## Signature® Floor Sessions 1-4

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Long Beach Convention Center • Room 103A  
300 E. Ocean Blvd. • Long Beach, CA 90802

### Session 1 – PREMIER

Thursday, February 4 • 6:00 PM PT • Lots 3001-3485

### Session 2

Friday, February 5 • 1:00 PM PT • Lots 3501-4048

### Session 3

Friday, February 5 • 6:00 PM PT • Lots 4049-4497

## Signature® Internet Session 4

(HERITAGELive!®, Internet, Fax, & Mail only Session)

### Session 4

Sunday, February 7 • 3:00 PM CT • Lots 7001-7998

## LOT SETTLEMENT AND PICK-UP

Friday, February 5 • 10:00 AM – 1:00 PM PT

Saturday, February 6 • 9:00 AM – 12:00 PM PT

Extended Payment Terms available. Email: [Credit@HA.com](mailto:Credit@HA.com)

Lots are sold at an approximate rate of 200 lots per hour, but it is not uncommon to sell 150 lots or 250 lots in any given hour.

**This auction is subject to a 17.5% Buyer's Premium.**

## BIDDING METHODS

### HERITAGE Live!®<sup>1</sup> Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at [HA.com/Live](http://HA.com/Live)

### Live Floor Bidding

Bid in person during the floor sessions.

### Live Telephone Bidding (floor sessions only)

Phone bidding must be arranged on or before Wednesday, February 3, by 12:00 PM CT.

Client Service: 866-835-3243

### Internet Absentee Bidding

Proxy bidding ends one hour prior to the session start time.

Live Proxy bidding continues through the session.

[HA.com/1232](http://HA.com/1232)

### Fax Bidding

Fax bids must be received on or before Wednesday, February 3, by 12:00 PM CT. Fax: 214-409-1425

### Mail Bidding

Mail bids must be received on or before Wednesday, February 3.

# HERITAGE AUCTIONS

HA.com

Dear Bidder,

Welcome to Heritage's February, 2016 Long Beach Signature auction! Once again, we take great pride in being the official auctioneer at the Long Beach Expo, and it is our pleasure to invite you to our West Coast season-opening show, hot on the heels of the \$50+ million dollar FUN event in Tampa.

Every Long Beach Expo is an adventure of numismatic insight, history, and camaraderie in addition to the fast-paced buying and selling. We hope you will avail yourself to the many educational opportunities presented there, as well as attending our Signature auction in person.

Our auction Sessions start with a resounding "bang" when 485 lots go to the highest bidders in an exciting Premier Session on Thursday evening, February 4. Highlights include high-value lots from many consignors, including three Long Beach Signature Featured Collections that deserve special mention:

## **SELECTIONS FROM THE BOB R. SIMPSON COLLECTION**

We are very pleased to present additional selections from the Bob R. Simpson Collection. As the co-owner of the Texas Rangers baseball team and a lifelong Texas energy executive, Mr. Simpson has always found time to spend with his unrelenting passion for rare coins.

The Premier Session includes four lots from the incomparable Simpson Collection, including:

- A fantastic, nine-piece proof set from 1856 graded PR64 to PR67, all PCGS Secure with CAC endorsement, to be offered as a single lot at the end of the Premier Session.
- The second-finest known 1943-S cent struck on a bronze planchet, AU58 PCGS Secure. CAC.
- An 1876 gold dollar, MS66+ PCGS. CAC. Virtually unimprovable as a circulation strike.
- A famous "Little Orphan Annie" 1844 Seated Liberty dime, MS66 PCGS Secure. CAC, looking for a new home.

Mr. Simpson gains particular pleasure watching his coins go into the hands of other collectors. There, he knows they will be equally cared-for and appreciated by their new owner(s) for their numismatic significance and beauty – as they have been while in the Simpson Collection.

## **SELECTIONS FROM THE OXBOW COLLECTION**

An exquisite group of proof gold dollars makes up The Oxbow Collection. Each coin was painstakingly selected for eye appeal and technical superiority, most with Cameo or Ultra Cameo characteristics. The 1858, 1863, 1866, 1876, 1879, 1880, and 1881 gold dollars in proof format are represented.

## **THE PERFECTION 1 & 2 COLLECTIONS, PART 2**

The Long Beach Expo includes the second installment of this high-grade collection of both proof and Mint State Indian cents, which were strongly received in the first installment at the FUN event last month. Our consignor (we call him "Mr. Perfection") assembled this set with the utmost care, desiring all of his coins to be strong or finest for the grade. By focusing on CAC-approved coins, series collectors can be assured the distinction is especially meaningful for full Red and Red and Brown Indian cents in the highest grades, where CAC populations are very low. Registry Set enthusiasts and advanced collectors of the Indian Head series will want to view every coin in this exceptional collection.

In total, 140 individual consignors have consigned a total of 2,480 lots to our Long Beach Signature sale, including nearly 1,000 lots to be auctioned in our Online Signature Session to be held on Sunday, February 7 following the event.

Bidding is simple before the auction and instantaneous during the sale, wherever you are in the world. Prior to the auction, we accept bids through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding and online bids with HERITAGE Live!® (our proprietary, award-winning online platform). Of course, if you are attending Long Beach in person we encourage you to stop by our booth on the Bourse, view the lots on-site, participate "live" from the auction floor.

The Long Beach Expo never disappoints, and we wish you the best of luck with your bids.

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

# SESSION ONE

## COLONIALS

1662 Oak Tree Twopence, Choice XF  
Small 2, Noe-30, W-240

- 3001** 1662 Oak Tree Twopence, Small 2, XF45 PCGS. Noe-30, W-240, Salmon 1-A, R.4. A deep silver-gray representative with pleasing sharpness, especially on the tree. The reverse centering is nearly ideal. The obverse appears moderately off center toward 7:30, due to requisite mint clips that leave N MAS tight against the edge. The base of the trunk is slightly raised, and an indistinct area beneath the 2 displays thin marks. Listed on page 38 of the 2016 *Guide Book*. NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

1662 Oak Tree Twopence, MS63  
Noe-29, Small 2, Noe Plate Coin  
Ex: Brand, Wurtzbach, Clarke, Boyd, Partrick

- 3002** 1662 Oak Tree Twopence, Small 2, MS63 NGC. CAC. Noe-29, W-240, Salmon 1-A, R.4. 11.9 gn. The plate coin in Noe's ANS standard reference *The Oak Tree Coinage of Massachusetts*. It was also a plate coin in Carl Wurtzbach's 1937 publication, a "limited edition leather bound set of black and white photographic plates of his collection," as described in the Ford catalog, Part XII. The tail on the 2 in the date is a stub, diagnostic for Noe-29. All Oak Tree twopence were coined from the same die pair. Noe-29, 30, and 31 are identified by die breaks on the 2, which is small and distant from 166. The 2 was then re-engraved on the die, larger and closer, to make the Noe-32, 33, and 34 varieties. This well-preserved gunmetal-gray example has a fully struck tree, date, and denomination. All letters are completely present, despite moderate obverse misalignment toward 7 o'clock. Listed on page 38 of the 2016 *Guide Book*.  
Ex: Virgil Brand, Carl Wurtzbach, T. James Clarke, F.C.C. Boyd; 60th Public Auction Sale (New Netherlands, 12/1968), lot 206; Donald Groves Partrick Collection (Heritage, 1/2015), lot 5556. NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

1652 Oak Tree Shilling, MS64  
Finest Known Noe-3, AN DO

1652 Oak Tree Shilling, AU53  
Noe-13.3, Rare Intermediate Die State  
Ex: Norweb, Hain Family, Partrick

**3003** 1652 Oak Tree Shilling, AN DO, MS64 NGC. Noe-3, W-450, Salmon 1-C, R.6. 72.2 gn. The present lot was the finest among the three examples of the rare Noe-3 variety from the Ford Collection. An impressive oval-shaped example that displays AN DO instead of the usual AN DOM, this Oak Tree shilling is toned medium sea-green and caramel-gold with shimmering luster and pleasing surfaces. The tree, date, and denomination are bold, as are most of the peripheral letters. DO is weak due to the die state, and a planchet wave near the edge causes softness on HV. The obverse is slightly misaligned toward 12 o'clock with the tops of MASAT incomplete. The reverse is moderately misaligned toward 3:30, affecting portions of WEN. Listed on page 39 of the 2016 *Guide Book*.  
Ex: F.C.C. Boyd Collection; John J. Ford, Jr. Collection, Part XII (Stack's, 10/2005), lot 18; Donald Groves Partrick. NGC ID# 2ARN, PCGS# 20

**3004** 1652 Oak Tree Shilling, IN at Bottom, AU53 NGC. CAC. Noe-13.3, W-520, Salmon 10-G, R.6. 70.9 gn. IN at Bottom. Along with Noe-13.6, this is one of the two intermediate die states of Noe-13. Both were first detailed in 1959 by Eric P. Newman. Die buckling on the central obverse distinguishes Noe-13.3 from Noe-13. The lack of "spines" on the tree, and the shape of the first and second S, separate Noe-13.3 from Noe-13.6. The present chocolate-brown Noe-13.3 shilling has full legends, although NEW and the final S are lightly impressed. No marks are remotely consequential. Minor granularity on the central reverse is as made from die erosion. The eye appeal is excellent, and obtaining a finer example would prove to be a Herculean task. Listed on page 39 of the 2016 *Guide Book*.  
Ex: New Netherlands, 1956; Norweb Collection, Part I (Bowers and Merena, 10/1987), lot 1171; Hain Family Collection (Stack's, 1/2002), lot 45; Donald Groves Partrick Collection (Heritage, 1/2015), lot 5541. NGC ID# 2ARL, PCGS# 45362 Base PCGS# 20

---

1652 Pine Tree Shilling, MS65  
Large Planchet, No Pellets, Noe-4  
Ex: F.C.C. Boyd, Ford, Partrick

**3005** 1652 Pine Tree Shilling, Large Planchet, Reversed N, MS65 NGC. Noe-4, W-720, Salmon 4-D, R.4. 72.6 gn. No Pellets at Trunk. Reversed N in IN. First N reversed in ENGLAND. Noted in the Ford catalog as "on a par for technical grade with both Uncirculated Hain coins (ex: Roper and ex: Norweb) and far nicer than Picker's. ... The top of the reverse seems scraped but this is actually a result of the piece going through the roller dies, elongating the letters in AND and the dots in the outer beaded border above them. Struck from the broken state of the reverse with die breaks forming in the left reverse field." The field break somewhat resembles a narrow cauldron with flames flickering from the top. The break lacks the unified upper "tail" found on the late die state Noe-4.5. The "stretching" of upper obverse or reverse design elements is encountered fairly often on Large Planchet Pine Tree shillings, and helps make each piece unique, along with other characteristics such as the irregular diameters and degree of "S" shaped wave.

The present Gem is a magnificent example. The walnut-brown, dove-gray, and jade-green surfaces shimmer with luster and are devoid of remotely mentionable detractors. The centers retain the central horizontal wave characteristic of rocker press emission. The strike is crisp across all design elements, although portions of MAS and the N and W in NEW lack their tops due to a Boston Mint straight clip. Among the finest Noe-4 shillings, and a desirable contribution to either a variety or type set of Massachusetts silver. Listed on page 39 of the 2016 *Guide Book*.

Ex: F.C.C. Boyd Collection; John J. Ford, Jr. Collection, Part XII (*Stack's*, 10/2005), lot 84; Donald Groves Partrick Collection (*Heritage*, 1/2015), lot 5571, which realized \$49,350. NGC ID# 2ARX, PCGS# 45372 Base PCGS# 23

**1779 Rhode Island Ship Medal, XF45  
No Wreath, W-1735  
Very Rare Pewter Striking**

- 3006** 1779 Rhode Island Ship Token, No Wreath, Pewter, XF45 NGC. Betts-562, W-1735, High R.7. The Rhode Island Ship tokens were British propaganda medals intended to convince the Dutch to stay out of the Revolutionary War. The design extols the British victory in the 1778 Battle of Rhode Island. The first medals struck (Betts-561) included the legend VLUGTENDE, a misspelling of the Dutch word (vluchtende) for fleeing, but since that could be interpreted that the Redcoats fled instead of the Yanks, the offending word was scraped by hand from the struck medals (Betts-562). Later, the obverse die was modified, replacing VLUGTENDE with a wreath (Betts-563). The supermajority of Betts-562 medals were struck in brass or copper. Pewter survivors are very rare, and the present lot is the sole example certified at NGC (1/16). The silver-gray surfaces display moderate wear and a few unobtrusive thin reverse field marks between the upper left ships. Some peripheral obverse spotting is noted near DE, van, and HOWE. Listed on page 50 of the 2016 *Guide Book*. PCGS# 586

**1776 Continental Dollar, Pewter  
Newman 1-C, Poor / Fair Details**

- 3007** 1776 Continental Dollar, CURRENCY, Pewter — Damage — PCGS Genuine. Poor / Fair Details. Newman 1-C, W-8445, R.3. Those in search of an entry-level Continental dollar need look no further. The cream-gray surfaces are slightly wavy, and a thin, dull horizontal scratch passes through the E in CURRENCY. But there is no evidence of corrosion and no other relevant marks. Many letters in the obverse legends are apparent, as are most of the letters in AMERICAN CONGRESS and WE ARE ONE. NGC ID# 2AYN, PCGS# 791

**1787 Fugio Cent, MS64 Red and Brown  
Popular N. 13-X, W-6855**

- 3008** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, N. 13-X, W-6855, R.2, MS64 Red and Brown PCGS. CAC. The N. 13-X variant of the Fugio cent is an available issue, quite popular for type purposes. In 1948, a hoard of 726 pieces was still intact in the Bank of New York. This pleasing surfaces of this attractive Choice example show a mix of olive-brown and original red patina, with well-detailed design elements and just a touch of granularity on the lower obverse. Listed on page 87 of the 2016 *Guide Book*. Population: 25 in 64 (1 in 64+) Red and Brown, 7 finer (1/16). NGC ID# 2B8E, PCGS# 884

**1787 Fugio Cent, MS65 Red and Brown  
4 Cinquefoils, Pointed Rays, N. 13-X, W-6855**

- 3009** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, N. 13-X, W-6855, R.2, MS65 Red and Brown PCGS. Coined in New Haven, Connecticut, the Fugio coppers were the first coins issued by authority of the United States. This remarkable Gem offers smooth chocolate-brown surfaces with a few hints of original red and just a touch of granularity at the lower left peripheries. The design elements are sharply impressed and some interesting clash marks show on the obverse. Listed on page 87 of the 2016 *Guide Book*. Population: 7 in 65 Red and Brown, 0 finer (1/16). NGC ID# 2B8E, PCGS# 884

1783 Chalmers Threepence, AU50  
W-1760, Sole Dies for Denomination

**3010** 1783 Chalmers Threepence AU50 PCGS. CAC. Breen-1018, W-1760, R.5. Ex: Newman. 10.8 grains, 94% silver, 5% copper, per NGC metallurgical tests. In 1783, John Chalmers of Annapolis issued silver threepence, sixpence, and shillings to reduce the extent of clipped and worn-out Spanish-American silver in circulation. The threepence are rarer than the Long and Short Worm shillings that typically represent the maker in Early American type sets. This example has splendid pewter-gray fields and silver-white devices. The strike is moderately off center toward 1:30 but the legends are complete. Listed on page 51 of the 2016 *Guide Book*.

Ex: Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part V (*Heritage*, 11/2014, as NGC AU50), lot 3004. NGC ID# 2AUP, PCGS# 592

HALF CENTS

1793 Flowing Hair Half Cent, VF25  
Popular C-1, B-1 First-Year Issue

**3011** 1793 C-1, B-1, High R.3, VF25 NGC. CAC. Both Roger Cohen and Walter Breen assigned variety number one to this die marriage, correctly identifying it as the first of four 1793 half cent varieties coined at the Philadelphia Mint. Many type collectors seek only first year of issue coins, and it is important, wherever possible, for those collectors to also seek the first variety of the first year. In this case, it is also the first variety of the denomination.

This lovely two-tone specimen exhibits light tan devices with deeper steel-brown field toning. The surfaces are pleasing with no marks of consequence. Our EAC grade Fine 15. NGC ID# 2222, PCGS# 35003 Base PCGS# 1000

1795 Half Cent, MS64 Brown  
No Pole, Plain Edge, C-6a

- 3012** 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6c, R.2, MS64 Brown NGC. An outstanding Choice Liberty Cap type coin. The chocolate-brown fields and high points are uncommonly void of imperfections. Faded mint red outlines design elements. The strike is consistent aside from softness on the dentils near the date and STATES OF. Struck over a rolled-out Talbot, Allum & Lee token, as were most Cohen-6 half cents. Traces of the undertype, including the ship and rigging, are evident across the upper reverse, and portions of the LIB in LIBERTY from the token are apparent near 9 o'clock on the obverse. Our EAC grade AU55. NGC ID# 2225, PCGS# 35089 Base PCGS# 1018

## LARGE CENTS

1793 Wreath Cent, XF40  
Attractive Lettered Edge, S-11c Example

- 3013** 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3, XF40 PCGS. Breen Die State I, with no clash marks and a faint ridge from O in ONE to T in CENT. Three separate subvarieties of the 1793 Wreath cent were struck using the same obverse and reverse dies, with different edge treatments (S-11a, S-11b, and S-11c). The S-11c edge reads ONE HUNDRED FOR A DOLLAR, with a single leaf cluster after DOLLAR. This edge lettering was continued on the Liberty Cap series. Students of the series believe these were the last Wreath cents struck, in early July of 1793.

This attractive XF specimen offers smooth olive-brown surfaces on a slightly oblong planchet, with strongly impressed design elements that show just a touch of wear on the high points of the hair and back of the temple. Some minor rim dents show on the edge. The overall presentation is most appealing. Our EAC grade VF30. NGC ID# 223J, PCGS# 35477 Base PCGS# 1350

1794 Liberty Cap Cent, XF45  
S-57, B-55, 'Button on Cap' Variety

- 3014** 1794 Head of 1794, S-57, B-55, R.1, XF45 NGC. Breen Die State IV, with a thin die crack in the lower "trench" from the lips to the rim. The famous "Button on Cap" variety. This pleasing Choice XF specimen offers lightly abraded chocolate-brown surfaces that show a few areas of granularity on the reverse. The design elements exhibit only light wear, but show some shallow detail, due to lapping. Our EAC grade VF20. NGC ID# 223P, PCGS# 35633 Base PCGS# 901374

1794 Large Cent, MS64+ Brown  
Head of 1795, S-67, B-59

- 3015** 1794 Head of 1795, S-67, B-59, R.3, MS64+ Brown PCGS. Breen's Die State III, multiple clash marks appear on the obverse, with a faint die crack across the tops of the RTY in LIBERTY. Faint clash marks are also noted on the reverse.
- This piece represents the "Head of 1795" or "Gardner's First Head," the latter Breen's usage. He attributed the design to assistant Mint engraver John Smith Gardner. Sheldon's varieties 67 through 72 are considered Head of 1795 varieties. For *Guide Book* collectors, variety 67 is the most plentiful in high grades, although the Noyes Census only lists 20 examples in AU or better for the six Sheldon numbers, combined.
- On this well-preserved piece, recorded as sixth finest in the Noyes Census, both the chips out of the hair and the diagnostic die clashes before the profile are clearly visible. Del Bland grades this specimen AU50, and it appears with three others in a fifth place tie at [1794largecents.com](http://1794largecents.com). Lustrous surfaces are medium-brown with considerable violet overtones and the faintest hints of cinnamon-orange at the right obverse and reverse. A trivial obverse rim bruise at 9:30 confirms the provenance. Though a handful of tiny nicks and wispy flaws preclude a finer grade, this coin offers great all-around visual appeal. Our EAC grade AU50.
- Ex: *Stack's* (3/1959); *Frank H. Masters, Jr.* (RARCOA, 5/1971), lot 79. NGC ID# 223R, PCGS# 35684 Base PCGS# 1365

## PROOF FLYING EAGLE CENTS

1856 Flying Eagle Cent, PR64  
Snow-1, Tilted ONE CENT

- 3016 1856 Snow-1 PR64 NGC.** Eagle Eye Photo Seal, no card included. ONE CENT is tilted relative to the wreath, diagnostic for this rare 1856 die variety. The dies are moderately rotated, also characteristic of Snow-1. The uniform tan-brown color provides further confirmation of the variety. Rick Snow (2014) states “only ten examples are presently known” in copper-nickel, with one other confirmed in copper. Snow also writes, “the probable prototype striking of the first small cents,” prior to Snow-3. A fully struck Choice proof with unabraded matte surfaces. The reverse exhibits a partial wire rim. Free from any spots or planchet detractors. Outstanding quality for the designated grade. PCGS# 148710 Base PCGS# 2037

1856 Flying Eagle Cent, PR65  
Snow-3, Eagle Eye Photo Seal

- 3017 1856 Snow-3 PR65 NGC.** Eagle Eye Photo Seal, card not included. Although designated as a proof by NGC, Snow-3 is the die pair most often associated with the 634 pieces struck in 1856 for distribution to Washington officials. Those coins were business strikes. True proofs from Snow-3 dies are known but are considered very rare. A majority of Snow-3 cents show evidence of circulation, but the present satiny example is mark-free, fully struck, and devoid of carbon. A trace of flan granularity, as made, is noted near the eagle's head and wingtip. Both sides display a partial wire rim. An outstanding Gem that would provide the cornerstone of any collection of small cents. NGC ID# 227A, PCGS# 47058 Base PCGS# 2037

1857 Flying Eagle Cent, PR64 Cameo  
Snow-PR2, Type of 1856

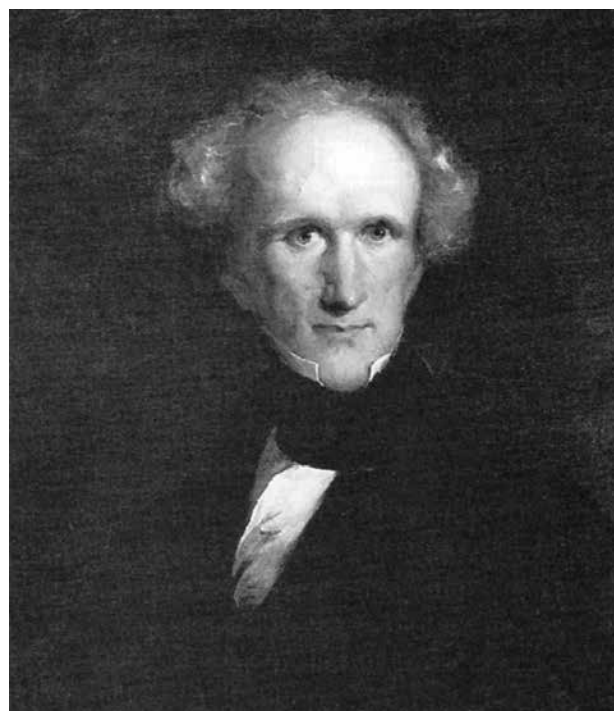

- 3018** 1857 Flying Eagle PR64 Cameo PCGS. CAC. Snow-PR2. The Snow-PR1 and -PR2 dies are known as the Style of 1856 for their “boxy” obverse letters, most obviously the interior of the O in OF, which is rather squared-off rather than round as on the Style of 1857 dies. Snow writes that these dies were probably produced from the same undated hubs as the 1856 Flying Eagle cents but dated 1857, and may thus be the “first regular issue small cents.” These proofs are rare, and Cameo examples such as this near-Gem PCGS example far rarer still. The surfaces here show much blond-tan color with daubs of orange and lilac in the fields. There are no mentionable die cracks, marking this as a strike from early-stage dies. The squared-off rims, needle-sharp detail throughout both sides are every bit as expected from this attractive and high-end proof, which also shows contrast in abundance between fields and devices. Population: 10 in 64 (1 in 64+) Cameo, 5 finer. CAC: 3 in 64 Cameo, 4 finer (1/16). NGC ID# 2Z23, PCGS# 82040

INDIAN CENTS

1860 Indian Cent, MS65  
Scarcer Pointed Bust Type

- 3019** 1860 Pointed Bust MS65 PCGS. CAC. FS-401. Ex: Perfection 1. An impressive Gem example of this early copper-nickel issue that features the scarcer Pointed Bust motif. The design elements are sharply detailed and the lustrous copper-red surfaces show just a few minor signs of contact. Only nine coins have been verified by CAC in MS65, with four finer (1/16). Population: 37 in 65 (1 in 65+), 12 finer (1/16).  
From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 227E, PCGS# 2056

Engraver James B. Longacre

**1862 Indian Cent, Immaculate MS67**  
**Sole Example of the Date at CAC**  
**Among Five CAC Superb Gems for the Type**

**3020 1862 MS67 PCGS. CAC. Ex: Perfection 1.** An incredible example of this copper-nickel Indian cent issue in the Superb Gem grade from PCGS, one of only a dozen such submissions (likely not all *separate coins*) seen at that service. Among the five copper-nickel dates 1860-64 inclusive, PCGS has seen 38 submissions in MS67 — nine of the 1860, and a dozen each of the 1862 and 1863. Only a single example of the 1861 has ever achieved the vaunted MS68 level at PCGS.

This MS67 1862 cent shows the expected but still amazing immaculate preservation on golden-tan surfaces thickly coated with lavish luster. A small tick on the first upright of U(NITED) is completely in accord with the grade. This piece is further separated from its small cohort by the CAC approval — this so far is the sole CAC-approved example of the 1862 date in this grade. For the copper-nickel type, CAC has also certified one 1860 and three 1861s in MS67, a total of five in all (1/16).

*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 227H, PCGS# 2064

**1864 L on Ribbon Cent, MS65+ Red**  
**Snow-4, Repunched Date**

**3021 1864 L On Ribbon, FS-2303, Snow-4, Repunched Date, MS65+ Red PCGS. CAC. Ex: Perfection 1.** The 1864 L on Ribbon cent is seldom seen in Gem condition and rarely finer. This Plus-graded Red coin is one of five Gems with CAC-approval and none are finer (12/15). Bold repunching on the date identifies the popular Snow-4 variety. The strike is well-executed, and the softly frosted surfaces yield warm amber-red and coppery-gold coloration. Population: 35 in 65 (2 in 65+) Red, 4 finer (12/15). *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 227M, PCGS# 2081

**1866 Indian Cent, Splendid MS66 Red**  
**Ex: Joshua and Ally Walsh**

- 3022 1866 MS66 Red PCGS. CAC.** Ex: Joshua and Ally Walsh. The 1866 date is among the most famous and elusive early issues in the Indian Head series, one seldom seen with aesthetic qualities even remotely approaching the present Premium Gem Red PCGS example. Most survivors of this issue appear in well-worn condition. The obverse of this splendid coin is sandy tan-gold, while the reverse deepens to orange-gold and blazing fire-red. A great strike and excellent preservation complete the broad eye appeal. PCGS reports only six in MS66 Red and none finer; at CAC, this piece is among only two in this grade with none finer (1/16).  
*Ex: Joshua and Ally Walsh Collection (Heritage, 1/2006), lot 3050; Joseph C. Thomas Collection / Central States Signature (Heritage, 4-5/2009), lot 2069; Philadelphia Signature (Heritage, 8/2012), lot 5032, which brought \$17,625.*  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 227P, PCGS# 2087*

**1867/67 Indian Cent, Snow-1, MS64+ Red**  
**Finest at PCGS, Sole CAC Red Example**

- 3023 1867/67 Snow-1, FS-301, MS64+ Red PCGS. CAC.** Ex: Perfection 1. Repunching in the date is blatant on the last two digits, showing underdigits that rise above the final punches but more prominently on the 7. Snow suggests in his latest magnum opus that the "initial 7 may be either a small 7 or a deformed regular size 7." The surfaces of this MS64+ Red PCGS-CAC piece are highly lustrous with blond-gold color prevailing amid glints of light orange. Some hazy gray above the feather tips and left of OF may be the remains of an old fingerprint but is not overt and fails to detract from the broad eye appeal. Two dark flecks show between the Indian's neck and the U of UNITED.

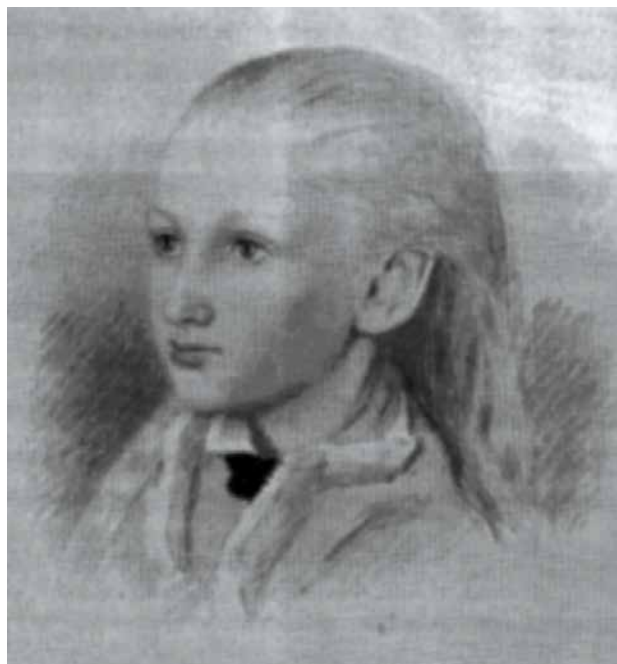

This coin is from the later Snow-1b die state, showing light die rust lumps on the cheek before the lowest curl, and a light die crack connecting the fletchings on the reverse with the left ribbon tip. This piece is also the plate coin for the variety on PCGS's CoinFacts website.

The Snow-1 Repunched Date is popular as one of the most blatant "naked-eye" varieties in the entire Indian Cent series. The present piece is exceptional not only for the high technical quality but for the well-within-Red color as well; Snow points out that most examples, even Mint State ones, appear on planchets exhibiting "streaky woodgrain toning" that instantly disqualifies the coins from being able to grade full Red. This piece is not only the sole finest Red piece certified by PCGS (by the Plus margin), but it is also the sole Red example of the variety at CAC in any grade (1/16).  
*Ex: Teich Family Collection / FUN Signature (Heritage, 1/2013), lot 3042, as MS64 Red PCGS-CAC, which brought \$15,275.*  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 227R, PCGS# 37461 Base PCGS# 92090*

**1869 Indian Cent, MS66 Red and Brown  
Exceptional Registry Set Candidate**

- 3024 1869 MS66 Red and Brown PCGS. CAC. Ex: Perfection 1.** A delightful Premium Gem example, with razor-sharp definition on all design elements and impeccably preserved, mostly red surfaces that have mellowed to light brown in some areas. Terrific eye appeal complements the high technical grade. Only two coins have been verified by CAC in MS66 Red and Brown, with none finer (1/16). Population: 6 in 66 Red and Brown, 0 finer (1/16). From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 227T, PCGS# 2095

Sarah Longacre, alleged model for  
her father's Indian cent design

**1871 Indian Cent, Elusive MS65 Red  
Tied for Finest at CAC**

- 3025 1871 MS65 Red PCGS. CAC. Ex: Perfection 1.** Bold N reverse, as usually seen. The 1871 Indian cent date is an elusive one, one of the rarest dates in the series due to the unusual machinations surrounding the Mint Act of 1871. This MS65 Red PCGS-CAC example is a standout coin, one of only 17 such submissions at PCGS and surpassed by only two in MS66 Red. Factoring in the CAC green approval sticker makes this piece one of only two in this grade at CAC, and none are finer in this color designation (CAC also has approved one MS66 Brown coin) (1/16).

The surfaces on this piece are far finer than usual, showing attractive golden-orange patina with glints of lilac on some of the high points, all well within the Red context. A small, curved scrape appears in the obverse field above the third feather and a tiny dark fleck near the rim at 9 o'clock. A wispy die crack runs from the top of the E in UNITED to that same area. A small tick shows on the high point of the cheek, but none of these are overly distracting. The strike is quite sharp throughout both sides, also unusual for this date. For a date that is usually found well-circulated or with subpar surfaces, this coin is simply among the finest that any collector could hope to obtain of this difficult date. From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 227V, PCGS# 2102

---

1873 Open 3 Cent, Richly Lustrous MS65 Red

- 3026 1873 Open 3 MS65 Red PCGS. CAC.** Ex: Perfection 1. Overall, the Open 3 1873 Indian cent is more plentiful than its Closed 3 counterpart, but both variants are rare in Gem Red condition. This piece is one of four CAC-endorsed coins in this grade with none finer (12/15). The strike is bold, and the frosty, beautifully preserved surfaces yield rich coppery-orange and fire-red hues. Eye appeal is outstanding. Population: 21 in 65 Red, 5 finer (12/15). *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 227Y, PCGS# 2108

---

1873 Closed 3 Cent, MS66 Red  
Top-Notch Eye Appeal

- 3027 1873 Closed 3 MS66 Red PCGS.** PCGS reports only six examples in the Premium Gem Red grade of this piece although, amazingly, there is one MS67 Red finer (1/16). The golden-blond surfaces boast effulgent luster throughout both sides and excellent preservation. A single small fleck before the Indian's nose is undistracting, and a small mark through the C of CENT down to the wreath is noted. The eye appeal is nonetheless top-notch, with the overall high surface quality more than compensating. Offerings of this issue in so high a grade are infrequent; the last two pieces we handled were in 2009 and 2015, respectively, bringing \$16,100 and \$16,450 — the latter also with CAC approval. NGC ID# 227X, PCGS# 2111

---

1875 Cent, Exceptional MS65 Red

- 3028 1875 MS65 Red PCGS. CAC.** Ex: Perfection 1. CAC has endorsed this one coin in MS65 Red and only a single piece finer (12/15). Even non-CAC examples are rare this well-preserved. This 1875 cent boasts vibrant coppery-orange luster and rich eye appeal. The strike is sharp, and there are no bothersome specks. Faint clash marks from the lower wreath are seen above Liberty's head. Population: 34 in 65 (1 in 65+) Red, 6 finer (12/15). *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 2282, PCGS# 2123

---

1877 Indian Cent, MS65 Red and Brown  
Among the Finest So Graded at CAC

- 3029 1877 MS65 Red and Brown PCGS. CAC. Snow-2.** Ex: Perfection 1. This key-date 1877 Indian cent, must be considered among the few finest available examples of this issue, which sees ceaseless collector demand. Although PCGS reports 69 in MS65 (one MS65+) Red and Brown with four MS66 finer, the addition of the CAC sticker brings the total population (both services) at CAC down to 14 in MS65 Red and Brown with none finer in that color designation (1/16).

This piece is also among the few finest obtainable in terms of its inherent aesthetics. The surfaces show a base of light golden-blond patina with intermingled golden-orange, ceding to occasional brown and lilac only on some of the device high-points. The surfaces reveal no carbon or mentionable marks and are well within the Red end of the Red and Brown designation.

*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 2284, PCGS# 2128

---

1879 Indian Cent, MS66 Red  
Among the Finest CAC-Approved

---

1883 Indian Cent, Needle-Sharp MS67 Red  
Blazing Luster and Color

**3030 1879 MS66 Red PCGS. CAC. Ex: Perfection 1.** The 1879 is among the more available Indian cent issues of the 1870s, but high-end Red examples are in a class separate from the bulk of survivors. In MS66 Red, this issue is genuinely rare, and finer pieces are prohibitively so. The present coin is one of only four Premium Gem Red specimens carrying a CAC endorsement (12/15). The strike is razor-sharp, and the satiny surfaces yield coppery-gold and peach-orange luster with occasional hints of lilac and mint-green. A spindly die crack stretches from the 8 in the date, across Liberty's face, to the second T in STATES. Population: 17 in 66 Red, 3 finer (12/15). *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 2286, PCGS# 2135

**3031 1883 MS67 Red PCGS. CAC. Ex: Perfection 1.** Blazing luster and fire-red patina lights up the surfaces of this Superb Gem Red 1883 cent with certification by PCGS and CAC approval. The 1883 date (like virtually all Indian cent issues, save for a few of the late-1890s/early 1900s dates) is elusive in the MS67 Red grade level; PCGS reports only six in this grade, and CAC has given the approval to four in MS67 Red (which of course could include NGC as well as PCGS coins) (1/16). This piece is unusual in that it boasts a needle-sharp strike all the way up to the feather tips, even on the forward feathers, as well as four diamonds on the ribbon, individual beads on the necklace, and a full strike as well on all reverse details. This coin could form a wonderful acquisition for a type or date set. *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 228A, PCGS# 2147

1886 Type One Cent, Blazing MS66+ Red  
Sole Finest at PCGS

- 3032 1886 Type One MS66+ Red PCGS. Although the easiest pickup point for the Type One is the feather pointing between IC rather than CA as on the Type Two, the reality is that Mint Engraver Charles Barber undertook a subtle redesign of the entire obverse master hub to create the “variety” — which is technically a different type. The design is shallower in relief and narrower. The Type One pieces are seen more often but quite seldom with full Red surfaces, and certainly not in the state of preservation seen here. The prevailing blazing orange cedes to momentary pale blue, fire-red, and grayish on the top of the 6. Currently the sole finest at PCGS, making it a Registry Set essential. Population: 3 in 66 (1 in 66+) Red, 0 finer (1/16). NGC ID# 228D, PCGS# 2156

1886 Type Two Indian Cent, MS65 Red  
Appealing Orange-Gold Surfaces

- 3033 1886 Type Two MS65 Red PCGS. The 1886 Indian cent varieties, Type One and Type Two, were actually caused by a subtle but complete redesign of the entire obverse hub by Charles Barber, making the Type Two coins not only pointing their lowest feather between CA rather than IC but showing shallower relief. Only about 20% of the 1886 cents are of the Type Two style. This Gem Red example displays orange-gold surfaces with great luster and a few scattered brownish flecks that are of little consequence. A bit of grayish patina appears on some of the lower obverse devices but there is still a great deal of eye appeal present. Population: 9 in 65 (2 in 65+) Red, 5 finer (1/16). NGC ID# 228E, PCGS# 92156

**1888 Cent, Glowing MS66 Red  
Tied for Finest With CAC-Endorsement**

- 3034 1888 MS66 Red PCGS. CAC. Snow-5a, Repunched Date.** Ex: Perfection 1. One of the two MS66 Red coins that share the top spot in the CAC *Pop Report*. This high-end 1888 Indian cent is a major condition rarity, and its quality and eye appeal are remarkable even for this grade. Glistening, frosty luster illuminates warm coppery-orange surfaces that are free of distracting abrasions or spots. The third headdress feather is curiously weak — likely struck through grease on the die — while the remaining design is razor-sharp. Repunching on the final 88 in the date identifies the Snow-5a obverse. Full Red examples of this often-overlooked Indian cent issue are genuinely rare above the Gem grade level. Population: 14 in 66 (1 in 66+) Red, 1 finer (12/15).  
From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 228G, PCGS# 2168

**1889 Indian Cent, Pristine MS66 Red  
Tied for Finest at PCGS and CAC**

- 3035 1889 MS66 Red PCGS. CAC. Ex: Perfection 1.** This Premium Gem Red 1889 Indian cent is among only eight such submitted to PCGS, which has never certified a finer example of the issue. Most survivors of the 1889 show woodgrain toning that precludes a Red designation, or else they lack the pristine preservation required for an MS66 grade. This immaculate coin is blond-tan on both sides, well within the Red designation and showing top-notch eye appeal. This piece would make a fantastic representative for a top-flight type set. CAC has given its green approval sticker to only three coins in this top grade (1/16).  
From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 228H, PCGS# 2174

**1894 Indian Cent, Top Grade MS66 Red**

- 3036 1894 MS66 Red PCGS. CAC. Ex: Perfection 1.** This spectacular Premium Gem exhibits impeccably preserved original red surfaces that radiate vibrant mint luster on both sides. The design elements are sharply detailed and eye appeal is terrific. Only two coins have been verified by CAC in MS66 Red, with one finer (1/16). Population: 32 in 66 (2 in 66+) Red, 0 finer (1/16).  
From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 228N, PCGS# 2189

---

**1895 Cent, MS66+ Red  
Deep, Glowing Red Color**

- 3037 1895 MS66+ Red PCGS. CAC.** Ex: Perfection 1. An ideal Registry coin, Plus-graded by PCGS and endorsed by CAC; CAC has only stickered 13 1895 Indian cents in the MS66 Red numeric grade and one finer (12/15). This high-end example is boldly struck with thick, frosty luster that yields rich rose-orange and coppery-red hues. Eye appeal is outstanding. Population: 51 in 66 (5 in 66+) Red, 4 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 228P, PCGS# 2192

---

**1896 Indian Cent, MS66+ Red  
Seldom Seen Finer**

- 3038 1896 MS66+ Red PCGS.** The 1896 Indian cent is seldom encountered in high grade, with the Red designation. This high-end Premium Gem exhibits sharp definition on the feather tips and diamonds, with original red surfaces that show no mentionable distractions. Vibrant mint luster adds to the outstanding visual appeal. Population: 18 in 66 (3 in 66+) Red, 2 finer (1/16). NGC ID# 228R, PCGS# 2195

---

**1897 Cent, MS66 Red  
High-End and CAC-Endorsed**

- 3039 1897 MS66 Red PCGS. CAC.** Ex: Perfection 1. Full Red examples of the 1897 Indian cent become scarce in MS65 and are genuinely rare in MS66. This glowing, frosty example displays rich coppery-bronze luster with blushes of rose and peach in the centers. The upper headdress feathers and reverse wreath bow show the only mentionable strike weakness. CAC has endorsed four examples in this grade and one finer. Population: 18 in 66 (1 in 66+) Red, 3 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 342W, PCGS# 2198

---

**1897 Indian Cent, MS67 Red  
Strong Registry Set Contender**

- 3040 1897 MS67 Red PCGS.** From a substantial mintage of more than 50 million pieces, the 1897 Indian cent is an available issue in lower Mint State grades, but it is a prime condition rarity at the MS67 grade level, with the Red designation. Only five examples have been certified in MS67 Red, three at PCGS and two at NGC, with none finer (1/16).

The blazing original red surfaces of this spectacular Superb Gem are free of any mentionable distractions, with especially vibrant mint luster on both sides. The design elements are well-detailed, with sharp definition on the feather tips, but just a touch of softness on the diamonds. Eye appeal is outstanding. NGC ID# 342W, PCGS# 2198

1899 Cent, MS67 Red, Registry-Grade Blazer

- 3041 1899 MS67 Red PCGS. CAC. Ex: Perfection 1.** The 1899 Indian cent is a favorite type-coin issue, being moderately plentiful in Choice and Gem condition. However, in MS67 Red, this issue becomes a great rarity. CAC has endorsed only seven pieces in this grade and none finer (12/15). This glowing, coppery-gold and rose-orange Superb Gem is vibrantly lustrous and boldly struck. The surfaces are devoid of carbon spotting and bothersome abrasions, and the eye appeal is exceptional. A finer Indian Head type coin is difficult to imagine. Population: 18 in 67 (2 in 67+) Red, 2 finer (12/15).  
From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 228U, PCGS# 2204

1901 Indian Cent, MS66+ Red

- 3042 1901 MS66+ Red PCGS. CAC. Ex: Perfection 1.** Dually (and duly) recognized by both PCGS and CAC for its high-end quality at the Premium Gem level, this frosty 1901 cent lives up to its Perfection pedigree. The original Red color dominates slightly granular surfaces that capture light and return it as coruscating mint luster. The strike is sharp, with all of the motifs crisply defined except the upper right shield point, which shows minute blending. CAC reports 14 MS66 Red examples, with two finer. PCGS population: 69 in 66 (9 in 66+) Red, 4 finer (1/16).  
From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 228W, PCGS# 2210

1903 Cent, MS67 Red  
Sole Finest CAC-Approved  
Tied for Finest Certified

- 3043 1903 MS67 Red PCGS. CAC. Ex: Perfection 1.** A major condition rarity, tied with seven others as the finest at PCGS (12/15). This blazing Superb Gem 1903 Indian cent is also the only piece this fine with a CAC endorsement. The surfaces are almost flawlessly preserved, showing vibrant sun-orange luster with tinges of deep amber-red along the upper reverse border. There are no abrasions or bothersome carbon spotting. As is typical of the issue, slight strike weakness is seen on the top three headdress feathers and the reverse wreath bow. No 1903 Indian cents are certified finer than this paramount Registry coin.  
From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 228Y, PCGS# 2216

---

**1905 Indian Cent, Sumptuous MS66+ Red  
Tied for Finest at PCGS and CAC**

- 3044 1905 MS66+ Red PCGS. CAC.** One of the few finest survivors of this late-series issue, one with a high mintage exceeding 80 million coins. This magnificent orange-red MS66+ Red coin boasts splendid luster and a bold strike. Although it has been reencapsulated in a newest-generation PCGS holder and regraded MS66+ Red, it still bears the certification number of its former green-label holder. Population: 58 in 66 (6 in 66+) Red, 1 finer. CAC: 11 in 66, 0 finer (1/16).  
*Ex: ANA Signature (Heritage, 8/2015), lot 3197, as MS66 Red, which brought \$3,525. NGC ID# 2292, PCGS# 2222*

---

**1908-S Cent, MS66 Red  
Only One Coin Certified Finer**

- 3045 1908-S MS66 Red PCGS. CAC.** *Ex: Perfection 1.* This famously popular branch mint semikey is scarcely encountered in high-end Red grades, and only a single example is certified finer than this glistening Premium Gem. CAC has endorsed only seven coins in this grade and none finer (12/15). This piece displays satiny sun-gold luster without obvious carbon spotting or abrasions. Trivial strike weakness on the wreath bow and the upper headdress feathertips is consistent with the reputation of the 1908-S. Population: 46 in 66 (1 in 66+) Red, 1 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 2296, PCGS# 2234*

---

**1909 Indian Cent, MS66+ Red  
Outstanding Final-Year Type Coin**

- 3046 1909 MS66+ Red PCGS. CAC.** *Ex: Perfection 1.* The lustrous and undisturbed surfaces are predominantly orange-red but exhibit traces of olive-green. Marks are absent, and the occasional pinpoint fleck requires a lens to locate. The strike is good despite minor merging on Liberty's shoulder and the upper feathertips. CAC lists 52 examples as MS66 Red and only one finer as MS67. As of (1/16), PCGS has certified 19 as MS66+ Red with only 11 finer.  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 2297, PCGS# 2237*

---

**PROOF INDIAN CENTS**

---

**1859 Indian Head Cent, PR67  
Sole Finest at PCGS, CAC  
Important Registry Opportunity**

- 3047 1859 PR67 PCGS. CAC.** *Ex: Perfection 2.* This 1859 Indian Head cent proof offering is numismatically significant for a variety of reasons. The Longacre-designed Indian Head cent was introduced in 1859 to the delight of collectors. Anticipating high demand, the Mint struck 800 proofs. The year 1859 was only the second one in which proofs were made available to the general public, and the Mint was apparently overly optimistic. Rick Snow writes: "Judging by the remaining examples extant today, it seems that no more than half the mintage was sold." In addition to its status as a first-year issue, the 1859 is also a one-year type, as the Laurel Wreath reverse was replaced by an oak wreath and shield in 1860.

Splendid amber-gold surfaces are smooth and satiny with unsurprisingly full definition on the design elements. A faint woodgrain pattern appears over the reverse, attesting to the originality of this Superb Gem proof cent. This is the first time we have offered this PR67 PCGS representative, the sole finest 1859 proof at that service. It is tied with two other such submissions at NGC, and is the only CAC-approved example at that grade level with none finer (1/16). The importance of this offering for the Registry collector cannot be overstated.

*Ex: ANA World's Fair of Money Auction (Stack's Bowers, 8/2011), lot 7202.*

*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 2299, PCGS# 2247*

1861 Indian Cent, PR65  
Seldom Seen This Fine

- 3048 1861 PR65 PCGS. CAC.** Ex: Perfection 2. A lovely copper-nickel proof Indian cent in seldom-seen Gem condition. This 1861 is boldly struck with reflective fields and warm bronze-orange color. Eye appeal is excellent. CAC has endorsed only six non-Cameo Gems and two finer (12/15). The 1861 proof Indian cent had a recorded mintage of 1,000 pieces, but significantly fewer survivors are known today. PCGS and NGC combined list only 229 coins across all grades, including a likely number of resubmissions. The issue is a genuine rarity in Gem condition and is exceedingly elusive any finer. Population: 23 in 65 (1 in 65+), 3 finer (12/15). *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 229B, PCGS# 2256

1863 Cent, PR66 Cameo  
Rarely Seen Contrast

- 3049 1863 PR66 Cameo PCGS. CAC.** Ex: Perfection 2. Compared to the 1860 and '61 proofs, the 1863 proof Indian cent is fairly plentiful and is a favorite for type purposes — this despite a low recorded mintage of 460 pieces. Nonetheless, the issue is rare as a Cameo and is almost unknown in Deep Cameo. This Premium Gem boasts stark field-device contrast with glowing copper-gold surfaces that yield hints of steel-blue. A boldly struck, visually almost flawless coin and among the finest at PCGS. CAC has endorsed only two pieces in this grade and none better. Population: 8 in 66 Cameo, 0 finer (12/15). *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 26SX, PCGS# 82262

**1864 Bronze No L Cent, PR67 Red and Brown  
Dramatic Two-Sided Toning, CAC Approved**

- 3050 1864 Bronze No L PR67 Red and Brown PCGS. CAC.** The vivid two-sided color palette on this early Superb Gem Red and Brown proof Indian cent creates a coin of stunning eye appeal. The obverse is a lovely blend of yellow-orange with tinges of sage and rose in the fields, while the reverse takes on a deep reddish-orange color with brownish devices. This piece overall is far more Red than Brown. There is no visible sign of carbon or contact, and the preservation is uniformly excellent throughout both sides, as demanded at the Superb Gem proof grade level.

The proof mintage of the Bronze, No L 1864 Indian cents is estimated at 300 coins, but few survive as nice as this piece — and that is true both technically and aesthetically, the latter in spades. PCGS reports only one other submission in PR67 Red and Brown, a very attractive coin but one that is more uniform and lacks the dramatic two-sided contrast of this piece. Only two examples of the Bronze No L issue in this grade bear the CAC green approval sticker — this piece and one other (1/16).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 229F, PCGS# 2277*

**1866 Cent, PR65+ Red Cameo  
Lovely Contrast and Color**

- 3051 1866 PR65+ Red Cameo PCGS. CAC. Ex: Perfection 2.** A rare Cameo example of this early bronze proof Indian cent, showing razor-sharp motifs set against mirrored copper-gold fields. A few hints of olive-green color emerge when tilted beneath a light. This Plus-graded coin is one of three Gem Red proofs endorsed by CAC and one is finer. Population: 9 in 65 (1 in 65+) Cameo, 4 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 229J, PCGS# 82287*

**1867 Cent, PR65 Red Cameo  
Rarely Seen So Fine**

- 3052 1867 PR65 Red Cameo PCGS. CAC. Ex: Perfection 2.** As is a continuing trend for proof Indian cents from this decade, the 1867 is a rarity in Cameo grades. This example is one of just two Gem Red proofs endorsed by CAC with none finer (12/15). The strike is tack-sharp, and the mirrored fields are deeply reflective. Both sides display rose-orange and bronze-gold hues, while a single carbon speck is tucked against the wreath above the E in ONE. Population: 7 in 65 Cameo, 3 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 229K, PCGS# 82290*

1869 Indian Cent, PR66 Red  
Tied for Finest at PCGS and CAC

1872 Cent, PR66 Red  
One of Two CAC-Approved in This Grade  
None are Finer

**3053 1869 PR66 Red PCGS. CAC. Ex: Perfection 2.** This Premium Gem Red proof 1869 cent is one of only two in this grade at PCGS, and none are finer. At CAC this is the sole PR66 Red coin, tied numerically with one PR66 Red Cameo example (1/16). The surfaces boast exuberant luster amid pale golden-orange patina on both sides, an incredibly appealing example. A couple of minor contact marks are in concert with the grade, concealed under the somewhat deeper color on the Indian's cheek. Although 600 or so proofs were struck of this issue, it is doubtful that one with higher technical or aesthetic appeal could be found, no matter how long one searched.  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 229M, PCGS# 2296*

**3054 1872 PR66 Red PCGS. CAC. Ex: Perfection 2.** The proof 1872 Indian cent is a better date in high-end Red condition, widely sought-after by Registry Set collectors at the Premium Gem level. With Cameo pieces almost never seen, this PR66 Red proof is among the finest that most collectors will have the opportunity to acquire. CAC has green-stickered only one other Red proof at this level and none finer (12/15). This piece displays glistening frost over the sharp design elements and reflective copper-gold and amber hues in the fields. The preservation is exceptional with only a couple of tiny specks hidden behind the headdress feathers below AMERICA. The Registry enthusiast will find this to be the ideal choice for a top-ranking set. Population: 6 in 66 Red, 0 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 229R, PCGS# 2305*

**1874 Cent, PR65 Red Cameo  
Starkly Contrasted Devices**

- 3055 1874 PR65 Red Cameo PCGS. CAC. Ex:** Perfection 2. Red Cameo examples of the proof 1874 Indian cent are extremely rare, and this Gem representative is the sole specimen endorsed by CAC (12/15). Olive-green and cherry-red hues emerge from sun-gold surfaces on each side, while frosty, razor-sharp design elements contrast starkly against the mirrored fields. Population: 3 in 65 Cameo, 2 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 229T, PCGS# 82311*

**1875 Cent, PR65 Red  
Rare in High Grade**

- 3056 1875 PR65 Red PCGS. CAC. Ex:** Perfection 2. The proof 1875 Indian cent is scarce in Red condition and extremely rare with cameo contrast. This Gem Red example is conditionally rare and possesses a hint of field-device contrast on the obverse. The strike is sharp throughout, set aglow by warm amber-orange hues in the mirrored fields. CAC has endorsed three pieces in this grade and none finer. Population: 14 in 65 Red, 2 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 229U, PCGS# 2314*

**1878 Cent, PR66 Red Cameo  
Showcase-Quality Contrast**

- 3057 1878 PR66 Red Cameo PCGS. CAC. Ex:** Perfection 2. The obverse portrait on this Premium Gem proof Cameo seems to glow atop the mirrored fields. The strike is bold, and the surfaces are beautifully preserved. Sun-gold and amber-red hues encompass the interiors while green, violet, and bluish-gray ribbons appear around the outer peripheries. CAC has endorsed three Red Cameos in this grade and none finer. Population: 7 in 66 Cameo, 0 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 4YVB, PCGS# 82323*

**1880 Cent, PR66 Red Cameo  
A High-End, Contrasted Example**

- 3058 1880 PR66 Red Cameo PCGS. CAC. Ex:** Perfection 2. Although marginally available in ordinary Red condition, the proof 1880 Indian cent is a great rarity with cameo contrast. This Premium Gem is among the finer-known examples. It is one of three endorsed by CAC in this grade with one finer (12/15). The strike is needle-sharp, and cameo contrast is obvious. Both sides are carbon-free and display soothing tan-orange coloration. Population: 6 in 66 Cameo, 2 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 229Z, PCGS# 82329*

**1884 Cent, PR66 Red Cameo  
Sole Finest CAC-Endorsed**

- 3059 1884 PR66 Red Cameo PCGS. CAC. Ex:** Perfection 2. Cameo examples of the proof 1884 Indian cent are extremely rare. PCGS has certified only seven such coins in all grades, and CAC has endorsed only three: two in PR65 Red and this PR66 Red coin (12/15). This piece is boldly struck with rich coppery-orange color. The fields are deeply mirrored, and the design elements display satiny, untouched luster. A faint, intact planchet lamination is seen below the T in CENT. Population: 2 in 66 Cameo, 1 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 22A5, PCGS# 82341*

**1886 Cent, PR65 Red  
Type One Obverse**

- 3060 1886 Type One PR65 Red PCGS. CAC. Snow-PR3. Ex:** Perfection 2. A ruby-red, orange-gold, and lime-green Gem. The strike is close to full, and the coruscating surfaces appear void of hairlines, contact marks, and carbon. Rick Snow writes "it is very difficult to find full red examples" of the proof 1886 cent. CAC must agree, since they have certified only two Type One 1886 proofs as Red, both at the MS65 level. Population: 18 in 65 Red, 13 finer (1/16).  
*From The Perfection 1 & 2 Collections, Part 2. NGC ID# 22A7, PCGS# 2347*

**1888 Cent, PR65+ Red  
Modest Field-Motif Contrast**

- 3061 1888 PR65+ Red PCGS. CAC. Ex: Perfection 2.** The proof 1888 Indian cent is almost uncollectible in Cameo grades and is rare in full Red condition. This Plus-designated Gem Red coin boasts remarkably noticeable field-device contrast for a non-Cameo coin, showing bold, satiny design elements and deeply mirrored fields. Warm sun-gold and copper-red hues encompass each side. CAC has stickered only five Red proofs, including for at the Gem level and one finer. Population: 9 in 65 (1 in 65+) Red, 2 finer (12/15). From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 22AA, PCGS# 2353

**1892 Cent, PR67 Red  
Sole Finest Red Coin at CAC**

- 3062 1892 PR67 Red PCGS. CAC. Ex: Perfection 2.** The proof 1892 Indian cent is extremely rare in PR67 Red; PCGS has seen only two coins this fine and none higher, and the present example is the sole finest Red coin with a CAC endorsement. The bold, satiny devices show modest contrast with the reflective fields, while both sides exhibit blended amber-red and peach-gold hues. Population: 2 in 67 Red, 0 finer (12/15). From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 22AE, PCGS# 2365

**1895 Cent, PR65 Red Cameo  
Sole CAC-Endorsed Example**

- 3063 1895 PR65 Red Cameo PCGS. CAC. Ex: Perfection 2.** Red Cameo proof cents are rare for the popular 1895 date, and coins with overt contrast between the frosted devices and reflective fields always bring a premium. Remarkably few proofs qualify for the Cameo distinction. This attractive Red example displays strong contrast, with attractive orange centers framed by traces of cherry-red at the rims. A strong strike covers the motifs, while a few cloudy specs and a tiny mark beneath the D in UNITED are noted. CAC reports this sole example as the only Red Cameo proof in any grade with the green CAC endorsement. PCGS population: 6 in 65 Cameo, 1 finer (1/16). From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 22AH, PCGS# 82374

**1897 Indian Cent, PR66 Red  
Crimson-Orange Reflective Proof**

- 3064 1897 PR66 Red PCGS. CAC. Ex: Perfection 2.** This fully struck, reflective proof displays minimal carbon freckling and no marks to mention, with crimson-orange coloration and a blush of ruby-red on the cheek. The motifs show light mint frost contrasting with the surrounding mirrored fields. Eye appeal is terrific, as confirmed by the CAC endorsement — one of three Premium Gem proofs to be so-honored with none finer at CAC. PCGS population: 6 in 66 Red, 4 finer (1/16). From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 22AK, PCGS# 2380

**1902 Indian Cent, PR67 Red Cameo  
An Immaculate Coin With Stunning Color**

- 3065 1902 PR67 Red Cameo PCGS. CAC. Ex: Perfection 2.** The “Perfection” moniker is appropriate, as this Superb Gem Red Cameo proof is the sole finest of this issue at PCGS and NGC combined. Rich honey-gold and orange surfaces predominate, ceding on portions of each side to vivid cherry-red. The reflective fields contrast sufficiently against the frosted, raised devices to merit a Cameo designation, in all a coin of simply stunning quality with no mentionable drawbacks. The proof strike is uniformly sharp throughout both sides. Population: 1 in 67 Cameo, 0 finer (12/15). This is, of course, the sole CAC example in this grade as well. *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 22AR, PCGS# 82395

**1904 Cent, PR66 Red Cameo  
Tied for Finest Cameo Known**

- 3066 1904 PR66 Red Cameo PCGS. CAC. Ex: Perfection 2.** Struck during a period when proof dies were polished on the fields and devices, the 1904 proof Indian cent is a rarity with any semblance of cameo contrast. This Premium Gem Red Cameo boasts excellent detail and deep mirrors. Each side showcases lovely copper-orange color. The finer of just two CAC-approved Red Cameos. Population: 3 in 66 Cameo, 0 finer (12/15). *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 22AT, PCGS# 82401

**1906 Indian Cent, PR67 Red and Brown  
Tied for Finest at PCGS**

- 3067 1906 PR67 Red and Brown PCGS. CAC. Ex: Perfection 2.** This magnificent Superb Gem exhibits razor-sharp definition on all design elements and the impeccably preserved original red surfaces have mellowed to attractive shades of light brown and violet in selected areas. Eye appeal is tremendous. Only two coins have been verified by CAC in PR67 Red and Brown, with none finer (1/16). Population: 2 in 67 Red and Brown, 0 finer (1/16). *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 22AV, PCGS# 2406

**1908 Cent, PR66 Red Cameo  
One of Two With CAC Endorsement**

- 3068 1908 PR66 Red Cameo PCGS. CAC. Ex: Perfection 2.** Much of each side displays bright bronze-gold color, yielding to tinges of deep cherry-red along the lower obverse and upper reverse margins. The strike is bold, and contrast is exceptional. One of two Red Cameos endorsed by CAC, both PR66 (12/15). Any Cameo example of this late-series proof is rare, and this Premium Gem is among the finest certified. Population: 6 in 66 Cameo, 0 finer (12/15). *From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 22AX, PCGS# 82413

## LINCOLN CENTS

### 1909-S VDB Lincoln Cent, MS66 Red and Brown Only One Finer Coin at PCGS

- 3069 1909-S VDB MS66 Red and Brown PCGS. CAC.** The mostly red surfaces of this iconic key Lincoln cent are impeccably preserved, with just a touch of light brown patina in selected areas. The design elements are sharply detailed and vibrant mint luster adds to the outstanding visual appeal. Population: 45 in 66 Red and Brown, 1 finer (1/16). NGC ID# 22B2, PCGS# 2427

### 1909-S Lincoln Cent, MS66+ Red Exceptional Eye Appeal

- 3070 1909-S Lincoln MS66+ Red PCGS. CAC.** The 1909-S Lincoln cent is somewhat scarcer in high grade than its more famous VDB counterpart. Premium Gems are scarce, and anything finer is extremely rare. This Plus-graded piece displays a bold strike and frosty, glistening luster. The surfaces appear almost flawless under a loupe, while subtle hints of lilac and silvery luminance emerge from the warm amber-gold patina. PCGS lists six finer representatives (12/15). NGC ID# 22B4, PCGS# 2434

### 1914 Lincoln Cent, Flawless MS66 Red One of Eight With CAC Approval

- 3071 1914 MS66 Red PCGS. CAC.** For a P-mint, the 1914 Philadelphia Lincoln cent issue is quite elusive in Premium Gem Red grade — despite a mintage exceeding 75 million coins. This piece boasts glowing orange-gold to fire-red surfaces with nary a flaw or wrinkle in the fabric, a fantastic coin for the grade. Population: 75 in 66 (5 in 66+) Red, 5 finer. CAC: 8 in 66 Red, 0 finer (1/16). NGC ID# 22BG, PCGS# 2470

### 1914-D Lincoln Cent, MS64 Red and Brown Early Series Key Issue

- 3072 1914-D MS64 Red and Brown PCGS. CAC.** The low mintage of 1.1 million pieces meant that once collector boards began to be used in the 1930s with mintages indicated, the 1914-D would be a pursued item by collectors. By then, most of the mintage had entered the channels of commerce and few remained in high grades. This is an exceptionally pleasing example that shows even mellowing of the original red mint luster; meaning significant red color shows still. Sharply struck throughout and carbon-free surfaces with no mentionable marks. NGC ID# 22BH, PCGS# 2472

---

1914-D Lincoln Cent, MS66 Red  
Low-Mintage Key  
None Certified Finer

**3073 1914-D MS66 Red PCGS.** Although the 1909-S VDB is considered the key date to the Lincoln cent series, its conditional rarity falls far behind that of many other dates, particularly in the finer Red grades. The 1914-D stands out in this regard, confirming its key-date status. Only 1.1 million Lincoln cents were struck at the Denver Mint in 1914, and few high-quality specimens were saved by contemporary collectors. As a result, it is many times scarcer in MS65 Red than the 1909-S VDB, and is prohibitively rare any finer. The 1909-S VDB remains collectible through MS66 Red, but only 10 examples of the 1914-D have been certified by PCGS and NGC combined at the MS66 grade level, with the Red designation. These 10 certification events are evenly split between the services, with five citations at each grading house. No finer examples have been certified at either service, and even this small figure may include a few resubmissions and crossovers (12/15). Most of the high-grade examples we know about today probably come from a hoard of about 700 pieces that Walter Breen says existed until the 1950s, although Q. David Bowers reports two rolls of Red and Brown Uncirculated specimens were discovered in Hawaii or the Philippines in the 1970s.

This delightful Premium Gem representative exhibits vibrant satiny luster in dusky copper-orange hues. The design elements exhibit razor-sharp definition throughout and no mentionable surface flaws are evident. A few microscopic carbon specks are not bothersome. This coin is a must-have example for Registry Set enthusiasts. Population: 5 in 66 Red, 0 finer (12/15). NGC ID# 22BH, PCGS# 2473

---

1915-S Lincoln, Seldom-Seen MS65 Red  
Conditional Rarity, One of Two Such at CAC

**3074 1915-S MS65 Red PCGS. CAC.** The 1915-S Lincoln cent is one of the true keys to the series in Gem Red condition, a level seldom surpassed at either PCGS or NGC. This piece, in a green-label PCGS holder, shows orange and red in about equal measure amid generous luster and no mentionable distractions. A sharply struck and delightfully appealing example of this conditional rarity. Population: 30 in 65 (1 in 65+) Red, 5 finer. CAC: 2 in 65 Red, 0 finer (1/16). NGC ID# 22BM, PCGS# 2485

---

1916-D Lincoln Cent, MS67 Red  
Sharply Detailed, With Original Surfaces  
Tied for Finest Certified

**3075 1916-D MS67 Red PCGS.** The 1916-D Lincoln cent claims a substantial mintage of nearly 36 million pieces, far outstripping the 1.1 million-piece mintage of the 1914-D, and expanding considerably on the 22 million-piece production total of the 1915-D. Consequently, the 1916-D is not difficult to locate in circulated grades today, and even lower Mint State specimens are found with a little patience, but coins with full, original red color are quite elusive. Although a new master die was introduced during the year, improving the striking characteristics of some examples, David Lange notes that the coins with original color are usually seen with weaker strikes. For some reason, the coins with sharp details are usually found with brown surfaces.

The present coin is a happy exception to the rule. Shimmering original orange-copper surfaces provide this exceptional Superb Gem cent with exceptional visual appeal. The design elements exhibit sharp definition in most areas, with only a touch of softness on the AM in AMERICA. The few marks present on this example are minuscule and hard to detect, even with a loupe. The reverse reveals a couple of attractive splashes of bluish-green color. Very few hints of carbon are present, all pinpoint in size. This coin is tied with one other specimen for finest certified at PCGS, while NGC has graded no Red examples finer than MS66 (12/15). A delightful example, with unsurpassed visual appeal and the highest available technical quality, this piece will make a wonderful addition to an advanced collection or Registry Set. NGC ID# 22BP, PCGS# 2491

1917 Cent, MS64 Red and Brown  
Doubled Die Obverse

- 3076** 1917 Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS. CAC. A rather boldly die-doubled *Guide Book* variety, showing a strong spread on the date, IN GOD WE TRUST, and elements of the portrait. This Choice example shows mostly copper-red luster but with soft burgundy overtones that denote the Red and Brown designation. A few scattered specks are not out of line for the grade, and the strike is bold. Population: 6 in 64 Red and Brown, 3 finer (12/15). PCGS# 37674 Base PCGS# 92496

1917-S Lincoln Cent, MS65 Red  
Only One Finer Coin at PCGS

- 3078** 1917-S MS65 Red PCGS. This delightful Gem displays impeccably preserved natural red surfaces, with vibrant mint luster on both sides and razor-sharp definition on all design elements. The reverse shows much of the outline of the bust, which was transferred from the obverse in a phenomenon once known as "ghosting," possibly caused by spacing the dies too closely together in the press. Population: 17 in 65 Red, 1 finer (1/16). NGC ID# 22BU, PCGS# 2503

1917 Lincoln Cent, MS65+ Red  
Doubled Die Obverse, FS-101

- 3077** 1917 Doubled Die Obverse, FS-101, MS65+ Red PCGS. Strong doubling is evident on the date and motto IN GOD WE TRUST. This extremely popular *Guide Book* and *Cherry-pickers* variety was only discovered in 1977, 60 years after the date of issue. As a result, no high-quality examples were saved for numismatic purposes and the FS-101 is seldom encountered in high grade today. This magnificent high-end Gem offers well-preserved original red surfaces, with vibrant mint luster and sharply detailed design elements throughout. Overall eye appeal is tremendous. We expect intense competition from series specialists when this lot is called. Population: 5 in 65 (1 in 65+) Red, 6 finer (1/16). PCGS# 37675 Base PCGS# 92497

1921-S Cent, MS65 Red  
Remarkable Full Red, Fully Struck Example

- 3079** 1921-S MS65 Red PCGS. All S-mint cents were produced early in the year in 1921 because of a slowdown in the economy later in the year and subsequent lack of demand for small coinage. As a result, only 15.2 million pieces were struck. The 1921-S has been a semikey issue almost since it was minted. Gems are rare, and full red Gems even rarer. This is a fully struck, full Red Gem — the rarest combination of all. The surfaces are bright, even red with remarkably fine detail seen on Lincoln's beard and lapels. No mentionable spots are seen on either side. Population: 18 in 65 Red, 0 finer (1/16). NGC ID# 22C7, PCGS# 2536

**1922 No D Cent, MS63 Brown  
Strong Reverse, FS-401**

- 3080 1922 No D, Strong Reverse, FS-401, MS63 Brown NGC.** Die Pair 2. For the only time since 1815, the Philadelphia Mint failed to strike cents in 1922. Thus, the absence of a Denver mintmark on a 1922-dated cent confounded numismatists for decades. Eventually, researchers identified three dies that appeared to lack mintmarks. However, high-grade pieces from Die Pair 1 and Die Pair 3 proved to be Weak D varieties, and only Die Pair 2 (FS-401) currently receives hobby sanction as a true No D variety. The typical example grades VF, but the present golden-brown and olive-green cent is lustrous and Uncirculated. Marks are confined to brief hair-thin lines near PLURIBUS UNUM. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

**1926-S Cent, MS64 Red  
Only Two Red Coins Finer at PCGS**

- 3081 1926-S MS64 Red PCGS.** This brick-red near-Gem 1926-S will satisfy the demands of all Registry Set collectors except for those seeking a Gem and willing to pay the six-figure sum required to capture one of the two PCGS-graded pieces in existence. This piece boasts exceptional eye appeal for the grade. The strike and surfaces are both far above average. Population: 71 in 64 (1 in 64+) Red, 2 finer (1/16). NGC ID# 22CL, PCGS# 2575

**1927-S Cent, Elusive MS65 Red  
Tied for Finest at PCGS**

- 3082 1927-S MS65 Red PCGS.** An issue that is far more elusive in Gem Red grade than collectors outside of savvy series specialists might realize, the 1927-S is much rarer grade-for-grade than the 1928-S or 1929-S. PCGS reports only 19 submissions in this grade and none finer (1/16). The orange-red surfaces boast a decent strike and no visible carbon, although there is some hazy brown dusting on the reverse. NGC ID# 22CP, PCGS# 2584

**1931 Lincoln Cent, MS67 Red  
Among the Finest Certified**

- 3083 1931 MS67 Red PCGS.** A mintage of nearly 19.4 million Lincoln cents was accomplished at the Philadelphia Mint in 1931, but few survivors can match the technical quality and eye appeal of this magnificent Superb Gem. The well-preserved surfaces maintain their original fiery red color, and the design elements show razor-sharp definition throughout. Population: 20 in 67 Red, 0 finer (1/16). NGC ID# 22D2, PCGS# 2614

**1932-D Lincoln Cent, MS67 Red  
Among the Finest Certified Examples**

- 3084 1932-D MS67 Red PCGS.** This delightful Superb Gem exhibits sharply detailed design elements throughout, with virtually pristine original red surfaces that radiate vibrant mint luster. Overall eye appeal is tremendous. This coin should find a home in the finest collection or Registry Set. Population: 15 in 67 Red, 0 finer (1/16). NGC ID# 22D6, PCGS# 2626

1936 Cent, MS65 Red  
Doubled Die Obverse, FS-101

- 3085 1936 Doubled Die Obverse, FS-101, MS65 Red PCGS. CAC.** Both FS-101 and FS-102 exhibit strong die doubling on the date. STATES shows strong doubling toward the rim on FS-101, while FS-102 has minimal doubling on STATES. Both varieties share a *Guide Book* listing. 1936 has a third and lesser doubled die *Cherrypickers'* entry, FS-103, and many Lincoln cent collectors seek to obtain examples of all three varieties. The present lustrous FS-101 Gem exhibits beautiful pumpkin-red color throughout, aside from a splash of olive-green on the central reverse. No marks are apparent, and surface imperfections are limited to a couple of pinpoint flecks on each side. Population: 5 in 65 Red, 7 finer (1/16). NGC ID# 22DE, PCGS# 82650

1936 FS-102 Cent, MS66+ Red  
Doubled Die Obverse, Peg Leg R

- 3086 1936 Doubled Die Obverse, FS-102, MS66+ Red PCGS.** For the 1936, three different doubled die obverse varieties are listed in *Cherrypickers'*. FS-101 and FS-102 show strong doubling on the date, and both correspond to the *Guide Book* listing. FS-102 is distinguished by a "peg leg" R in LIBERTY. The present orange-red Premium Gem offers booming luster and a mark-free appearance. Carbon is virtually absent. Population: 13 in 66 (2 in 66+) Red, none finer (1/16). NGC ID# 22DE, PCGS# 92650

The original 1907 edition of Brenner's Abraham Lincoln plaque which caught the eye of President Roosevelt. (ANA)

1943-S Bronze Cent, Second-Finest Known, AU58  
From the Bob Simpson Collection

**3087 1943-S Struck on a Bronze Planchet AU58 PCGS Secure. CAC.** Ex: Simpson. The sale of off-metal error 1943 bronze and 1944 steel cents in our recently concluded FUN Signature (Heritage, 1/2016) was definitely one for the record books. The present cataloger (GH) had several of his own bundles of Thanksgiving joy getting to describe and write about so many monumental coins, the *crème de la crème* of the Lincoln cent series and true Lincoln cent “error coin royalty,” in the memorable words of NGC’s David Lange.

Whether we like it or not, change is an inevitable part of life. Even an advanced collector like Bob Simpson eventually turns his eyes in new directions. Collectors for years have been privileged to admire (or envy, or attempt to emulate, or drool over) his complete PCGS Registry Set of Lincoln Cents Off-Metal Strikes, Circulation Strikes (1943-1944) — each coin, incredibly, in Mint State — which was ranked #1 (of course) for five straight years by PCGS and has been inducted into the PCGS Hall of Fame.

Bob Simpson offered half of this top-grade set — the steel cents, as mentioned — in our January 2016 FUN Signature in the form of a 1944 Philadelphia steel cent, MS64 PCGS (offered at \$146,875); a 1944-D steel cent, MS62 PCGS (brought \$54,050); and a remarkable 1944-S steel cent, MS66 PCGS, the finest “steelie” certified from any mint (offered at \$323,125). As we go to press with this catalog, some of those coins have sold and some are on offer at their reserve prices plus buyer’s premium.

To the best of our knowledge, however, Simpson retains for the time being his complete 1943 set of Mint State bronze or “copper” cents, including a 1943 Philadelphia, MS62 Brown PCGS; 1943-D MS64 Brown PCGS; and 1943-S MS62 Brown PCGS.

The present 1943-S bronze cent from the Simpson Collection falls under the category of “duplicate,” although it is in all other respects a fine coin — nay, an *extraordinary* coin, the second-finest certified 1943-S bronze cent at either service — that would form the centerpiece of virtually any set in which it resides.

Another Simpson “duplicate” (such an ugly word for such fantastic coins), his 1943 Philadelphia bronze cent, AU58 PCGS Secure-CAC, brought \$305,500 in our January FUN Signature. The FUN January 2016 and Long Beach February 2016 Signature auctions at Heritage will undoubtedly remain among the most memorable offerings of off-metal Lincoln cents in modern numismatic history.

### Some Context Around the Bob Simpson Collection

It is likely the last numismatic understatement of the year 2015 we will make to write that Bob Simpson owns some simply amazing, staggering coins. The entire numismatic world owes him a tremendous debt of gratitude for keeping his sets open/published so that collectors of all stripes and situations can admire those wonderful coins.

To examine the various Bob Simpson Registry Sets, either active or retired, visible at PCGS is to enter a numismatic Shangri-La, to enter a world full of miraculous coins that simply shouldn’t exist — but do, each one of them in incredible TrueView images. This is a world including (currently) 60% of all the Judd patterns, a complete set of all four gold stellas of 1879-80 (and most of the pattern stellas), complete sets of 20th century gold circulation strikes, complete Barber proofs (all three denominations), four of the 10 most famous United States “ultra rarities,” complete two cents and three cent silvers, early half dimes, Capped Bust and Liberty Seated half dimes, the list goes on and on — an amazing and bewildering array of coins, many of them in the finest grades known. And yet, of all those incredible Registry Sets, the Lincoln Cents, Off-Metal Strikes (1943-44) is currently the only one with the PCGS Hall of Fame recognition, and it is undoubtedly among the most admired and most commented-on of all his sets.

### The Present Example, AU58 PCGS Secure-CAC, Ex: Simpson

Far more important than any technical description of this coin is its high Condition Census ranking as the second-finest 1943-S bronze cent that we can confirm through recent trades. As noted, this will remain the finest available 1943-S bronze cent unless and until Bob Simpson decides to dispose of his Registry Set of Mint State 1943-PDS bronze cents, or until the *extremely unlikely* appearance of another example that trumps both.

The surfaces are a light medium-tan, boasting excellent luster remaining throughout both sides despite a touch of circulation wear and some scattered detritus in the device crevices that actually serves to confirm this AU58 piece’s original, uncleaned status. A diagonal (northwest to southeast) scrape through Lincoln’s eye ends in the right obverse field. Obvious die polishing lines run north-northeast through the right obverse field. Bits of dark material appear in the upper loops of the 9 and 3, in the lower loop of the S mintmark, and at the upper obverse rim above the motto.

### Roster of 1943-S Bronze Cents

We can confirm only six examples of the 1943-S bronze cents certified by the two major grading and authentication services. Perhaps as many as a dozen to 15 examples survive of the 1943 Philadelphia bronze cents, while the 1943-D bronze cent, MS64 Brown PCGS, in the Simpson Collection (for which he paid \$1.7 million in 2010) remains unique, despite decades of searching on the part of thousands of collectors. The roster is based on publicized trades and public auctions; private trades may represent other examples that are unlisted here.

**1. MS62 Brown PCGS Secure.** “Found in the year of issue in a Mint-sewn bag of 1943-S steel cents” by Merl D. Burcham, per its early appearances with Superior Galleries (the Superior lot description from February 1974 is reprinted in Dr. Sol Taylor’s *Standard Guide to the Lincoln Cent*, fourth edition [1999], page 138); later to error coin dealer Frank Spadone; part of a \$15,000 trade of “regular and pattern silver coins valued at that time [1965] between Spadone and Walter Farris of Bristol, Tennessee, per the Superior ads (and covered in a *Coin World* story on page 41, January 20, 1965); authenticated at some point by Walter Breen (before 1965, by which time Farris had obtained the certification); Dr. Charles L. Ruby Collection, Part I (Superior, 2/1974), lot 1991; Superior (6/1977), realized \$49,500; Dr. Jon Kardatzke Collection (Goldberg Auctions, 2/2000), lot 257, as MS61 Brown NGC, brought \$115,000; Legend Numismatics to Bob Simpson as MS62 Brown PCGS for \$1 million (9/2012); Simpson Collection. “A tiny fleck of zinc is ... lodged in the bronze, just above the 3 in the date,” according to the Goldbergs description. Some muted mint red remains. PCGS certification #25510131.

**2. AU58 PCGS.** Ex: Simpson Collection, where it resided apparently from some time before September 2012 (likely as early as late 2010) until the present. Earlier provenance uncertain. This piece became the Bob Simpson “duplicate” when he purchased a 1943-S bronze cent in MS62 Brown PCGS Secure for \$1 million in September 2012, a transaction arranged by Legend Numismatics. **The present example.** PCGS certification #18523980.

**3. AU55 PCGS Secure.** Purchased from an unspecified auction “sometime during the 1980s” and newly certified at PCGS in autumn 2015. Previously authenticated by ANACS. The Sorensen Collection / FUN Signature (Heritage, 1/2016), lot 5267, brought \$211,500. No further provenance available. PCGS certification #25653505.

**4. AU53 NGC.** Ex: Kenneth S. Wing Jr. Collection. A few light flecks on the reverse help with pedigree identification, including one on the right wheat ear, one at the left bottom of T in CENT, and one right at the midpoint of M in UNUM. Other scattered, tiny flecks appear in the central reverse. A near-vertical tick on Lincoln’s cheekbone is the most apparent obverse mark. “Discovered within a year of its issue, this attractive specimen remained in the same family for more than 60 years,” according to its NGC Photo Proof certification and extensive documentation

---

provided by its current owner. Found in circulation in 1944 by 14-year-old collector Kenneth S. Wing, Jr. in Long Beach, California; Kenneth S. Wing family; sold to Rare Coin Wholesalers for \$72,500 (7/2008); purchased from Park Avenue Numismatics for \$173,000 (8/2008); Kerry Rudin. NGC certification #3184796-001; formerly in a slab with NGC certification #3210930-001 (now listed as AU53/Deleted by NGC) but reholdered due to scuffs on the slab. Photographed on NGC Coin Explorer.

**5. XF45 PCGS.** From a photo in the PCGS Condition Census on CoinFacts. A small tick at Lincoln's temple, and a hairline-thin scrape from the obverse field left of T(RUST) to a hair curl above Lincoln's head down to the ear, are the most obvious pedigree markers. Other small ticks show in the obverse field between the bowtie and goatee, and at the rear shoulder directly down from (LIBERT)Y. Copper spot at rear of head, below G(OD). PCGS certification #11456467.

**6. VF35 PCGS.** Dr. Carl A. Minning, Jr. Collection (Bowers and Merena, 8/1999), lot 1122, brought \$51,750; Phillip Flannagan et al. Sale (Bowers and Merena, 11/2001), lot 6076, realized \$62,100; Alfred V. Melson Collection, Part Two / Long Beach Signature (Heritage, 2/2010), lot 178, garnered \$207,000; Geyer Family Collection / New York Signature (Heritage, 11/2013), lot 3510, brought \$141,000. An abrasion runs horizontally beneath the bases of US in TRUST. Described by the 1999 Bowers and Merena cataloger as "King of the Small Cents / Nationwide Publicity Item!" PCGS certification #3457896.

#### **Other Appearances**

*Although these examples appear in the NGC Census Report, there are no public trades known for any of them, leading us to believe they may be duplications of some of the pieces above.*

**A. MS61 Brown NGC.** An example in this grade remains in the NGC Census Report. See #1 above, or this could be a duplicate.

**B. AU58 NGC.** From NGC Census Report.

**C. AU55 NGC.** From NGC Census Report.

*Selections from The Bob R. Simpson Collection. NGC ID# 22E9, PCGS# 82715*

1972 Lincoln Cent, MS67 Red  
Popular Doubled Die Obverse, FS-101

- 3088 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. An immensely popular *Guide Book* and *Cherrypickers* variety, the FS-101 is identified by the strong doubling on the date, LIBERTY, and IN GOD WE TRUST, and by a small die line at the reverse rim near the D in UNITED. This Delightful Superb Gem exhibits virtually pristine original red surfaces, with vibrant mint luster and sharply detailed design elements. Population: 36 in 67 Red, 1 finer (1/16). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

1972 Doubled Die Cent, MS67 Red  
FS-101, *Guide Book* Variety

- 3089 1972 Doubled Die Obverse, FS-101, MS67 Red PCGS. The strong die doubling throughout the obverse legends is reminiscent of the spectacular FS-101 1955 cent. The most significant of the many doubled die varieties from 1972, and the sole die variety from that year to secure *Guide Book* recognition. A peach-red Superb Gem with lustrous mark-free surfaces and only a couple of pinpoint flecks. Population: 36 in 67 Red, 1 finer (1/16). NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

1992 Close AM Cent, MS64 Red  
FS-901, Unpriced *Guide Book* Rarity

- 3090 1992 Close AM, FS-901, MS64 Red PCGS. The U.S. Mint intended 1993 as the release date for a new design subtype on Lincoln cents. Among minor changes, the FG initials were spaced further from the Lincoln Memorial, and the letters AM in AMERICA were placed very close together. But a small number of 1992 and 1992-D cents are known from Close AM dies. Schechter and Garrett list both varieties as #38 in their 2011 Top 100 reference. As of (1/16), PCGS has certified a total of 10 1992 Close AM cents in all grades. A lustrous orange-red near-Gem with exemplary preservation for its conservatively assessed third-party grade. Population: 1 in 64 Red, 1 finer (1/16). PCGS# 569375 Base PCGS# 412710

PROOF LINCOLN CENTS

1909 VDB Cent, PR65 Red and Brown  
In-Demand First-Year Issue

- 3091 1909 VDB PR65 Red and Brown PCGS. Proof examples of the 1909 VDB first-year Lincoln cent issue always garner plenty of attention from series specialists, with some notable individual pieces and one massive "hoard" recently stirring numismatic news and roiling collector message boards. This lustrous Gem offers prevailing orange-red patina amid glints of rose and mint — somewhat lighter-colored overall on the reverse — creating generous eye appeal with no mentionable signs of contact or carbon. This piece is certified in an early blue-label PCGS holder. Population: 28 in 65 Red and Brown, 11 finer (1/16). NGC ID# 22KR, PCGS# 3301

1911 Cent, Matte PR66 Red  
Sole Finest CAC Example

**3092 1911 PR66 Red PCGS. CAC.** A great-looking Premium Gem Red example of this early matte proof Lincoln cent issue, showing mostly orange-red on the obverse and blazing fire-red on the reverse. A coin with simply top-notch eye appeal and technical quality as approved by both PCGS and CAC, this coin never ventures far at all from its core Red coloration. Certified in an early blue-label PCGS holder, this matte proof clearly possesses stable color and surfaces and has likely been in this same holder for a dozen years or more. Note that this is the sole example in this grade with CAC approval. Population: 12 in 66 (1 in 66+) Red, 0 finer. CAC: 1 in 66 Red, 0 finer (1/16).

*Ex: Pevehouse/Davis Collections (American Numismatic Rarities, 10/2004), lot 105, which brought \$5,750. NGC ID# 22KU, PCGS# 3311*

1913 Lincoln Cent, PR67 Red  
None Finer at NGC

**3093 1913 PR67 Red NGC.** The 1913, according to David Lange (2005) is generally the most available of the early proofs in choice and gem condition. Fully red specimens in this lofty grade, however, are far and few between. Marvelous golden-copper luster adorns the impeccably preserved surfaces of this exquisitely struck piece. Census: 6 in 67 Red, 0 finer (12/15). NGC ID# 22KW, PCGS# 3317

1914 Lincoln Cent, PR67 Red  
One of Three With CAC Approval

**3094 1914 PR67 Red PCGS. CAC.** Certified in an early-era PCGS blue-label holder, this Superb Gem Red proof 1914 Lincoln cent clearly has stable surfaces, a point that aficionados of such things will care about. Blazing orange-red patina only momentarily veers into pale lilac on the portrait high points. There is a wealth of detail visible from the full proof strike in the hair, beard, and coat. A few brownish flecks appear only under magnification and are trivial in context of the broad eye appeal and high technical quality present. Population: 7 in 67 Red, 2 finer. CAC: 3 in 67 Red, 0 finer (1/16). NGC ID# 22KX, PCGS# 3320

**1915 Matte PR65 Red Cent**  
**Very Scarce Type Coin**

- 3095 1915 PR65 Red PCGS.** The production of matte proof Lincolns was limited to just 1,150 pieces this year and percentage of Gem quality Red survivors is quite low. This remarkably struck specimen has just begun to mellow on Lincoln's portrait and the especially vibrant reverse has a splash of pinkish-gold color across the center. Population: 17 in 65 Red, 9 finer (1/16).  
*Ex: Long Beach Signature (Heritage, 6/2002), lot 5389. NGC ID# 22KY, PCGS# 3323*

**1916 Matte PR65 Lincoln Cent**  
**Rarely Seen With Full Red Surfaces**

- 3096 1916 PR65 Red PCGS. CAC.** Most of the surviving 1916 proof cents out of the original mintage of 1,050 pieces are Brown or Red and Brown. Fully red, unspotted, and fully struck pieces are rare. The present Gem offering displays copper-orange luster on matte surfaces. A full strike includes Lincoln's hair and bow tie and the grains and lines of the wheat stalks. A few minuscule toning spots are visible on each side but the coin is carbon free, and a small mark concealed in Lincoln's beard is within the parameters of the numerical grade. Population: 10 in 65 Red, 3 finer (1/16).  
*Ex: FUN Signature (Heritage, 1/2010), lot 2450. NGC ID# 22KZ, PCGS# 3326*

**1936 Lincoln Cent, Brilliant PR66+ Red**  
**Two Finer at PCGS**

- 3097 1936 Type Two — Brilliant Finish PR66+ Red PCGS. CAC.** The brilliant surfaces exhibit engaging luster amid impeccable preservation and bright orange-red color throughout both sides. As expected at this grade level, there are no signs of carbon, although a couple of tiny brown flecks show on the reverse. The 1936 proof coins were the first of what is considered the "modern era" and could be individually ordered; 5,569 were sold, but the production was divided into Satin and Brilliant Finish coins, the latter appearing later and sold in smaller numbers. More of them seem to survive today, however, perhaps because of their higher reflectivity and generally better eye appeal. Population: 48 in 66 (3 in 66+) Red, 2 finer. CAC: 13 in 66 Red, 0 finer (1/16). NGC ID# 22L3, PCGS# 3335

**1937 Lincoln Cent, PR66 Red**  
**Elusive Cameo Example**

- 3098 1937 PR66 Red Cameo PCGS.** Cameo contrast is unusual with this issue, and Premium Gem Cameo proofs with original red surfaces are decidedly rare. This delightful specimen offers sharply detailed design elements and reflective fields that contrast boldly with the frosty devices. Just a few microscopic carbon spots are evident on close inspection. Population: 27 in 66 (2 in 66+) Cameo, 4 finer (1/16). NGC ID# 22L5, PCGS# 83338

**1950 Lincoln Cent, PR66+ Red  
Rare Deep Cameo Example**

**3099 1950 PR66+ Red Deep Cameo PCGS.** The Philadelphia Mint resumed its commercial proof set offerings in 1950, after a seven-year hiatus. Most coins were struck with an all-brilliant finish, and only a relatively small number of the first examples struck from the fresh dies show enough mint frost on the devices to produce any cameo contrast. The present coin is a delightful high-end Premium Gem, with sharply detailed design elements that show unusually frosty texture. The deeply mirrored fields contrast profoundly with the frosty devices to create an intense cameo effect. The original copper-red surfaces are impeccably preserved and eye appeal is terrific. Population: 15 in 66 (2 in 66+) Deep Cameo, 6 finer (12/15). NGC ID# 22LA, PCGS# 93359

**1990 No S Lincoln Cent, PR68 Red  
Dramatic Deep Cameo Specimen**

**3100 1990 No S, FS-101, PR68 Red Deep Cameo PCGS.** From an estimated mintage of 100-150 pieces struck from a proof die with the S mintmark inadvertently omitted, the 1990 No S Lincoln cent is always in demand. This magnificent PR68 specimen exhibits razor-sharp design elements and deeply mirrored fields that contrast profoundly with the frosty devices. The impeccably preserved original red surfaces add to the stunning eye appeal. Population: 88 in 68 (1 in 68+) Deep Cameo, 34 finer (1/16). NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

**1990 No S Cent, PR68 Red Deep Cameo  
FS-101, Rare Modern Variety**

**3101 1990 No S, FS-101, PR68 Red Deep Cameo PCGS.** The mint error 1990 No S proof cent is ranked number 13 in Schechter and Garrett's 100 Greatest U.S. Modern Coins. That reference states that "about 250 examples are known" from a reported net mintage of 3,555 pieces. Needless to say, there are far more than 250 Lincoln cent collectors in need of this key *Guide Book* variety. The present specimen appears perfect to the unaided eye, and a loupe shows only minute carbon near ONE CENT and a tiny trapped gas bubble beneath the copper plate near the S in TRUST. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

1990 No S Cent, FS-101  
PR69 Deep Cameo

- 3102** 1990 No S, FS-101, PR69 Deep Cameo PCGS. The Philadelphia Mint ceased production of proof sets in 1965 to combat a coin shortage. Special mint sets were then struck at San Francisco for three years. When proof set production resumed in 1968, the coins bore S mint marks, which were added to the working dies by hand. On rare occasions, a worker neglected to add the mint mark, with the final such occurrence on the FS-101 proof 1990 cent. The variety promptly became the key to the Lincoln Memorial series. Some examples show rim corrosion due to moisture in the Mint packaging, but the present pristine piece appears as made and demonstrates profound deep cameo contrast. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

PROOF TWO CENT PIECES

1868 Two Cent Piece, PR67 Red and Brown  
Tied for Finest at NGC

- 3103** 1868 PR67 Red and Brown NGC. This spectacular Superb Gem is one of the finest survivors from an estimated proof mintage of 600 pieces. The immaculate surfaces show a mix of original red, light brown, and violet patina, with deeply reflective fields under the toning. The design elements are sharply detailed throughout and eye appeal is terrific. Census: 5 in 67 Red and Brown, 0 finer (1/16). NGC ID# 274X, PCGS# 3637

1868 Two Cent Piece, PR67 Red and Brown  
Exceptional Registry Set Contender

- 3104** 1868 PR67 Red and Brown NGC. The virtually pristine surfaces of this magnificent Superb Gem show a mix of original copper-orange, cerulean-blue, and violet patina, with reflective fields underneath. The design elements are sharply detailed throughout and overall eye appeal is terrific. Census: 5 in 67 Red and Brown, 0 finer (1/16). NGC ID# 274X, PCGS# 3637

1872 Two Cent Piece, PR67 Red and Brown  
Tied for Finest Certified

- 3105** 1872 PR67 Red and Brown NGC. By 1872 the two cent piece was a failed and forgotten experimental coin. Only 65,000 circulation strikes were produced with an estimated 950 proofs, and the next year would be the final one for this short and highly collectible series. This is a remarkably preserved example. The mirrored fields flash strongly on each side, and the color is predominantly red with just the slightest bits of pale blue interspersed. There are no obvious contact marks, as one would expect from the grade, and also as one would expect this piece cannot be numerically upgraded. Census: 6 in 67 (1 in 67 ★) Red and Brown, 0 finer (1/16). NGC ID# 2752, PCGS# 3649

1873 Open 3 Two Cent Piece  
Extraordinary PR66 Red and Brown

- 3106** 1873 Open 3 PR66 Red and Brown PCGS. CAC. The Open 3 date variant for the 1873 two cent piece is a restrike issue and it is easily recognized, not by looking at the 3 in the date, but rather by the shallow area in the center of the shield lines. Only 500 pieces are believed to have been struck, obviously for sale to collectors who missed the opportunity acquire one of the 600 original proofs. This is a remarkably well-preserved example and one of the finest known. The surfaces are mostly cherry-red with occasional light blue patina interspersed. The fields are nicely mirrored, and the only surface flaws of any note is an area of light spotting above the 2 on the reverse. Population: 10 in 66 Red and Brown, 0 finer (1/16). NGC ID# 2754, PCGS# 3655

THREE CENT SILVER

1863 Three Cent Silver, Impeccable MS67  
Only Two Finer at PCGS, Ex: Gardner

- 3107** 1863 MS67 PCGS. CAC. The Civil War had driven silver out of circulation by 1863 and only 21,000 coins were struck, mostly to pay for various purchases at the Mint. Blue, green, and russet toning blankets the surfaces, lending spectacular eye appeal to each side. This semiprooflike Superb Gem offers considerable contrast between the frosted devices and deep, watery fields. The rich patina is all that precludes a Prooflike designation. Essentially pristine and free of clash marks. Population: 3 in 67 (1 in 67+), 2 finer (1/16). Ex: Purchased by Eugene H. Gardner from Legend Numismatics (10/1998); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015, as MS67 NGC with CAC approval), lot 98046. NGC ID# 222D, PCGS# 3682

## PROOF THREE CENT SILVER

1856 Three Cent Silver, PR67 Ultra Cameo  
The Only 1856 Ultra / Deep Cameo Certified

- 3108 1856 PR67 Ultra Cameo NGC.** This moderately toned Superb Gem Ultra Cameo Type Two proof three cent silver offers deeply reflective fields, and each side is covered with smooth dove-gray toning. The numerous die polishing marks in the fields resemble hairlines but were created during die cleaning before striking at the Mint.

While the exact number of proof three cent silvers struck in 1856 is unknown, Breen estimated in 1977 that somewhere between 30 and 40 pieces survive today in all grades. Although we believe the number is somewhat higher, this is a rare coin in proof format, with possibly around 60 pieces known in all grades. It is far more so in Ultra / Deep Cameo format, where this is the sole Ultra / Deep Cameo certified of this date at either service (12/15).

Ex: *Palm Beach Signature* (Heritage, 11/2004), lot 5715; purchased by Eugene Gardner from Pinnacle Rarities (1/2008). NGC ID# 27C3, PCGS# 93703

1863 Three Cent, Stunning PR67 ★  
Top-Notch Eye Appeal

- 3109 1863 PR67 ★ NGC.** The Star designation from NGC says much regarding the top-notch eye appeal of this Superb Gem proof 1863 three cent silver, showing an obverse with steel-blue shield and star surrounded by pale rose and violet patina. The reverse shows a similar effect at the rim but an intense multicolor rainbow effect in the center. A few scattered dark flecks appear only under magnification and are inconsequential on this stunning survivor from the mintage of 460 proofs. Census: 8 in 67 (1 in 67 ★), 1 finer (11/15). NGC ID# 7VZF, PCGS# 3712

1864 Three Cent Silver, PR67  
Deeply Mirrored, Concentric Toning

- 3110 1864 PR67 NGC.** Bands of champagne-gold, pink, and lavender-gray toning enhance the beautifully preserved surfaces of this remarkable Premium Gem, with well-detailed, frosty design elements and deeply mirrored fields throughout. A limited mintage 470 proofs was struck along with 12,000 business strikes, the limited production possibly influenced by wartime hoarding of all precious metal coinage. Census: 9 in 67, 1 finer (1/16). NGC ID# 27CA, PCGS# 3714

**1867 Three Cent Silver, PR68 Cameo  
Tied for Finest Cameo Certified**

**3111 1867 PR68 Cameo NGC.** Breen (1988) indicates that most of the 4,000 1867 circulation strikes were melted in July 1873. Presumably then, date collectors exert added pressure on the proofs, of which 625 were produced. The present Superb Gem with its outstanding eye appeal and infrequently designated Cameo contrast stands out as a fabulous opportunity for the three cent silver proof specialist.

Mirrored fields that display a melange of deep forest-green, aquamarine, electric-blue, and lavender toning accentuate the frosty motifs covered with light silver-gold patina, producing noticeable contrast over both sides. Razor-sharp detail appears on the design elements, and impeccable preservation prevails throughout. NGC has designated only three Cameos in this finest-achieved grade, PCGS none (12/15).

Ex: R.M. Smythe (11/2000), lot 1607; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98067. NGC ID# 27CD, PCGS# 83717

**1871 Three Cent Silver, PR67 Cameo  
None Numerically Finer at NGC**

**3112 1871 PR67 Cameo NGC.** A generous mintage of 960 silver three cent pieces was accomplished in 1871, making the issue relatively available in most grades. Superb Gem Cameo examples, like the present coin are still very rare, however. The sharply detailed frosty design elements of this delightful specimen contrast boldly with the deeply reflective fields and the surfaces are impeccably preserved. Census: 7 in 67 Cameo (3 in 67 ★ Cameo), 0 finer (1/16). NGC ID# 27CG, PCGS# 83722

**1871 Three Cent Silver, PR67 ★ Cameo  
Tied for Finest at NGC and PCGS**

**3113 1871 PR67 ★ Cameo NGC.** The 1871 is considered one of the most available three cent issues in proof format thanks to a mintage of 960 specimens and a proportionately high survival rate. This example should be regarded differently, though, as top-certified proofs with cameo contrast and fantastic patination are extremely rare. Blue and green border hues merge with shades of magenta and golden-orange at the central obverse. Similar colors encircle virtually brilliant centers on the reverse. A pristine circulation-strike alternative. Census: 7 in 67 Cameo (3 in 67 ★ Cameo), 0 finer (1/16). NGC ID# 27CG, PCGS# 83722

## THREE CENT NICKEL

1866 Nickel Three Cent, Frosty MS67+  
Advanced Die State

- 3114 1866 MS67+ NGC. CAC.** The 1866 nickel three cent is rare in MS66 and exceedingly so finer. This Plus-designated Superb Gem is exceptionally vibrant and frosty, devoid of toning. Struck from severely deteriorated dies, the peripheries show extensive flowlines and both sides are heavily clashed. However, the sharpness of the obverse portrait is unaffected the luster is incredible. Close study with a loupe fails to reveal even minor abrasions. Census: 4 in 67 (1 in 67+, 1 in 67 ★), 1 finer (11/15). NGC ID# 22NK, PCGS# 3732

## PROOF THREE CENT NICKEL

1868 Three Cent Nickel, PR67 Cameo  
Sole Finest Cameo at PCGS

- 3115 1868 PR67 Cameo PCGS.** Sharp, frosty devices provide pleasing contrast with the highly reflective fields of this Superb Gem Cameo proof. A faint golden hue attests to the originality of the surfaces, which are devoid of contact marks. Liberty's cheek shows some faint roller marks (Mint-made) if studied with a loupe, but they do not detract and have no impact on the grade or outstanding quality. A Registry Set caliber Cameo proof, the sole finest at PCGS. Population: 1 in 67 Cameo, 0 finer (12/15).  
Ex: *The Eugene H. Gardner Collection Part III* (Heritage, 5/2015), lot 98118. NGC ID# 275N, PCGS# 83764

## SHIELD NICKEL

1866/1866 Shield Nickel, MS65  
Sought-After, First-Year FS-301 Variety

- 3116 1866/1866 Rays, Repunched Date, FS-301, MS65 PCGS.** The Mint experienced many difficulties when the five-cent nickel was introduced in 1866. The hardness of the new alloy resulted in short die life and the Shield design, with Rays on the reverse, was difficult to bring up, resulting in weak strikes and many die cracks. A number of easily recognized Repunched date varieties exist, with the FS-301 being the boldest and most popular with collectors of *Cherrypickers* varieties. The lower half of all four numerals in the date are clearly visible to the right of the primary digits.

This delightful Gem displays the slight softness on the central design elements that is expected on this issue, but the repunched date is boldly rendered. The surfaces are free of mentionable distractions, but a few minor die cracks show on both sides, also typical of this issue. Satiny mint luster adds to the considerable eye appeal. This coin is tied with one other specimen at PCGS for finest-certified example of the popular FS-301 variety (12/15). PCGS# 38314 Base PCGS# 3790

## PROOF SHIELD NICKELS

### 1876 Shield Nickel, PR67+ Atop the Condition Census

**3117 1876 PR67+ NGC.** Proof mintages increased across the board in 1876, probably with the expectation that Centennial celebrations would heighten demand for souvenir coinage. At least 1,150 proof Shield nickels were struck, and it is possible the production was even higher. Whatever the actual mintage, this PR67+ example stands proudly atop the Condition Census for non-Cameo proofs. Each side offers mixed lavender, powder-blue, and peach-orange toning over reflective, nearly flawlessly preserved surfaces. Census: 6 in 67 (1 in 67+, 1 in 67 ★), 0 finer (1/16). NGC ID# 4S39, PCGS# 3830

### 1877 Shield Nickel, PR65 Cameo Proof-Only Key Issue

**3118 1877 PR65 Cameo PCGS.** A great-looking representative of the key 1877 Shield nickel. This Gem proof displays nice field-device contrast with a uniformly sharp strike soft-gray freckles. The proof-only status of the 1877 nickel places it in high demand with series collectors, who have no alternative than to vie for one of the 900 pieces struck, a formidable challenge at the PR65 Cameo level. Population: 43 in 65 Cameo, 53 finer (1/16). NGC ID# 276U, PCGS# 83831

## LIBERTY NICKELS

### 1884 Liberty Nickel, MS66+ None Finer at PCGS

**3119 1884 MS66+ PCGS Secure. CAC.** This second-year Liberty nickel displays largely nickel-white surfaces with a small streak of reddish-orange crossing the TE of UNITED. The reverse shows a late state of the dies with a crack connecting the D of UNITED with the top of STATES, while the obverse shows even more extensive cracking, particularly in the area of the coronet and to the left of the date. The stars are surprisingly sharp. Population: 39 in 66 (10 in 66+), 0 finer (1/16). NGC ID# 22PJ, PCGS# 3845

### 1885 Liberty Nickel, Rose-Gold MS66 Engaging Luster

**3120 1885 MS66 PCGS.** Fairly uniform rose-gold patina enlivens surfaces that dance with engaging luster and show near-immaculate preservation on this Premium Gem key-date Liberty nickel. The strike is extremely well brought up even on the lower-left wreath ear of corn, and only a small dark tick shows on Liberty's neck, not at all consequential. A virtually unimprovable example. Population: 30 in 66 (2 in 66+), 3 finer (1/16). NGC ID# 2773, PCGS# 3846

### 1886 Nickel, MS65 Popular Key Issue

**3121 1886 MS65 NGC.** The 1886 nickel is an absolute as well as a condition rarity. Only 3.3 million pieces were struck with few set aside at the time of issue, especially in high grade. This Gem has a hint of blue to its light steel-gray patina and deeper colors on the rims. On the obverse, prominent die cracks circle through stars and date. Census: 28 in 65, 3 finer (12/15). NGC ID# 277U, PCGS# 3847

**1886 Liberty Nickel, MS65+  
Few Are Finer at PCGS**

- 3122 1886 MS65+ PCGS.** While the 1885 is the higher-visibility coin in the series, the 1886 is of nearly equal scarcity — and its rarity exceeds that of its more famous counterpart in Gem or finer grades. This high-end Gem example shows sharply defined features in all areas, including a moderate amount of detail on the ear of corn at the lower left portion of the wreath, as well as entirely sharp centers on the obverse stars. A thin veil of silver-gray toning covers each side with glowing, satin-like mint luster underlying the light layering of color. The present coin is an exceptionally well-preserved example with lovely, problem-free surfaces. Population: 42 in 65 (1 in 65+), 8 finer (1/16). NGC ID# 277U, PCGS# 3847

**1887 Nickel, Stunning Premium Gem  
Plus-Graded and CAC Endorsed**

- 3123 1887 MS66+ PCGS. CAC.** This exceptional MS66+ 1887 Liberty nickel features brilliant frosty luster beneath beautiful gold toning. The ear of corn in the left branch of the wreath presents virtually full details. In fact, this piece would qualify for the “Full Corn” designation if such a thing existed, but more importantly, the strike is full throughout both sides. A light wash of pinkish color prevails on both sides, with a thin band of deeper orange on the lower reverse. One of 15 MS66 coins with the CAC green approval sticker, and one of three with the important PCGS Plus designation. Population: 26 in 66 (3 in 66+), 3 finer (1/16). NGC ID# 22PL, PCGS# 3848

**1896 Five Cent, Exceptional MS66+  
Conditionally Rare Issue**

- 3124 1896 MS66+ PCGS. CAC.** The 1896 Liberty nickel is a slightly scarcer date in Mint State, and it becomes genuinely rare at the Premium Gem grade level. Its scarcity in relation to most other issues from this period is proportionate to its slightly lower mintage of fewer than 9 million pieces, this being the last of three unusually low mintages for the decade. This high-end representative displays unusually frosty, silvery-gray luster with hints of champagne and ice-blue color seen when turned in-hand. The strike is essentially sharp, save for the lower-left portion of the wreath that exhibits some of the typical softness. Surface flaws are undetectable to the unaided eye. Plus-graded by PCGS and CAC endorsed. Population: 23 in 66 (3 in 66+), 0 finer (1/16). NGC ID# 277B, PCGS# 3857

**1912-S Liberty Nickel, MS66  
None Certified Finer at Either Service**

- 3125 1912-S MS66 NGC.** The challenge of locating a 1912-S nickel in high grade is accentuated by the issue's tendency to be poorly struck. It was the San Francisco Mint's first attempt at regular production with the hard nickel alloy, and many of the striking problems that affected the Philadelphia Mint in the 1860s were now apparent at the Western facility. This Premium Gem example is typically soft on the corn ear to left of the wreath bow, but the stars and portrait are well-defined. Iridescent golden toning blankets satiny luster on each side, while the overall appearance delivers the mildly glossy patina that is characteristic of this issue. Census: 13 in 66 (1 in 66+, 1 in 66 ★), 0 finer (12/15). NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, Attractive MS66  
Among the Finest at PCGS**

**3126 1912-S MS66 PCGS.** The Liberty design was retired after 1912 (aside from the uncollectible, clandestine 1913 issue) and a meager mintage of 238,000 nickels was produced at the San Francisco Mint that year. This well-detailed Premium Gem displays nicely preserved lustrous surfaces under attractive shades of magenta toning. Population: 33 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 277R, PCGS# 3875

**1912-S Liberty Nickel, Pastel-Toned MS66**

**3127 1912-S MS66 PCGS.** A beautifully toned Premium Gem example of this late-series key-date S-mint, showing pale pastel hues of lilac, rose, and pale blue. The strike is typical of the issue but the preservation and eye appeal are remarkable on this coin, separating it from most of the (few) survivors at this level. A Registry Set essential, impossible to upgrade at either service. Population: 33 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 277R, PCGS# 3875

**PROOF LIBERTY NICKELS**

**1885 Liberty Nickel, PR66+ Deep Cameo  
Strong Eye Appeal**

**3128 1885 PR66+ Deep Cameo PCGS. CAC.** Profound contrast provides this high-end Premium Gem representative with a tremendous degree of visual appeal. Tiny splashes of golden toning are present on this sharply struck piece. A retained lamination appears on the obverse near 2 o'clock and extends into Liberty's hair. Population: 2 in 66 (1 in 66+) Deep Cameo, 0 finer (1/16). NGC ID# 277T, PCGS# 93883

**1897 Liberty Nickel, PR68 Cameo  
Outstanding Registry Set Candidate**

**3129 1897 PR68 Cameo PCGS. CAC.** A nominal mintage of 1,938 proof Liberty nickels was accomplished in 1897, making the issue challenging, but still obtainable, in grades up to the Premium Gem level. Specimens that grade better than PR66, with Cameo surfaces, are condition rarities. The present coin is among the finest survivors of this popular issue. This piece possesses incredible eye appeal to complement its unsurpassed technical quality, with deeply mirrored fields that contrast dramatically with the razor-sharp, frosty design elements. As expected from the lofty grade, the brilliant surfaces are virtually pristine, with just the slightest hint of pale gold toning at selected angles. Population: 3 in 68 Cameo, 0 finer (1/16). NGC ID# 2787, PCGS# 83895

## BUFFALO NICKELS

### 1920-D Buffalo Nickel, MS65+ Few Known So Fine

- 3130 1920-D MS65+ PCGS. CAC.** Pale blue covers the portrait, giving way to darker tones before exiting the rim with a yellow-brown color. There are a few ticks in the center, and the surfaces at the periphery are smooth. Gold graces the high points of the reverse.

The 1920-D Buffalo nickel is a difficult issue to find well-struck, as the present example indicates by its central softness, but is also scarce in Gem condition. This Plus-designated example will excite the Registry collector, as numerically finer representatives are extremely rare. Population: 74 in 65 (4 in 65+), 3 finer (1/16). NGC ID# 22RR, PCGS# 3945

### 1921 Nickel, Boldly Struck MS67 Impeccable Preservation

- 3131 1921 MS67 PCGS.** The surfaces show a frosty texture throughout and show no more than a hint of gold-rose patina amid thick, rich luster and impeccable preservation. Despite a large mintage exceeding 10 million coins, few examples of the 1921 Buffalo survive nearly so fine as this Superb Gem. A small die crack runs from the Indian's brow through E in LIBERTY to the rim. The strike is quite bold as well. Population: 27 in 67, 0 finer (1/16). NGC ID# 22RT, PCGS# 3947

### 1926-D Buffalo Nickel, MS66 Strike and Condition Rarity

- 3132 1926-D MS66 PCGS. CAC.** Although the 1926-S is more challenging overall, the 1926-D remains an elusive issue in Gem condition or finer, especially with the level of definition seen here. The *Guide Book* flags this issue as one where "Uncirculated pieces with full, sharp details are worth considerably more," and this coin's rounded horn testifies to an above-average strike. Only a hint of softness occurs on the bison's shoulder and tail. Satiny luster radiates over nickel-gray surfaces that show hints of orange at the margins. Population: 27 in 66 (3 in 66+), 1 finer (1/16). Ex: *Central States Signature* (Heritage, 4/2013), lot 4161. NGC ID# 22S6, PCGS# 3958

### 1927-D Nickel, MS65+ Seldom Available Any Finer

- 3133 1927-D MS65+ PCGS. CAC.** The strike and natural appeal of this high-end Gem nickel are outstanding. The Bowers reference describes the 1927-D as "poorly detailed to minimally average," yet this coin is remarkably bold for the issue. The worn dies were often widely spaced, contributing to weakness in the centers and die erosion at the borders — two distractions not seen on this example. The nickel-gray surfaces are satin-smooth, essentially mark-free, and attractive, with a hint of warmth from occasional pale champagne-gold overtones. A Plus-graded Gem with CAC endorsement. Population: 71 in 65 (5 in 65+), 5 finer (1/16). NGC ID# 22S9, PCGS# 3961

---

**1928-S Buffalo Nickel, Pastel-Toned MS65+**

- 3134 1928-S MS65+ PCGS.** Pastel hues enliven the surfaces of this sharply struck Gem in shades of amber, pale blue, and violet, creating an extremely eye-appealing composition. This issue is far more elusive in top grades than generally thought. A different toned example in this exact grade and service in our December 2015 auctions brought \$4,888. Population: 78 in 65 (4 in 65+), 11 finer (1/16). NGC ID# 22SD, PCGS# 3965

---

**PROOF BUFFALO NICKELS**

---

**1913 Type Two Nickel, Pastel-Toned PR67+  
Tied for Finest at PCGS**

- 3135 1913 Type Two PR67+ PCGS.** Fantastic pastel color embellishes both sides of this Superb Gem proof Buffalo, including amber-gold, rose, violet, and ice-blue hues amid top-notch preservation and the expected bold proof strike. Both the eye appeal and the lack of mentionable distractions put this piece — tied for finest graded at PCGS — far above most survivors from its cohort. Population: 57 in 67 (3 in 67+), 7 finer (1/16). NGC ID# 278S, PCGS# 3990

---

**1937 Buffalo Nickel, Brilliant PR68  
Full Strike, Exceptionally Mirrored Fields**

- 3136 1937 PR68 PCGS.** Deep pools of reflectivity reach out from the immaculately smooth mirrored finish that surrounds the raised elements of this stunning, untuned proof nickel. At the same time, the central devices compete for attention by virtue of their pinpoint-sharp, full strike.

PCGS has certified one nickel in a numerically finer grade, although from a technical standpoint it is hard to imagine a more well-produced proof than this glittering Superb Gem. There are simply no problems, defects, or interruptions to its pristine condition and quality. Population: 28 in 68, 1 finer (1/16). NGC ID# 278Z, PCGS# 3996

---

**1937 Buffalo Nickel, PR68  
Only One Finer at Either Service**

- 3137 1937 PR68 PCGS.** The fact that a solitary 1937 proof Buffalo nickel is certified in a finer grade makes one wonder what that coin must be like, given the seemingly unsurpassable quality of the present example. A whisper of high-point gold warms the icy silver radiance, and the fields display smooth reflectivity to counterbalance the deeply impressed motifs that are fully detailed to virtually the last hair strand. Population: 28 in 68, 1 finer (1/16). NGC ID# 278Z, PCGS# 3996

---

**1937 Buffalo Nickel, Exquisite PR68  
Razor-Sharp and Beautifully Toned**

- 3138 1937 PR68 PCGS.** The brilliant format proof finish struck in 1936 carried over to 1937, and was welcomed by collectors. The present coin is an exceptional representative of the PR68 grade, set apart by nuances of strike and eye appeal that make all the difference at this lofty grade. Even the most subtle hair strands are well-defined above the fully struck braid knot. The bison reveals an equally full-detailed strike, with both sides deeply mirrored and with ice-blue toning surrounded by pale-gold, rose, and lilac accents. Population: 28 in 68, 1 finer (1/16). NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

1939 Jefferson Nickel, MS67 Full Steps  
Doubled Monticello, FS-801

- 3139 1939 Doubled Monticello MS67 Full Steps PCGS. FS-801.** This delightful Superb Gem offers sharply detailed design elements throughout, with full steps definition on the reverse. The brilliant surfaces are impeccably preserved and radiate vibrant mint luster on both sides. The reverse is strongly doubled, with the effects most apparent on the lettering in MONTICELLO and FIVE CENTS. The right side of the building also shows significant doubling. The FS-801 is a popular *Cherrypickers* variety and is listed on page 135 of the 2016 *Guide Book*. Sought-after in all grades and conditions, the FS-801 is particularly elusive in high grade, and specimens always command high premiums. This variety is only seen on coins with the Reverse of 1940. The present coin is the single-finest certified example of this rare variety (12/15). NGC ID# 22T8, PCGS# 84004

1942-D Nickel, MS66 Full Steps  
D Over Horizontal D, FS-501

- 3140 1942-D D Over Horizontal D, FS-501, MS66 Full Steps PCGS.** The mintmark was initially punched into the die in a horizontal position and then corrected on this immensely popular *Guide Book* and *Cherrypickers* variety. The FS-501 is extremely difficult to locate in high grade and Mint State examples always command extraordinary premiums.
- The present coin is a spectacular Premium Gem, with sharply detailed design elements that show Full Steps definition on Monticello. The repunched mintmark is easily detected. The well-preserved surfaces radiate satiny mint luster, under delicate shades of champagne-gold toning. This coin is the single-finest example seen at either of the leading grading services (12/15). NGC ID# 22TL, PCGS# 38496 Base PCGS# 84015

## PROOF JEFFERSON NICKEL

1971 No S Nickel, PR69 Deep Cameo  
Sought-After Error Proof Issue

**3141** 1971 No S PR69 Deep Cameo PCGS. Reflective fields and nickel-rose devices provide optimal contrast on this error S-less proof nickel. Probably no more than a few hundred examples are known in all, although records are lacking. The No S proof coins are a specialized pursuit, but some collectors run avidly after these pieces on the rare occasions when they surface at auction. Deep Cameo examples such as this piece are among the rarest of the rare. Population: 6 in 69 Deep Cameo, 0 finer (1/16). NGC ID# 22YN, PCGS# 94204

## SEATED HALF DIMES

### 1838-O No Stars Half Dime, Brilliant MS66+ Single Finest Certified Example

**3142** 1838-O No Stars MS66+ PCGS. CAC. V-1. It was a transitional year for half dime production in 1838. The New Orleans Mint struck the only No Stars half dimes produced at any mint for the year — just 70,000 pieces — and as a result, the 1838-O half dime is the only O-Mint of the No Stars type. While the Philadelphia Mint struck 2,225,000 half dimes in 1838, all were of the new With Stars design including both Large Stars and Small Stars varieties.

This is an all-brilliant example with extraordinary mint luster. The 1838 New Orleans half dimes are often associated with satiny or lackluster surfaces and low eye appeal, yet the present coin displays exceptional bright, frosted luster. It is from the Valentine-1 variety, easily attributed by the die crack through the bottom of the mintmark and by the first 8 in the date obviously recut north.

Three die cracks appear on the obverse. One travels from the edge of the coin to Liberty's right shoulder, one from the edge toward Liberty's nose, and a small one from the edge to the top of Liberty's head. No obvious imperfections occur on the reverse, although the die seems heavily rusted. Die clashing is visible to a small extent on both sides.

This is the sole finest example at either service, followed by a single MS65 at NGC as second-finest and four examples in MS64 at PCGS, suggesting it is likely an impossible task to exceed this coin as the finest 1838-O half dime known. Population: 1 in 66 (1 in 66+), 0 finer (1/16).

Ex: Joseph O'Connor (11/2005); The Eugene H. Gardner Collection Part II (Heritage, 10/14 as MS66 PCGS, CAC, without the Plus designation), lot 98181. NGC ID# 232N, PCGS# 4314

**1853 Arrows Half Dime, MS67  
None Certified Finer**

- 3143 1853 Arrows MS67 NGC.** The entire half dime series from 1794 to 1873 lacks another issue that challenges the 1853 Arrows in terms of availability. More than 13.2 million coins were struck after a reduction in silver weight was authorized to stimulate their circulation. The 1853 Arrows is also the first of a three-year type, reducing the supply relative to demand, especially in high grade. This top-graded, lightly toned Superb Gem offers orange, violet, and lavender hues intermixed over each side with windows of brilliance. Well-struck and frosty with a touch of strike softness on the upper wreath leaves. Census: 23 in 67 (8 in 67 ★), 0 finer (11/15). NGC ID# 233Y, PCGS# 4356

**1857 Seated Half Dime, MS67  
Tied for Finest at PCGS**

- 3144 1857 MS67 PCGS. CAC.** The 1857 was struck to the extent of nearly 7.3 million coins, and examples only become conditionally rare in MS67. Still, one cannot help but marvel at the impeccable preservation of this Superb Gem. Specks of olive toning visit the radiant, frosty silver surfaces. Intense silver luster flows across both sides. Struck from lightly clashed dies (faintly visible on the reverse), only slight peripheral softness occurs on each side. CAC endorsed. Population: 8 in 67 (1 in 67+), 0 finer (1/16). NGC ID# 233S, PCGS# 4365

**1860 Half Dime, MS66  
Transitional Judd-267 Pattern**

- 3145 1860 Transitional, Judd-267, Pollock-315, R.4, MS66 PCGS. CAC.** This transitional issue could be described as “Stars Obverse, Legend Omitted Reverse,” as the back side only displays the HALF DIME denomination within a wreath. Only 100 of these coins were struck during the transition of moving the legend UNITED STATES OF AMERICA to the obverse. This lovely Premium Gem shows deep multicolor patina on each side with excellent preservation and a bold strike, save for the usual weakness on the lower reverse. Population: 9 in 66 (1 in 66+), 9 finer (1/16). NGC ID# 2346, PCGS# 4373

**1866 Seated Liberty Half Dime, MS67+  
Tied for Finest Certified**

- 3146 1866 MS67+ PCGS Secure. CAC. Ex: Simpson.** This high-end Superb Gem displays sharply detailed design elements throughout, with interesting clash marks on both sides. Close inspection reveals no mentionable distractions and vibrant, satiny mint luster radiates from both sides. A few hints of pale gold toning add to the outstanding eye appeal. Population: 3 in 67 (2 in 67+), 0 finer (1/16). NGC ID# 234J, PCGS# 4388

## PROOF SEATED HALF DIMES

1841 Half Dime, Attractive PR65  
Tied for Finest Graded, Ex: Gardner

**3147** 1841 PR65 NGC. CAC. V-1. Russet, pale blue, and silver-white areas alternate to splendid effect on this attractive Gem proof 1841 half dime, one of perhaps eight to 10 known to survive of this early proof issue. A full strike is in evidence throughout both sides. NGC reports one each in PR63, PR64, and two in PR65. PCGS shows one each in PR63 and PR63 Cameo, making a total of six *grading events* between the two services — not necessarily all separate coins. In any case, this piece is tied for finest graded, at a minimum, and is the finer of only two with the CAC green approval sticker (12/15).

Developing rosters of distinctly different survivors of these early proofs is not for the faint of heart; some examples trade privately or stay in one collection for decades. Others appear at auction in old catalogs with minimal descriptions and poor (or no) photographs, making their documentation and identification virtually impossible. Although we find six separate grading events for the 1841 proof half dime, the number of survivors could be as low as five or as high as 10, although we lean in the direction of the lower number.

Ex: Boys Town (Bowers and Merena, 3/1998), lot 501; Eugene H. Gardner Collection, Part II (Heritage, 10/2014), lot 98212. NGC ID# 2359, PCGS# 4417

1852 Half Dime, Richly Toned  
Early Gem Proof Rarity  
One of Perhaps 10 Proofs Minted

**3148** 1852 PR65 PCGS. CAC. This carefully preserved, richly toned Gem comes from an estimated mintage of a mere 10 proofs. The coins were struck several years prior to Mint Director Snowden's push to popularize proof coinage and make them more widely available to collectors. In 1852, proofs were still produced on an "as-needed" basis, whenever requested by a collector.

Dense, obviously original sea-green and copper-red toning dominates both sides, but iridescent accents of gold and purple-rose are also noteworthy. The design details are razor-sharp, and bright reflectivity becomes evident beneath the deep patina when the piece is rotated under a lamp. A few wispy die striations occur on the obverse and reverse alike (creating the brightness in the fields), but the pleasing surfaces are free from bothersome contact marks. The proof 1852 half dime is a rare coin in any grade. This piece is among the finest known in addition to being the sole PR65 certified by PCGS. NGC has graded two coins at PR65, with one finer. PCGS reports a single finer proof specimen as PR66 (12/15). Population: 1 in 65, 1 finer (12/15).

Ex: FUN Signature (Heritage, 1/2007), lot 854. NGC ID# 235K, PCGS# 4429

1856 Half Dime  
Rare Gem Proof

**3149** 1856 PR65 NGC. A speckling blue and olive-gray toning covers the underlying champagne-gold coloration of this reflective Gem half dime. The Valentine-2 variety shows a high date, positioned far to the right of the shield tip. Fully struck on the bow knot and obverse stars, only Liberty's forecurls show blending. The PCGS Coin Facts mintage estimate of 50 proofs does not take attrition into account, and we believe perhaps 30 to 40 proofs of the 1856 proofs survive in all grades. Census: 8 in 65, 6 finer (11/15). NGC ID# 235L, PCGS# 4434

## EARLY DIME

### 1796 Dime, JR-4, MS65 Outstanding Prooflike Surfaces Condition Census, Ex: Eliasberg

**3150** 1796 JR-4, R.4, MS65 NGC. Ex: Eliasberg, where this coin was described as “fully prooflike and possibly a presentation piece.” The prooflike surfaces remain, with frosted devices set against mirrored fields, and translucent golden toning at the margins. If not a special strike, the coin is undoubtedly produced from fresh dies with extra care. The portrait of Liberty and the Small Eagle are fully detailed even on the extreme central high points. In fact, this coin has one of the sharpest renditions of the Small Eagle and its supporting legs, talons, clouds, and surrounding wreath we have seen. The peripheries are not as boldly rendered. Struck on an overweight planchet, light adjustment marks are visible with a glass on the reverse margin at AMERICA. Slight peripheral weakness is seen here, as well as on the opposing obverse border where minor misalignment of the dies results in slight weakness at the dentils and on stars 9 through 13.

Other memorable JR-4 dimes include the former Garrett coin, sold by Bowers and Ruddy Galleries in 1980 — a toned coin, also of Gem quality. Both the current coin and the Garrett specimen show the 6 in the date with bold recutting, the secondary 6 positioned well below the primary digit with the curl and ball of the underdigit lightly effaced. This feature is not mentioned in *Early United States Dimes 1796 - 1837* and may be visible only on the high-grade examples of the variety.

The Seated dime reference further suggests that only 10% of all 1796 dimes are the JR-4 variety. If so, the current population reports combining all varieties need to be viewed with that estimate in mind, suggesting this outstanding dime is one of two pieces at the top end of the Condition Census for the JR-4 variety. A remarkable coin with a touch of cameo contrast on each side. Census (all varieties included): 9 in 65, 10 finer (12/15).

Ex: The Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 1039. NGC ID# 236B, PCGS# 38745 Base PCGS# 4461

## PROOF BUST DIME

1828 Dime, PR63  
JR-1, Small Date  
Very Rare in Proof Format

**3151** 1828 Small Date PR63 NGC. JR-1, High R.7 as Proof. A sharply struck specimen with flashy fields and squared-off dentils. Attractively toned sea-green, ruby-red, and golden-brown. The fields are lightly clashed but lack any consequential marks. In the decades prior to the advent of third party certification, unworn early dimes with field reflectivity were frequently cataloged as proof, when they were instead well-made Uncirculated examples. True proof 1828 dimes are extremely rare. The *Dime Book* (1984) states "at least five proofs reported." NGC and PCGS combined have certified four examples with possible duplication of submissions over the years. We know of only the following modern auction appearances:

1. NGC PR65. (J.C. Morgenthau, 1/1943), lot 422; Floyd T. Starr Collection (Stack's, 10/1992), lot 355; Turtle Rock Collection (Superior, 2/2008), lot 492, which realized \$29,900.

2. Gem Proof. 60th Anniversary Sale (Stack's, 10/1995), lot 321, which realized \$22,000.

3. PR64. E.W. Ropes Collection (New York Coin & Stamp Co., 2/1899); J.M. Clapp; Clapp Estate; Louis E. Eliasberg, Sr., 1942; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 5/1996), lot 1081, which realized \$8,800.

4. Choice Proof. Lester Merkin (4/1970), lot 484; Kamal Ahwash, 4/1979; Allen F. Lovejoy Collection (Stack's, 10/1990), lot 89, which realized \$7,150.

5. NGC PR63. The present coin. NGC ID# 237M, PCGS# 4547

## SEATED DIMES

1840-O No Drapery Dime, MS64  
Rare in Mint State

**3152** 1840-O No Drapery, Small O, F-109a, R.4, MS64 PCGS. In 1840, the Mint transitioned from the No Drapery Seated Liberty obverse to the With Drapery rendition. Dime coinage at Philadelphia was split between the two types, but With Drapery dies did not arrive in New Orleans in time to make the transition in 1840. All 1.175 million O-mint dimes struck show the original No Drapery figure. Nonetheless, the 1840-O is the rarest of the No Drapery, With Stars issues in Mint State. In more than two decades, we have offered an Uncirculated example on only 10 different occasions and mostly in MS62 or lower grades. This is only the second Choice piece to appear in our auctions. The first MS64 offering was the Gardner coin (Heritage, 6/2014), lot 30246, which realized \$28,200.

This piece is visually comparable and technically equal to that example. The strike is boldly rendered, and the satiny surfaces yield soft olive-gold, lavender-gray, and russet toning. No significant abrasions are observed, and the eye appeal is pleasing. A genuine rarity in any Mint State grade and extremely rare this fine. Population: 3 in 64, 1 finer (12/15). PCGS# 537743 Base PCGS# 4574

---

1844 Seated Liberty Dime, MS66  
Famous 'Little Orphan Annie' Dime  
Single-Finest Certified Example

**3153 1844 F-102, R.4, MS66 PCGS Secure. CAC. Ex: Simpson.** Dime production at the Philadelphia Mint plummeted from 1.3 million pieces in 1843 to a mere 72,500 coins in 1844. There were few active coin collectors at this early date, so almost the entire mintage was released into circulation and probably no specimens were saved for numismatic purposes. Most examples in collector's hands are worn pieces that typically grade no finer than VF. The certified population of this issue dwindles rapidly above that level of preservation, with Mint State examples numbering just 18 coins at both NGC and PCGS combined (12/15). Thanks to the efforts of Frank C. Ross, a writer from Kansas City, the 1844 Seated Liberty dime was dubbed the "Little Orphan Annie" dime in the 1930s, a nickname that led to widespread popularity among Seated dime specialists. Recent auction sales include the spectacular MS65 PCGS example in lot 1609 of the Baltimore Signature (Heritage, 7/2008), which realized \$51,750.

The present Premium Gem is the single-finest certified example of this popular and conditionally challenging P-mint issue (12/15). Both sides are silver-gray in appearance, the obverse being semiprooflike in finish, the reverse displaying a warmly frosted texture. There are some striations (as struck) in the obverse field, neither side reveals any sizeable distractions. This coin is earmarked for inclusion in the finest collection or Registry Set of Seated Liberty dimes.

*Ex: Long Beach Signature (Heritage, 10/2001), lot 5942, as MS65 PCGS, in a green label holder, realized \$31,050; Bob Simpson Collection. Selections from The Bob R. Simpson Collection. PCGS# 537817 Base PCGS# 4585*

**1854-O Arrows Seated Liberty Dime, MS66+  
Sole Finest-Certified at PCGS**

**3154** 1854-O Arrows MS66+ PCGS. CAC. Apparently struck from a Fortin unlisted die pair or die state, showing light die clashing on the reverse but none of the diagnostic die cracks or other identifiable characteristics of the listed Fortin varieties. The 54 in the date is “open” and high.

This coin is certainly among the finest 1854-O examples that exist, with frosty, brilliant surfaces and a hint of lemon-gold patina at the rims. Virtually mark-free and fully struck, it is the only Plus-graded PCGS coin at the MS66 level with none finer. CAC endorsed. Population: 2 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 239B, PCGS# 4606

**1865-S Seated Dime, MS64  
One of Eight Known Mint State Coins  
Sole Finest at NGC**

**3155** 1865-S F-101, R.4, MS64 NGC. Extensive circulation, exportation, and melting explain the incredible rarity of this issue in Uncirculated condition, given as High R.7. Only eight examples survive in Mint State from a mintage of 175,000 coins. Such pieces are highly prized and rarely appear at auction.

The issue is notorious for strike softness on Liberty’s head and the lower wreath, evident even on this Choice example. Apart from the typical incompleteness, the remaining design features, including the upper wreath, are well-detailed. Mottled crimson, olive, and golden-tan hues intermingle with areas of brilliance. The coin is lightly abraded for the grade with no singularly distracting marks. Given the extreme Mint State rarity, we expect Seated dime specialists to quickly seize this opportunity. Census: 1 in 64, 0 finer (1/16).

Ex: Frog Run Farm Collection (*American Numismatic Rarities*, 11/2004), lot 602; *The Eugene H. Gardner Collection, Part IV* (Heritage, 10/2015, as MS63 NGC), lot 98266. PCGS# 538206 Base PCGS# 4642

**1873 Open 3 No Arrows Dime, MS64**  
Attractive Original Toning

- 3156** 1873 Open 3, No Arrows, F-102, R.3, MS64 PCGS. The Open 3 1873 Seated dime is rare in Mint State. Only 60,000 pieces were struck, and few escaped attrition. This Choice example offers well-struck motifs and satiny luster. Natural progressions of toning begin with aquamarine, amber, and gold at the borders and lighten to champagne-gray in the centers. A few small abrasions limit the grade but pose little distraction for the MS64 level. Population: 3 in 64, 1 finer (12/15). NGC ID# 23AB, PCGS# 538296 Base PCGS# 4660

**1879 Dime, Prooflike MS68**  
Repunched Date

- 3157** 1879 Repunched Date, F-104a, R.4, MS68 NGC. Fully prooflike fields and modest obverse contrast are the hallmarks of this remarkable 1879 Seated dime, struck from a retired proof die pair. Repunching of the 18 in the date confirms the variety. This high-end Superb Gem circulation strike lacks the razor-sharp definition of a proof, confirming its origin as occurring after the die pair was retired from proof coinage. Both sides show lovely ocean-blue, violet, and golden toning and are devoid of abrasions. Only a handful of pieces are known this fine, and none surpass this level. Census: 5 in 68, 0 finer (11/15). NGC ID# 23AS, PCGS# 538642 Base PCGS# 4687

**1884-S Seated Dime, MS66**  
Few Known So Fine

- 3158** 1884-S F-101, R.4, MS66 PCGS. CAC. During the 1880s, most branch mint resources were devoted to the production of millions of standard silver dollars as mandated by the Bland-Allison Act of 1878. Almost no quarters or halves were struck in San Francisco during this period (the exception being the 1888-S quarter), and only limited emissions of dimes were paid out from that facility. In 1884, S-mint dime coinage amounted to little more than 564,000 pieces. This issue is a rarity today in Uncirculated condition and is almost never seen at the Premium Gem level. The present piece is remarkable. Liberty's figure and the wreath show excellent definition, set amid frosty luster toned in champagne-gray and aquamarine hues. There are no bothersome abrasions, and the eye appeal is outstanding. Population: 3 in 66, 1 finer (12/15). PCGS# 593526 Base PCGS# 4693

1888-S Dime, Sharply Struck MS67  
Important Condition Rarity  
The Finest Certified

**3159** 1888-S F-106, R.3, MS67 PCGS. The Fortin-106 variety is attributed by a High Date that has a slight downward slope, and a centered Medium S mintmark with a slight left tilt. Both sides are peripherally toned in dappled orange-russet and cobalt-blue colors, and each side is richly frosted. The central motifs display frosty silver luster beneath ivory-gold toning.

Overall, the design elements exhibit an above-average strike. Liberty's head is sharply defined for the issue, a significant attribute, as the 1888-S normally is found weakly struck there. There are no grade-limiting abrasions — all factors that confirm the Superb Gem grade, making this the finest-certified example at either service. Population: 1 in 67, 0 finer (1/16). PCGS# 538787 Base PCGS# 4701

PROOF SEATED DIMES

1837 Seated Dime, PR63  
No Stars, Large Date, F-101

**3160** 1837 No Stars, Large Date, F-101, R.7, PR63 PCGS. Just one die pair was used to strike both proof and commercial 1837 Large Date dimes. The proofs came first, since they lack the prominent diagonal obverse die cracks often seen on business strikes. The mintage of proofs is unknown, but Breen (1989) estimated 30+ specimens were coined June 30, 1837, presumably to commemorate the advent of the Seated Liberty type. The present fully struck and nicely mirrored Select dime displays cream-gray motifs and peach-gold fields. The margins exhibit lavender and ruby-red toning. Incidental field contact corresponds with the designated grade. PCGS# 538978 Base PCGS# 4718

**1855 Arrows Dime, PR64 Cameo**  
Important Proof Rarity

**3161 1855 Arrows, F-101, R.7, PR64 Cameo PCGS. CAC.** The proof 1855 Seated dime is a known rarity, but the number of surviving examples may actually be lower than generally thought. The PCGS estimate is 15 to 20 coins, a figure which is supported by the combined PCGS and NGC certified population of 31 submissions in all grades. In practice, however, this issue proves more elusive than is suggested by these figures. We have offered an example on 31 different occasions since our records began in 1993, but with only 12 individual coins represented. A 13th piece resides in the Smithsonian. Even if a few others are hidden somewhere, this proof Seated dime issue is a major rarity, with the total population likely residing near the low end of the PCGS estimate of 15 to 20 coins.

This piece is fully struck, with delightfully bright mirroring in the fields. Tinges of peripheral blue accent champagne interiors, delivering a high degree of eye appeal for the grade. Close study with a glass reveals faint marks in the mirrors, but none are discernible to the naked eye. The attractive toning pattern will have to suffice for pedigree purposes. Population: 2 in 64 Cameo, 0 finer (12/15). PCGS# 538995 Base PCGS# 4744

**BARBER DIMES**

**1896-S Barber Dime, MS66**  
Unavailable in a Higher Grade

**3162 1896-S MS66 PCGS.** Many of the branch mint dimes from the 1890s are low-mintage issues and they are usually quite scarce in high grades. The 1896-S is a classic condition rarity of the series, with coins grading MS65 or finer extremely scarce. The issue is unobtainable any finer than MS66. This mark-free Premium Gem example displays strong satiny luster and delightful lilac-gray patina. The strike is sharp as a tack. Population: 17 in 66 (2 in 66+), 0 finer (1/16). NGC ID# 23E2, PCGS# 4811

**1913-S Barber Dime, MS67**  
Iridescent Colors, Frosty Luster

**3163 1913-S MS67 PCGS. CAC.** The 1913-S dime is a relatively well-saved and well-preserved issue despite its low mintage of just 510,000 pieces. Even so, Superb Gem coins are rare and neither service reports a finer grade than MS67. The present coin is one of the small group that qualifies for highest honors. Iridescent rainbow colors embellish the borders on both sides, with slight silver-gray toning accents merging toward the centers. Frosty and lustrous surfaces show no significant marks and a sharp strike. Population: 6 in 67 (2 in 67+), 0 finer (1/16). NGC ID# 23FS, PCGS# 4864

**PROOF BARBER DIMES**

**1911 Barber Dime, PR67+ Cameo**  
Remarkably Low Mintage

**3164 1911 PR67+ Cameo PCGS. CAC.** The 1911 Barber dime is notable because of its low proof mintage of only 543 pieces. It is moderately available as a date, but remarkably unavailable with cameo contrast. This is a distinctly contrasted proof striking with deeply reflective mirrors in the fields. Each side is mostly brilliant with just the slightest tinge of golden peripheral color. Problem-free, of course. Population: 6 in 67 (1 in 67+) Cameo, 3 finer (1/16). NGC ID# 23GS, PCGS# 84895

**1912 Barber Dime, PR67+**  
Fantastic Toning, Impressive Eye Appeal

**3165 1912 PR67+ PCGS.** A fantastic coin for toning lovers, this piece would get a Star designation at NGC but is already a PR67+ at PCGS, showing a combination of iridescent and pastel patina, the rims cherry, gold, ocean-blue, and fuchsia, the interiors pale blue, orange, light brown, and canary-yellow. Impeccable preservation complements impressive eye appeal. Population: 10 in 67 (3 in 67+), 0 finer (12/15). NGC ID# 23GT, PCGS# 4896

## MERCURY DIMES

### 1917-D Mercury Dime, MS66 Full Bands None Numerically Finer at PCGS

- 3166** 1917-D MS66 Full Bands PCGS. From a mintage of 9.4 million pieces, the 1917-D Mercury dime is seldom encountered at the Premium Gem level, with Full Bands definition on the fasces. This remarkable specimen exhibits fully split and rounded bands, and the impeccably preserved surfaces are visited by attractive shades of greenish-gold, lavender-gray, and amber toning. Population: 14 in 66 (2 in 66+) Full Bands, 0 finer (1/16). NGC ID# 23H3, PCGS# 4913

### 1921 Dime, MS65 Full Bands Delicately Toned, Sharp Key Issue

- 3167** 1921 MS65 Full Bands PCGS. CAC. The high-point strike is just a whisper short of full on the central hair curls and at the lower third of the date numerals, but overall this key Philadelphia Mint representative is extremely sharp for a 1921 despite some minor peripheral die wear. Attractive steel-blue toning glows with vibrant mint luster. CAC endorsed. Just 1,230,000 pieces were struck. PCGS reports only 47 pieces graded numerically finer (12/15). NGC ID# 23HE, PCGS# 4935

### 1928-S Dime, MS66 Full Bands Seldom Seen So Fine

- 3168** 1928-S MS66 Full Bands PCGS. CAC. A challenging date in Full Bands grades and rare at the Premium Gem level. This 1928-S Mercury dime boasts sharp detail and vibrant luster with a light champagne hue. There are no significant abrasions, and the eye appeal is excellent. Extremely rare any finer. Population: 35 in 66 Full Bands, 10 finer (12/15). NGC ID# 23HZ, PCGS# 4971

### 1939-D Dime, MS69 Full Bands Tied for the Finest Mercury Dime Known

- 3169** 1939-D MS69 Full Bands PCGS. Without exception, every known Mercury dime at the MS69 Full Bands grade level resides in this single 1939-D issue, making this date singularly important among type collectors who must simply have only the best. PCGS lists 21 pieces in this grade and NGC five (12/15). This representative showcases vivid amber-red, gold, and olive-green toning over the upper and lower obverse with a band of silver brilliance stretching across the center from 9 to 3 o'clock: a distinctive toning pattern that we have seen on several other high-end examples of this date — could they all be from the same source? The reverse shows similar peripheral hues and a frosty, brilliant center. The strike is sharp, and the surfaces are virtually flawless to the human eye. NGC ID# 23JS, PCGS# 5019

### 1945-S Dime, MS67 Full Bands Scarce Micro S Mintmark, FS-512

- 3170** 1945-S Micro S, FS-512, MS67 Full Bands PCGS. Most Mercury dime collectors eschew the various mintmark size varieties on San Francisco issues from the 1940s. But specialists in the series make an exception for the distinctive 1945-S Micro S. The tiny mintmark punch was not used on any other issue during the 1940s. This well-struck example displays variegated forest-green and golden-brown obverse toning. The reverse is brilliant aside from peripheral chestnut patina, and displays a few minor field grazes. Population: 34 in 67 (2 in 67+) Full Bands, 3 finer (1/16). Ex: FUN Signature (Heritage, 1/2015), lot 3917. NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

## PROOF MERCURY DIME

1941 Mercury Dime, Unimprovable PR69  
Immaculate Preservation

**3171 1941 PR69 NGC.** A remarkable display of iridescent rainbow toning embraces the smoothly brilliant silver center on the obverse, while the reverse is less dramatically toned but equally pristine and attractive.

As expected, the surfaces are fully struck and essentially flawless, befitting the MS69 grade that makes this one of the two finest 1941 proof dimes at either service. NGC reports just seven PR69 dimes for all dates in the short proof series 1936 - 1942, while PCGS lists just one PR69, a 1942 coin. The current coin is seemingly unsurpassable for Registry Set purposes. Census: 2 in 69, 0 finer (1/16). NGC ID# 27DM, PCGS# 5076

## PROOF ROOSEVELT DIME

1968 No S Dime, PR68 Cameo  
Among the Rarest No S Proof Errors

**3172 1968 No S PR68 Cameo PCGS.** The 1968 No S dime is among the most elusive of the coveted No S proof issues of various denominations — only the 1975 No S Roosevelt dime issue is rarer. It was also the first No S issue of the modern era, and one for which no records are available. It is estimated that no more than a couple of dozen were struck, and Cameo examples are the rarest graded, as Deep Cameo pieces are unknown. This gleaming example is well-contrasted and shows no more than a trace of rose color on either side. A single tick on President Roosevelt's cheek is apparently all that precludes a PR69 grade. PCGS reports only five submissions in PR68 Cameo and none finer, although a handful survive in PR67 and PR68 non-Cameo as well (1/16). The last example in this grade certified by PCGS was lot 4199 in our Central States Signature (Heritage, 4/2013), which brought \$30,550. The 1968 No S dime is listed as #3 in Scott Schechter and Jeff Garrett's *100 Greatest Modern U.S. Coins*. NGC ID# 59SA, PCGS# 85245

## TWENTY CENT PIECE

1876 Twenty Cent, MS66  
Beautifully Preserved, Short-Lived Type

- 3173 1876 MS66 PCGS. CAC.** The Philadelphia Mint produced only two business strike issues in the short-lived twenty cent denomination, the 1875 and 1876. Both experienced fairly low mintages, but the 1876 boasts the lower with a total of only 14,400 coins. The date is the second-rarest in the series overall, behind only the ultra-rare 1876-CC, and is many times scarcer in Mint State than is the 1875-S type issue. This Premium Gem example is well-struck on the eagle's legs and talons, as well as on Liberty's head and all obverse stars. Attractively blended sea-green, blue, and lavender-gray hues encompass each side, giving this beautifully preserved coin a high degree of eye appeal. Population: 15 in 66 (2 in 66+), 3 finer (12/15). This is among six of this date with the CAC green approval sticker.  
*Ex: Beverly Hills Signature (Heritage, 11/2014), lot 3668, which realized \$16,450. NGC ID# 23R8, PCGS# 5299*

## PROOF TWENTY CENT PIECE

1875 Twenty Cent, PR66  
First-Year Issue, Multihued Toning

- 3174 1875 PR66 NGC.** The introduction of the twenty cent series saw a P-mint production of 38,500 coins for commerce, complemented by a run of 1,200 proofs. The facility would only manufacture circulation strikes again in 1876, while it continued to issue proofs through 1878. This marvelous Premium Gem twenty cent has mottled multihued toning that includes elements of orange, violet, blue, and green. Nearly unsurpassed preservation and an expectedly bold impression heighten the appeal. Census: 18 in 66, 1 finer (1/16). NGC ID# 27GZ, PCGS# 5303

## BUST QUARTERS

1815 B-1 Quarter, MS64  
Colorful Capped Bust Type Coin

- 3175 1815 B-1, R.1, MS64 NGC.** Rich forest-green margins encompass orange, gunmetal, and lavender centers. The strike is precise aside from blending on the claws and forehead curls. This coruscating and carefully preserved near-Gem exhibits exceptional eye appeal. 1815-dated coinage consisted of one die marriage each for the quarter, half dollar, and half eagle. Cents were likely struck that year, but bore 1814 dates. Census: 13 in 64 (1 in 64+), 14 finer (11/15). NGC ID# 23RG, PCGS# 38942 Base PCGS# 5321

1818 B-2 Quarter, MS65  
Rarely Seen Finer

**3176** 1818 B-2, R.1, MS65 NGC. Tompkins Die State 2/1. The 1818 is among the most plentiful large size Capped Bust quarters in Mint State, ideal for type representation. Yet, Gem-quality examples are seldom seen, and anything finer is rare. This piece is essentially untuned with frosty luster and bold design elements. The obverse is cracked along the upper-right periphery, but neither die is yet clashed in this moderately early state. A few faint marks on Liberty's cheek are all that preclude an even finer designation. Due to the extreme rarity of higher-grade examples, many of the MS65 coins reported by the grading services may reflect resubmissions and not actual coins. Census (all varieties included): 27 in 65, 14 finer (12/15). NGC ID# 23RH, PCGS# 38943 Base PCGS# 5322

1818/5 Quarter, Lustrous MS64  
B-3, Scarce Overdate Variety

**3177** 1818/5 B-3, R.3, MS64 PCGS. Tompkins Die State 3/2. The late die state with a light crack from the upper leaf tip to the U in UNITED. In writing *Early Quarters of the United States*, Steve Tompkins explains that the influx of Spanish two reales slowed despite increasing demand for quarter-size coins, necessitating a large production of federal quarters in 1818. A total of 361,174 pieces were struck using five obverse dies and seven reverse dies, and 10 die marriages are known for the issue. B-3 and B-1 share the same obverse die, but evidence of the underdigit 5 is more apparent on B-1. Forest-green borders surround stone-gray interiors. This well-struck representative displays coruscating luster and minimally abraded fields. Liberty's cheekbone shows a few minuscule ticks. B-3 Population: 1 in 64, 1 finer (12/15). NGC ID# 23RH, PCGS# 411648 Base PCGS# 5323

**1825/4/(2) B-2 Quarter, AU58+  
Sharply Detailed and Unblemished**

- 3178 1825/4/(2) B-2, R.2, AU58+ NGC.** An impressive borderline Uncirculated Capped Bust type coin. The minimally marked surfaces display blended jade-green, tan-gold, and cream-gray toning. Luster emerges from design elements, and the boldly struck motifs show only a trace of high point wear. Struck from perfect dies, as usual for B-2, although later die states are known including a retained cud near the arrowheads. The 1825/4/(2) B-2 is listed in the *Guide Book* as an 1825/4 variety. It is not to be confused with the rarer B-1, which the *Guide Book* lists as an 1825/2 although it is technically an 1825/4/2 variety. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

**1831 Quarter, MS63  
B-1, Small Letters**

- 3179 1831 Small Letters, B-1, R.3, MS63 PCGS.** Tompkins Die State 1/5. The Browning-1 variety is readily identified by the small, curl-base 2 of the denomination and the stem end centered over the period following C2. The reverse is rotated more than 20° in relation to the obverse. This Select Uncirculated example is richly toned in bronze, blue, and gunmetal-gray hues with reddish-gold accents. Few marks are seen on either side. Sharply struck despite the late state of the reverse die, with all of the star centers bold and the eagle's plumage fully defined. NGC ID# 23RW, PCGS# 38980 Base PCGS# 5348

**1831 Quarter, MS64  
B-5, FS-301, Repunched Date**

- 3180 1831 Large Letters, B-5, FS-301, R.3, MS64 NGC.** Repunching of the date is most obvious at the 1s, where a larger digit was impressed over smaller numerals with the serifs of the underdigits clearly visible. The 8 and 3 of the date are also repunched, although less obviously so. Star 11 shows additional repunching. Olive-gray toning covers both sides of this sharply struck quarter, with reddish-gold accents at the borders. A sharp strike is seen throughout, with no significant marks to report and soft mint luster underlying the attractive, original patina. NGC ID# 23RW, PCGS# 38984 Base PCGS# 5349

**1834 B-1 Quarter, MS64  
O Over F in OF, FS-901**

- 3181 1834 O Over F in OF, B-1, FS-901, R.1, MS64 NGC.** Cobalt-blue and plum-mauve dominate the obverse field, while the upper half of the portrait is stone-gray. The reverse is light golden-brown with glimpses of sea-green and rose-red near the rims. A sharply struck and satiny Choice quarter. Marks are absent save for minor contact on the cheek and in the field below the chin. Census (all varieties): 47 in 64 (4 in 64+), 20 finer (1/16). NGC ID# 23RZ, PCGS# 38992 Base PCGS# 5353

## SEATED QUARTERS

### 1840 With Drapery Quarter, MS66 ★ Finest Known for the Issue

**3182 1840 MS66 ★ NGC. Briggs 1-A.** Ex: Eric P. Newman Collection. The present 1840 With Drapery quarter, the sole finest certified by a grade point at either leading service, should pique the interest of many advanced collectors, both for its obvious aesthetic allure as well as its prestigious Newman pedigree. Gorgeous concentric toning on the obverse is blue-green at the rims with a fade through indigo and violet to finish in a small peach core. The sharply defined reverse is semireflective in the fields with colors appearing mostly at the borders. With its substantial all-around eye appeal, this early Seated quarter more than earns the Star designation that accompanies its lofty third-party grade. The NGC plate coin for the Coin Explorer website.

Ex: Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33362; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98330. NGC ID# 23SH, PCGS# 5397

### 1852-O Quarter, MS62 Conditionally Rare Branch Issue

**3183 1852-O MS62 PCGS. Briggs 1-B.** Smoky gold and lilac patina appears on the obverse of this rarity, while the reverse is nearly brilliant save for scattered color accents. A few small dark toning flecks show on the reverse, but generous mint luster is present there as well. Well struck save for the centers of a few of the right-side stars. The obverse is microgranular, and both sides are minimally abraded. Only 96,000 pieces were struck, with many melted since bullion value exceeded face upon issue. Population: 1 in 62, 1 finer (12/15).

Ex: Auction '88 (Superior's Session, 7/1988), lot 119; Long Beach Signature (Heritage, 9/2008), lot 1519; Central States Signature (Heritage, 4/2010), lot 2082; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98341. NGC ID# 23T9, PCGS# 5420

### 1854 Arrows Quarter, Frosty MS65 Lavender and Golden-Gray Patina

**3184 1854 Arrows MS65 NGC.** Frosty luster issues from surfaces lightly toned in pale lavender and golden-gray hues with radiant brilliance visible underneath. The peripheral devices are incompletely defined, while the centers show stronger detail. There are remarkably few blemishes even for the Gem assessment. More than 12.3 million 1854 Arrows quarters were struck, and survivors are collectible through MS64. Examples prove challenging in this high grade and very rare in MS66 or higher. Census: 20 in 65, 7 finer (1/16). NGC ID# 23U6, PCGS# 5432

---

1855-O Arrows Seated Quarter, MS67  
Pedigreed to Stickney, Eliasberg, and Gardner  
Finest Certified by Three Grade Points

**3185 1855-O Arrows MS67 NGC. CAC. Briggs 1-B.** Ex: Eliasberg. This Superb Gem 1855-O Arrows quarter is by far the finest — by three grade points — example known of this, the lowest-mintage issue among the Arrows quarter dollars; struck to the extent of only 176,000 pieces and usually seen well-circulated with a miserable strike, to boot. The satiny luster on each side is complemented by lilac and gold toning, and showing a much-sharper strike on the head of Liberty and the obverse overall than usually seen.

Beyond its obvious aesthetic and numismatic allure, this coin boasts an unusually long pedigree dating back all the way to early numismatist Matthew Adams Stickney (1805-1894) of Salem, Massachusetts, one of the first Americans known to have systematically assembled collections of American coins in several series. Stickney is well-known for his 1843 visit to the U.S. Mint in Philadelphia, where he obtained an 1804 Class I silver dollar in exchange for other rare coins. One wonders how long he owned — and how he obtained — this early O-mint Seated quarter rarity, which would have been struck when Stickney was 50 years of age.

This piece was described in the Eliasberg catalog as “MS-66 or finer,” “a superb gem, a challenge to perfection,” and a “landmark coin,” among other superlatives. It is the sole finest certified at either leading service by three grade points and boasts the coveted CAC endorsement label. Both NGC and PCGS show two in MS64 as the second-finest (12/15).

Ex: Matthew A. Stickney; *Stickney Collection* (Henry Chapman, 6/1907), lot 1195; John H. Clapp; *Clapp estate* (1942); Louis E. Eliasberg, Sr.; *Eliasberg Collection* (Bowers and Merena, 4/1997), lot 1460; later, purchased by Eugene Gardner from George Huang and Laura Sperber at *Legend Numismatics* (4/2008); Eugene H. Gardner *Collection, Part III* (Heritage, 5/2015), lot 98343. NGC ID# 49XK, PCGS# 5436

**1857 Quarter, Iridescent-Toned MS67+  
The Gene Gardner Coin**

**3186 1857 MS67+ PCGS. CAC.** Fabulous iridescent toning prevails on each side. The rim on the obverse displays concentric rings of varying shades of blue and then rose, with a golden-rose center. The reverse is sky-blue accented with rose-gold on each side. Bright underlying frosted luster only serves to make the color pop that much more. The strike is a bit soft on each side, but as expected for the extremely high grade, no mentionable contact marks appear.

This is the third time we have handled this same coin, although in its first two appearances it was in an NGC holder. It has now been crossed to PCGS at the same high grade and once again given the CAC approval — a marvelous piece, for which what we wrote twice previously still applies: “This one of those occasional numismatic treasures that we Heritage catalogers get to enjoy before the bidders — a coin that simply should not exist in so high a grade.” Population: 8 in 67 (2 in 67+), 1 finer. CAC: 9 in 67, 1 finer (1/16).

Ex: *Central States Signature* (Heritage, 4/2011), lot 5084, as MS67+ NGC, which brought \$10,350; *Eugene Gardner Collection, Part IV* (Heritage, 10/2015), lot 98436, as MS67+ NGC-CAC, realized \$10,575. NGC ID# 23TE, PCGS# 5442

**1864 Quarter, Frosty MS67  
Low-Mintage Civil War Date  
Tied for Finest at NGC**

**3187 1864 MS67 NGC. Briggs 1-A.** With the Civil War raging and circulating silver absent from (or hoarded in) most areas of the United States, the Philadelphia Mint had little reason to produce a large number of quarters in 1864. Coinage amounted to 93,600 pieces, and high-end survivors are rare. This Superb Gem representative is tied with one other as finest that NGC has seen (12/15). A comparably graded MS67 PCGS-CAC coin, lot 98351 in our *Gardner Part III Signature* (Heritage, 5/2015), garnered the attention of more than 14 different bidders who fought to achieve a final hammer price of \$35,250.

Gleaming, frosty luster with modest hints of reflectivity in the fields proceeds from both sides of this lightly toned Superb Gem. Sharply detailed features complement delicate iridescent and champagne-gold shades. Grade-limiting abrasions are virtually nonexistent.

Ex: *Santa Clara Signature* (Heritage, 11/2002), lot 7033; *Eugene H. Gardner Collection, Part IV* (Heritage, 10/2015), lot 98453. NGC ID# 23TY, PCGS# 5459

1867-S Quarter, MS64  
Uncommonly Smooth Surfaces

- 3188 1867-S MS64 PCGS.** From a mintage of just 48,000 pieces, the 1867-S Seated Liberty quarter is an elusive issue in all grades, and Mint State examples are rare, since no collector demand was present for mintmarked issues, and proofs satisfied the date sets then in vogue. The present coin is an attractive Choice specimen despite minor incompleteness of strike on the final three stars and the dentils near the date and STATES. The well-preserved and coruscating surfaces are blanketed in shades of golden-brown, lavender, and gray patina, with patches of amber on the reverse. Population: 2 in 64, 1 finer (12/15). NGC ID# 23UE, PCGS# 5471

1873 No Arrows, Open 3 Quarter, MS66  
Elusive and Beautifully Toned  
Ex: LaRiviere, Gardner, Among Finest Certified

- 3189 1873 Open 3, No Arrows, MS66 PCGS. Briggs 1-A.** Pale blue, mint, and violet tones invigorate the obverse, while the reverse shows richer crimson, gold, blue, and orange patina, and generous luster runs throughout both sides amid stunning eye appeal and excellent preservation. A coin that is basically mark-free. Briggs 1-A is clashed, most prominently near the raised arm and above the 8 in the date.

Mint State examples of this issue are available but rare. The Arrows coinage that was introduced later in the year was struck in an amount many times that of the Open 3 and Closed 3 No Arrows quarters. Population: 4 in 66, 0 finer (12/15).

Ex: Lucien LaRiviere Collection (Bowers and Merena, 5/2001), lot 1466, where the cataloger termed it "possibly the finest known of the date" (population 1 at the time); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98356. NGC ID# 23UV, PCGS# 5485

1874-S Arrows Quarter, MS67  
Tied for Finest Certified of the Type

**3190 1874-S Arrows MS67 PCGS. Briggs 1-A.** The 1874-S is one of the most plentiful issues in the brief With Motto, With Arrows Seated quarter type, a favorite for type purposes, but the number of examples surviving in MS66 or finer condition is impressively minimal. This Superb Gem is tied with four others as finest at PCGS; likely including one or more resubmissions, NGC contributes another ten coins in this grade, also with none finer (12/15). This piece is boldly struck and possesses beautifully preserved surfaces. Some light die rust on the reverse contributes to the overall frosty glow of the luster, while each side is graced by light champagne toning. Several reverse die cracks suggest a late die state. Among the finest coins known of the With Motto, With Arrows type. NGC ID# 23VY, PCGS# 5495

1876 Quarter, Rainbow-Toned MS68 ★  
Unmatched Technical Quality

**3191 1876 MS68 ★ NGC.** A production of 17.8 million coins stands as the highest-mintage quarter dollar issue between 1796 and 1919. With that record-high total in mind, consider that this MS68 ★ representative is the sole finest survivor of the 1876 date recorded at NGC or PCGS. The devices are nearly fully struck, and the surfaces fail to reveal even the faintest blemish under close inspection with a loupe. Die cracks travel around the peripheries on each side. In addition to the unparalleled technical preservation, the visual appeal is equally spectacular. Multicolor toning includes rings of gold, green, blue, magenta, and peach-orange, while frosty luster shines through the eye-catching patina. This is a must-have for the dedicated Registry Set builder. Census: 1 in 68 ★, 0 finer (12/15). NGC ID# 23V2, PCGS# 5501

1887 Seated Quarter, MS67+  
Sole Finest at PCGS

- 3192** 1887 MS67+ PCGS. CAC. Briggs 1-A. The 1887 Seated quarter is among the sought-after, low-mintage issues from the tail-end of the series, boasting a production of only 10,000 coins. Mint State examples survive in various grades but are nonetheless rare in Superb Gem condition. This Plus-designated coin is the sole finest at PCGS, and only a single MS68 coin is higher-grade at NGC (1/16). The strike is soft on the peripheral stars but well-executed on the central devices. Eye appeal is outstanding. Frosty luster illuminates lavender-gray and aquamarine toning, and the surfaces are beautifully preserved. Population: 19 in 67 (1 in 67+), 0 finer (1/16). NGC ID# 23VK, PCGS# 5519

PROOF SEATED QUARTERS

1843 Seated Quarter, PR64  
Seven Examples Traced  
Tied for Finest at NGC

- 3193** 1843 PR64 NGC. Briggs 4-E. Pre-1858 proofs are rare, but the proof 1843 quarters are especially elusive. PCGS CoinFacts estimates only six to eight examples survive in all grades. Our research has identified seven distinct specimens, including one impaired example and another in the Smithsonian Institution. The present coin combines high technical quality, intense eye appeal, and absolute rarity in one extremely attractive package. The central design elements of this spectacular Choice proof are sharply detailed, but the stars on the left are a little flat. The rims are square and the edges flat. Vivid shades of autumn-brown, plum-red, and ocean-blue toning blanket the well-preserved surfaces. The fields are flashy throughout. Census: 2 in 64, 0 finer (11/15). Ex: Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98374. NGC ID# 23W6, PCGS# 5537

1856 Seated Quarter, PR64  
Rare Proof Issue

**3194 1856 PR64 NGC.** If the razor-sharp strike, broad, squared-off rims, and reflective fields left any doubt as to the proof origin of this 1856 quarter, a die bulge under the first A in AMERICA is indisputable confirmation. The obverse shows alternating shades of blue, rose-violet, and orange-gold, while the reverse displays mostly golden patina with colorful accents near the edges. Mintage estimates for the 1856 proof quarter generally range from 25 to 30 specimens, but the 58 grading events at NGC and PCGS combined indicate traditional approximations are probably low. Either way, all proofs are rare, and this Choice example will hold a special place in any collection. Census: 6 in 64, 7 finer (1/16). NGC ID# 23WH, PCGS# 5552

1856 Quarter, PR66  
Ex: Smith, Clapp, Eliasberg  
Rare Proof Date

**3195 1856 PR66 NGC. Briggs 10-H.** Ex: Eliasberg. Dusky caramel-gold, gunmetal-blue, and forest-green toning embraces the obverse. The reverse exhibits lighter peach and pearl-white shades. The fields are deeply mirrored with sharply defined, satiny devices. All proof 1856 quarters exhibit the die bulge visible near the eagle's right (facing) wing. Walter Breen estimated perhaps 30 examples of the 1856 proof quarter survive in all grades. Census: 3 in PR66, 1 in PR67 Cameo, 1 in PR68 Cameo (12/15). Ex: Harlan P. Smith (S.H. and H. Chapman, 5/1906), lot 836; John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 1462; B & D Collection (Heritage, 4/2011), lot 5088, which realized \$19,550. NGC ID# 23WH, PCGS# 5552

1865 Quarter, PR65 Cameo  
Ex: Bruce Scher

- 3196** 1865 PR65 Cameo PCGS Secure. Ex: Bruce Scher. A scant 500 proofs were struck in the final Civil War year, and today only a handful of finer examples exist at PCGS — a situation that has not changed in at least the past 10 years. This exceptional Cameo proof displays faint champagne toning over deeply mirrored fields with frost-white central devices. Fully struck, the coin shows only a few scattered, delicate lines and a pair of tiny lintmarks. Population: 6 in 65 Cameo, 5 finer (1/16). NGC ID# 23WT, PCGS# 85561

Gobrecht, drawing on mica, with grid background

1882 Quarter, PR68 Cameo  
Tied for Finest, Ex: Newman, Gardner

- 3197** 1882 PR68 Cameo PCGS. CAC. Briggs 2-B. Ex: Newman. Deceptive prooflike business strikes exist, but the true proofs, as here, show the bottom-left serif of the 1 over the right edge of a dentil. Additionally, proofs exhibit a level date, while the 2 on the Uncirculated pieces is punched noticeably below the other digits. The mintage of 15,200 Seated quarters for circulation in 1882 was joined by 1,100 proofs. This PR68 Cameo example is at the top end of the surviving population, and the eye appeal is simply off the charts. The central obverse shows amber patina, ceding to pink, aqua, and deep purplish-charcoal near the rims, with a silver center on the reverse and similar rim colors. Similar hues encircle the reverse, leaving the interiors brilliant. The thin, iridescent bands serve to immediately identify this as a Newman coin. Population: 1 in 68 Cameo, 0 finer (12/15).  
Ex: Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33389; Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as PR68 Cameo NGC with CAC approval), lot 98393. NGC ID# 23XE, PCGS# 85583

1891 Quarter, PR68 ★ Cameo  
Top-Certified Registry Coin

**3198 1891 PR68 ★ Cameo NGC. Briggs 1-A.** The Seated Liberty quarter dollar series came to an end with the production of 600 proofs in 1891, and this PR68 ★ Cameo example is tied for finest certified at both services regardless of designation. Each side boasts electric-blue centers that cede to jade-green, yellow, and rose-violet. The effect is especially vivid on the reverse. Reflective fields, razor-sharp motifs, and nearly blemish-free surfaces are unsurprising and produce impressive contrast. This is a top-quality Superb Gem with the eye appeal to match its nearly flawless technical grade. Census: 1 in 68 ★ Cameo, 0 finer (12/15).

Ex: Eugene H. Gardner Collection, Part IV (Heritage, 10/2015, as PR67 NGC with CAC approval), lot 98548. NGC ID# 597E, PCGS# 85592

## BARBER QUARTERS

1900-O Barber Quarter, MS67  
Condition Census Coin

**3199 1900-O MS67 PCGS. CAC.** Type One Obverse, Type Two Reverse. The 1900-O Barber quarter is seldom thought of as a significant semikey date, but its scarcity in Mint State is undeniable. Gem examples are seldom seen, and finer pieces are major rarities. Based on the combined populations from PCGS and NGC, this Superb Gem example joins four other pieces beneath two finer MS68 examples to rank among the finest known.

Soft, satiny luster resides beneath concentric patina that shows warm orange-gold and amber hues in the centers, with deeper aqua-blue and rose-gray around the peripheries. The reverse arrow fletchings, as well as several obverse stars, show minor striking weakness, not unusual for this New Orleans product. Population: 3 in 67 (1 in 67+), 1 finer (1/16).

Ex: David Lawrence Rare Coins (11/1998); The Eugene H. Gardner Collection, Part IV (Heritage, 10/2015 as MS67 NGC CAC), lot 98565. NGC ID# 23YL, PCGS# 5626

1907-S Quarter, MS66  
Scarce Issue in Mint State

**3200 1907-S MS66 PCGS.** Although more than 1.3 million pieces were struck, the 1907-S Barber quarter is scarce in Mint State and notably rare at the Premium Gem level. This piece is second to few. Old-time aquamarine, champagne, and lavender-gray toning encompasses each side, and the fields showcase modest reflectivity. An area of predictable strike weakness appears on the eagle's right (facing) wing junction. Population: 8 in 66 (1 in 66+), 3 finer (12/15). NGC ID# 23ZB, PCGS# 5648

1908-D Quarter, MS67  
Tied for Finest at PCGS

**3201 1908-D MS67 PCGS. CAC.** The new *Guide Book of Barber Silver Coins* relates that Gem 1908-D quarters are "rare in relation to the generous mintage." At this level, however, they become rare in the absolute sense of the term. Beautiful shades of rose, violet, orange, blue, and green combine across the surfaces of this mesmerizing Superb Gem quarter. The colorful overlay fails to inhibit radiant satin luster from shining through, illuminating sharply detailed devices. A couple of the right obverse stars, the right talon, and fletchings show traces of incompleteness, but the impeccable preservation and eye appeal more than compensate for those typical deficiencies. Population: 4 in 67 (1 in 67+), 0 finer (1/16). NGC ID# 23ZD, PCGS# 5650

PROOF BARBER QUARTER

1902 Barber Quarter, PR68  
Distinctive Toning Scheme

**3202 1902 PR68 NGC.** Tinges of deep orange-gold and olive toning accent pale powder-blue patina on the obverse of this Premium Gem proof, while the reverse exhibits more fluid shades of violet, olive-gold, and bright orange. The design elements are fully defined throughout.

Cameo examples of the 1902 proof are seldom seen, leaving the budget-conscious collector with a small number of high-end non-Cameos from which to choose. This imbalance in the number of Cameo representatives known is a result of a change in the die preparation for proofs, which eliminated much of the field-motif contrast seen on earlier issues.

Ex: *Americana Sale* (Stack's, 1/2006), lot 1640; *Eugene H. Gardner Collection IV* (Heritage, 10/2015), lot 98610. NGC ID# 242H, PCGS# 5688

## STANDING LIBERTY QUARTERS

### 1917-D Standing Liberty Quarter, MS66+ Full Head Popular First-Year Type Two Issue

**3203 1917-D Type Two MS66+ Full Head PCGS.** Hermon MacNeil's Standing Liberty design for the quarter was modified in 1917 to include a coat of chain-mail armor over Liberty's torso. As the first year of the new design, the 1917-D is a popular date with branch mint type collectors. Despite a substantial, and generally well-produced, mintage of 6.2 million pieces, the 1917-D is an elusive issue at the MS66 grade level, with the Full Head designation.

The present coin is a high-end Premium Gem, with sharply detailed design elements in most areas. Full Head definition is apparent on this specimen, and just a touch of softness shows on a few shield rivets. The surfaces are impeccably preserved, with vibrant mint luster and just a hint of pale gold toning. Population: 21 in 66 (2 in 66+) Full Head, 3 finer (12/15). NGC ID# 2435, PCGS# 5717

### 1917-S Type Two Quarter, MS66+ Full Head Magnificent Pastel Patina

**3204 1917-S Type Two MS66+ Full Head PCGS.** Although the comparison is often made between the 1917-S and the 1917-D Type Two quarters, this issue is nearly twice as scarce as a Full Head coin than the Denver date. Magnificent patina in shades of gold, lavender, and powder-blue graces each side of this Plus-designated Premium Gem, with frosty luster percolating through. The shield lines are fully delineated and the chain mail is strong, but rivets three and four are unclear and the eagle's feathers are moderately incomplete. Field preservation is top-notch, as is the eye appeal. Population: 19 in 66 (1 in 66+) Full Head, 9 finer (1/16). NGC ID# 2436, PCGS# 5719

1918 Quarter, MS67 Full Head  
Delicate Pastel Toning

**3205 1918 MS67 Full Head NGC.** This is an outstanding 1918 quarter, showcasing not only smooth, frosty surfaces but also razor-sharp detail throughout the head, shield, stars, and gown lines. The eagle's left (facing) wing is also crisp along its leading edge. Pastel lavender, gold, and mint-green hues encompass each side, giving this coin exceptional eye appeal.

The 1918 Standing Liberty quarter is moderately available in Full Head through MS65, but Premium Gem examples are scarce. This MS67 Full Head coin is tied with just three others as the finest at NGC (12/15). A phenomenal, conditionally rare Registry-grade 1918 quarter. Census: 4 in 67 Full Head, 0 finer (12/15). NGC ID# 2437, PCGS# 5721

1918/7-S Standing Liberty Quarter, MS62  
Compelling Example of the Overdate

**3206 1918/7-S FS-101 MS62 PCGS.** The 1918/7-S variety was unknown until the late 1930s, and as a result most examples of the overdate are well-circulated. Mint State examples survived by chance rather than purpose, rescued from accumulations of regular-date quarters that were put aside in Uncirculated condition. Now a key to the series, every Mint State representative commands the attention of advanced Standing Liberty collectors.

The present coin offers dramatic eye appeal. Faint rose-gold toning does not diminish the compelling, sparkling mint luster that adorns both sides. The silver surfaces are satin-smooth and boldly struck for the issue, with minimal blending on the head, lower-left shield border, and Liberty's sash. (A few Full Heads have been certified by the services, but most of those lack true full details.) Quarter enthusiasts are duly advised to take note of this special lot and bid accordingly. Population: 22 in 62, 50 finer (12/15). NGC ID# 243A, PCGS# 395949 Base PCGS# 5726

**1919-D Quarter, Sharp MS65  
Strong Silver Luster**

- 3207 1919-D MS65 PCGS. CAC.** This Denver date is well-known among Standing Liberty specialists as undervalued and very scarce in Gem condition. The present example is wonderfully lustrous and well-preserved, with brilliant silver sheen that overwhelms the occasional pale-gold and russet accents. The head is not full, but perhaps 60 to 70% detailed, and the lower shield shows blending on three of the rivets. The inner shield border is complete. The sash and Liberty's waist show nice definition, as do the eagle's breast, wing feathers, and wing edges. The coin is a bit concave at the date, but the quibbles about strike are nearly universal for the 1919-D issue and insignificant given the more important attributes of the exceptional surface quality, luster, and eye appeal. Rare this nice, CAC endorsed. Population: 50 in 65 (1 in 65+), 27 finer (12/15). NGC ID# 243C, PCGS# 5730

**1919-D Quarter, Satiny MS66  
Just One Coin Certified Finer**

- 3208 1919-D MS66 NGC.** Delightful, subtle color graces both sides of this attractively toned 1919-D quarter. The obverse is a two-toned affair, with ice-blue shades occupying the upper quadrants enhanced by rainbow iridescence. The lower obverse displays clear, lemon-gold color. The reverse shows a faint ivory-gold sheen that deepens slightly at the borders. Vibrant, silver mint luster shines through on both sides of this sharply struck coin. The head is nearly full, while the shield and sash show inconsequential blending at the usual locations. PCGS has yet to certify a coin finer than MS66, while NGC reports just a single finer example. Census: 15 in 66, 1 finer (1/16). NGC ID# 243C, PCGS# 5730

**1928-S Quarter, MS67 Full Head  
Attractive With Vibrant Luster**

- 3209 1928-S MS67 Full Head PCGS.** A nearly brilliant Superb Gem, with vibrant silver luster and only the faintest hint of translucent gold toning at margins. The fields are smooth and pristine — as are the devices — with only microscopic ticks on Liberty's left knee and a shin visible with a lens. The strike is sharp throughout except at a couple of shield rivets, while the coin earns the important Full Head designation. No examples are numerically finer at PCGS. Population: 19 in 67 (1 in 67+) Full Head, 0 finer (1/16). NGC ID# 243Z, PCGS# 5771

**1929-D Quarter, Eye-Appealing MS67  
Tied for Finest at PCGS**

- 3210 1929-D MS67 PCGS.** A mostly untoned to light gold-toned piece, this Superb Gem cedes at the upper and lower obverse rims to sunset-orange and deep burgundy in thin crescents. A touch of pale pastel patina appears in the central reverse. The strike is decent if not quite there for a Full Head designation, but the preservation and eye appeal are top-notch. Population: 2 in 67, 0 finer (1/16). NGC ID# 2443, PCGS# 5774

**WASHINGTON QUARTERS**

**1932-S Washington Quarter, MS65+  
First-Year, Key San Francisco Issue**

- 3211 1932-S MS65+ PCGS. CAC.** A delightful Gem specimen of this first-year Washington quarter, from a low San Francisco mintage of 408,000 pieces. The devices are sharply defined, and the surfaces are graced by dappled shades of green, russet, and ice-blue toning. Vibrant mint luster shines through the patina. Currently, only five coins display the PCGS Plus designation at MS65 and just four coins are certified in higher numeric grades at PCGS (1/16). NGC ID# 2449, PCGS# 5792

1936-D Washington Quarter, MS67  
Exceptional Surface Quality

- 3212** 1936-D MS67 PCGS. A sprinkling of reddish-brown toning visits both sides of this Superb Gem quarter. Pearlescent silver surfaces compete with the intermittent toning for attention, with generous mint luster beneath the original patination. The frosty surfaces show a few tiny ticks but none that distract in the least. Neither service reports a numerically higher-graded example. Population: 18 in 67 (1 in 67+), 0 finer (12/15). NGC ID# 244H, PCGS# 5801

1936-D Quarter, MS67  
Untoned Semikey Issue

- 3213** 1936-D MS67 PCGS. The silver-white surfaces show a satiny sheen throughout both sides of this nicely preserved Superb Gem 1936-D quarter, an issue that assumes semikey status along with a couple of other early mintmarked issues such as 1934-D and 1935-D and -S. No trace of other color or mentionable contact appears. Population: 18 in 67 (1 in 67+), 0 finer (1/16). NGC ID# 244H, PCGS# 5801

PROOF WASHINGTON QUARTER

1936 Quarter, PR67  
Registry Set Quality

- 3214** 1936 PR67 NGC. This is a gleaming Superb Gem proof, among the finest certified by either NGC or PCGS. Dusky light golden toning softens the reflectivity when studied beneath a light and masks a few stray lines that define the grade. Ideal for Registry Set purposes. Census: 25 in 67 (1 in 67 ★), 0 finer (11/15). NGC ID# 27HN, PCGS# 5975

EARLY HALF DOLLARS

1794 Half Dollar, O-101a, Fine 12  
'Circulated Cameo' Look

- 3215** 1794 O-101a, T-7, High R.3, Fine 12 NGC. CAC. The curl piercing star 1 and Y distant from the star, combined with the leaf pair between O and F in OF, are sufficient to attribute the O-101, T-7 half dollar, while the die crack through the F identifies the later O-101a die state. This coin displays an excellent "circulated cameo" look via rose-toned devices contrasted against deeper violet-gray patina in the fields on both sides. The wear is fairly extensive but even, with a few scattered but moderate marks. Census for O-101a: 10 in 12, 37 finer. CAC has given the green approval sticker to five 1794s in this grade (all varieties), including the present coin (11/15). NGC ID# 24E6, PCGS# 39201 Base PCGS# 6051

1795 2 Leaves Half Dollar, XF45  
Scarce O-105a Variety

- 3216 1795 2 Leaves, O-105a, T-25, R.4, XF45 PCGS. Tompkins Die State 3/3. The berries are arranged 10 left by seven right, and star 1 touches the lower curl. The late die state shows considerable signs of erosion and numerous peripheral cracks, including one from the rim down through the B in LIBERTY. Bright silver interiors blend with golden and violet-gray elements near the legends. High-point rub leaves most of the design detail intact, and light scattered marks are undistracting. A pleasing example of this scarce R.4 variety. NGC ID# 24E7, PCGS# 39221 Base PCGS# 6052

1801 O-101 Half Dollar, AU55  
Better Draped Bust Date

- 3217 1801 O-101, T-2, R.3, AU55 NGC. A steel-gray Choice AU representative with myriad glimpses of olive-green luster about the stars, letters, curls, shield, and plumage. A lens reveals distributed minor thin field marks. The strike is generally good although the stars opposite the bust tip are incompletely brought up, characteristic of the type. Only two die marriages exist for this challenging Draped Bust date. O-101 is distinguished from the very scarce O-102 by small die breaks near the arrows and the R in AMERICA. The diagonal die crack through the E in LIBERTY confirms that O-101 was struck after O-102. NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

**EARLY**  
*United States*  
**HALF DOLLARS**

Volume 1  
1794-1807

Steve M. Tompkins

Steve Tompkins has written a new reference on early half dollars (1794-1807). His system uses **T numbers** to indicate the variety and die sequence. We will use his numbering system for varieties, alongside the Overton numbers.

**BUST HALF DOLLARS**

1814 Half Dollar, O-105, MS64  
Pleasing for the Grade

- 3218 1814 O-105, R.2, MS64 PCGS. CAC. Strong, satiny luster cartwheels beneath soft lavender-gray toning that shows brighter gold and olive hues in the peripheral recesses when rotated beneath a light. The eagle's right (facing) talons and the corresponding obverse stars are a trifle weak, but the definition is otherwise strong throughout. Bold clash marks around Liberty's ear are characteristic of the variety. The 1814 half dollar is moderately available in the absolute sense, but pleasing Mint State pieces are elusive, particularly in grades above MS63. Population (all varieties included): 26 in 64 (1 in 64+), 12 finer (12/15).  
Ex: Rarities Sale (Bowers and Merena, 7/1997), lot 177; Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98630. NGC ID# 24F3, PCGS# 39480 Base PCGS# 6105

**1820 Half Dollar, Attractive MS64+  
O-105, Square Base-Knob 2, Large Date**

- 3219** 1820 Square Base 2, Large Date, Knob, O-105, R.1, MS64+ PCGS. A triple dentil beneath the leftmost pair of olive leaves is diagnostic of the reverse, while the obverse is confirmed by the square-based 2 with a knob top. This high-end near-Gem example is smooth and virtually unmarked with attractive, satiny luster. Hints of tan-gold color enliven the slate-gray patina while gunmetal blue overtones add eye appeal. A sharp strike is tempered by slight weakness at the crown of the eagle's head and the wing shoulders. Steve Herrman's Census shows two MS64 coins at the top of the variety, making this piece a strong candidate for the finest known O-105. NGC ID# 24FD, PCGS# 39567 Base PCGS# 6122

**1827/6 Half Dollar, O-103, MS64  
Rare So Fine**

- 3220** 1827/6 O-103, R.4, MS64 PCGS. CAC. The third and final use of the overdated 1827/6 head die. Overton-103 is scarce in high grades, the scarcest of all three overdate die pairings. Yet, all are rare in MS64 or better condition. This piece displays bold interior detail with some fading around the borders due to die wear. Frosty luster illuminates champagne toning over much of each side while the peripheries glisten with blue and violet. A few trivial ticks on Liberty's cheek are not out of line for the grade. Population (all overdate varieties included): 10 in 64 (1 in 64+), 4 finer (12/15). NGC ID# 24FP, PCGS# 39753 Base PCGS# 6147

**REEDED EDGE HALF DOLLARS**

**1837 Reeded Edge Half, MS65  
GR-18, Late Die State**

- 3221** 1837 GR-18, R.1, MS65 NGC. Hints of aquamarine and wheat-gold toning adorn this thoroughly lustrous silver-gray half dollar. The strike is full on the central devices, and there are no noticeable abrasions on either side of this splendid Gem. Reverse dentilation is indistinct, customary for the variety. Lengthy die cracks on both sides and a series of die chips within the shield allow prompt attribution. For all 1837 varieties, Census: 45 in 65 (1 in 65+, 3 in 65 ★), 12 finer (11/15).

Ex: Long Beach Signature (Heritage, 9/2008), lot 2157; Boston ANA Signature (Heritage, 8/2010), lot 3158. NGC ID# 24G4, PCGS# 531065 Base PCGS# 6176

1839 GR-7 Bust Half, MS65  
Brilliant Silver Luster

**3222** 1839 Large Letters, GR-7, R.1, MS65 NGC. Deep, frosty luster cascades from the smooth surfaces of this Gem Bust half. Available in lesser grades but very scarce in Gem or finer condition, the 1839 Reeded Edge halves are challenging regardless of variety.

The 2012 Dick Graham reference lists eight 1839 die pairs for the Philadelphia issue. Die lines on the forehead and from the lower part of the bust identify the GR-7 variety. The current coin is sharply struck except on the first S in STATES and the D in DOL. A pair of minuscule, faint toning spots between star 1 and the neck pedigree this brilliant-white example. A conditionally scarce and underappreciated two-year design subtype in high grades. NGC Census: 6 in 65, 2 finer (1/16). NGC ID# 24G6, PCGS# 531104 Base PCGS# 6179

SEATED HALF DOLLARS

1842-O WB-101 Seated Half, AU58  
Rare Small Date, Small Letters Variety

**3223** 1842-O Small Date, Small Letters, WB-101, Die Pair 2, R.5, AU58 NGC. While Heritage has handled some exceptional 1842-O Small Date half dollars in the past two years — including the Gene Gardner coins (both an exceptional MS63 NGC coin and an AU58 PCGS example) and the impressive Dr. Harry Salyards example, also graded AU58 PCGS, the appearance of yet another AU58 coin is amazing and unprecedented. PCGS and NGC combined report just nine grading events in AU58 or finer conditions for this rare New Orleans type. Two die pairs represent the entire output of the variety — one with the mintmark high and left (Die Pair 1) and the other with the mintmark low and right (Die Pair 2).

The present coin was struck from Die Pair 2. Sharply defined on the obverse, the eagle shows slight merging of the feathers on the left leg, as well as minor weakness of the left talons and arrow feathers. Pale, reddish-gold toning visits both sides, with ample silver luster remaining and a few blue accents in the recesses and at the margins. A diagnostic die crack travels radially from the edge into the rock support and the scroll on the obverse, with another well-developed die crack from Liberty's shin to star 11. A reverse die crack runs vertically between A and L of HALF to the eagle's middle talon, all of which suggest a late state of the dies. High-grade examples of this variety always find strong hands, and we expect the same will be true for this attractive Small Date, Small Letters example. Census: 5 in 58, 2 finer (12/15). NGC ID# 24GV, PCGS# 572015 Base PCGS# 6238

**1854-O WB-101 Arrows Half, MS65**  
**Crumbled Obverse Die, Filled 54 in Date**

- 3224 1854-O Arrows, WB-101, Die Pair 37, Lloyd-905, R.3, MS65 NGC.** This is one of the most intriguing die varieties for the 1854-O issue. It is the sole use of a reverse die that exhibits extensive, heavy die lines, particularly around the peripheral legends, while the obverse is heavily deteriorated around the figure of Liberty and shows extensive crumbling around the date. The present example is well-struck, with satiny luster that displays soft golden hues around the margins. Light contact on the high points of Liberty precludes a finer grade. Census (all varieties): 13 in 65, 10 finer (12/15). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

**1854-O Seated Half, MS65**  
**Frosty Cartwheel Luster**

- 3225 1854-O Arrows, WB-101, Die Pair 1, R.2, MS65 NGC.** The date is broadly doubled, indicating an early die state although diagnostic die cracks from a later die state exist on both the obverse and reverse, suggesting the coin was struck before any relapping or polishing of the obverse die. The strike is bold with just nominal weakness at the eagle's left (facing) talon. Strong mint luster radiates in cartwheels over silver-white surfaces interspersed with areas of amber and russet-gold toning. Census (all varieties): 13 in 65, 10 finer (12/15). NGC ID# 24JM, PCGS# 572088 Base PCGS# 6280

**1859-S Seated Half, MS64**  
**WB-101, Large S Mintmark**

- 3226 1859-S Large S, WB-101, Die Pair 3, R.3, MS64 NGC.** Frosted surfaces show areas of deep charcoal and gold toning, but for the most part this half can be appreciated for its underlying silver luster. A near-Gem half from a technical perspective, with no marks to mention and a razor-sharp strike on the stars and central motifs. The remnant curve of a misplaced 9 is faintly visible in the rock edge above the primary 9. Census (all varieties): 10 in 64 (3 in 64+), 5 finer (12/15). NGC ID# 24J2, PCGS# 524237 Base PCGS# 6298

**1865 Seated Liberty Half Dollar, MS65**  
**WB-101, Attractive Obverse Toning**

- 3227 1865 WB-101 MS65 PCGS.** Normal Date. Attractive bluish-gray obverse color with tan-gold highlights and shimmering luster provide this Gem Seated half with a high degree of visual appeal. The reverse is virtually untuned and lustrous frost-white. The coin displays a pleasing degree of detail aside from minor incompleteness at the upper portion of the eagle's left (facing) wing. Population (all varieties): 14 in 65 (1 in 65+), 7 finer (1/16). NGC ID# 24JF, PCGS# 572164 Base PCGS# 6313

**1870-CC Half Dollar, VF25**  
**Elusive First-Year Carson City Issue**

- 3228 1870-CC WB-101, Die Pair 5, R.6, VF25 PCGS.** Four of the five die varieties of the 1870-CC half dollar are designated R.6, and the fourth is R.5 — a perfect representation of just how scarce this issue is in any grade. Bill Bugert estimates as few as 200 coins survive in total, many of which grade lower than Fine and show cleaning or other damage. This problem-free mid-grade example displays strong detail for the VF level, with medium lavender-gray patina that yields to deeper olive and gunmetal hues in the peripheral fields. Population: 5 in 25, 60 finer (12/15). NGC ID# 6466, PCGS# 572190 Base PCGS# 6328

**1872 Half Dollar, MS66+  
Radiant Luster, The Finest Certified**

- 3229** 1872 WB-101 MS66+ NGC. A mintage exceeding 880,000 pieces and uninspiring *Guide Book* values hinder collector recognition of the 1872 Seated half dollar as a scarce date. High-end circulated coins are infrequently seen, and the issue is genuinely rare at any Mint State level. *This Plus-designated Premium Gem is the sole finest certified.* Luster glistens on the frosty, untouched surfaces while yielding lovely orange-gold, lavender, and deep blue toning. The strike is boldly rendered, and a few tiny ticks are restricted to the high points of Liberty's legs. An outstanding opportunity for the astute Seated half specialist. Census: 4 in 66 (1 in 66+), 0 finer (12/15). NGC ID# 24K7, PCGS# 572201 Base PCGS# 6333

**1874-CC WB-101 Arrows Seated Half, AU53  
Scarce CC Issue, Dramatic Album Toning**

- 3230** 1874-CC Arrows, WB-101, Die Pair 3, R.3, AU53 NGC. Likely preserved in an early album or coin board with high sulfite content, this scarce Carson City half acquired dramatic blue and orange-gold toning that dominates both sides of the coin. Mint luster shines through the rich patina. Just 59,000 pieces were struck of the 1874-CC, with most survivors in low circulated grades or otherwise impaired. This About Uncirculated example exhibits small marks and moderate wear, but it will be of high interest to Carson City Seated half specialists and collectors of impressively toned coins alike. Census: 2 in 53, 21 finer (1/16). PCGS# 572221 Base PCGS# 6347

**1876-S WB-102 Half Dollar, Sharp MS65+  
Iridescent, Semiprooflike Fields**

- 3231** 1876-S Open Bud, Very Small S, WB-102, Die Pair 37, R.3, MS65+ PCGS. CAC. The sole Plus-graded MS65 at PCGS, this wonderful high-end Gem displays smooth, semiprooflike surfaces and satin luster beneath splendid iridescent toning. The strike is essentially full with pinpoint definition on Liberty's head, stars, bold feather definition, fully defined talons, and sharp arrow fletchings. Struck from a later state of the dies, with numerous reverse die cracks. More than 4.5 million pieces were minted of the 1876-S, yet coins of this quality are rare and seldom available. Population (all varieties): 13 in 65 (1 in 65+), 3 finer (1/16). NGC ID# BNVD, PCGS# 572242 Base PCGS# 6354

1879 WB-102 Half Dollar, Toned MS67  
Eye-Catching Luminescence

- 3232** 1879 Closed Bud, WB-102, MS67 NGC. The 1879 Seated half dollar is the first of the low-mintage Philadelphia issues from the tail-end of the series. Only 4,800 pieces were struck, although enough Mint State representatives were saved at the time of issue that the date is moderately collectible today. This outstanding MS67 coin is one of only a small number of pieces that are worthy of the Superb Gem grade level. Both sides display an attractive combination of vibrant luster and semiprooflike mirroring, with blended mint-gold, ocean-blue, and lavender-gold hues blanketing each side. The strike is sharp, and a few small marks on Liberty's legs are the only surface abrasions of note. Census: 11 in 67 (3 in 67 ★), 1 finer (11/15). NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

1880 Seated Half Dollar, MS67  
WB-102, Tied for Finest Graded

- 3233** 1880 Closed Bud, WB-102, MS67 PCGS. The Philadelphia Mint used one obverse and two reverse dies to manufacture 8,400 business strike half dollars in 1880. Despite the limited original mintage, the 1880 is not particularly rare in an absolute sense. However, precious few of the Mint State survivors that were preserved at the time of issue have survived with surfaces pristine enough to warrant an MS67 designation.

Every design feature on this Superb Gem exhibits razor-sharp detail, and the original toning is breathtaking in its kaleidoscopic display of colors. Cobalt-blue, salmon-pink, olive-gold, powder-blue, and lavender-gray shades cover both sides in a targetlike fashion. Isolated areas of near-brilliance also occur around the obverse devices. The semiprooflike finish readily appears at direct angles, and the surfaces are free of even the most trivial disturbance. PCGS reports just two MS67 submissions, and none finer (1/16). Ex: *The Eugene H. Gardner Collection, Part IV* (Heritage, 10/2015, as MS67 NGC), lot 98702. NGC ID# 24KT, PCGS# 572262 Base PCGS# 6362

1883 WB-101 Half Dollar, Multicolor MS66

**3234 1883 WB-101 MS66 PCGS.** The Philadelphia Mint struck nearly 12.3 million silver dollars in 1883 but neglected the other silver denominations. Only 8,000 business strike halves were issued, including the present Premium Gem. This is a colorfully toned example with strong, satiny luster and smooth surfaces. Rich aquamarine and peach-gold toning dominate both sides, which also display considerable prooflike iridescence. Population: 19 in 66 (1 in 66+), 3 finer (1/16). PCGS# 572267 Base PCGS# 6365

1887 Half Dollar, Prooflike MS66

**3236 1887 WB-101 MS66 NGC.** Although the 1887 Seated half dollar was heavily saved at the time of issue, pieces grading finer than MS65 are inherently rare. This Premium Gem example is well-struck with typically seen prooflike mirroring in the fields. A lack of prominent abrasions is accentuated by warm original toning that shows sun-gold and mint-green peripheral hues around warm lavender-orange interiors. Census: 9 in 66, 3 finer (11/15). NGC ID# 24L2, PCGS# 572272 Base PCGS# 6369

1884 Half Dollar, MS67+  
Only Finer Submission at NGC

**3235 1884 Repunched Date, WB-102, MS67+ NGC.** All circulation strikes have a repunched 4 in the date. The 1884 enjoys the lowest production total in a series of low-mintage issues from a period when new half dollars was unnecessary to supply commercial demand. At the time, the need for half dollars was met by silver returned from overseas, including Canada and Latin America. Only 4,400 Seated halves were struck in 1884, and just a handful of coins survive at this impressive grade level. Minimally toned interiors generate bold contrast against frosty central motifs, while the surrounding areas show mixed blushes of gold, russet, violet, and blue patina. Fully struck with unquestionable prooflike qualities, as usual for this popular issue. Census: 9 in 67 (1 in 67+, 1 in 67 ★), 1 finer (12/15).

*Ex: Purchased by Eugene H. Gardner from Larry Whitlow (1/2004); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015, as MS66 PCGS), lot 98707. PCGS# 572269 Base PCGS# 6366*

1889 Seated Half, MS67  
Finest Example Certified at PCGS

**3237 1889 MS67 PCGS.** The 1889 half was struck toward the end of the decade-plus era of very low production runs for quarters and half dollars. These low production totals began with implementation of the Bland-Allison Act in 1878, an act that demanded almost full attention of Mint personnel to the striking of silver dollars that were required by law. Only 12,000 halves were struck in 1889, and the same number were produced the following year. It wasn't until 1891 that half dollar mintages began to recover to their pre-1879 levels (still only 200,000 pieces struck). This is a radiant example and the finest certified at PCGS (1/16). Strike details are complete throughout. The mint luster is frosted and races around each side as the piece is tilted beneath a light. The centers are noticeably lighter in hue with significant reddish-russet toning encircling the margins. NGC ID# 24L4, PCGS# 6371 Base PCGS# 6371

## PROOF SEATED HALF DOLLARS

### 1839 Seated Liberty Half Dollar, PR62 One-Year No Drapery Design Type Only Six Proofs Traced

**3238 1839 No Drapery PR62 NGC. WB-101.** The 1839 proof No Drapery Seated Liberty half dollar is a celebrated 19th century rarity and a one-year design type that will appeal to series specialists and advanced type collectors alike. Walter Breen recognized three specimens in his 1977 *Encyclopedia of United States and Colonial Proof Coins*, but his list contained an example in the Norweb Collection, and that famous gathering did not have a representative of this issue when it was sold in the late 1980s. PCGS population data list only two examples and estimate a survival of two to four pieces in all grades, while NGC has certified six specimens, including an unknown number of resubmissions and crossovers (12/15). Randy Wiley and Bill Bugert estimated “less than six” different coins were extant in 1993, a figure that closely agrees with our roster, which identifies six individual pieces today. One of the coins known to us has been impounded in the collection of the Bibliothèque Nationale in Paris since 1858.

Prominent coin dealers S.H. and H. Chapman described an example of the 1839 No Drapery half dollar in lot 539 of the Richard B. Winsor Collection (Chapman, 12/1895):

“1839 Liberty clad in a chiton, seated on a rock, her right hand supporting a U.S. shield, her left a staff of liberty, 13 stars; ex’g date. R. as 1836 but with HALF DOL instead of 50 CENTS. Edge milled. Type 1839-1865. Brilliant proof, very slightly hairmarked. Sharp impression. No drapery from elbow. Excessively rare. See plate.”

The lot brought \$16.50, the same amount as an 1842 Small Date proof half dollar in lot 545, and much more than any other Seated Liberty half in the sale. More recent appearances include the PR65 NGC (now PR64+ PCGS) specimen in lot 2481 of the Central States Signature (Heritage, 4/2009), which realized \$241,500.

The present coin has no traceable auction history before it appeared in a Stack’s sale in 1996. It may be the specimen included in a proof set from a European holding discovered by Marc Emory in 1981. It is an impressive PR62 specimen, with sharply detailed design elements and reflective fields that show attractive highlights of champagne-gold toning. A few minor hairlines are evident, accounting for the grade, and a small clip on the reverse rim at 10 o’clock (as struck) serves as a useful pedigree marker. The reverse shows the usual die crack through MERICA and HAL DOL that is seen on all examples of this issue. Any appearance of an 1839 No Drapery Seated Liberty half dollar is a major numismatic event and we expect intense competition when this lot is called.

Ex: U.S. Gold, Silver and Copper Coins (Stack’s, 10/1996), lot 300. Unknown previous pedigree, possibly the coin discovered in a European collection by Marc Emory in 1981. NGC ID# 27SZ, PCGS# 6381

**1854 Seated Half Dollar, PR66  
Outstanding Quality and Color  
Major Rarity in Proof Format**

**3239 1854 Arrows PR66 NGC. WB-101.** The mintage figure for the 1854 proof Seated half dollar was not recorded by the Mint, although it was likely a little higher — even if not by much — than those of previous years. Randy Wiley and Bill Bugert write in the *Complete Guide to Liberty Seated Half Dollars* that “Less than 6 [are] known,” although this figure is low per modern research. In his *Complete Encyclopedia*, Walter Breen estimated that fewer than 20 proofs survive. We know of at least eight distinct coins and estimate that the total number known is likely in the 10 to 12-coin range, which reveals the certified population data to be highly inflated. Whatever the exact tally, the 1854 proof half dollar is an undisputed major rarity, and the present piece is definitively tied with two others as second-finest certified (12/15).

Highly reflective, unblemished fields illuminate beautiful multicolor toning on each side of this Premium Gem proof, revealing shades of olive-gold, rose, amber, and ocean-blue. The eagle’s left (facing) talons are a trifle soft, but the design elements are otherwise bold, and the surfaces free of noticeable contact marks. Two small areas of lighter toning near stars 1 and 13 aid in pedigree identification.

Ex: *Century Collection* (Superior, 2/1992), lot 2016; *Long Beach Connoisseur Collection* (Bowers and Merena, 8/1999), lot 207; purchased by Eugene Gardner from Joseph O’Connor (10/2005); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98503. NGC ID# 27TX, PCGS# 6407

**1865 Half Dollar, PR66  
Needle-Sharp Motifs**

**3240 1865 PR66 PCGS.** Proof half dollar coinage in 1865 was limited to only 500 pieces, few of which survive in Gem or finer condition. In PR66, this issue is a major rarity, with or without field-motif contrast. The present piece might have garnered a Cameo designation were it not quite so evenly toned. The obverse shows a light wheat-gold overlay of color that does allow mild contrast, although the reverse, in addition to a similar light golden hue, exhibits deeper russet-gray overtones which preclude noticeable contrast. A full strike and Premium Gem-quality surfaces conclude the visual attributes. Population: 9 in 66 (1 in 66+), 1 finer (12/15). NGC ID# 27TS, PCGS# 6419

**1874 Arrows Half Dollar, PR65  
Undesignated Field-Device Contrast**

**3241 1874 Arrows PR65 NGC.** Although undesignated, this piece is clearly a Cameo proof with nice field-to-device contrast. The ivory-white surfaces show a hint of gray, accompanied by peripheral blue and iridescent toning on both sides. Minor strike weakness shows at the eagle’s lower left talon. Census: 15 in 65, 9 finer (12/15). NGC ID# 27UV, PCGS# 6435

**1878 Half Dollar, Toned PR68 Cameo  
The Sole Finest Certified, Ex: Gardner**

- 3242 1878 PR68 Cameo PCGS. CAC.** Type Two Reverse. Although plentiful in Choice and lower grades, the 1878 proof Seated half dollar is decidedly rare at the Superb Gem level. Only the example offered here has been certified PR68, with or without Cameo designations. This remarkable Superb Gem proof displays a beautiful blend of cobalt-blue and lavender toning around the obverse borders, framing the silver-gray central area. On the reverse, a sliver of gold clings to the margin, ceding to dominant sea-green over the remaining surface. The design features stand out markedly against the mirrored fields, and as expected, essentially unimprovable preservation characterizes both sides. An unsurpassable example in all regards. Population: 1 in 68 Cameo, 0 finer (12/15).  
Ex: Orlando Sale (Superior, 8/1992), lot 410; ANA Signature (Heritage, 3/2010), lot 1018; Eugene H. Gardner Collection, Part III (Heritage, 5/2015, as PR68 NGC with CAC approval), lot 98511. NGC ID# 27UD, PCGS# 86439

**1885 Half Dollar, PR67 Cameo  
Starkly Contrasted, Conditionally Rare**

- 3243 1885 PR67 Cameo NGC. WB-101.** The proof 1885 Seated half dollar is scarce with designated cameo contrast, and rarely is such a coin located in Superb Gem condition. This boldly rendered example displays essentially brilliant interiors with warm lavender-gold toning emerging from the peripheries. No obvious marks or distracting hairlines are observed, and the field-device contrast is incredible. Census: 9 in 67 Cameo (1 in 67 ★ Cameo, 1 in 67+★ Cameo), 2 finer (11/15). NGC ID# 27UL, PCGS# 86446

**1887 Seated Half, Gorgeous Toned PR67**

- 3244 1887 PR67 NGC.** Gorgeous deeply toned surfaces on this Superb Gem proof display intermingled pastel pale blue, violet, orange, and rose coloration amid a bold strike and excellent preservation. This proof issue of 710 coins came along near the tail end of the Seated Liberty half dollar series, when even the circulation strikes were at a low ebb, 5,000 pieces in this case. NGC ID# 27UN, PCGS# 6448

**1891 Half Dollar, PR67  
Beautifully Toned Final-Year Example**

- 3245 1891 PR67 NGC.** Medium toning competes against deeply mirrored fields on this beautiful final-year proof half dollar from the Seated Liberty series, one of only 600 pieces struck. Pale aqua and mint central toning cedes to light rose around the rims, and the proof strike is, as one would expect, razor-sharp. NGC has encapsulated just four proofs in this nearly unimprovable grade with a single submission finer. The finest coin at PCGS is a comparable Superb Gem example. NGC Census: 4 in 67, 1 finer (12/15). NGC ID# 27UT, PCGS# 6452

## BARBER HALF DOLLARS

### 1892-O Half Dollar, MS68 Single Finest at CAC Ex: Eliasberg

**3246 1892-O MS68 NGC. CAC.** The present lot is one of only two different MS68 1892-O Large O half dollars to appear at auction. The other, an NGC MS68 ★ example previously from the Dr. Thaine B. Price Collection, appeared in our 2005 FUN Signature as lot 4199 and realized \$103,500. PCGS lists an additional MS68 example, not known to have been publicly offered.

This piece has been cataloged sans pedigree in the past, but close study of plates confirms without a doubt that it is the high-grade prooflike Eliasberg specimen. The cataloger of the Eliasberg Collection called this remarkable coin “a superb prooflike gem, no doubt made for special purposes or perhaps as a presentation coin. Delicate splashes of heather and gold toning over satiny motifs and mirrored fields, the latter being mirrored in all areas including among the letter spaces.” The description further commented:

“It is not difficult to envision a scenario in which on the first day of striking this new design at the New Orleans Mint some special pieces were made for presentation. The importance is incredible, and the beauty is memorable - and the opportunity is likewise. Certainly this will be one of the highlights in the Barber half dollar collection of its next owner, just as it is in the Eliasberg Collection.”

NGC has certified a single 1892-O half dollar as MS62 Deep Mirror Prooflike. It would be interesting to compare that coin, wherever it might be, with the Eliasberg specimen to determine if they are from the same die pair and die state. Half dollars had not been struck at New Orleans since 1861, before the travails of the Civil War. Certainly, the resumption of half dollar production with the new Barber design would have been worthy of a ceremony at the facility. In either case, no one can argue the eye appeal and sheer quality of this coin as one of the finest 1892-O halves known.

Ex: Fred Porter Collection (Charles Steigerwalt, 12/1893); J.M. Clapp; John H. Clapp; Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 2064; Drew St. John Sale (American Numismatic Rarities, 6/2005), lot 78; Eugene H. Gardner Collection (Heritage, 6/2014), lot 30548. NGC ID# 27UW, PCGS# 6462

**1894-S Barber Half, MS66**  
**Outstanding Condition Census Coin**  
**Ex: Duckor / Akers / Gardner**

- 3247 1894-S MS66 PCGS.** Ex: Duckor/Akers. The 1894-S Barber half dollar is one of the most elusive dates in the entire series in MS65 or finer grades. In the Thaine Price catalog, David Akers wrote of the date:

"I consider it to be one of the series' most underrated issues since it has never been widely publicized or even recognized as a rarity yet it bears favorable comparison to almost any other issue in the series."

Dr. Duckor acquired this example in August 1995, prior to the appearance of several major collections. The Hugon Collection coin was MS66 PCGS, earlier coming from the San Francisco Mint through the Clapp and Eliasberg collections. The Friend Collection also had an MS66 PCGS example. The Gem Uncirculated Price coin came from the Emery-Nichols Collection, and earlier from the Chapman brothers in 1903. The Norweb, Pryor, Queller, and Byers collection specimens are each in lower Mint State grades. The Duckor specimen is boldly defined and just shy of a full strike. Both sides show a few trivial marks consistent with the grade, mostly masked by deep steel-blue, golden-grown, and iridescent toning that blankets satiny luster on each side. Population: 4 in 66, 1 finer (12/15).

Ex: David Akers (8/1995); ANA Signature (Heritage, 8/2010), lot 3181; FUN Signature (Heritage, 1/2011), lot 5572; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98518. NGC ID# 24LR, PCGS# 6470

**1896-S Half Dollar, MS65**  
**Upper-End for the Grade**

- 3248 1896-S MS65 PCGS.** This Gem Barber half is almost devoid of abrasions, with soft, satiny luster illuminating a thin blanket of light golden toning which allows occasional glimpses of deeper olive and russet around the peripheries. A few faint roller marks on Liberty's cheek are Mint-made and do not affect the grade. The eagle's talons are sharp, but some minor weakness shows on the upper-right corner of the shield. Population: 10 in 65, 5 finer (12/15). NGC ID# 24LX, PCGS# 6476

**1898-S Barber Half, MS66**  
**Frosty Luster, Strong Appeal**

- 3249 1898-S MS66 NGC.** The 1898-S is a scarcer issue than its relatively high mintage of 2.3 million coins would suggest. This is a pleasing Premium Gem example with sharp strike definition and smoky silver-gray toning over the obverse, complemented by slight gold-tan and olive peripheral accents. The reverse displays slightly deeper golden-gray coloration. Both sides are lustrous and well-preserved. Among the finest certified and rare as such. Census: 6 in 66, 0 finer (12/15). NGC ID# 24M5, PCGS# 6482

**1899 Barber Half Dollar, MS66**  
**Colorful and Sharply Defined**

- 3250 1899 MS66 PCGS.** This wonderful Premium Gem Barber half dollar has the look of an old-time collector coin with variegated blue, green, and orange hues that surround largely violet interiors on the obverse. Similar patina appears throughout the reverse mixed with areas of gleaming mint brilliance. The stars are complete, as are the fletchings and talons. The top right shield corner features crisp lines. There are 10 and eight MS66 submissions at PCGS and NGC, respectively. Two finer Superb Gems are both encased in PCGS holder (1/16). NGC ID# 24M6, PCGS# 6483

**1900-O Barber Half, MS66**  
**Tied for Finest at PCGS**  
**Ex: Dale Friend**

**3251 1900-O MS66 PCGS. CAC.** Ex: Friend. The 1900-O ranks among the major “hidden” rarities of the Barber half dollar series in high grade, due in part to the mintage of nearly 3 million coins, the 13th highest production of the entire Barber half dollar series, including coins of all mints. While low mintages do not necessarily mean a given coin is rare, so also a high mintage does not necessarily mean a coin is common. Despite its moderate mintage, the 1900-O has one of the lowest Mint State populations of the series, and the issue is genuinely rare in Gem or finer condition.

The Friend coin is an exquisite example, boasting arguably finer technical quality than the Pryor piece and a sharper strike than the Price coin. Overall, it appears about equal to the Eliasberg example. Slight weakness appears in the centers, in the usual locations, but this piece is still sharper than the typical New Orleans Mint Barber half dollar. The surfaces display frosty luster, the obverse accented by faint rose-gold toning with traces of pale blue. The reverse is brighter with hints of champagne. Population: 4 in 66, 0 finer. CAC: 2 in 66, 0 finer (12/15).

Ex: U.S. Coins, Inc; Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars / FUN Signature (Heritage, 1/2009), lot 3885; Greensboro Collection, Part V / ANA Signature (Heritage, 8/2015), lot 4081, which brought \$30,550. NGC ID# 24MA, PCGS# 6487

**1910-S Half Dollar, MS66**  
**Few Examples Are Finer**

**3252 1910-S MS66 PCGS.** The high-luster silver centers on each side of this stunning Premium Gem Barber half cede to sunset-orange, cinnamon, and lilac hues near the rims. The strike is uniformly bold save for a touch of blending on the right shield corner and the eagle’s right (facing) claw. There are no visible marks of consequence. Population: 16 in 66 (2 in 66+), 4 finer (12/15). NGC ID# 24NC, PCGS# 6520

**1915-D Barber Half, MS66+**  
**Just One Finer Coin at Either Service**

**3253 1915-D MS66+ NGC. CAC.** David Lawrence summed up this Denver issue in two words. “Comes nice.” Other than that concise description, the most notable attraction to collectors is its status as the series final-year issue — an important factor for type purposes. The current coin is extremely frosty and lustrous, tinged by a slight hint of amber-gold toning, although otherwise brilliant. The surfaces show virtually no imperfections or marks other than a thin die crack that wanders from the ball of the 5 across the tip of the neck truncation and ends at star 13. The strike is bold but blends slightly at the upper right shield and wing junction. A condition rarity in this grade, with only one example numerically finer at either PCGS or NGC, and with this coin one of two examples receiving the NGC Plus designation. Census: 10 in 66 (2 in 66+), 1 finer (12/15). NGC ID# 24NS, PCGS# 6533

**PROOF BARBER HALF DOLLARS**

**1906 Half Dollar, Vividly Toned PR67+**

**3254 1906 PR67+ NGC.** Vivid concentric rainbow patina in shades of pale blue, rose, gold, and violet occupies both sides of this stunning Superb Gem proof 1906 Barber half. This piece offers immaculate preservation and a bold strike throughout, certainly among the finest survivors from the proof production of 675 pieces. Census: 20 in 67 (1 in 67+, 1 in 67 ★), 5 finer (12/15). NGC ID# 24PA, PCGS# 6553

---

1915 Barber Half, Crisp PR68  
A Visual Treat, Numerically Unsurpassed

**3255** 1915 PR68 NGC. This gorgeous Superb Gem proof is really something special. In addition to its unsurpassed technical quality, it possesses a bold strike throughout and is beautifully patinated in rich multicolor hues. Both sides are awash in a vibrant array of aquamarine, violet, amber-gold, champagne, and ivory, with occasional glimpses of forest-green and cherry-red. The term “eye-catching” comes to mind when looking at this coin.

Proof Barber half dollar production had one last hurrah in 1915, with a delivery of just 450 pieces to round out the series. Among proof issues, this date ranks as one of the more challenging overall, especially in high grades, and is also popular for its final-year status. For the patient collector, a handful of “monster” coins survive, such as the present piece. NGC reports seven non-Cameo proofs in this highest numeric grade (one in PR68 ★), while the finest at PCGS grade PR67+ (12/15).

Ex: Pre-Long Beach Auction (Ira & Larry Goldberg, 1-2/2010), lot 1129; Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98550. NGC ID# 24PK, PCGS# 6562

---

---

WALKING LIBERTY HALF DOLLARS

1917-S Half Dollar, MS65  
Reverse Mintmark

**3256** 1917-S Reverse MS65 NGC. The certified population of the 1917-S Reverse Mintmark half dollar drops off sharply from MS64 to MS65, and finer pieces are decidedly rare. This Gem representative displays satiny mint luster with warm champagne toning. The strike is boldly rendered, and there are no significant abrasions. The Walking Liberty half dollar specialist will be delighted to acquire this outstanding coin. Census: 26 in 65, 5 finer (11/15). NGC ID# 24PU, PCGS# 6573

---

**1919-S Half Dollar, MS65**  
**Key Branch Mint Issue, Few Are Finer**

**3257 1919-S MS65 PCGS.** The 1919-S is particularly difficult to locate, especially in the better circulated grades through Mint State. While not as challenging in high grades as the 1919-D, 1921-D, and 1921-S, Uncirculated 1919-S halves are still encountered only sporadically.

Gem examples are very scarce. This outstanding coin shows distinctive die striations in the fields on each side that impart a bright semiprooflikeness — struck from freshly polished dies — most likely to remove die clashing. Machine doubling is visible on UNITED STATES OF AMERICA, with irregularities between the wing edge and AMERICA that are still visible to confirm the clashed dies. Much original brilliance remains, with a faint blush of golden toning that occupies the date area and drifts across the central reverse. The strike definition is strong, although it shows some unavoidable incompleteness at the centers, as always seen. This interesting piece would be a great start to a Gem-quality collection of early Walkers. Population: 41 in 65 (2 in 65+), 11 finer (1/16). NGC ID# 24R2, PCGS# 6579

**1920-D Half Dollar, MS65**  
**Challenging at This Level**

**3258 1920-D MS65 PCGS.** More available than the surrounding 1919-D or the 1921-D key date rarities, the 1920-D is still conditionally scarce and challenging in Gem or finer grades. This example exudes mint-fresh luster with plentiful eye appeal.

An up-and-down strike shows solid definition on the eagle's leg and lower gown lines, but softness at Liberty's head and typical detail on the branch hand. A few small spots of cloudy patina near the rims are nearly invisible at first glance. This is a well-preserved example — the lowest-mintage Walker from the three Mints for the year — and a notable necessity for completion of the early series. Population: 44 in 65, 6 finer (1/16). NGC ID# 24R4, PCGS# 6581

**1941-S Walker, Sharply Struck MS67**

**3259 1941-S MS67 NGC.** The 1941-S is one of the foremost of the S-mint strike rarities from the 1940s. This example is remarkably strong with almost complete skirt lines and clear separation between the thumb and forefinger. The mint luster is bright and frosted. Each side is brilliant in the interior and surrounded by pale golden at the margins. An exceptional '41-S for an exceptional Short Set. Census: 23 in 67, 0 finer (11/15). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

## PROOF WALKING LIBERTY HALF DOLLAR

1942 Walking Liberty Half Dollar, PR69  
Vivid Multicolor Toning, Tied for Finest

- 3260 1942 PR69 NGC.** For the entire seven-year series and across both certification services, only 10 proof Walking Liberty half dollars have achieved the unsurpassed PR69 grade — eight of these are in the 1942 issue. For type collectors of proof coinage and Registry Set competitors, this remarkable, near-perfect 1942 proof Walker is unsurpassable in both quality and eye appeal. Vivid shades of emerald-green and lavender toning visit the deeply reflective surfaces, but the centers remain essentially brilliant. The design elements are fully struck, and no mentionable distractions are evident. Eye appeal is terrific. The last PR69 example we offered realized \$22,325 in lot 3978 of the Long Beach Signature (Heritage, 9/2015). The present coin is equally attractive and important. Census: 7 in 69 (1 in 69 ★), 0 finer (11/15). NGC ID# 282G, PCGS# 6642

## FRANKLIN HALF DOLLAR

1948-D Franklin Half Dollar, MS67 Full Bell Lines  
None Certified Finer

- 3261 1948-D MS67 Full Bell Lines PCGS.** The Franklin design was introduced on the half dollar in 1948, an important consideration for type purposes. Of course, the master hub was new and most working dies were fully detailed, so the 1948-D is often seen with a sharp strike, unlike the issues from later years. Still, examples in MS67 condition, with the Full Bell Lines designation, are very rare.
- The present coin is a delightful Superb Gem, with sharply detailed design elements and full definition on the bell lines. The impeccably preserved surfaces are blanketed in vivid shades of magenta, sea-green, and silver-gray toning, with vibrant mint luster underneath. Population: 5 in 67 Full Bell Lines, 0 finer (12/15). NGC ID# 2549, PCGS# 86652

## PROOF FRANKLIN HALF DOLLAR

1950 Franklin, PR65 Ultra Cameo  
Conditionally Rare

- 3262** 1950 PR65 Ultra Cameo NGC. Although the Franklin half dollar was first produced for circulation in 1948, proofs were not coined until 1950. This debut issue is rare in Gem Ultra Cameo, and such pieces are heavily sought by Registry Set enthusiasts. This example is fully struck and starkly contrasted. Brilliant surfaces yield frosty motifs and mirrored fields. Census: 12 in 65 Ultra Cameo (2 in 65 ★ Ultra Cameo), 3 finer (11/15). NGC ID# 27VA, PCGS# 96691 Base PCGS# 96690

## KENNEDY HALF DOLLAR

1970-D Kennedy Half, Untoned MS67

- 3263** 1970-D MS67 PCGS. The mint-set-only 1970-D half dollar in Superb Gem grade becomes a conditionally elusive item, as most were apparently handled carelessly at the Mint and today grade, for the most part, MS64 to MS65 despite decades of cellophane survival. This exception boasts an attractive satiny untoned finish with far fewer marks than normal. Population: 14 in 67, 0 finer (1/16). NGC ID# CC4U, PCGS# 6713

## EARLY DOLLARS

1795 Flowing Hair Dollar, VF30  
Scarce B-9, BB-13 Variety

- 3264** 1795 Flowing Hair, Two Leaves, B-9, BB-13, R.4, VF30 NGC. Bowers-Borckardt Die State II. The scarce Die State II, with dramatic clash marks from the leaves and wings on the obverse. This attractive VF30 example shows lightly abraded surfaces, with pleasing shades of golden-brown and lavender toning on both sides. The design elements show moderate wear, but some detail remains intact in the hair and the other devices are bold. NGC ID# 24WZ, PCGS# 39980 Base PCGS# 6853

---

**1795 B-2, BB-20 Flowing Hair Dollar**  
**Lustrous and Toned, Select Uncirculated**  
**Among the Finest of the Variety**

**3265 1795 Flowing Hair, Two Leaves, B-2, BB-20, R.3, MS63** NGC. Bowers Die State II. Flowing Hair dollars seldom appear with the vibrancy and singular verve of this lustrous Two Leaves example. Although not listed in the Bowers summary of Notable Specimens, the coin is comparable by grade to all but four of the other historic pieces that populate the roster.

Perhaps more importantly — in terms of eye appeal — it ranks among the most memorable Flowing Hair dollars of any 1795 variety we have presented at auction.

Well-preserved in a private collection for decades, the coin radiates Mint-fresh luster beneath an iridescent medley of color. Lilac, azure-blue, and rich-gold hues predominate, with subtle nuances from rainbow tones that cling to the protected areas around the raised devices. Cartwheel mint luster shines brightly when the coin is viewed, even in limited light.

The B-2, BB-20 variety is thought to have been struck in 1795, rather than later when other Flowing Hair die pairs may have been produced as late as 1798. The mintage circulated widely, resulting in many worn coins and relatively few Mint State survivors. Six prominent curls characterize the obverse, with the lowest curl pierced by star 1 with its end disconnected and floating to the right of the intervening star point. The left hand stars are less robust than those on the right, suggesting the dies were lapped early-on in the mintage. To date, no perfect die examples have been confirmed.

A diagnostic die scratch near the innermost point of star 4 is boldly evident on this coin, reminiscent of the famous “bar” seen on the B-5, BB-27 die pair, but it is located in an entirely different location and orientation on the BB-20. It is the first use of the reverse die, also employed on the more readily available BB-21 variety and also on the BB-24 die pair.

The fields are smooth and hard, with a reflective sheen across both sides. Microscopic die polish lines and a few tiny marks are hidden by the toning, but there are no adjustment marks or heavy abrasions of any kind. Each of the stars is sharply struck as are most of Liberty’s hair strands, although the highest point at Liberty’s temple as well as the top of the eagle’s breast show minor incompleteness.

We expect vigorous competition among the early dollar specialists when this outstanding lot is called. NGC ID# 8M5Y, PCGS# 39985 Base PCGS# 6853

**1796 Small Date, Large Letters Dollar, AU53  
B-4, BB-61, Very Few Marks**

- 3266 1796 Small Date, Large Letters, B-4, BB-61, R.3, AU53 PCGS Secure.** Bowers Die State I. The only collectible variety of the Small Date, Large Letters type, struck from one of two die pairs (the other is the rare B-6, BB-64 varieties, just three pieces known). The BB-61 is the most available 1796-dated Large Letters variety, and a necessity for *Guide Book* collectors of early dollars.

This attractive example is particularly well-detailed for the grade, and entirely free of adjustment marks or any large abrasions. Golden-gray toning reveals remaining mint luster beneath, while a few dark-brown speckles cluster at the margins. The coin is sharply struck despite apparent weakness of the eagle, which was poorly impressed into the working die with a resultant weakness of feather detail. Few pieces exceed this example at either service. Population (Large Letters variety): 7 in 53, 13 finer (12/15). NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

**1798 Large Eagle, Pointed 9 Dollar, AU50  
Scarce B-31, BB-115 Variety**

- 3267 1798 Large Eagle, Pointed 9, Close Date, B-31, BB-115, R.4, AU50 NGC.** Bowers-Borckardt Die State IV or possibly beyond, as the "heavy die crack" just to the right of the O in OF on the reverse is approaching a full-on break. Faint luster still glimmers through the rich patina on this About Uncirculated Large Eagle dollar, lighting up the blue and rose-silver outer tones as well as the gold-to-gray of the interiors. NGC ID# 24X6, PCGS# 40032 Base PCGS# 6873

**1801 B-1, BB-211 Draped Bust Dollar, XF40  
Substantially Appealing**

- 3268 1801 B-1, BB-211, R.3, XF40 PCGS. CAC.** Bowers Die State IV. There are no distracting abrasions on this lightly circulated BB-221 dollar, and mint luster remains among the devices. Lilac, rose, and light olive-gold toning covers both sides. CAC-endorsed and an opportunity for the discerning collector who seeks a pleasing Heraldic Eagle type coin. NGC ID# 24XA, PCGS# 40083 Base PCGS# 6893

1802 Draped Bust Dollar, AU55  
Lightly Toned B-6, BB-241 Example

- 3269 1802 Narrow Date, B-6, BB-241, R.1, AU55 PCGS. Bowers Die State III. This attractive piece is aglow with warm golden toning that accentuates subtle reflectivity in the fields. The strike is even and well-centered with complete dentils on each side. Sharp stars and boldly rendered interior motifs further contribute to the technical quality, while slight amber toning over the highest points of the devices denotes trivial friction which precludes a Mint State grade. Evidence of die lapping in Liberty's back hair curls confirms the late die state, as is usually seen on BB-241. This die pairing is the most available Draped Bust variety in high grades, an ideal acquisition for the type enthusiast. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

## GOBRECHT DOLLAR

1838 Gobrecht Dollar, PR65  
Judd-84, Early Restrike  
Exceptionally Rare in Die Alignment IV  
Ex: Norweb

**3270 1838 Name Omitted, Judd-84 Restrike, Pollock-93, R.5, PR65 NGC.** Ex: Norweb. 413.2 grains. Silver. Die Alignment IV (center of Liberty's head opposite the F in OF). There are four principal die alignment configurations for Gobrecht dollars. This particular coin exhibits a Die Alignment IV orientation, the head of Liberty opposite the F in OF (i.e., medal turn with the eagle flying level). This is a rare situation for an 1838 dollar. Most 1838 dollars exist in Die Alignment III. Gobrecht dollars dated 1838 are found in three different categories:

**1. Original 1838 dollars (Judd-84) appear in Die Alignments III and IV and were struck with a reverse very faintly cracked through ITE and MERI.** The die cracked in hardening or immediately upon striking the first pieces. The exact mintage of these coins is unknown, but undoubtedly small. Based on letters from Assistant Assayer William E. DuBois to noted collector Matthew Stickney, in 1843 to 1854, offering three pieces for trade (DuBois keeping a fourth), Dannreuther and Sholley estimate that there were no more than six or seven pieces struck. One of the pieces traded to Stickney apparently came from the Mint Cabinet, while the other two came from DuBois' father-in-law, Adam Eckfeldt. The Original 1838 dollar in the Smithsonian Collection is in Die Alignment IV and the only other piece known is the ANS / Korein coin. The ANS / Eliasberg coin is an Original in Die Alignment III.

**2. Very early Restrike 1838 dollars struck in Die Alignment IV with microscopic reverse die cracks through MERI and moderate die rust present on Liberty and to the right of Liberty's elbow. The reverse additionally shows rust on the eagle (especially the head and beak) and on all letters.** Mintage of these coins is unknown. In fact, the current piece is currently the only known Restrike in Die Alignment IV. Mint records establish that Director James Ross Snowden struck and traded these pieces in 1859 to 1860 in exchange for Washingtonia for the Mint Cabinet collection.

**3. The second category of restrike 1838 dollars are found in Die Alignment III and have reverse die cracks similar to the Type II coins.** However, these pieces were probably struck on several occasions starting in the late 1850s and continuing into the late 1860s and possibly into the 1870s; a time period when the Die Alignment III Judd-60s and other Gobrecht patterns were made, including examples in copper. In any case, the 1838 dollars in Die Alignment III are scarce with fewer than 40 pieces known today.

Unlike the circulation issues of 1836 (Judd-60) and 1839 (Judd-104), no 1838 dollars were intentionally made for public distribution. Therefore, unlike the 1836 and 1839 dollars, the 1838 issue is considered a true pattern. The main purpose of the 1838 dollars was to test perhaps three new design features: (1) a reeded edge, (2) the removal of the 26 stars from the reverse of the 1836 dollar, and (3) the placing of 13 new stars around the obverses. It is clear that the dies for the 1838 dollar were made in 1838; however, it is uncertain how many (if any) 1838 dollars were actually struck in 1838. Only three Original specimens are known (mentioned above).

Virtually all 1838 dollars observed in private or other museum collections appear to be Restrikes made in the late 1850s under the authority of Director James Ross Snowden, or in the mid-to-late 1860s by Director H.R. Linderman. Like the present specimen, the Restrikes were made to satisfy collector demand for these beautiful and popular coins. The later-year Restrikes are generally found in Die Alignment III orientation (i.e., head of Liberty opposite the N of ONE) — one is known overstruck on an 1859 Seated dollar — however, a few Restrikes were also made in Die Alignment IV (like the present example). Although the exact mintage of 1838 dollars is unknown, recent estimates suggest that few coins were ultimately made.

At the recent FUN Show, John Dannreuther examined this dollar. These are his notes:

"Obverse has rusty area below elbow and out into right field. Liberty grainy with numerous small rust lumps.

"Reverse has larger area of lumps between tops of TA of STATES caused by additional clashing during striking of the 300 1839s in December of that year. Letters grainy from rusting with rust pits on upright and upper curve [of the] D [in] UNITED, particularly noticeable on sharp strikes. Strong polish lines through UNITED STATES OF AMERICA. "Die line" (actually a crack) from second dentil over T to left upper serif of E in UNITED. This reverse state is approximately the same as the latest state of 1839 Originals, now rusted. Both obverse and reverse show polishing lines, with the reverse being heavier."

Following up on JD's remarks, Craig Sholley observed that the area of die rust to the right of Liberty's elbow is consistent with early state Die Alignment III 1838 Restrike dollars. According to Craig, "While a bit surprising, it does make sense." Some 1836 Name on Base (Judd-60) Originals, 1839 Originals (Judd-104) and the earliest 1836 Name Below Base (Judd-58) dollars were also struck in DA IV. The deduction we can make then is Mint Directors James Ross Snowden followed suit and Henry Linderman began the restriking of Gobrecht dollars in Die Alignment IV, which we may call the original alignment for Restrikes. At some point the switch was made to Die Alignment III (the most likely suspect for this change in alignment is William Idler, who claimed he could tell the Restrikes he had made "at a glance.")

An additional feature for study for the advanced Gobrecht specialist is the line above the T in UNITED. Opinions still vary whether this is a die line or die crack. It is straight, but it a bit rough (like a die crack). Since die lines do crack sometimes, as seen on two cent piece reverses, both might be correct.

This is a splendid Gem proof example of the rare 1838 Gobrecht dollar. The deeply reflective fields show several layers of deep, multicolored toning. The devices are fully struck throughout, and there are no noticeable contact marks on either side. Overall this coin represents a pleasing example of a very rare Gobrecht dollar that should fit nicely in any high-grade collection of early silver dollars.

Ex: Norweb III (Bowers and Merena, 11/1988), lot 3776, where it was photographed in Die Alignment I or II orientation; Rosemont Central States Signature (Heritage, 4/2008), lot 2344; Eugene H. Gardner Collection II (Heritage, 10/2014), lot 98587. NGC ID# AKFH, PCGS# 11350

## SEATED DOLLARS

### 1857 Seated Liberty Dollar, Resplendent MS66 Renowned Business Strike Rarity Ex: Akers, Gardner

**3271 1857 MS66 NGC.** A coin of this quality and well-deserved reputation seldom appears, and when it does its superior eye appeal and sheer charisma transcends the population reports and grading points. The date — while more available than many of the 1850s rarities in the Seated Liberty series — remains elusive in near-Gem, very rare in Gem, and virtually unobtainable as a Premium Gem.

The Philadelphia Mint produced 94,490 silver dollars dated 1857, most of which were exported to China as payment for imported goods such as silk and tea. Today, only a few hundred examples exist in all grades. The balance were allegedly melted (primarily in China), with perhaps some melted by the Mint in 1861 for bullion.

The year 1857 was a calamitous time for the financial markets. The Panic of 1857 was precipitated by one financial crisis after another, not the least of which was the September 12, 1857 sinking of the S.S. *Central America* with the loss of its large cargo of gold coins and bullion. Ultimately, many banks failed. On October 13th, all but one New York City bank halted operations. Other banks nationwide halted specie payments that weren't resumed until December of the year. It is no surprise collectors were hesitant or unable to put away many of the year's silver dollars.

Surviving 1857 examples share interesting striking characteristics. Virtually all have some degree of prooflike surfaces and many are fully prooflike. While about 50 to 100 proofs were struck, the count has been somewhat confused over the years because many prooflike business strikes were described as proofs by early collectors.

Another telling characteristic of the 1857 is weakness of strike at Liberty's head and the surrounding top stars. Hardly any specimens stand out as being well-struck with frosty surfaces. As a result, these coins are highly valued by business strike collectors. John W. Dannreuther, who wrote the chapter on Liberty Seated dollars in John Highfill's *U.S. Silver Dollar Encyclopedia*, mentions an "amazing non-PL 1857" as one of his two favorite Seated dollars he had ever personally handled (the other was a Gem 1848 dollar).

David Bowers describes two such 1857 Seated dollars in his *Encyclopedia*. James C. Gray is quoted from a 1992 letter, "The specimen in my collection is frosty Uncirculated without even a hint of prooflike surface. It is fully struck on the head, the obverse stars, and the eagle's legs and talons..."

Bowers further states, "Another remarkable exception is a specimen David W. Akers owned in 1993, which exhibited sharply struck stars and lustrous frosty surfaces." That, of course, is the outstanding silver dollar offered here, purchased out of the Akers sale by Gene Gardner.

This Premium Gem is essentially brilliant-white with a whisper of golden-orange toning around a few stars and at the rims. The visual impression of the coin is frosted, highly lustrous perfection. Only the smallest abrasions are visible anywhere on the coin, pedigreed by a tiny mark beneath star 5. The vibrant luster rolls off the coin in billowing waves of light.

For the record, PCGS has graded two examples in MS65 with none finer, and NGC reports three pieces in MS66 (at least one is a duplicate grading event) and none finer (12/15).

Ex: *The David & Sharon Akers Collection (Heritage, 1/2014), lot 5291; The Eugene H. Gardner Collection Part III (Heritage, 5/2015), lot 98566. NGC ID# 24YW, PCGS# 6945*

1867 Seated Dollar, MS64  
Semiprooflike Fields

**3272** 1867 MS64 PCGS. Most Seated dollars from the 1860s are elusive in high grades, partly a result of limited mintage figures during and immediately after the Civil War. Hoarding and melting took its toll on the population as well, and high-end survivors are widely sought-after. This Choice 1867 representative displays bold devices set against beautiful semiprooflike mirrors. A few small grazes are present but none are individually distracting. Traces of light amber-gold toning grace the peripheral regions. Population: 12 in 64, 3 finer (12/15). NGC ID# 24ZA, PCGS# 6960

1872 Seated Dollar, MS64+  
Interesting Blundered Date Variety

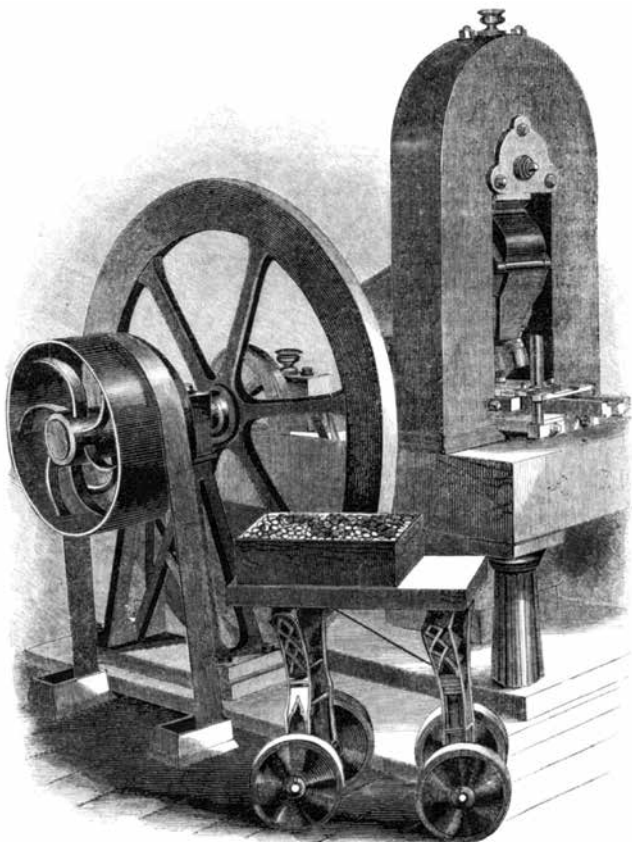

**3273** 1872 MS64+ PCGS. CAC. Blundered Date, Breen-5491. Several die anomalies exist on the obverse of this Seated dollar, which was minted to the extent of just over 1.1 million pieces utilizing several die pairs. The current obverse die was described by Walter Breen and occurs in approximately one third of the surviving 1872 dollars, according to an estimate by Seated specialist Larry Briggs. Misplaced digits are visible on the rock above the date (a 1 and a 2) as well as a second 2 immediately beneath the rock. Odd die lines occur in the dentils below the date, and a pair of long, threadlike die scratches are visible in Liberty's lower gown folds. The high-end, near-Gem surfaces of this lightly toned dollar are perfect for viewing the variety. The faintly gold-toned surfaces are lustrous and satiny, with only a tiny number of trivial marks anywhere on the coin. Both sides exhibit a sharp strike, while the smooth fields display hints of prooflikeness on the obverse. Few 1872 Seated dollars are any finer. Population: 37 in 64 (6 in 64+), 4 finer (1/16). NGC ID# 24ZJ, PCGS# 6968

1872-CC Seated Dollar  
Minimally Abraded XF40

**3274 1872-CC XF40 PCGS.** All four Seated Liberty dollars from the Carson City Mint were low-mintage issues, and all are rare in mint condition. Light gray and olive-green patination runs over each side of this XF specimen. Nice detail is evident on the design elements, though the bottom of the E in LIBERTY is a tad soft, a not-unusual trait for this design type. Both sides reveal fewer marks than might be expected for a large silver dollar that has experienced some circulation and for the designated grade. NGC ID# 24ZK, PCGS# 6969

Coining Press

PROOF SEATED DOLLARS

1846 Seated Liberty Dollar, PR62  
Richly Toned, Rare Early Proof

**3275 1846 PR62 NGC.** Prior to 1858, proofs were not coined with any regularity or with any real plan for distribution, and this dollar was probably struck at the request of one of the few collectors of the time or as a presentation piece for some contemporary VIP.

The 1846 proof silver dollar is a true rarity. Bowers estimates only 30-40 were coined, with 15 or so pieces that can be traced today. PCGS suggests 20 to 30 proofs are known. The mirrored fields on this example are quite muted due to the depth of the gunmetal-blue, amber-gold, and gray toning. Several minor marks and delicate lines from handling are noted in the fields on each side. However, these small impairments should not deter a strong bid for this exceedingly rare proof. It is the sole PR62 example at either service. Census: 1 in 62, 11 finer (1/16). NGC ID# 24ZW, PCGS# 6987

**1851 Silver Dollar, PR64 Cameo  
Desirable Proof Restrike**

- 3276 1851 Restrike PR64 Cameo PCGS. CAC.** The contrast on this exceptional Choice Cameo proof is considerable, with crisply struck and lightly frosted silver-white devices that project from moderately reflective gold-gray and smoke-gray fields. A lintmark that passes through star 1 serves as a pedigree identifier. Well-preserved overall despite a few minor hairlines in the fields.

Current numismatic scholarship suggests that not all proof 1851 restrikes were made at the same time. At least one batch was produced by Theodore Eckfeldt and accomplices from 1858 until mid-1860, and another was apparently created by Mint Director Henry Linderman, likely from 1867 to 1868. The same centered date obverse die was used for all restrikes. Cameo proofs (including the present piece) exhibit die chips on the left (facing) wing. Those without cameo contrast typically lack those die chips, and instead the first three vertical lines on the reverse shield are attenuated near the juncture with the horizontal lines.

*Ex: Dallas Signature (Heritage, 4/2007), lot 947; Legend Numismatics (6/2007); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98577. NGC ID# 2524, PCGS# 86993*

**1856 Seated Dollar, PR62  
Pre-Commercial Era Proof Rarity**

- 3277 1856 PR62 NGC.** Mintage figures and survival rates are largely guesswork when it comes to proofs struck prior to 1858. In 1988, Breen wrote that only a few dozen 1856 proof dollars had survived. More recently, Dick Osburn and Brian Cushing have proposed a production of 100 Seated dollar proofs and a survivorship of 40 or so pieces. NGC and PCGS report 67 grading events in all (non-Cameo and Cameo), including an unknown number of resubmissions (1/16). When held at an angle under a lamp, blushes of golden-orange, russet, violet, and blue appear over each side. The toning hides most grade-limiting marks. NGC ID# 252A, PCGS# 6999

**1857 Seated Dollar, PR61  
Only 40 Proofs Believed Extant**

- 3278 1857 PR61 NGC.** Seateddollarvarieties.com writes of the 1857 proof Seated dollar: "It's a rare proof, with only 40 or so estimated survivors. ... The obverse die used to strike OC-P1, Obverse P1, was later used to strike business strikes. The reverse die is transitional. It was first used to strike proofs in 1856, then 1857, and finally 1858." Interestingly, the reverse die was also used to manufacture the 1851 and 1852 restrike dollars. This PR61 specimen features a thin veil of golden patina over surfaces that show scattered contact marks and trivial hairlines. A great chance to procure a rare pre-Commercial Era proof dollar. NGC ID# 252B, PCGS# 7000

**1857 Seated Dollar, PR66+  
A Spectacular, Lightly Toned Proof  
The Finest Certified**

**3279 1857 PR66+ NGC.** The 1857 proof Seated dollar is about on par with the 1856 in terms of overall availability, notably scarce in all grades and a significant rarity in Gem or finer condition. The mintage was unrecorded, but most estimates peg the likely total in the 50 to 100-coin range. With as many as 50 to 75 pieces believed extant, it seems that a significant portion of the original mintage survives for modern-day collectors.

This remarkable Premium Gem proof is fully struck on the stars and Liberty's head and is bold throughout the eagle's feathers. Pale lavender-gold and powder-blue hues blend over each side, leaving the softly frosted devices with modest, undesignated field-motif contrast. The finest non-Cameos certified are four PR66 at NGC (with this piece the finest of these in PR66+) and one PR66 at PCGS (12/15).

*Ex: Purchased by Eugene Gardner from Legend Numismatics (5/2007); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98580. NGC ID# 252B, PCGS# 7000*

**1859 Seated Dollar, Toned PR64+  
Sharp and Attractive**

**3280 1859 PR64+ PCGS.** Deeply toned surfaces are nonetheless engaging and attractive, rose in the centers with deeper burgundy and bluish patina near the rims and some untuned silvery areas remaining, more so on the reverse. This near-Gem proof boasts a nice sharp strike, among the finer survivors from the coinage of 800 proofs. A few small contact marks determine the grade but there are no major hits. A small light-colored flaw appears just above 1 in the date. Population: 47 in 64 (1 in 64+), 15 finer (1/16). NGC ID# 252D, PCGS# 7002

**1865 Seated Dollar, PR63 Cameo  
Small Run of 500 Proofs**

**3281 1865 PR63 Cameo PCGS.** A final run of 500 proofs closed out the No Motto subset in the Seated dollar series. Cameo representatives are considerably rarer than their uncontrasted counterparts, with the PCGS *Population Report* showing 184 non-Cameo submissions versus 55 Cameo grading events (1/16). Hints of golden-olive delicately color the otherwise brilliant surfaces of this Select proof offering. Reflective fields, frosty motifs, and surfaces with minimal contact make this proof dollar immensely desirable.

*Ex: FUN Online Session (Heritage, 1/2006), lot 27536. NGC ID# 252K, PCGS# 87008*

## TRADE DOLLARS

1877 Trade Dollar, MS66  
FS-101 Doubled Die Obverse, None Finer

**3282 1877 Doubled Die Obverse, FS-101, MS66 NGC.** Die doubling occurs on stars 11, 12, and 13 as well as on the wheat stalks, LIBERTY, and IN GOD WE TRUST. With a production figure exceeding 3 million pieces, the 1877 Trade dollar must be considered a type coin, but its mintage nonetheless pales beside that of the 1877-S, where close to 10 million pieces were struck by the San Francisco Mint.

Deep pinkish-gray and blue patina prevails throughout both sides of this attractively toned Philadelphia issue. As expected at the Premium Gem level, essentially pristine and mark-free surfaces exist throughout. The strike leaves little to be desired — unusual for the issue — save for minor softness on the wheat sheaves and the hair around Liberty's ear. The reverse is also sharply defined, despite slight softness on the left (facing) claw. The present coin is the sole finest at NGC (12/15).

Ex: FUN Signature (Heritage, 7/2012), lot 3887; Eugene H. Gardner Collection Part II (Heritage, 10/2014), lot 11627. PCGS# 145696 Base PCGS# 7044

1878-CC Trade Dollar, AU58  
Key to the Series

**3283 1878-CC AU58 PCGS.** A low initial mintage of 97,000 1878-CC Trade dollars was reduced even further when 44,148 dollars, mostly consisting of the 1878-CC, were melted on July 19 of the same year. The issue is the rarest in the series in circulated condition, and only 350 coins are thought to survive across the entire grade spectrum. This near-Uncirculated example features natural, medium gray toning over each side with olive and russet peripheral shadings. Well-struck with a trace of friction over the devices. A small reeding mark is seen above Liberty's thigh. Population: 14 in 58, 33 finer (1/16). NGC ID# 253M, PCGS# 7047

## MORGAN DOLLARS

### 1878-CC Morgan Dollar, MS66 ★ Semiprooflike With Sharp Contrast

**3284 1878-CC MS66 ★ NGC.** The 1878-CC Morgan marks the first occasion when the Carson City Mint's annual silver dollar coinage breached 2 million coins (2.2 million). This sharp Premium Gem example is untoned and nearly prooflike, showing distinctive (but undesignated) cameo contrast. The NGC Star relates to the outstanding eye appeal, and the service records just nine finer submissions (1/16). NGC ID# 253M, PCGS# 7080

### 1879-CC Dollar, MS62 Challenging Date in the CC Series

**3285 1879-CC MS62 PCGS.** The 1879-CC Morgan dollar is one of the most challenging dates in the Carson City collection, second only to the 1889-CC in high grade. This MS62 example is lightly abraded on Liberty's cheek, consistent with the grade, but it is otherwise eye-appealing with frosty luster over brilliant surfaces and well-struck design elements. NGC ID# 253U, PCGS# 7086

### 1879-CC Dollar, Brilliant MS63 Semiprooflike Fields, Normal Mintmark

**3286 1879-CC MS63 PCGS. CAC.** The fields are semiprooflike and contrast nicely with the frosted portrait of Liberty and the sharply struck, frosty eagle. Blending at the eagle's claws and among the over-ear hair strands is minimal. The second-scarcest Carson City issue, this lustrous coin is brilliant and high-end for the Select Uncirculated grade. The coin is CAC endorsed, housed in an old green label holder. NGC ID# 253U, PCGS# 7086

### 1879-CC Morgan Dollar, Untoned MS64+ Key Series Issue, Seldom Seen Finer

**3287 1879-CC MS64+ PCGS. CAC.** Normal Mintmark. This coin is a virtual match in color, luster, grade, service, and CAC approval with a Capped Die VAM-3 example of this issue appearing in this same session — potential for a paired set acquisition to some forthright bidder. The frosty surfaces are untuned and show no trace of other color, glowing with soft but complete luster throughout both sides. The few scattered ticks are trivial, largely removed from the focal points and not meriting singular mention. The eagle's breast is remarkably clean, and the strike is well brought up overall. Excellent eye appeal prevails on this piece. The last example we handled in this exact grade and service was lot 5482 in our FUN Signature (Heritage, 1/2016), lot 5482, which brought \$12,925. NGC ID# 253U, PCGS# 7086

**1879-CC Dollar, MS63 Deep Mirror Prooflike  
High Contrast, Scarce With Deep Mirrors**

- 3288 1879-CC MS63 Deep Mirror Prooflike PCGS.** Normal mintmark. The portrait of Liberty is especially well brought up on this highly contrasted Deep Mirror Prooflike example. The 1879-CC is scarce in all formats, but especially so with mirrored surfaces. This Select Uncirculated coin shows a few light marks that account for the grade — most notably, a field abrasion beneath the chin and light scrapes beneath UNUM, but these are nearly unavoidable at the grade level. The overall quality is impressive. Housed in a green label holder. Population: 18 in 63 Deep Mirror Prooflike, 21 finer (12/15). NGC ID# 253T, PCGS# 97087

**1879-CC Morgan Dollar, MS64  
Popular Capped Die, VAM-3 Variety**

- 3289 1879-CC Capped Die, VAM-3, MS64 PCGS.** A Top 100 Variety. The Capped Die variety was created when the engraver initially punched a small CC mintmark into the die, and then punched a large CC over it, trying to efface the undertype in the process. This well-detailed Choice example exhibits lightly marked surfaces, with slightly subdued mint luster, and a few hints of lavender toning. PCGS has graded 13 numerically finer examples (1/16). NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

**1879-CC Capped Die Morgan, Untoned MS64+  
With CAC Approval**

- 3290 1879-CC Capped Die, VAM-3, MS64+ PCGS. CAC.** A Top 100 Variety. So close to the Gem grade and with the CAC green approval label, this key-date Morgan dollar should be near the top of many series specialists' want lists. Besides the coin's many innate admirable qualities, it is among the couple of dozen finest certified at PCGS and CAC as well. PCGS reports only 19 examples in MS64+ with 11 in MS65 and two MS65+ finer (1/16). This compares to more than 360 examples at PCGS in MS64. And while CAC ignores Plus and Star designations and such in assigning its approvals (thus making the numbers within a given grade level potentially inflated), only 40 submissions of this issue in MS64 (and MS64+) have received its blessing, as have five MS65 finer.

This splendid 1879-CC is untoned silver-white, save for the faintest blush of champagne patina near the rims. The preservation is excellent, and the surfaces throughout show only the most minute, unimportant ticks that likely preclude a Gem grade. A fine Morgan dollar set will benefit by the addition of this coin. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC Morgan Dollar, MS60  
Capped Die With Die Gouges, VAM-3A

- 3291 1879-CC Capped Die, VAM-3A, MS60 PCGS.** A Top 100 Variety. Soft mint luster glows beneath the deeply frosted surfaces of this Capped Die variety, which shows obvious die gouges beneath the A of AMERICA and near the eagle's right wing. Both the date and mintmark are repunched on this popular variety. Few marks are seen on the coin (particularly at the assigned MS60 grade), although the luster is a bit subdued by the extensive mint frost. Housed in an old green label holder. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

GSA DOLLAR

1879-CC GSA Dollar, MS61  
Lightly Toned and Lustrous

- 3292 1879-CC GSA MS61 NGC.** Faint gold toning visits the borders of this lustrous key date Carson City silver dollar. The cheek exhibits the expected number of delicate abrasions, and the hair above the ear lacks an absolute impression from the dies. A GSA box is included but no certificate is present. NGC ID# 253T, PCGS# 518848 Base PCGS# 407086

MORGAN DOLLAR

1880-CC Silver Dollar, MS67  
Third Reverse, VAM-9

- 3293 1880-CC MS67 PCGS. VAM-9.** A brilliant Superb Gem that boasts booming luster and exceptionally smooth fields. Delicate marks on the portrait preclude perfection. Most Uncirculated 1880-CC dollars in today's marketplace participated in the 1970s GSA auctions. The issue is rife with interesting die marriages. Although VAM-9 has comparatively few memorable characteristics, it is scarcer than the more popular VAM-4. VAM-9 can be attributed by its die lump above the left foot of the second L in DOLLARS. An obverse pick-up point is provided by a diagonal die line in the lower loop of the second 8 in the date. NGC ID# 2542, PCGS# 7100

## GSA DOLLAR

1880-CC GSA Dollar, MS66  
Popular Carson City Issue

**3294** 1880-CC GSA MS66 NGC. VAM-8. Rich sea-green, lavender, and golden-brown toning adorns the left obverse of this otherwise brilliant silver dollar. The lustrous surfaces exhibit minimal contact, and the centers show only minor incompleteness. The second-lowest mintage Carson City Morgan dollar issue. A GSA box accompanies the lot. NGC ID# 2542, PCGS# 518851 Base PCGS# 407100

Richard Bland

W. B. Allison

## MORGAN DOLLARS

1880-O Morgan Dollar, MS65  
Sharply Detailed and Vividly Toned

**3295** 1880-O MS65 PCGS. A substantial mintage of more than 5.3 million Morgan dollars was accomplished at the New Orleans Mint in 1880, all struck with the reverse of 1879 (slanting arrow feather). The 1880-O was a well-produced issue in general, and it was well-represented in Treasury releases over the years, so enough nice specimens have usually been available to satisfy collector demand. Still, at the MS65 grade level, the 1880-O is an elusive issue, and finer coins are virtually unobtainable.

This impressive Gem offers sharply detailed design elements, with fine definition on the hair strands above Liberty's ear. The well-preserved surfaces are blanketed in iridescent shades of lavender, greenish-gold, and cerulean-blue toning, with vibrant mint luster underneath. Eye appeal is terrific. Perhaps to emphasize the branch mint origin of this coin, PCGS has holdered it with the reverse in the frontal position. Population: 38 in 65 (4 in 65+), 1 finer (12/15). NGC ID# 2543, PCGS# 7114

**1884-S Dollar, MS61**  
Pleasing for the Grade

- 3296 1884-S MS61 NGC.** A challenging issue in Mint State, seldom seen without unsightly abrasions. This Uncirculated 1884-S Morgan dollar shows only light, scattered surface grazes, which are largely masked by mottled amber-gold, lilac, and olive-gray toning. The coin is well-struck, and eye appeal is above-average for the issue and grade. Finer examples are infrequently offered. NGC ID# 254P, PCGS# 7156

**1884-S Morgan Dollar, MS62**  
Highly Sought in Mint State

- 3297 1884-S MS62 NGC.** Collectors in 1884 had little appreciation either for the significance of mintmarks or for the Morgan dollars per se, and it would not be until the 1960s that the elusiveness of the 1884-S in Mint State gained notice. By then, most of the 1884-S dollars were either circulated, melted, or exported.

This example was certified as MS62 many years ago, housed in a former-generation NGC holder that was in use from 1992 to 1997. It offers exceptional quality for the grade, with few marks and undisturbed mint luster. Areas of lilac-gray and orange-gold toning are seen on both sides, more extensively on the reverse. Liberty's cheek shows only a few tiny marks. NGC reports just 60 numerically finer submissions (1/16). NGC ID# 254P, PCGS# 7156

**1885-CC Morgan Dollar, MS67**  
Bold Obverse Toning

- 3298 1885-CC MS67 NGC.** The allure of the CC mintmark and low 228,000-coin mintage places ever-strong demand on the 1885-CC, but the Treasury release of the 1960s and 1970s ensures an adequate supply of high-grade survivors. The obverse of this Superb Gem is richly toned in blended rainbow iridescence, while the reverse is frosty and brilliant. The coin is razor-sharp and virtually unabraded. NGC reports just 5 numerically finer grading events (1/16). NGC ID# 254S, PCGS# 7160

**1885-CC Dollar**  
Superb Gem in All Respects

- 3299 1885-CC MS67 PCGS.** The low 228,000-piece mintage is numismatically interesting but immaterial to the availability of the issue, since most of the more than half of the mintage was released in Mint State into silver dollar enthusiasts hands during the GSA sales. Rather, the scarcity of Superb Gem and finer coins makes this MS67 example of keen interest to Carson City specialists and Morgan dollar series collectors. Untoned, satin-smooth, brilliantly lustrous, and razor-sharp, this exceptional dollar lacks any mentionable flaws or distractions. PCGS has graded but a single coin numerically finer. Population: 73 in 67 (3 in 67+), 1 finer (1/16). NGC ID# 254S, PCGS# 7160

**1886 Morgan Dollar, MS68**  
Exceptional Surfaces

- 3300 1886 MS68 NGC.** A splendidly smooth and fully struck stone-white silver type coin. The dies were long in use and provide an orange-peel texture in the fields, as struck. Extended coinage from the die pair has also caused some softness on the breast feathers of this piece. This coin may have once been the top coin in a sealed bag of silver dollars, likely opened in the 20th century, decades after production. Census: 30 in 68 (3 in 68+, 2 in 68 ★), 0 finer (12/15).  
Ex. *Summer FUN Signature* (Heritage, 7/2011), lot 4047. NGC ID# 254V, PCGS# 7166

1889-CC Dollar, AU50  
Green Label Holder

- 3301 1889-CC AU50 PCGS.** Unlike most Carson City Morgan dollar issues, the 1889-CC was not set aside in bag quantity in Treasury vaults. When the GSA auctions ended in 1980, just a single 1889-CC dollar had participated. The typical example grades VF to XF and has problems such as cleaning or scratches. But the present coin displays bright luster throughout the margins and motifs, and the surfaces are refreshingly free from mentionable marks. Encased in a green label holder. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, AU53  
Cornerstone to the Carson City Series

- 3302 1889-CC AU53 ANACS.** The key date among the Carson City Morgan dollars, rare in all grades with never enough coins to satisfy the collector demand. Apparently, most of the 350,000-piece mintage was melted, and the few coins that entered commerce circulated heavily. This About Uncirculated example retains a fair amount of mint luster at the borders and around the central devices, with traces of orange-gold toning and silver-gray interiors. Light abrasions and bagmarks are noted, with a thin mark on Liberty's chin-to-neck, yet the motifs are well-defined. NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, AU55  
Rarest Carson City Morgan

- 3303 1889-CC AU55 NGC.** The Carson City Mint managed only an abbreviated production of 350,000 silver dollars in the waning months of 1889, and apparently not all of the coins were distributed into commerce. This Choice, lightly circulated example is minimally marked and retains residual mint luster across both sides. Minor softness over the ear and on the eagle's high points are grade-appropriate. Lightly toned silver surfaces display pleasing golden toning approaching the borders. NGC ID# 2559, PCGS# 7190

1889-CC Morgan Dollar, Pleasing MS61  
Always-Elusive Carson City Issue

- 3304 1889-CC MS61 PCGS.** Only about 6% of all the 1889-CC dollars offered by Heritage over the past 15 years (more than 2,600 examples) achieved an Uncirculated grade, and of those few coins, not many pieces compare favorably with the visual appeal of this modestly graded MS61 example. Peripherally toned in blue and russet-red shades (likely from longtime album storage), the centers are brightly lustrous and sharply struck. A reeding mark at the chin to the nose is the sole mark of note, as all of the other abrasions are minor, well-scattered, and minimal for the grade.

Such originality and surface quality is seldom seen and highly valued for the 1889-CC. Storage and transport invited coin-to-coin contact, while the issue's sparse availability has always eluded collectors. Just 350,000 pieces were struck and only a small fraction of that mintage ever reached public hands. Bidders are encouraged to pay extra attention to this strictly graded Mint State opportunity. NGC ID# 2559, PCGS# 7190

**1891-CC Morgan Dollar, Toned MS65+**

- 3305 1891-CC MS65+ PCGS.** A high-end Gem from the famous Carson City Mint, this specimen exhibits sharply detailed design elements and vibrant, frosty mint luster, under spectacular shades of ice-blue, lavender-gray, greenish-gold, and violet toning. The surfaces are well-preserved and eye appeal is outstanding. PCGS has graded 34 numerically finer examples (1/16). NGC ID# 255H, PCGS# 7206

**1891-CC VAM-3 Morgan Dollar, MS66+  
Branch Mint Condition Rarity**

- 3306 1891-CC Spitting Eagle, VAM-3, MS66+ PCGS.** A Top 100 Variety. The VAM-3 die pair takes a back seat to the exceptional condition rarity of this Plus-Graded Premium Gem 1891-CC dollar, which is virtually unobtainable any finer. The surfaces are deeply frosty, virtually unmarked, brilliantly lustrous — untoned and sharply struck.

While the frosted fields and devices “invite” abrasions, somehow this coin avoided all but the most minor luster grazes and minuscule contact. Liberty’s cheek is pristine. Both PCGS and NGC have certified just one finer coin each, and the PCGS Plus designation separates this example from other MS66 representatives. This coin is destined for one of the finest Morgan dollar collections or Registry Sets. For the VAM collector, it is likely unimprovable. Population: 33 in 66 (5 in 66+), 1 finer (1/16). NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**1892-CC Dollar, Semiprooflike MS65  
Intermittent Toning, Vibrant Cartwheel Luster**

- 3307 1892-CC MS65 NGC.** Areas of reddish-gold toning join lemon-gold accents at the borders and creep into the fields of this otherwise brilliant and frosty Gem Carson City dollar. The reverse die is heavily clashed and cracked, while the obverse is undisturbed by either die cracks or any significant abrasions or marks. The strike is sharp but not full, with typical blending over the ear. Scarce in Gem and very scarce any finer, the 1892-CC was absent from the GSA sales. NGC reports only 17 finer examples (1/16). NGC ID# 255M, PCGS# 7214

**1892-CC Morgan Dollar, MS65  
Semiprooflike Fields, VAM-8A**

- 3308 1892-CC MS65 PCGS. VAM-8A.** Interesting for the filled 2 in the date, the VAM-8A variety is one of the few die pairs for the issue that holds any interest for variety collectors. More importantly, the penultimate Carson City issue is notable for its absence from the GSA sales and the remarkably few coins that qualify for a Gem grade or finer. This MS65 example radiates silver luster from reflective, sharply struck fields and lightly frosted motifs. A fleeting glimmer of reddish-gold toning briefly visits the margins on both sides. PCGS reports just 31 numerically finer coins (1/16). NGC ID# 255M, PCGS# 7214

**1893-CC Silver Dollar, MS62  
Above-Average Central Detail**

- 3309 1893-CC MS62 PCGS.** Aside from a trace of orange in the date area, this final-year Carson City dollar is untuned and starkly silver with mostly prooflike fields on both sides. Sharply struck at the centers, both the hair detail above the ear and the eagle’s plumage are bold. A few light field abrasions are noted, as well as a shallow mark on Liberty’s chin-to- cheek. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, MS63**  
**Attractively Lustrous and Well-Defined**

- 3310 1893-CC MS63 PCGS.** Frosty, vibrant mint luster graces the lightly toned surfaces of this Select Mint State 1893-CC Morgan. The devices are unusually well-struck, and only a few small marks on Liberty's cheek limit the grade. The obverse displays splashes of teal-blue and lavender toning over champagne-gold undertones, while the reverse has more traditional coloration that includes blue and amber peripheries surrounding a light golden interior. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS63**  
**In-Demand, Elusive Final-Year Issue**

- 3311 1893-CC MS63 PCGS.** The final silver dollars rolled off the coin presses in May, 1893 at the historic Carson City Mint, bringing the mintage for the year to just 677,000 pieces. Handling and transport was carelessly done, resulting in many bagmarked coins and putting a premium on sharply produced, minimally abraded examples. The present Select Uncirculated coin is remarkably clean for the grade, with only a few minor abrasions and sharply struck devices. Untoned and brilliantly lustrous, the surface quality and eye appeal are suggestive of an even higher grade. NGC ID# 255S, PCGS# 7222

**1893-CC Dollar, Reflective MS63**  
**Remarkably Attractive for the Grade**

- 3312 1893-CC MS63 PCGS.** David Bowers suggests about half of the surviving 1893-CC dollars have some degree of prooflike surface, yet few coins are as notably reflective on both sides as this Select Uncirculated example. Bagmarks are fewer than expected for the final Carson City issue, always the subject of intense collector interest and popularity. The strike over the ear is soft, but the eagle's breast is above-average. The coin is untuned, lustrous, and extremely attractive for the assigned grade. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS63**  
**Popular Final-Year Issue**

- 3313 1893-CC MS63 PCGS. CAC.** An attractive Select example from the last year of operations at the Carson City Mint, this coin exhibits sharply detailed design elements throughout, with lustrous surfaces that show a scattering of minor, grade-consistent contact marks on both sides. A few hints of greenish-gold and violet toning visit the peripheries. NGC ID# 255S, PCGS# 7222

**1893-S Morgan Dollar**  
**Richly Toned, Choice XF**

- 3314 1893-S XF45 PCGS.** Original mint luster remains on both sides of this richly patinated key dollar, where the reverse is particularly Choice for the XF level and approaches a finer grade. The obverse displays deep, bluish-gray toning accented by lighter rose-gold accents, with mint luster still visible in protected areas.

A few light marks are seen on the obverse including a short nick on the cheekbone. The fields are largely unabraded aside from a few scattered, small marks and faint lines, surrounded by unmarked rims. Merging at the hair strands over Liberty's ear and on the eagle's breast feathers are of little concern for this distinctive '93-S example, ideal for bidders who prefer toned mid-grade Morgans with remaining mint luster. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar, XF45  
Indisputable Series Key

**3315 1893-S XF45 PCGS.** The silver-gray surfaces of this key San Francisco dollar display a faint gold accents and a trace of mint luster at the outer edges. Sharp detail remains, although some blending from strike and wear appears at the center of both sides. The series-low mintage of just 100,000 pieces creates inexhaustible demand for the issue, for which this example is clearly well-suited.

Only a few light marks exist on the Choice XF surfaces. Some vestiges of prooflike surface remain at the margins, a frequently seen characteristic of the 1893-S, although the moderate circulation has reduced the effect. Still, this lightly toned representative is ideal for an XF or finer set. NGC ID# 255U, PCGS# 7226

1893-S Morgan Dollar  
Eye-Appealing AU53

**3316 1893-S AU53 PCGS.** Ex: STP Legacy Collection. Boasting extremely attractive surfaces that are untuned silver-white in the centers but accented with a touch of lilac and pale blue near the rims, this lightly circulated key-date 1893-S Morgan ranks far above most survivors of the issue. Generous luster sweeps each side. The typical VF-or-so example pales before this coin, showing only a few light marks from circulation but only a single mentionable one, a small nick on the lower chin of Liberty. A few thin, wispy lines in the cheek center are undistracting, and the reverse is quite nicely preserved.

The line of demarcation for a truly nice collection of Morgan dollars will include an 1893-S in XF45 or AU50, the jumpoff point where surviving examples become truly rare and elusive. This piece should see spirited bidding when it crosses the block.

From *The Alan Berkowsky #7 PCGS Registry Set of Morgan Dollars*.  
NGC ID# 255U, PCGS# 7226

**1895-O Silver Dollar, AU58**  
Lustrous and Appealing

**3317 1895-O AU58 PCGS.** The inherent scarcity of the 1895-O Morgan dollar in Mint State imparts strong demand on high-end AU coins. This near-Mint representative displays significant mint luster shining through light golden toning. Trivial marks on Liberty's cheek are minor in the context of the grade, and slight weakness on the eagle's breast and the hair above Liberty's ear is as expected for this New Orleans issue. NGC ID# 255Y, PCGS# 7236

**1895-O Dollar, Untoned MS60**  
Conditionally Rare Branch Mint Issue

**3318 1895-O MS60 NGC.** The 1895-O has a low mintage relative to other dates in the Morgan dollar series (450,000 coins), and it enjoys above-average demand because of the unavailability of P-mint circulation strikes. However, the issue's meager survival rate in Uncirculated condition makes it the renowned rarity it is. Most examples were placed into circulation, where they stayed for a short period of time based on the number of XF and AU survivors. Only a few pieces were saved in Mint State, either purposefully or by chance, and they are widely pursued by series specialists. This untoned 1895-O dollar has softly frosted luster over each side. The centers are better-struck than expected for the date, but areas of incompleteness occur on the lower wreath and lower obverse stars. Abrasions are peppered throughout. NGC ID# 255Y, PCGS# 7236

**1895-S Dollar, Brilliant MS63+**  
Semiprooflike Fields

**3319 1895-S MS63+ PCGS. CAC.** Intense cartwheel luster combines with semiprooflike mirroring in the fields, while the design elements contrast with thick, frosty brilliance. An untoned, minimally abraded example of this conditionally elusive San Francisco issue. The strike is a trifle soft on the high points of the central devices, but the eye appeal is hardly affected. NGC ID# 255Z, PCGS# 7238

**1897-S Morgan Dollar, MS67 Prooflike**  
Tied for Finest at PCGS

**3320 1897-S MS67 Prooflike PCGS.** The 1897-S Morgan dollar was produced in large numbers and the issue is relatively available in lower Mint State grades, making it a popular choice with branch mint type collectors. The 1897-S is a condition rarity in MS67, however, and examples with prooflike surfaces are decidedly rare. This magnificent Superb Gem exhibits sharply detailed design elements and reflective prooflike fields on both sides. The brilliant surfaces are impeccably preserved and no mentionable distractions are evident, even on close inspection with a loupe. This coin should find a home in the finest collection or Registry Set. Population: 4 in 67 Prooflike, 0 finer (1/16). NGC ID# 267S, PCGS# 7251

**1901 Silver Dollar, MS63**  
**Elusive This Well-Preserved**

- 3321 1901 MS63 PCGS.** The 1901 Morgan dollar is famously scarce in Mint State and is most often seen with bagmark-riddled surfaces. Pieces qualifying for the MS63 grade level are infrequently seen, and anything finer is rare and far out of reach for most collectors. This Select representative displays satiny luster with a blush of light golden toning over each side. A few trivial grazes on Liberty's cheek and in the fields limit the grade, but there are no singular abrasions. Minor strike softness is seen on the eagle's breast and the hair above Liberty's ear, as usual. PCGS reports only 37 finer examples, mostly in MS64 (12/15). NGC ID# 256J, PCGS# 7272

**1902-S Silver Dollar, MS66**  
**Distinctive Obverse Toning**

- 3322 1902-S MS66 NGC.** As the 1902-S Morgan dollar is typically seen either brilliant or lightly toned golden, this Premium Gem stands out with a splash of deep aquamarine, amber, and russet toning on the obverse and warm sun-gold peripheral hues on the reverse. The coin is also conditionally rare, and finer pieces are prohibitively so. This piece is among the finest at NGC and shows exceptional preservation with a hint of the usual softness on the eagle's breast. Census: 10 in 66, 0 finer (12/15). NGC ID# 256P, PCGS# 7282

**1903-O Morgan Dollar, MS66 Prooflike**  
**Tied for Finest at PCGS**

- 3323 1903-O MS66 Prooflike PCGS. CAC.** Even though the 1903-O Morgan dollar flowed by the thousands from Treasury coffers in the 1960s, few Prooflike examples were among them. Generous contrast prevails over the surfaces of this representative, with fields that are mirrored and untuned except for a mere trace of color near U and S of PLURIBUS. Liberty's cheek is smooth and frosted. The present sharply struck Premium Gem is far finer than most — brilliant and reflective, one of four in this grade with the CAC green approval sticker. Population: 6 in 66 (1 in 66+) Prooflike, 0 finer (1/16). NGC ID# 256S, PCGS# 7287

## PROOF MORGAN DOLLARS

1880 Morgan Dollar, PR66+ Cameo  
Attractive, Heavily Contrasted Example

**3324 1880 PR66+ Cameo NGC.** A popular speculation in Trade dollars, which were only produced in proof format in 1880, caused an increased demand for proof sets that year. As a result, the Morgan dollar proof mintage was a generous 1,355 pieces. This high-end Premium Gem displays sharply detailed motifs, with richly frosted devices that contrast boldly with the deeply mirrored fields. Census: 37 in 66 Cameo (2 in 66+ Cameo, 1 in 66 ★ Cameo, 1 in 66+ ★ Cameo), 45 finer (12/15). NGC ID# 27Z4, PCGS# 87315

1880 Morgan Dollar, PR66 Cameo  
Intense Field-Device Contrast

**3325 1880 PR66 Cameo PCGS Secure. CAC.** Ex: Sunset Hill Collection. The 1880 Trade dollar was a proof-only issue, which prompted speculators to order more proof sets than usual that year in hopes of securing a coin that would be rare and desirable in the future. An unintended consequence of this speculation was a large proof mintage of 1,355 Morgan dollars, also included in the proof sets, the largest production total of the series. This impressive Premium Gem exhibits sharply detailed design elements that have an unusually thick coat of mint frost, creating intense cameo contrast with the deeply mirrored fields. No mentionable distractions are evident and a few hints of pale gold toning add to the terrific eye appeal. Population: 27 in 66 (3 in 66+) Cameo, 18 finer (1/16). NGC ID# 27Z4, PCGS# 87315

### 1885 Morgan Dollar, Richly Toned PR66

- 3326 1885 PR66 PCGS.** From a proof mintage of 930 coins, this Premium Gem displays bold design definition, and the colorful surfaces are well-preserved. Deep toning in varying shades of olive, gold, ocean-blue, and pale lavender encompasses each side, slightly muting the mirroring in the fields. Population: 15 in 66, 2 finer (1/16).  
Ex: *New York Signature* (Heritage, 10/2014), lot 4922; *FUN Signature* (Heritage, 1/2015), lot 6187. NGC ID# 27ZE, PCGS# 7320

### 1886 Morgan Dollar, PR66 Cameo Only One Finer at PCGS

- 3327 1886 PR66 Cameo PCGS.** Liberty's cheek is remarkably free of even the most insignificant signs of contact on this delightful Premium Gem, and the sharply detailed design elements have enough mint frost to create a modest degree of contrast with the slightly hazy reflective fields. Population: 6 in 66 Cameo, 1 finer (1/16). NGC ID# 27ZF, PCGS# 87321

### 1892 Morgan Dollar, PR66 Cameo Bold Contrast, Marginal Rainbow Hues

- 3328 1892 PR66 Cameo NGC.** The Mint struck 1,245 proof Morgan dollars in 1892. Output nearly doubled over the previous year, in large part because of the excitement generated by the introduction of Chief Engraver Charles Barber's new subsidiary silver coinage design. Cameo proofs are challenging, as they represent a small fraction of survivors. Each side of this Premium Gem Cameo proof is brilliant with bold field-device contrast. Bands of rainbow toning appear near the peripheries. NGC ID# 27ZM, PCGS# 87327

### 1902 Dollar, PR66 Deeply Reflective Mirrors

- 3329 1902 PR66 NGC.** The Mint abandoned its traditional contrasted proof finish in 1902, opting instead for a brilliant finish with polished fields and devices. A total of 777 proof Morgan dollars were minted in that year, and specimens are rarely found at this impressive grade level. Daubs of golden-russet and crimson patina hug the border areas, leaving the interiors brilliant. Deeply reflective mirrors lack obtrusive signs of contact. NGC ID# 2822, PCGS# 7337

## PEACE DOLLARS

### 1924 Dollar, MS67 Brilliant and Frosted Example

- 3330 1924 MS67 NGC.** A Superb Gem, frosted across both sides and elegant in its absence of marks. The coin radiates silver luster. A bold strike accentuates Liberty's hair and the eagle's plumage, while the overall quality puts this coin solidly among the finest seen by NGC. Just two coins are certified in a higher numeric grade: one by PCGS, the other by NGC (1/16). NGC ID# 257J, PCGS# 7363

### 1934-S Peace Dollar, MS64 Elusive Any Finer

- 3331 1934-S MS64 PCGS.** The 1934-S Peace dollar is marginally available in MS64 but is seldom seen finer. This collector-grade Choice example shows well-struck motifs with softly frosted luster and light golden toning. A few trivial grazes on Liberty's cheek limit the grade but pose little distraction. The scarcest issue in the series in Uncirculated condition. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS65  
Rarely Encountered Finer**

**3332 1934-S MS65 PCGS.** The key to the Peace dollar series in Mint State, the 1934-S is a strong performer in high grades. An important Gem quality representative, the present piece displays mottled lilac-gray and tan-brown toning over exceptionally clean surfaces. The strike is quite bold for a 1930s product of the San Francisco Mint. Housed in an old green label holder. There are 28 finer coins at PCGS (12/15).

Ex: *Long Beach Signature* (Heritage, 6/2000), lot 8060. NGC ID# 257Z, PCGS# 7377

**SUSAN B. ANTHONY DOLLAR**

**1979-P Anthony Dollar, MS67+  
Elusive Wide Rim Variety**

**3333 1979-P Wide Rim, FS-301, MS67+ PCGS.** A slight design modification in 1979 resulted in a wider rim on the Susan B. Anthony dollar than had been previously used. This variety is sometimes referred to as the "Near Date" variety, since the date appears closer to the rim. The Wide Rim variety is significantly scarcer in MS67 than its Narrow Rim counterpart. This coin ranks as one of just 14 examples certified as MS67 at PCGS, and is the only one awarded a Plus designation; none are numerically finer at that service (1/16). Both sides display a lovely blend of sun-gold and sky-blue toning, with well-struck design elements and no significant abrasions. NGC ID# 2593, PCGS# 145367 Base PCGS# 99571

**SACAGAWEA DOLLAR**

**2000-P 'Cheerios' Sacagawea Dollar  
MS67, FS-902, Rare Design Subtype**

**3334 2000-P Cheerios, FS-902, MS67 PCGS Secure.** In early 2000, as part of a U.S. Mint promotion for the newly introduced Sacagawea dollar, 5,500 examples were placed in random boxes of Cheerios cereal. Many were spent by their fortunate finders. Five years later, numismatists finally realized that the Cheerios dollars are from a different design subtype than the regular issue. Specifically, the tailfeathers are ribbed. The present lustrous sun-gold Superb Gem is essentially as made. The lot includes the original Certificate of Authenticity from the Cheerios box. Population: 33 in 67, 32 finer (1/16). NGC ID# 282J, PCGS# 147231 Base PCGS# 411990

**GOLD DOLLARS**

**1849-C Closed Wreath Gold Dollar, MS62  
Rarely Seen in Mint State**

**3335 1849-C Closed Wreath MS62 NGC. Variety 1.** The Closed Wreath 1849-C gold dollar is fairly scarce with fewer than 300 pieces believed extant, and Mint State examples are genuinely rare. The present example is a trifle soft on the highest hair curls but shows otherwise bold definition. Yellow-gold surfaces yield hints of coppery-orange near the borders, and there are no severe abrasions. Census: 8 in 62, 9 finer (11/15). NGC ID# 25BC, PCGS# 7505

**1851-O Gold Dollar, MS65+  
Frosty Luster, Stellar Eye Appeal  
Rarely Encountered This Fine**

- 3336 1851-O MS65+ PCGS. CAC.** The obverse is uncracked on this high-end Gem 1851-O gold dollar, and the surfaces yield vibrant, frosty yellow-gold luster. Minor die fatigue is evident around the peripheries, and slight strike weakness is seen in the extreme centers. The preservation is exceptional, and the eye appeal superb. This New Orleans issue is among the more available from this mint, but Gem-quality examples are rare, and anything finer is prohibitively so. The present CAC-endorsed representative will please even the most discerning Southern gold collector. Population: 34 in 65 (4 in 65+), 3 finer (1/16). NGC ID# 25BN, PCGS# 7516

**1855-C Gold Dollar, XF40  
Rare One-Year Charlotte Type Coin**

- 3337 1855-C XF40 PCGS Secure. Variety 2.** Longacre's Type Two design was not in service for long. Philadelphia struck the type in both 1854 and 1855, while San Francisco struck the final issue in 1856. New Orleans, Charlotte, and Dahlonega each coined the design only during 1855. The 1855-C has a meager mintage of 9,803 pieces, and is in demand as the sole C-mint Type Two representative. The present wheat-gold example exhibits minimal contact. The moderately circulated surfaces display clash marks and occasional microgranularity, usual for the issue. NGC ID# 25C5, PCGS# 7533

**1855-C Gold Dollar, XF45  
Sole Type Two Charlotte Issue**

- 3338 1855-C XF45 NGC. Variety 2.** As the sole Type Two Charlotte issue, the 1855-C is requisite for a type set from the Southern branch facility. The mintage of 9,803 pieces ensures a limited number of survivors. The dies for Variety 2 were improperly annealed, and all examples seen have an indistinct appearance on the portrait and wreath. The microgranular olive-gold surfaces show only trivial contact. The obverse field is clashed. NGC ID# 25C5, PCGS# 7533

**1855-O Gold Dollar, MS63  
Only O-Mint Type Two Issue**

- 3339 1855-O MS63 NGC. Variety 1.** No gold dollars were struck at the New Orleans Mint in 1854 and the denomination was produced for the last time at the famous Southern mint in 1855. Thus, the 1855-O is the only Type Two gold dollar from the New Orleans Mint. The reported mintage of 55,000 pieces was released into circulation at the time of issue and few were saved by contemporary collectors. The 1855-O can be located in circulated grades with patience, but the issue is very rare at the MS63 grade level.

The present coin is an impressive Select example, with lustrous orange-gold surfaces that show only minor signs of contact. The obverse design elements are well-detailed, while the reverse displays a touch of the softness on the date and denomination that almost always shows on this issue. The overall presentation is quite pleasing. Census: 10 in 63, 5 finer (11/15). NGC ID# 25C7, PCGS# 7535

**1857-C Gold Dollar, AU58  
The Eliasberg Example**

- 3340 1857-C AU58 NGC.** Ex: Eliasberg. The Eliasberg pedigree adds appeal to this near-Mint Charlotte gold dollar, one of 13,280 pieces struck. As noted in the Eliasberg sale, David Akers described the 1857-C planchet quality as “downright atrocious,” and this coin is perhaps more fortunate than some in that regard. Still, numerous light lines are visible as well as a pedigree-confirming scratch above the wreath opening, and several dark freckles reveal patches light porosity on the surfaces. The coin is nevertheless well-struck with pleasing, medium-gold color. Census: 32 in 58, 16 finer (1/16). Ex: *The United States Gold Coin Collection* (Bowers and Ruddy Galleries, 10/1982), lot 35. NGC ID# 25CE, PCGS# 7545

**1859 Gold Dollar, MS66  
Seldom Seen This Fine**

- 3341 1859 MS66 PCGS.** From a reported mintage of 168,244 pieces, the 1859 gold dollar is moderately available in circulated grades, but the issue is decidedly rare at the MS66 grade level. This spectacular Premium Gem exhibits impeccably preserved rose-gold surfaces, with satiny mint luster and well-detailed design elements. Population: 8 in 66 (2 in 66+), 5 finer (1/16). NGC ID# 25CL, PCGS# 7551

**1867 Gold Dollar, MS66  
Sharp and Rare This Fine**

- 3342 1867 MS66 PCGS.** The 1867 gold dollar is an elusive issue from a small business-strike mintage of 5,200 pieces. Probably no more than 75-110 examples are extant in all Mint State grades, and circulated specimens are quite scarce as well. The true rarity of this date is generally unappreciated outside of series specialists. High-grade business-strike examples have often been mistaken for proofs in auction descriptions.

The present delightful Premium Gem offers sharply detailed design elements and some interesting clash marks on both sides. The prooflike yellow-gold surfaces are well-preserved and show no large or distracting flaws. Population: 4 in 66, 2 finer (12/15). NGC ID# 25D3, PCGS# 7566

**1876 Gold Dollar, MS66+  
Rarely Seen Finer, Ex: Duckor**

**3343 1876 MS66+ PCGS. CAC. Ex: Duckor.** This high-end Premium Gem displays yellow-gold color, rich luster, and well-struck design elements. A number of small orange alloy spots are present, primarily on the obverse. Faint traces of pale slate-blue toning appear on both sides of this lovely piece.

Only 3,200 business strikes were produced for this Centennial-year gold dollar, making it quite rare, with slightly more than 100 pieces estimated to survive. Auction appearances occur approximately once every two years, on average. Doug Winter notes: "The low-mintage 1876 gold dollar is available in grades up to MS65, but MS66s are very rare and underrated." This coin realized a record price for the issue when it sold as lot 4277 of the Duckor Family Collection of Gold Dollars in August of 2015.

*Ex: Central States Signature (Heritage, 4/2013), lot 5443, as MS66+ NGC, CAC, realized \$16,450; Duckor Family Collection of Gold Dollars (Heritage, 8/2015), lot 4277, realized \$30,550.*

*Selections from The Bob R. Simpson Collection. NGC ID# 25DE, PCGS# 7577*

**1889 Gold Dollar, Splendid MS68  
None Certified Finer**

**3344 1889 MS68 PCGS.** Just eight examples are certified by PCGS as MS68, with none finer by either PCGS or NGC, making this Superb Gem among the finest of the final-year gold dollars — a denomination that started out as a workhorse of American commerce, then faded in importance until the last hurrah of 29,000 pieces struck were struck in 1889. The present coin is a candidate for the finest collection, with razor-sharp definition and incredibly deep, frosty luster. Exceptional honey-gold coloration blankets both sides. A few microscopic freckles provide the pedigree markers to identify this jewel-like gold dollar for posterity. Population: 8 in 68, 0 finer (1/16). NGC ID# 25DU, PCGS# 7590

## PROOF GOLD DOLLARS

### 1858 Gold Dollar, PR64 Cameo Gold-on-Black Contrast

**3345 1858 PR64 Cameo PCGS.** Delectable gold-on-black contrast is the hallmark of this nicely preserved and rare 1858 gold dollar in the near-Gem proof grade, a Cameo-designated piece that certainly seems on the verge of a Deep Cameo designation. The raised devices display a rich honey-gold and wheat color that sets up well against the black-mirrored fields. Only a few stray hairlines seemingly preclude an even finer grade. There are no mentionable contact marks on the Indian princess's cheek. Typical of proofs, the interiors of the letters DO in DOLLAR are filled in and frosted, while those of the AR and the 858 are mirrored.

The number of proof 1858 gold dollars struck has not been sent down for posterity from a Mint that was rather mysterious about such matters at the time, but the number was certainly small. Breen's proof reference estimated that fewer than a dozen pieces survive. We upped that number to 15 to 18 pieces in the cataloging of the ex: "Col." Green-Eric Newman example in November 2014, where lot 3191 was a PR66+ Cameo NGC-CAC coin that brought \$32,900. Whatever the number of survivors, it can be shown rather easily that numerous duplications exist in the certified populations. An example in the same grade as this piece (but a different coin), PR64 Cameo PCGS, was lot 6841 in our FUN Signature (Heritage, 1/2013), which realized \$22,325.

*Selections from The Oxbow Collection.* NGC ID# 25DZ, PCGS# 87608

### 1863 Gold Dollar, PR65 Ultra Cameo From the Clapp and Eliasberg Collections

**3346 1863 PR65 Ultra Cameo NGC.** Ex: Eliasberg. This splendid Gem Ultra Cameo NGC-certified proof 1863 gold dollar hails from the fabled Eliasberg Collection, shown not only by the slab provenance but by the description itself in the Eliasberg gold catalog, sold as the "United States Gold Coin Collection" by Bowers and Ruddy in October 1982:

**"1863 Gem Proof-67.** Another superb rarity. Separated from perfection by a minute lintmark in the field below N of UNITED which serves to hallmark the piece. One of the finest known specimens.

"6,250 business strikes were minted of the 1863 gold dollar, plus 50 Proof examples. It is probable that many, perhaps half, of the Proofs were melted, for today Proof examples are exceedingly rare. Walter Breen traces the existence of just six specific specimens. Probably fewer than a dozen exist. Adding to the desirability of this Gem Proof is the status of 1863 as an exceedingly elusive gold dollar in any grade. Indeed, David Akers notes that as a date it is only slightly less rare than the famous 1875."

Lovely honey-gold surfaces show deep contrast and minimal field marks consistent with the grade. The mentioned lintmark is evident but the portrait and major devices are problem-free and provide superlative eye appeal. Census: 4 in 65 Ultra Cameo (1 in 65 ★ Ultra Cameo), 4 finer (12/15).

Ex: S.H. & H. Chapman (8/1892); John H. Clapp; Clapp estate to Louis E. Eliasberg, Sr. (1942); U.S. Gold Collection (Bowers and Ruddy, 10/1982), lot 51, brought \$6,600.

*Selections from The Oxbow Collection.* NGC ID# 25E6, PCGS# 97613

**1866 Gold Dollar, PR64 Ultra Cameo**  
**Bold Field-Motif Contrast**

- 3347 1866 PR64 Ultra Cameo NGC.** Fewer than 20 proof gold dollars of 1866 are thought to still exist from a reported mintage of 30 pieces. NGC and PCGS have certified about 40 specimens, meaning that many represent resubmissions, or more than 20 were in fact struck. In any event, the present near-Gem Ultra Cameo displays stunning gold-on black contrast and exquisitely struck design features. Both sides have been very well cared for. Census: 1 in 64 Ultra Cameo, 8 finer (11/15).  
*Selections from The Oxbow Collection. NGC ID# 25E9, PCGS# 97616*

**1876 Gold Dollar, PR66 Cameo**  
**Sole Finest Cameo Example Graded**

- 3348 1876 PR66 Cameo NGC.** Few proofs survive of this date in any unimpaired grade and certainly far fewer still in the high Premium Gem proof grade level with Cameo designation. This piece is sole and highest-graded Cameo example of the date at NGC (12/15), although there is also one NGC-certified PR66 Ultra Cameo that appeared in our auctions in 2011 and 2013, bringing \$27,600 and \$28,200, respectively.  
Only 3,200 circulation-strike 1876 gold dollars were coined, plus 45 proofs recorded, an anomalously large amount likely related to the American Centennial observances. It is likely not all of those proof coins were sold, however, with the rest being likely melted or placed into circulation. The caramel-gold devices on this piece are remarkably smooth and free of marks, providing abundant contrast against deeply mirrored fields. The highest-graded Cameo piece at PCGS is a single PR65 Cameo coin.  
*Selections from The Oxbow Collection. PCGS# 87626*

1879 Gold Dollar  
Sharply Struck Near-Gem Proof

- 3349 1879 PR64 PCGS.** The 1879 proof gold dollar is a tricky issue. Only 30 proofs were struck, and apparently the same dies were used on both proofs and business strikes. As a result, the apparent availability of this date is skewed by old auction appearances when first-impression business strikes were offered as proofs. When viewing this coin, there is absolutely no doubt about its proof status. The fields are deeply mirrored on each side, with strong mint frost over the devices giving the coin a notable (although unacknowledged) cameo contrast. Close examination with a magnifier reveals a few wispy hairlines, a couple of tiny planchet flaws, and rich orange-gold color interspersed with the occasional dash of lilac. Population: 3 in 64, 2 finer (12/15).  
Ex: *Central States Signature* (Heritage, 4/2006), lot 2332; *Long Beach Signature* (Heritage, 2/2009), lot 2397; *FUN Signature* (Heritage, 1/2013), lot 6844.  
Selections from *The Oxbow Collection*. NGC ID# 25EN, PCGS# 7629

1880 Gold Dollar, PR64  
Ex: Harry W. Bass, Jr.

- 3350 1880 PR64 PCGS. CAC.** Ex: HW Bass Jr Collection. We seldom have the opportunity to offer a confirmed 1880 proof gold dollar. Just 36 proofs were struck yielding an estimated 22 to 27 survivors (according to the Bowers reference). Because the proof dies were also used to produce prooflike circulation strikes, the proof characteristics described by David Akers are important, including the wreath tops solidly joined at the top, with large frosted areas at the wreath ends, and broad, square edges.  
The present coin comes from the Harry W. Bass, Jr. Collection — an unquestioned Choice proof, with a distinguished provenance to confirm its status as such. The glittering yellow-gold surfaces show mirrorlike fields and lightly frosted on the devices. Amber-gold and lilac accents enrich the coloration. A pair of pinpoint copper alloy marks pedigree the piece to its roots in the Scanlon and Bass collections, while a few delicate lines account for the near-Gem grade. This an outstanding opportunity for collectors of proof gold dollars to acquire the seldom-seen 1880 issue. Population: 4 in 64, 1 finer (1/16).  
Ex: *Scanlon Collection* (Stack's, 10/1973), lot 1997; *Harry W. Bass, Jr. Collection, Part II* (Bowers and Merena, 10/1999), lot 210.  
Selections from *The Oxbow Collection*. NGC ID# 25EP, PCGS# 7630

1881 Gold Dollar  
Glittering PR65 Cameo

- 3351 1881 PR65 Cameo NGC.** The proof gold dollar mintage was minuscule in 1881 but higher than 1880, increasing to 87 pieces from the prior year's 36 coins. Unlike previous increases, this one stuck as production continued to rise into the three and then four figures in the following years. This wonderful, Gem Cameo example of the 1881 proof is exactly struck and impressively contrasted. Orange-gold luster prevails in the outer mirrors, while the interior of the wreath offers intriguing lavender-to-blue overtones. A modestly patinated but highly impressive gold dollar, rare in PR65 Cameo format. Census: 4 in 65 Cameo, 1 finer (1/16). *Selections from The Oxbow Collection.* NGC ID# 25ES, PCGS# 87631

EARLY QUARTER EAGLES

1807 BD-1 Quarter Eagle, AU Details  
Still-Pleasing Type Coin

- 3352 1807 BD-1, R.3 — Improperly Cleaned — NGC Details. AU.** Bass-Dannreuther Die State a/b, the earliest state for this issue. The 1807 quarter eagle is known in only one variety and is fairly plentiful in the context of early gold with as many as 350 pieces extant. The present coin is ideal for the budget-restricted type collector. Portions of the obverse periphery show remnants of adjustment marks, and the central reverse is slightly weak in strike. The surfaces are fairly smooth and display bright yellow-gold color with slight evidence of cleaning. Hints of luster remain in the reverse fields. NGC ID# BFVY, PCGS# 45514 Base PCGS# 7656

1825 Quarter Eagle, Outstanding XF40  
Rare BD-3 Die Marriage

- 3353 1825 BD-3, High R.6, XF40 PCGS.** Bass-Dannreuther Die State a/a, as always. Three varieties exist for the 1825 quarter eagle, despite a low total mintage for the date of 4,434 pieces. BD-2 is fairly plentiful, while BD-1 and -3 are major rarities. Harry Bass Jr. called BD-3 "VERY RARE" in his notebook, per John Dannreuther, and his famous early gold collection contained two examples of the issue — both retained in the Core Collection. Per Dannreuther's estimation, that leaves perhaps 10 to 13 pieces in private hands today.

This is a sharp XF example with remnants of luster in the fields and significant detail in the devices. The coin is well-struck and devoid of bothersome abrasions. The straw-gold surfaces show slight amber hues over the worn points, attesting to the originality of the coloration. Housed in a first generation "rattler" holder. Population (all varieties included): 2 in 40, 45 finer (12/15). PCGS# 45520 Base PCGS# 7664

1832 Quarter Eagle, BD-1, XF Details

- 3354 1832 BD-1, R.4 — Improperly Cleaned — NGC Details. XF.** Bass-Dannreuther Die State a/c, as always. A single die pair produced a small 4,400-coin mintage of quarter eagles in 1832, and only 80 to 100 pieces are believed to survive in all grades. This representative is boldly struck with little wear and shows medium bronze-gold color. Lightly cleaned but remaining attractive to the unaided eye. PCGS# 45526 Base PCGS# 7672

## LIBERTY QUARTER EAGLES

1858-C Gold Dollar, Scarce MS61  
Sole CAC for the Grade

**3355 1858-C MS61 PCGS. CAC.** Although the issue is ranked among the more available Charlotte quarter eagles, the 1858 is nevertheless scarce in Uncirculated grades and it is unknown certified finer than MS63 by either service. This bright, yellow-gold MS61 example displays moderate reflectivity in the fields and a sharply struck obverse. The reverse is bold at the legends but shows some high-point blending on the eagle's plumage (particularly the lower shield and legs) and at the arrow fletchings. A few light abrasions account for the assigned grade. CAC endorsed, the sole MS61 example to be so-honored. Population: 8 in 61, 17 finer (1/16). NGC ID# 25JH, PCGS# 7787

1862 Quarter Eagle, MS63  
Very Rare So Well-Preserved

**3356 1862 MS63 PCGS.** The economic impact of the Civil War is clear by examining the decline in quarter eagle mintages beginning in 1862. Between 1861 and 1862, the production of quarter eagles at the Mint dropped by over 92%. One year later, no two and a half dollar gold coins were produced at all. The 1862 (98,508 coins struck) is very scarce in all grades and rare in Uncirculated condition. Select survivors are very rare. This piece has rich orange and reddish-gold color with luminous luster and a full strike. Light field marks are undistracting. Population: 9 in 63, 3 finer (12/15). NGC ID# 25JZ, PCGS# 7796

## PROOF LIBERTY QUARTER EAGLE

1887 Quarter Eagle, Rare PR64 Deep Cameo  
Just 122 Proofs Struck

**3357 1887 PR64 Deep Cameo PCGS. CAC.** Although the mintage of just 122 pieces seems small, it was a generous production of proof quarter eagles. Less than half that many survive today, with PCGS estimating fewer than 50 survivors. Population reports suggest examples with the Deep Cameo designation number fewer than half of those.

This Choice Deep Cameo coin offers exceptional contrast between the frosted devices and reflective fields. Fully struck, only a few delicate lines interrupt the attractive, medium-gold color. Most high-grade examples are tightly held — we have presented just five 1887 Deep Cameos in the past 11 years in all grades. Population: 7 in 64 (1 in 64+) Deep Cameo, 8 finer (1/16). PCGS# 97913

## INDIAN QUARTER EAGLES

### 1908 Indian Head Quarter Eagle, MS66 Important First-Year Issue

- 3358 1908 MS66 PCGS.** This was the first year for Bela Lyon Pratt's Indian Head design, which was not received with great enthusiasm by the general public. Despite being well-saved as a first-year issue, the number of high-grade 1908 quarter eagle survivors is not great. This lovely Premium Gem shows minor incompleteness on the eagle's breast feathers and talons yet it is boldly struck on the obverse. Light mint-green and deeper peach-gold hues are attractively blended over both sides. PCGS reports a mere two MS67 coins finer (12/15). NGC ID# 288Y, PCGS# 7939

### 1911 Quarter Eagle, MS65+ Elusive in High Grades

- 3359 1911 MS65+ PCGS.** CAC. The 1911 seldom displays a complete strike and the appearance is often somewhat granular in texture. Yet this coin is a lovely, high-end Gem example, with attractive intermingled shades of light gold and orange. The degree of luster is pleasing. Aside from a tiny mark in the left obverse field, there are no significant abrasions to mention. At the Gem level, only 11 coins have received the PCGS Plus designation, and PCGS has awarded a higher numeric grade to just a single example (1/16). NGC ID# 7KR6, PCGS# 7942

### 1914 Quarter Eagle, MS64 Beautiful, Frosty Surfaces

- 3360 1914 MS64 PCGS.** The 1914 is the second-rarest Indian quarter eagle in high grade. The present example is alive with rich reddish-gold color. Luster quality is well above average for the series, being mostly frosty with minimal granularity. There are remarkably few abrasions for the MS64 grade level, and the eye appeal is strong. Ex: *New York Signature* (Heritage, 7/2004), lot 8129. NGC ID# 7KRA, PCGS# 7946

### 1914 Indian Quarter Eagle, MS64+ Low-Mintage, Better-Date Issue

- 3361 1914 MS64+ PCGS.** CAC. The 1914 Indian quarter eagle claims a smallish mintage of 240,000 pieces and the issue becomes quite scarce in grades above MS64. This high-end Choice example displays lustrous orange-gold surfaces and sharply detailed design elements with outstanding visual appeal. PCGS has graded 63 numerically finer examples (1/16). NGC ID# 7KRA, PCGS# 7946

## THREE DOLLAR GOLD PIECES

### 1856 Three Dollar Gold Scarce in Select Mint State

- 3362 1856 MS63 PCGS.** With a circulation strike production of 26,010 pieces, the 1856 is one of the higher-mintage three dollar gold pieces in the long series, yet Select Uncirculated examples are decidedly scarce and seldom available. This attractive, yellow-gold example radiates intense mint luster and displays exceptional eye appeal. The strike is fairly good for the issue, although the lower curls lack completeness as does the bow knot and some high points of the right-side wreath. Population: 37 in 63, 37 finer (12/15). NGC ID# 25M8, PCGS# 7974

### 1858 Three Dollar, AU55 Scarce in All Grades

- 3363 1858 AU55 PCGS.** The 1858 is scarce across the entire grade spectrum, claiming a low mintage of 2,133 coins and a meager survival rate. Barely more than 200 coins are reported at the two leading certification services. This pleasing Choice AU three dollar gold piece shows an expected number of abrasions from a short time spent in commerce. Friction over the curls and lower wreath elements is minimal. The hidden areas retain a degree of original luster that brightens straw-gold surfaces. Population: 20 in 55, 23 finer (1/16). NGC ID# 7K5J, PCGS# 7978

**1860-S Three Dollar, AU55**  
**Choice, Attractive Surfaces**

- 3364 1860-S AU55 NGC.** With an official mintage of 7,000 pieces, about one third of the 1860-S three dollar gold pieces was found to be underweight, and the coins were later melted for a net production of just 4,408 pieces. Most of the remaining coins circulated heavily, making this Choice AU example far above average for the issue. Natural, olive-gold surfaces show few marks and strong remaining definition on the devices, with only high-point wear and no other evidence of the time spent in circulation. Pleasing mint luster still exists in protected areas. Census: 17 in 55, 24 finer (1/16). NGC ID# 7K5M, PCGS# 7981

**1872 Three Dollar, Reflective MS62**

- 3365 1872 MS62 PCGS.** Wheat-gold and yellow-orange patina enlivens the luster on both sides of this well-preserved three dollar, one showing a perceptible amount of semiprooflike reflectivity. There are few contact marks of any significance, and the strike is bold. Only 2,000 examples of this issue were struck for circulation, with certified survivors today averaging Choice AU. Population: 22 in 62 (1 in 62+), 12 finer (1/16). NGC ID# 25MV, PCGS# 7994

**1886 Three Dollar, Appealing MS62**  
**Nice for the Grade**

- 3366 1886 MS62 PCGS.** A few thin, straight marks appear on the Indian princess's cheek and in the obverse left field, but this yellow-orange piece boasts lots of lively luster and much eye appeal for the assigned grade. The mintage was a meager 1,000 pieces, most of which were likely saved. For our money we would much rather have a slightly rarer date such as this even for type purposes than one of the common "big three" type issues, the 1854, 1874, and 1878 dates. Population: 24 in 62 (1 in 62+), 16 finer (1/16). NGC ID# 25N9, PCGS# 8008

**1887 Three Dollar, MS64+**  
**Rich, Swirling Luster**

- 3367 1887 MS64+ PCGS.** The mintage was just 6,000 pieces, although by 1887 three dollar gold pieces hardly circulated and many were saved as novelties or used for jewelry and gifts. Some pieces may have been melted at year end. This high-end near-Gem piece was struck from a circulation strike obverse with broad doubling of RICA of AMERICA, as well as further doubling at BERTY of LIBERTY. The surfaces display deeply lustrous, orange-gold color with only a few minor ticks, as well as a tiny flat spot on the eyebrow. The eye appeal is outstanding. PCGS reports just three pieces at this level with the Plus designation, plus 35 finer (1/16). NGC ID# 25NA, PCGS# 8009

**1888 Three Dollar Gold, MS64+**  
**Popular Penultimate Issue**

- 3368 1888 MS64+ PCGS. CAC.** The 1888 three dollar gold piece claims a mintage of 5,000 pieces, a small production total in absolute terms, but rather generous in the context of the series. The denomination was cancelled the following year. This high-end Choice example exhibits well-detailed design elements, with just a touch of softness on the ribbon knot. The lustrous orange-gold surfaces show only minor signs of contact. NGC ID# 25NB, PCGS# 8010

## PROOF THREE DOLLAR GOLD PIECES

### 1876 Three Dollar Gold, PR64 Deep Cameo Classic Proof-Only Issue Recorded Mintage of 45 Pieces

**3369 1876 PR64 Deep Cameo PCGS.** According to Mint records only 45 proof three dollar gold pieces were struck in 1876 and no business-strike coins were produced. The first delivery of 20 specimens took place on February 19 and a second emission of 25 examples was accomplished on June 13. Since only twenty gold proof sets were struck in the surrounding years of 1874, 1875, 1877, and 1878, the February delivery probably represents the standard, more or less automatic, proof production the Mint planned on every year, while the later delivery was in response to a perceived increased demand, possibly the result of the country's centennial celebrations that year.

Once the proof-only status of the three dollar coin became widely known, it became the focus of intense collector demand and it seems likely that a number of restrikes were made, based on frequency of auction appearances and population data from the grading services today. However, Q. David Bowers notes that the "restrikes" might have been struck in 1876, the same year as the official issue, making their status hard to define. NGC and PCGS have combined to certify 74 examples in all grades, but PCGS CoinFacts estimates only 35-40 specimens are actually extant, with the discrepancy due to resubmissions and crossovers (1/16).

The coin offered here exhibits well-detailed design elements, with some slight evidence of die rust in Liberty's hair, which Walter Breen believed was characteristic of the coins from the June delivery. The deeply reflective fields set off the frosty devices nicely, creating a dramatic cameo effect. The greenish-gold surfaces show just a few minor hair lines and minimal signs of contact. Eye appeal is outstanding. A Lucent Technologies Corrosion Intercept Shield holder accompanies the coin, to protect the PCGS slab. Population: 4 in 64 (2 in 64+) Deep Cameo, 6 finer (1/16). NGC ID# 28AJ, PCGS# 98040

---

**1889 Three Dollar Gold, PR64+ Deep Cameo  
Underrated Final-Year Proof**

- 3370 1889 PR64+ Deep Cameo PCGS.** A nominal mintage of 129 proof three dollar gold pieces was accomplished in 1889, the last year of the denomination. Q. David Bowers notes that the 1889 issue is one of the most elusive proof dates of the era, a fact not widely known outside of series specialists. This high-end Choice specimen offers razor-sharp definition on all design elements, and the deeply mirrored fields contrast dramatically with the frosty devices. Only minor signs of contact are evident and overall eye appeal is outstanding. Population: 3 in 64 (2 in 64+) Deep Cameo, 3 finer (1/16). NGC ID# 28AY, PCGS# 98053
-

**EARLY HALF EAGLES**

**1796/5 Small Eagle Five, BD-1, VG8  
Attractive Collector-Grade Example**

- 3371 1796/5 Small Eagle, BD-1, High R.4, VG8 NGC.** Bass-Dannreuther Die State a/b. During the Mint's early coinage in the 1790s, annual production totals of various denominations did not necessarily reflect the actual number of coins struck with that date. Outdated dies were often used well into the next production year (or beyond) as a cost-saving measure.
- The Mint struck 6,196 half eagles in 1796, but John Dannreuther estimates that as few as 1,057 to 2,000 pieces were actually dated 1796. Only a single die variety is known for this date — showing a 1796/5 overdate — and there are fewer than 100 surviving examples thought to exist. The present coin is well-circulated but decidedly appealing for the grade. Major details remain in the central devices, and the obverse rim is bold — the reverse rim fades along the lower border. Both sides show smooth bronze-gold color with deeper copper-red hues in the peripheral recesses. Census: 1 in 8, 36 finer (11/15). NGC ID# BFWU, PCGS# 519862 Base PCGS# 8067
-

**1800 Half Eagle, BD-5, AU58**  
**Lustrous and Well-Struck**

**3372 1800 BD-5, High R.3, AU58 NGC. CAC.** Bass-Dannreuther Die State e/c. BD-5 is among the most plentiful of the five 1800 half eagle die pairings, with as many as 250 pieces extant. However, few remain as fine as this near-Mint example. The strike is even and boldly rendered, while the fields glisten with yellow-gold luster. A faint brush of friction over the highest points of Liberty's hair curls and the eagle's breast feathers appears to be all that precludes a Mint State designation. A few trivial marks are scattered about, as expected for the grade.

The culminating half eagle coinage of the 18th century tallied at 37,628 pieces for the year, most of which are thought to have actually been struck with 1800-dated dies. As a date, this issue is widely chosen for type purposes. NGC ID# 25NW, PCGS# 45595 Base PCGS# 8082

**1802/1 Half Eagle, BD-8, Strong AU58**  
**Excellent Type Representative**

**3373 1802/1 BD-8, R.4, AU58 PCGS.** Bass-Dannreuther Die State c/b, with a crack through UNI(TED). Obverse 2 shows the 2 in the date touching the bust, and Reverse G features the final S in STATES positioned far right over the clouds. BD-8 is the most available 1802/1 half eagle variety. The Bass-Dannreuther reference estimates the variant comprised 17% to 26% of the entire 57,176-coin mintage for date. While only 150 to 200 examples are believed extant, the issue's survivorship is about twice as large as the secondmost available variety. The devices are nearly fully struck, save for softness over the left (facing) talon, fletchings, and tailfeathers. Otherwise, the strike is razor-sharp throughout this near-Mint early half eagle. Light yellow-gold surfaces display a hint of cabinet friction, and both sides are void of any blemishes worthy of mention. NGC ID# 25NX, PCGS# 519889 Base PCGS# 8083

**1810 BD-4 Five Dollar, MS61  
Large Date, Large 5**

- 3374** 1810 Large Date, Large 5, BD-4, R.2, MS61 NGC. Bass-Dannreuther Die State a/a without cracks or clashes. A charming butter-gold representative. The surfaces are occasional minutely granular, but no marks are remotely consequential. The strike is generally bold, although the claws and other high points exhibit minor blending of detail. A *Guide Book* collection of early half eagles is out of reach for most collectors, but a date set of the John Reich series (1807 to 1812) can be completed by the specialist. Obtaining all four 1810 marriages is impractical, though, due to the formidable rarity of the two Small 5 varieties, especially the Large Date BD-3. NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

**1813 Half Eagle, BD-1, XF45  
Pleasing Type Coin**

- 3375** 1813 BD-1, R.2, XF45 NGC. Bass-Dannreuther Die State a/a. BD-1 is the only variety — and the 1813 is the only date — in the Large Size, Small Capped Bust half type that is generally available. Several hundred pieces are known. This Choice XF example displays pleasing detail and medium wheat-gold color. Remnants of luster emerge from the peripheries when rotated beneath a light. The surfaces show scattered handling marks but are free of singular abrasions. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

**1813 BD-1 Five Dollar, AU53  
Popular Capped Head Left Type Coin**

- 3376** 1813 BD-1, R.2, AU53 PCGS. Bass-Dannreuther Die State a/a. This caramel-gold example displays bright luster throughout the borders and devices. The strike shows moderate incompleteness on the curls and plumage. The fields display distributed minor abrasions, but none are singularly consequential. 1813 was the first year of the challenging Capped Head Left type, which replaced the more collectible John Reich design in use between 1807 and 1812. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

## CLASSIC HALF EAGLE

1834 Plain 4 Half Eagle, MS62  
Nicely Preserved for the Grade

- 3377 1834 Plain 4 MS62 NGC. Second Head, Breen-6502, McCloskey 4-C, R.2. The 1834 is a popular first-year type in short-lived Classic Head series. Examples are made even more desirable by their often semiprooflike surfaces, as seen here. This Uncirculated half eagle show a nice degree of preservation for the grade, and well-frosted orange-gold devices contrast beautifully against the light honey and yellow-gold patina in the fields. The strike through the centers of each side is more sharply executed than on many survivors of this underrated issue, which circulated extensively and scarcely appears in mint condition. NGC ID# 25RR, PCGS# 8171

## LIBERTY HALF EAGLES

1839-C Half Eagle, AU55  
Beautiful Example of This Two-Year Type

- 3378 1839-C AU55 PCGS. Variety 1. Certified in a green-label PCGS holder, this early Charlotte Mint half eagle also possesses much innate beauty, showing lightly circulated golden-yellow surfaces with considerable luster remaining and little evidence of overt contact. Light field chatter does not defeat the eye appeal. Population: 7 in 55, 11 finer (1/16). NGC ID# 25S8, PCGS# 8192

1841-C Half Eagle, AU55  
Charlotte Mint Type Candidate

- 3379 1841-C AU55 PCGS. Brassy, orange-gold accents appear across the underlying yellow-gold patina of this Choice AU Charlotte issue. Both sides show numerous small abrasions but no heavy hits or deep lines. The 21,467-piece mintage was generally well-struck, and the current coin displays nice definition on the motifs with only minor blending on the left-hand stars. Mint luster remains at the margins. Population: 10 in 55, 18 finer (1/16). NGC ID# 25SP, PCGS# 8203

1846 Small Date Liberty Half Eagle, MS62  
Tied for Finest Certified

- 3380 1846 Small Date MS62 PCGS. The 1846 Liberty half eagle is known in both Small Date and Large Date varieties, with the wide 46 in the date identifying the Small Date motif. Small Date coins are seldom encountered in any Mint State grade. This attractive MS62 example offers well-detailed design elements, with a touch of softness on the arrow fletching. The lustrous orange-gold surfaces show the expected number of minor contact marks for the grade. Population: 2 in 62, 0 finer (1/16). NGC ID# 25TF, PCGS# 88226

1854-D Half Eagle, Near-Mint  
Large D Mintmark

- 3381 1854-D Large D AU58 PCGS. Variety 36-AA. Despite a low mintage of 56,413 pieces, four die marriages are known for the 1854-D. Variety 36-AA features a deeply entered mintmark with a lightly repunched base. A well struck and beautiful orange-gold Borderline Uncirculated example. Marks are absent although a lamination affects Liberty's forehead and the field near the profile. Population: 31 in 58, 24 finer (12/15). NGC ID# 25UK, PCGS# 8258

1856-D Half Eagle, MS60  
Low-Mintage Dahlonega Issue

- 3382 1856-D MS60 PCGS. Variety 39-FF.** As the San Francisco Mint came up to speed, less Gold Rush bullion was shipped East for coining, and production at the Dahlonega Mint dwindled. During 1856, the facility struck only about 23,000 coins, mostly half eagles along with tiny mintages of gold dollars and quarter eagles. The 1856-D five is rare in Uncirculated grades. The present unblemished caramel-gold example has mildly prooflike fields. The strike is sharp at the borders although the eagle's neck and fletchings are lightly brought up, as are curls near Liberty's ear. NGC ID# 25UX, PCGS# 8268

1869-S Liberty Five, AU55  
Choice Original Surfaces

- 3383 1869-S AU55 NGC. CAC.** Mint luster appears briefly around the stars and legends of this Choice About Uncirculated half eagle, which is conditionally scarce above XF and rare in full Mint State. Original, olive-gold surfaces show faint orange accents and only minor marks across both sides. Just 31,000 pieces were struck, and most (if not all) entered West Coast commerce. The few survivors are generally well-worn as a result. Census: 16 in 55, 15 finer (11/15). NGC ID# 25W8, PCGS# 8318

1870-CC Liberty Five, VF30  
Rarest CC-Mint Half Eagle

- 3384 1870-CC VF30 PCGS. Variety 1-A.** Only 7,675 Liberty half eagles were struck at the Carson City Mint in 1870, the first year of coining operations at the famous Western facility. The entire mintage was released into circulation and, since there was almost no interest in collecting branch mint issues at the time, probably no coins were saved for numismatic purposes. Today, the 1870-CC is the rarest half eagle from the Carson City Mint, and most examples seen are well-worn and extensively abraded.

The present coin is an attractive VF30 example that shows considerable wear on most of the devices, but also retains much interior design detail. More than half the hair detail remains intact and the motto and ribbon are bold. The orange-gold surfaces are relatively lightly abraded, aside from a few marks on Liberty's cheek. Population: 7 in 30, 36 finer (12/15). NGC ID# 25WA, PCGS# 8320

**1877-S Five Dollar, MS60  
Mint State Rarity**

- 3385 1877-S MS60 PCGS.** A run of low-mintage half eagles from the San Francisco Mint ended in 1877, with just 26,700 pieces minted. The 1878 mintage of S-Mint half eagles increased nearly six-fold. Even so, the 1877 P-mint and CC-mint counterparts saw even smaller mintages, and as a result the 1877-S five is underrated through all grades. Mint State survivors of all three Mints are rare both conditionally and in an absolute sense. This MS60 example offers shining yellow-gold surfaces and crisp detail. A total of just three Mint State examples are reported by PCGS, while NGC lists only a single piece in Uncirculated condition. PCGS population: 1 in 60, 2 finer (1/16). NGC ID# 25X3, PCGS# 8344

**1882-CC Half Eagle, Lightly Circulated AU58**

- 3386 1882-CC AU58 NGC. Variety 1-A.** The 1882-CC half eagle issue, despite a plentiful mintage exceeding 82,000 coins, becomes scarce in higher About Uncirculated grades and is seldom found in Uncirculated grades. Charming orange-yellow patina graces the surfaces of this briefly circulated example. The strike is crisp, and there is only minor weakness in the centers. The reverse is especially lustrous, and there is plenty to be seen on the obverse as well. A delightful type coin.  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 2807, which brought \$3,220. NGC ID# 25XH, PCGS# 8359*

**1902-S Liberty Five, MS66+  
Exceptional Branch Mint Type Coin**

- 3387 1902-S MS66+ PCGS. CAC.** Despite the large mintage of 939,000 pieces, the 1902-S Liberty half eagle is an elusive issue at the MS66 grade level, and finer examples are rare. This delightful Premium Gem offers well-detailed design elements, with just a touch of softness on some of the star centers. The impeccably preserved apricot-gold surfaces radiate vibrant mint luster. Population: 30 in 66 (2 in 66+), 7 finer (1/16). NGC ID# 25YZ, PCGS# 8406

**1904 Half Eagle, MS67  
Sensational Eye Appeal**

- 3388 1904 MS67 PCGS.** The year 1904 was one in which the Philadelphia Mint was largely concerned with striking vast quantities of silver dollars and double eagles, although it did also produce a considerable quantity of 392,000 half eagles as well. Most of those gold coins, while they may have circulated little, were often moved in bags from place to place as reserve backing for bank deposits and Treasury obligations (back when the U.S. dollar was backed by gold). The average certified survivor is Mint State with marks, an MS62 coin. This splendid Superb Gem is exceptional, displaying incredible luster and a complete absence of mentionable contact. Deep amber- and honey-gold color and a sharp strike complete the sensational eye appeal. Population: 5 in 67, 0 finer (1/16). NGC ID# 25Z6, PCGS# 8409

**1908 Liberty Head Five, Elusive MS66**

- 3389 1908 Liberty MS66 PCGS. CAC.** Saint-Gaudens' high relief ten and twenty dollar designs replaced Gobrecht's and Longacre's Liberty Heads on those denominations in 1907, but Pratt's new sunken relief Indian Head design for the quarter eagle and half eagle did not debut until 1908. The Philadelphia Mint struck a little more than 421,000 half eagles in early 1908 using old Liberty Head dies. This is a frosty, beautifully preserved Premium Gem example of the final-year issue. The strike is bold, and both sides glow in soft honey, lilac, and mint-gold hues. Population: 36 in 66, 8 finer (12/15). NGC ID# 25ZE, PCGS# 8418

## INDIAN HALF EAGLES

### 1908 Indian Half Eagle, MS65 Ideal Type Candidate

**3390 1908 MS65 PCGS.** The 1908 Indian half eagle was widely saved due to its first-year issue status, and it is far and away the most plentiful date in Gem and finer grades, outpacing even the available 1909-D. Not surprisingly, then, the issue is ideal for type representation. This Gem example boasts sharp detail and satiny yellow-gold luster. A few minute surface ticks preclude an even finer grade, but they are not discernable to the naked eye. PCGS has certified just 22 numerically finer representatives (1/16). NGC ID# 28DE, PCGS# 8510

### 1908 Indian Half Eagle, MS65 Transitional First-Year Type

**3391 1908 MS65 PCGS.** Half eagles were struck with both the Liberty Head and Indian Head designs in 1908, and the Indian Head fives were widely saved for their distinctive new motifs and strange (at the time) "sunken" devices. This Gem example was carefully preserved, with lustrous and glossy medium-gold color and few marks. The strike is sharp except at the eagle's shoulder, a die making deficiency that was corrected in the following year. PCGS reports just 22 finer examples (1/16). NGC ID# 28DE, PCGS# 8510

### 1909-O Five Dollar, AU58 Attractive, Problem-Free Example

**3392 1909-O AU58 NGC.** The 1909-O is one of the "stoppers" to the Indian half eagle date and mintmark set. The issue is famously rare in Mint State, and a majority of the more accessible AU representatives have been cleaned or otherwise artificially brightened to the detriment of eye appeal. The present Borderline Uncirculated example will be a refreshing reward for the patient specialist. Subtle olive-gold deepening of the luster occurs over the fields and high points of the design, denoting trivial friction, while the recesses display original, satiny luster in brighter straw-gold hues. There is little softening of the finer details, and the surfaces are free of severe abrasions. A finer 1909-O half eagle will prove exceedingly difficult to find and proportionately more costly to acquire. NGC ID# 25ZK, PCGS# 8515

### 1911-D Five Dollar, Pleasing AU58

**3393 1911-D AU58 NGC. CAC.** A pleasing near-Mint example of this key Denver issue, showing bold design elements and satiny bronze-gold luster. A few scattered ticks and abrasions are common for the grade. The 1911-D half eagle boasts a scant 72,500-coin mintage and has long been recognized as a scarce date in Uncirculated condition. This high-end AU coin remains within the grasp of the average Indian gold collector. NGC ID# 28DR, PCGS# 8521

**1911-D Half Eagle, MS62  
Low-Mintage Semikey Issue**

**3394 1911-D MS62 PCGS. CAC.** The 1911-D quarter eagle gets all of the press, but the 1911-D half eagle is demonstrably the rarer coin — despite the slightly higher mintage. In terms of Mint State scarcity, the comparison is even more dramatic. Mint State grading events for the quarter eagle exceed those of the half eagle by more than 10 to 1. Some of the difference is a function of value and multiple submissions, but clearly the half eagle is by far the scarcer coin when Uncirculated.

This CAC-endorsed MS62 example is sharp and lustrous, with desirable orange-gold coloration and a strong strike. A few light marks are scattered about the high fields, but they require a glass to view. Pervasive, satiny mint luster covers both sides. Just 72,500 pieces were produced, third-lowest for the Indian half eagle series. PCGS reports just 53 pieces in a numerically finer grade (1/16). NGC ID# 28DR, PCGS# 8521

**1914-D Half Eagle, High-End MS64  
Sandy-Orange Example With CAC Approval**

**3395 1914-D MS64 PCGS. CAC.** The nicely preserved, smooth surfaces show a notable paucity of abrasions on a fine-grained, mattelike texture. The sandy-orange patina cedes to momentary cherry-red on the lower obverse. A few thin marks of no consequence are limited to the reverse, but both sides show a bold strike and generous eye appeal. The 1914-D issue is seldom seen in Gem grade — a level where PCGS has seen only 16 submissions and three finer — despite a mintage of 247,000 coins. CAC has approved only 36 in MS64 and two finer, both MS65 (1/16). NGC ID# 28DV, PCGS# 8528

**1914-S Half Eagle, MS62  
Engaging Luster**

**3396 1914-S MS62 PCGS.** Engaging luster runs over the wheat-gold surfaces on both sides of this semikey S-mint half eagle. Although examples of the 1914-S can be found up to the MS62 grade, Select-graded coins are far more elusive and seldom seen. This piece's excellent eye appeal, decent strike, and good preservation should short-list it for potential bids among series collectors. NGC ID# 28DW, PCGS# 8529

## PROOF INDIAN HALF EAGLES

1909 Indian Five, PR67+  
Finest Certified at PCGS  
Registry Set Essential

**3397 1909 PR67+ PCGS. CAC.** In 1908, when Pratt's Indian Head designs debuted on the half eagle, the Mint once again began to explore new finishes for its proof coinage. Experimental tests with a sandblast or "matte" finish on proof 1907 eagle trial strikes proved promising, and in 1908, it was this finish that debuted on the half eagle. The coins were struck with fresh, unpolished dies and planchets, and were then lightly sandblasted to produce the desired surface texture. The result was a coin with rather dull luster and extremely delicate surfaces, and these proved to be unpopular with the majority of collectors. The following year, then, the Mint introduced yet another experimental proof finish. This time the master hubs were lightly buffed prior to annealing and the proofs were then struck with fresh, unpolished dies made from these hubs. The result was a coin with a distinctly satiny surface texture (called Roman Gold by Walter Breen, although that nomenclature has no basis in fact); these proofs were more popular than the dull, sandblast proofs, but their similarity to regular business strikes ultimately led to their discontinuance in 1911, when the dull matte finish was once again employed.

Today, the bright, satiny proofs of 1909 are highly sought-after rarities. Mike Fuljenz, writing in *Indian Gold Coins of the 20th Century*, states:

"Only 78 Proofs were produced and it is unlikely that more than thirty or so exist. Most of these pieces are in the PR64 to PR65 range. Examples that grade PR66 and higher are extremely rare."

NGC and PCGS combined have certified 12 examples in PR67, and just three finer, though it is likely these numbers include some resubmissions. This coin is the single-finest specimen at PCGS, by virtue of its Plus designation (1/16). This piece is truly a marvel to see; the design elements are struck to full definition and the surfaces are seemingly free of any type of disturbance. Glowing honey-gold luster blankets both sides, giving this piece a high degree of eye appeal. This is a rare and important opportunity for the advanced Indian gold specialist. NGC ID# 25ZS, PCGS# 8540

---

1910 Half Eagle, PR64  
Radiant 'Roman Finish' Proof

**3398** 1910 PR64 PCGS. CAC. The "Roman Gold" finish used to strike 250 proof half eagles in 1910 straddled the line between satiny and reflective, yet the overall impression is more toward the satiny side. The smooth portions of the incuse design appear more reflective than the high, satin fields or the intricately detailed headdress and eagle's plumage.

This near-Gem proof displays attractive medium-gold color trending toward orange-gold at the margins. Sharply struck, the microgranular fields appear unmarked and highly attractive. While the proof mintage was substantial for the series, many went unsold and were melted at year's end. PCGS estimates 60 to 75 survivors remain in all grades. Population: 12 in 64, 12 finer (1/16). NGC ID# 28E4, PCGS# 8541

---

---

EARLY EAGLES

1795 Eagle, BD-1, AU Details  
13 Leaves Reverse

**3399** 1795 13 Leaves, BD-1, High R.3 — Tooled, Whizzed — NGC Details. AU. Bass-Dannreuther Die State b/b. A well-detailed, bright example of this first ten dollar gold variety. BD-1 is fairly plentiful in the context of early gold varieties with perhaps 225 to 325 examples extant. Nonetheless, demand from type collectors keeps high-end examples out of reach for most collectors.

This piece is boldly struck and sharply detailed throughout the central devices. A few scattered abrasions are accompanied by irregular tool marks in the fields, and both sides are unnaturally bright due to cleaning and whizzing. However, the appeal of this coin lies in its central detail and moderate affordability in comparison to problem-free AU coins. NGC ID# 25ZU, PCGS# 45710 Base PCGS# 8551

---

1797 Large Eagle Ten, BD-4, AU58  
A Remarkably Attractive Example

- 3400** 1797 Large Eagle, BD-4, High R.4, AU58 NGC. Bass-Dannreuther Die State d/b, showing radial die cracks on the reverse through R and C in AMERICA. The obverse shows a crack running upward through the second 7 in the date. The obverse die of the BD-4 is shared with the BD-3 and BD-2 die pairings, all more or less rare; the reverse die here shows a triangular neck truncation on the eagle and a star under the beak. This piece is a remarkably attractive survivor of the variety, showing lovely caramel-gold surfaces with much engaging luster embellishing both sides and no marks or distractions of any significance. No adjustment marks appear on either side. A small, curved contact tick by star 16 serves to pedigree this piece. NGC ID# 25ZY, PCGS# 45719 Base PCGS# 8559

1799 Capped Bust Right Ten, MS60  
Popular BD-7 Variety

- 3401** 1799 Small Obverse Stars, BD-7, R.3, MS60 PCGS. Ten different die varieties are known for the 1799 Capped Bust Right eagle, eight with small stars on the obverse and two with large stars. This attractive Mint State specimen represents the more available BD-7 variety, with the Small Stars obverse and the leaf touching the right foot of I in AMERICA. The obverse die later struck the BD-8 variety of this date, while the reverse previously coined the BD-6 variety. This piece is in an intermediate die state, Bass-Dannreuther d/d. The design elements are well-detailed and the pleasing antique-gold surfaces are lustrous and lightly marked for the grade. Housed in a green label holder. NGC ID# 2624, PCGS# 45730 Base PCGS# 98562

1799 Eagle, BD-10, AU55  
Attractive, Partially Lustrous Type Coin

**3402 1799 Large Obverse Stars, BD-10, R.3, AU55 NGC.** Bass-Dannreuther Die State a/a, perfect dies. BD-10 is famously among the most plentiful early eagle varieties, frequently encountered in type collectors' cabinets. A number of high-end pieces survive but are nonetheless in high demand. This Choice AU representative retains hints of yellow-gold luster in the fields and bold definition on the devices. Slight friction is seen over the highest hair curls and eagle's feathers, as well as in the fields, but no softening of the fine details is observed. Typically seen scattered abrasions from circulation are mercifully absent, giving this coin exceptional eye appeal for the grade. The type collector would be hard-pressed to locate a finer Large Stars Obverse or Heraldic Eagle ten dollar within the AU grade range. NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

1799 Capped Bust Right Eagle, MS60  
Large Stars, BD-10 Variety

**3403 1799 Large Obverse Stars, BD-10, R.3, MS60 PCGS.** Bass-Dannreuther Die State a/a. A nominal mintage of 37,449 Capped Bust Right eagles was accomplished in 1799, with 10 die varieties known for the date. This coin represents the popular BD-10 variety, with the Large Stars obverse, and the leaf touching I in AMERICA. The surviving population of the BD-10 numbers approximately 300-400 examples in all grades, and the variety probably accounted for 12,500-17,500 pieces of the reported mintage.

This attractive Mint State example exhibits vivid orange-gold surfaces that retain much of their original mint luster, with prooflike reflectivity in sheltered areas. The design elements are well-detailed and only the expected number of minor contact marks are evident. Housed in a green label holder. NGC ID# 2625, PCGS# 45723 Base PCGS# 8562

## LIBERTY EAGLES

1875-CC Eagle, VF30  
Natural Apricot-Gold Surfaces

**3404 1875-CC VF30 PCGS. Variety 1-A.** While elusive, the 1875-CC tens are available to some extent from a mintage of 7,715 pieces. Carson City eagle collectors could hardly expect to find a more original mid-grade example, with natural, apricot-gold color and minor abrasions muted by 30 points of wear. Well-struck for the issue, with all of the motifs reasonably strong despite the moderate circulation. Doug Winter estimates just 65 - 75 survivors in all grades. Population: 6 in 30, 64 finer (12/15). NGC ID# 2688, PCGS# 8673

---

1876 Liberty Eagle, AU58  
Low-Mintage Rarity  
Only Two Finer Certified

**3405 1876 AU58 PCGS. CAC.** The overall rarity of the 1876 ten dollar rivals that of almost all other dates in the Liberty eagle series, with only the 1873 and the prohibitively rare 1875 being decisively rarer. The 1876 eagle also had a mintage of only 687 pieces, the second-lowest production total of the series, behind only the 1875 at a paltry 100 coins. Survivors are rare in all grades, with only 40 to 50 pieces believed extant. The sole finest known is an NGC MS61 Prooflike coin; PCGS has also certified a Mint State example — an MS60 coin — though it is unknown if this is perhaps the same as the NGC example. Seven AU58 coins are tied for the next finest known of the date (2 at PCGS and 5 at NGC), though even this figure possibly includes one or more resubmissions (12/15). The combined certified population total of 54 coins in all grades is notably higher than the number of pieces actually believed to exist. The Smithsonian Institution lacks an example of this issue in business strike format.

All known representatives of this date are moderately abraded, as virtually the entire mintage was released into circulation. Prooflike fields, or rather the remnants thereof, are the norm, as can be expected for an issue with such a low mintage. The present coin is a noticeably reflective example, with warm honey-gold patina and sharply defined motifs. Light, uniformly dispersed abrasions are observed on each side, slightly subduing the mirroring in the exposed portions of the fields, but actual wear is almost indiscernible, even with a loupe. Overall, this is an immensely appealing, original example of this With Motto Philadelphia rarity. With only one or two numerically finer representatives known, the specialist should not let this one pass by. NGC ID# 265C, PCGS# 8674

**1897 Ten Dollar, MS65**  
**Lustrous With Rich Mint Frost**

- 3406 1897 MS65 PCGS.** Remarkably few coins cross the threshold into the Gem level for this conditionally challenged Philadelphia eagle. The dies were overused to produce more than 1 million pieces, and the issue is plagued by bagmarks and die cracks. Many survivors come by way of European hoards, and they were carelessly handled. This lustrous exception has its share of die cracks, but relatively few marks of consequence. A sharp strike accompanies the frosty eye appeal. Population: 11 in 65 (1 in 65+), 3 finer (12/15). NGC ID# 26CH, PCGS# 8737

**1901-S Liberty Ten, MS66+**  
**Excellent Branch Mint Type Coin**

- 3407 1901-S MS66+ PCGS. CAC.** A high-end Premium Gem representative of this popular branch mint type issue, with razor-sharp definition on all design elements and impeccably preserved peach-gold surfaces. Vibrant mint luster adds to the outstanding visual appeal. PCGS has graded two numerically finer examples (1/16). NGC ID# 267S, PCGS# 8749

**1903 Liberty Eagle, MS65+**  
**Only One Finer Coin at PCGS**

- 3408 1903 MS65+ PCGS.** A spectacular Plus-graded Gem example from a mintage of 125,800 pieces, this coin offers sharply detailed design elements throughout, and the attractive peach-gold surfaces show only the most insignificant signs of contact. Vibrant mint luster adds to the outstanding eye appeal. Population: 7 in 65 (1 in 65+), 1 finer (1/16). NGC ID# 267V, PCGS# 8752

**1903-S Liberty Eagle, MS66**  
**Older Generation Holder**

- 3409 1903-S MS66 NGC.** The 1903-S is the least conditionally rare issue in the Liberty eagle series. It is the only issue with more certified in MS64 than in MS62. Nonetheless, examples as close to pristine as the present sun-gold piece are desirable as representatives of their type. Lustrous, fully struck, and smooth aside from a tick on the chin. A minor alloy spot is noted above the highest arrowhead. Encapsulated in a prior generation holder. Census: 38 in 66, 6 finer (11/15). NGC ID# 267X, PCGS# 8754

## PROOF LIBERTY EAGLE

1905 Ten Dollar Liberty, PR64 Cameo  
Scarce Overall, Rare With Contrast

- 3410** 1905 PR64 Cameo PCGS. CAC. Typical of nearly all gold and silver proofs from the first years of the 20th century, this piece has light cameo contrast, the devices exhibiting satiny luster with deeply mirrored fields. The surfaces on both sides of this near-Gem are fully brilliant with light yellow-gold color. A few wispy hairlines in the left obverse field prevent a higher grade. The most obvious “flaws” we see for tracking the pedigree of this rare proof are both on the reverse: a planchet flake is out of the field above the junction of the eagle’s neck and right (facing) wing and there is a line (either a hairline or graver’s slip, we aren’t certain) that extends from the field left of the eagle’s neck to the right. The 1905 is much scarcer than even its low mintage of 86 pieces would indicate. Population: 3 in 64 Cameo, 3 finer (1/16).  
Ex: Dallas Signature (Heritage, 10/2006), lot 3030, unsold. NGC ID# 28GC, PCGS# 88845

## INDIAN EAGLES

1907 No Periods Eagle, MS65  
Boldly Struck, Essentially Mark-Free

- 3411** 1907 No Motto MS65 PCGS. The short-lived No Motto type endured only two years, 1907 and 1908. The generous luster that this piece offers would not be out of place on a high-grade Morgan dollar. Beautiful caramel-gold color, a decent strike, and a paucity of mentionable marks complete the bold eye appeal. NGC ID# 28GF, PCGS# 8852

1910-D Eagle, Lustrous MS65

- 3412** 1910-D MS65 NGC. The 1910-D eagle is a high-mintage issue of more than 2.3 million pieces that is nonetheless seldom seen in the finer Mint State grades. Some examples, however, such as the present piece, appear with good luster and a bold strike. Scattered ticks consistent with the grade are more prominent on the reverse. This would be a great candidate for a mintmarked type set. NGC reports only 50 submissions in MS66 and MS67 (12/15). NGC ID# 28GS, PCGS# 8866

**1910-D Ten Dollar, MS66  
Just Two Finer at PCGS**

**3413 1910-D MS66 PCGS.** Type collectors target this issue as the most plentiful mintmarked eagle, a result of more than 2.3 million coins produced by the Denver Mint in 1910. While Gem examples are relatively available, the 1910-D becomes notably scarce at the MS66 level and Superb Gems are virtually unobtainable.

This example displays the finely grained surfaces that seem to avoid marks and abrasions. Aside from a pair of ticks on the eagle's leg, the coin is virtually free of distraction and the medium-gold, frosty surfaces radiate cartwheel luster. A typically strong Denver strike covers the motifs. Population: 44 in 66 (9 in 66+), 2 finer (1/16). NGC ID# 28GS, PCGS# 8866

**1910-S Eagle, Frosty Near-Gem  
Demonstrably Rare Any Finer**

**3414 1910-S MS64 NGC.** The 1910-S Indian eagle's high mintage of 811,000 coins is deceiving. Availability was drastically reduced in the mid-1930s during the massive gold melts. Mint State survivors are seldom available, typically grading only in the MS62 and lower range. The date is scarce in MS63, and it is rare at the Choice level. This example is a visual delight for the collector who enjoys original patina. Both sides show frosty luster beneath deep orange, lilac, and lavender-gold hues. The design elements are sharply impressed, and only a few minute ticks preclude full Gem status. Census: 20 in 64, 6 finer (12/15). NGC ID# 268D, PCGS# 8867

---

1911 Indian Eagle, MS68  
Exemplary Surface Quality  
Tied for Finest Known

**3415 1911 MS68 NGC.** With a mintage of more than 500,000 pieces, the 1911 Indian eagle is usually available in the absolute sense and can be obtained in Gem condition with little difficulty. Yet, the population thins considerably in higher grades, and David Akers remarks, "Superb Gems are nothing short of rare."

The present coin is magnificent: one of only four MS68 coins certified (all NGC). A single MS67+ example is the finest at PCGS (12/15). Pinpoint sharpness appears on all design elements. The lower headdress feathers — in an area that is often seen with incomplete detail — are fully brought up. The surfaces are light orange-gold with highlights of green and red. Vibrant mint luster adds to the outstanding eye appeal.

It is rare that any Superb Gem 1911 eagle is offered at auction, but such appearances of one of the few finest-known MS68 coins is excessively rare. This is only the third public auction appearance that we know of for an MS68 1911. The last such offering was in lot 4547 of Stacks-Bowers' ANA sale (8/2013), where a comparably graded MS68 brought \$94,000. The present example is technically equal and aesthetically comparable to that coin in every respect.

As rare as the 1911 Indian ten is in this remarkable grade, it is one of only a few dates in the entire series that exists so fine in any quantity. It grades superior to every known example of the more widely pursued 1926 and 1932 issues, and, across the entire series and both grading services, only two MS69 coins are finer (12/15).  
Ex: Long Beach Signature (Heritage, 6/2011), lot 4842. NGC ID# 28GT, PCGS# 8868

**1913 Indian Eagle, MS66**  
**Incredible Eye Appeal, Just One Finer**

**3416 1913 MS66 PCGS.** With a mintage of 442,000 pieces the 1913 eagle is easily located in almost all grades. As with most Indian Head tens, however, Gems become quite challenging and require not only patience, but also deep pockets. MS66 coins are undeniable rarities. In more than two decades Heritage has previously auctioned only about a dozen examples graded this fine, and never without intense bidder interest. This is not an opportunity to be missed.

The present coin boasts exceptional eye appeal, a standout piece even among other MS66 eagles. Rich orange-gold patina flows across both sides with occasional hints of lilac. Like other Indian Head tens, the surfaces are mattelike with frosted mint luster. A remarkably clean Premium Gem that will undoubtedly be the subject of intense bidding. Population: 15 in 66 (1 in 66+), 1 finer (1/16). NGC ID# 28GY, PCGS# 8873

**1913-S Ten Dollar, MS61**  
**Better San Francisco Issue**

**3417 1913-S MS61 NGC.** The 1913-S is a semikey date with a mintage of only 66,000 pieces, and Uncirculated survivors are decidedly scarce. This lightly abraded example is well-struck and remains within the grasp of many budget-conscious collectors. The surfaces yield satiny yellow-gold luster and light chatter but lack individually significant abrasions. NGC ID# 28GZ, PCGS# 8874

**1916-S Ten Dollar, MS64+**  
**Frosty Texture, Vibrant Luster**

**3418 1916-S MS64+ PCGS.** While the 1916-S is relatively available in About Uncirculated to low Mint State grades, it becomes increasingly scarce at the Select Uncirculated level and very scarce any finer. We seldom have the opportunity to offer near-Gem or Gem. No ten dollar gold pieces were struck at the other Mints for the year, putting the 1916-S under considerable pressure from date collectors.

Frosty yellow-gold luster blankets both sides of this high-end Choice ten. Surface abrasions are limited to a few tiny ticks — one on the 9 in the date, and a light abrasion to the right of the eagle's head. Pleasing reddish-orange accents embellish the well-defined headress, and the strike is sharp throughout. The present coin is just one of three earning the PCGS Plus designation at the MS64 level. Population: 41 in 64 (3 in 64+), 23 finer (1/16). NGC ID# 28H7, PCGS# 8880

**1932 Indian Eagle, MS66+  
Only One Coin Numerically Finer at PCGS**

- 3419 1932 MS66+ PCGS. CAC.** The gold melts of the mid-1930s consumed much of the later eagle and double eagle mintages through 1933, but the 1932 eagle was surprisingly spared, having been issued to the public before Roosevelt's confiscation order was enacted in early 1933. By extension, the 1932 Indian eagle is the most available date in the series in Mint State, ideal for type purposes. This Plus-grade Premium Gem example is among the finer-known representatives, with only a single MS67 piece numerically finer at PCGS (1/16). Both sides are boldly struck and display frosty green-gold luster that shows a warm honey-gold glow in the central regions. As the grade suggests, the surfaces are free of distractions. NGC ID# 28HB, PCGS# 8884

**LIBERTY DOUBLE EAGLES**

**1850 Twenty Dollar, Attractive AU53**

- 3420 1850 AU53 NGC.** The wheat-gold surfaces of this lightly circulated first-year gold type coin show some scattered marks consistent with a short stint in circulation, including some reeding marks on Liberty's neck. A few larger scrapes appear on the shield on the reverse. Much eye appeal still remains amid considerable luster clinging to both sides. All obverse stars are sharply struck. NGC ID# 268F, PCGS# 8902

**1850 Double Eagle, AU55  
Natural Coloration**

- 3421 1850 AU55 PCGS. CAC.** The 1850 is sought after as a first-year type coin, though the majority of representatives survive in VF-XF condition. Examples in lower AU grades are accessible, but the date becomes scarce in Choice AU. In addition to its inaugural status and numismatic significance, the 1850 can be found sharply struck with natural coloration, as seen here. Light orange-gold surfaces display abundant mint frost with glints of green color. The reverse has a semiprooflike quality that adds to the appeal. Sharply rendered with myriad bagmarks that do not detract. NGC ID# 268F, PCGS# 8902

**1851-O Liberty Double Eagle, AU55  
Choice O-Mint Type Coin**

**3422 1851-O AU55 PCGS. CAC.** The scarcity of this New Orleans twenty is underrated in Choice AU and finer grades, and minimally abraded coins with remaining luster are especially challenging to locate. Always in demand for its O-Mint, Type One No Motto design, the 1851-O is the “go-to” date for most type collectors.

This Choice example displays appealing medium-gold color with greenish-gold accents, with fewer bagmarks and abrasions than expected. Aside from light wear, the motifs are well-defined and there are no heavy marks. Mint luster remains plentiful at the margins and to a lesser extent across the smooth fields. The coin is CAC endorsed with great eye appeal. Population: 43 in 55 (1 in 55+), 22 finer (1/16). NGC ID# 268J, PCGS# 8905

**1852-O Twenty Dollar, AU53  
Smooth, Original Patina**

**3423 1852-O AU53 NGC. CAC. Variety 1.** The 1852-O double eagle had the second-highest mintage in the series from this mint at 190,000 pieces, but the bulk of this production circulated extensively and was subsequently lost to attrition. High-grade survivors are scarce. This collectible AU representative is boldly detailed with hints of luster still clinging to the soft honey-gold surfaces. Liberty's cheek and the fields are uncommonly smooth, and eye appeal is proportionately high for the grade. NGC ID# 268L, PCGS# 8907

**1856-S Twenty Dollar, MS61  
Variety 17H, Full Serif, Right S**

**3424 1856-S MS61 NGC. CAC. Variety 17H.** The 1856-S was rarely seen in mint condition prior to the recovery of the *S.S. Central America*, which yielded about 1,500 Uncirculated coins. This No Motto representative, almost certainly from the ill-fated ship, is sharply struck in most areas, with a few scattered bagmarks on each side that prohibit an even higher numerical grade. Perhaps this coin's most noteworthy attribute is its intense, radiating mint luster over lavender and orange-gold surfaces.

Ex: *Central States Signature* (Heritage, 5/2009), lot 3938; *Long Beach Signature* (Heritage, 6/2015), lot 4334. NGC ID# 2692, PCGS# 8919

**1857-S Twenty Dollar, MS64  
'Spiked Shield,' S.S. *Central America***

**3425 1857-S MS64 PCGS. Variety 20A.** Ex: *S.S. Central America*. SSCA 4179. The “Spiked Shield” variety; the most familiar from the famous antebellum shipwreck. A sharply struck, lustrous, and well-preserved apricot-gold near-Gem. The left obverse displays two blushes of dusky coloration. Housed in a gold label holder. Included with the lot is a brown faux California Gold Rush book and a certificate of authenticity signed by Tommy Thompson. NGC ID# 2696, PCGS# 8922

**1857-S SSCA Twenty Dollar, MS64  
Variety 20A, 'Spiked Shield'**

- 3426 1857-S MS64 PCGS. Variety 20A.** Ex: S.S. *Central America*. SSCA 0774. A Choice example of the "Spiked Shield" variety, confirmed the presence of two slender die lines near the left border of the shield. The variety probably constituted the most recent delivery from the San Francisco Mint to be included in the SSCA cargo, since MS64 was the median grade among the pieces recovered from the shipwreck. The present lustrous peach-gold example has the look of a Gem, but was held back in grade by a narrow arc of struck-in grease on the field near the profile. Housed in a gold label holder. NGC ID# 2696, PCGS# 8922

**1861 Double Eagle, MS62  
Few Marks for the Grade**

- 3427 1861 MS62 PCGS.** Excessive marks and abrasions are always the worry for double eagles in this grade, but the present coin is especially pleasing in that regard. Only minor marks are widely dispersed, and none stand out as particularly bothersome. The strike is needle-sharp on the devices. Cartwheel luster radiates from the centers and imbues the thickly frosted surfaces with a satiny, rich-gold appeal. PCGS shows just 50 examples in a higher grade in stark contrast to the staggering original mintage of nearly 3 million pieces (12/15). NGC ID# 269G, PCGS# 8932

**1862-S Twenty Dollar, AU58  
Attractive and Lustrous**

- 3428 1862-S AU58 PCGS.** The 1862-S double eagle is challenging in the upper AU grades and genuinely rare in Mint State. This near-Mint representative is boldly detailed and retains significant luster in the olive-gold fields. A few small abrasions on Liberty's cheek are characteristic of the grade and issue. Eye appeal rivals that of many Uncirculated coins. Population: 52 in 58, 22 finer (1/16). NGC ID# 269N, PCGS# 8938

**1864 Double Eagle, AU53  
Significant Luster Remains**

- 3429 1864 AU53 NGC.** The 1864 double eagle is scarce in all AU grades and rare in Mint State, although it does not always get the recognition it deserves. Barely more than 200,000 coins were struck, continuing a pattern of low-mintage issues from the Philadelphia Mint during the Civil War period. This piece shows minor high-point friction and scattered abrasions, but the glow of original luster in the fields and attractive straw-gold coloration delivers noteworthy eye appeal. NGC ID# 269S, PCGS# 8941

**1865 Twenty Dollar, MS63  
Ex: S.S. Republic**

- 3430 1865 MS63 NGC.** Ex: S.S. *Republic*. A sharply struck butter-gold double eagle that boasts vibrant luster and an unabraded reverse. The left obverse displays moderate contact. The S.S. *Republic* was in service only 12 years. Initially the S.S. *Tennessee*, it was briefly seized by the Confederacy, then recaptured by the North and renamed the U.S.S. *Mobile*. It was auctioned by the U.S. Navy in early 1865, and relaunched as the S.S. *Republic*. The ship encountered a hurricane on October 25, 1865, and sank bearing a large assortment of Federal gold. Odyssey Marine successfully salvaged the wreck circa-2003. NGC ID# 269U, PCGS# 8943

**1866 Double Eagle, AU58+  
First Type Two Issue**

- 3431 1866 Motto AU58+ PCGS.** A high-end near-Mint example from the first year of the popular Type Two design, with the motto IN GOD WE TRUST on the reverse. This attractive specimen shows just the slightest friction on the high points of the sharply detailed design elements and the lightly abraded orange-gold surfaces retain much original mint luster. Population: 69 in 58 (3 in 58+), 49 finer (1/16). NGC ID# 269X, PCGS# 8949

**1866-S Liberty Double Eagle, AU53  
First Year With Motto**

- 3432 1866-S Motto AU53 NGC.** The 1866-S Liberty double eagle represents the first year of the popular Type Two design. Despite the substantial mintage of 842,250 pieces, the 1866-S is seldom encountered in high grade today. This attractive AU53 specimen shows light wear on the design elements and the pleasing yellow and orange-gold surfaces show the expected number of minor abrasions for the grade. NGC ID# 26B2, PCGS# 8950

**1867-S Twenty Dollar, AU58  
Blatant Originality**

- 3433 1867-S AU58 PCGS. CAC.** Large S. CAC has rightfully recognized the originality and eye appeal of this frosty, rose and green-gold San Francisco double eagle. The stars display full centers, the curls are bold, and the eagle shows crisp feather detail. A trace of rub over the relief areas explains the near-Mint technical assessment, but it is virtually indiscernible. Unimportant chatter occurs in the fields occurs on both sides, but Liberty's cheek is relatively unscathed. PCGS reports 18 higher grading events (1/16). NGC ID# 26A2, PCGS# 8952

**1867-S Twenty Dollar, Minimally Abraded AU58  
In-Demand Type Two Issue**

- 3434 1867-S AU58 NGC. CAC.** The 1867-S follows a general pattern laid out by most San Francisco double eagle issues from this period, being available in the XF and lower AU grade range but conditionally rare in Mint State. As a result, near-Mint representatives are the finest typically available. This CAC-endorsed example displays attractively original honey-gold patina with significant luster remaining in the fields. The minimally abraded surfaces show a mere trace of wear over the high points of the design. NGC shows only 27 Mint State coins finer (12/15). NGC ID# 26A2, PCGS# 8952

**1869-S Double Eagle  
Lustrous, Near-Mint Surfaces**

- 3435 1869-S AU58 NGC.** Sharply defined motifs and ample luster remain on this near-Mint San Francisco double eagle, with only faint evidence of time spent in circulation. The Small Squat S mintmark is positioned especially high above the right upright of N in TWENTY on the reverse. A few bagmarks occupy Liberty's cheek and neck, but the fields are remarkably clear of distracting abrasions. A light rim bump is noted above the M of AMERICA. NGC ID# 26A6, PCGS# 8956

---

1870-S Liberty Double Eagle, MS63  
Type Two Condition Rarity  
Tied for Finest Certified

**3436 1870-S MS63 NGC. CAC.** The 1870-S Liberty double eagle claims a substantial mintage of 982,000 pieces, but most of the coins were released into circulation, where they were either exported or worn down and melted for recoinage. The average survivor grades no better than VF or XF today, and the issue is a prime condition rarity in grades above MS61. Luckily, three MS62 coins were discovered in the Saddle Ridge Hoard in 2013, which nearly doubled the supply of MS62 examples at the time. Only two coins have been graded at the MS63 grade level, including the coin offered here and a single example at PCGS (1/16). This coin last appeared in lot 86 of the Rarities Sale (Stack's Bowers, 5/2015), where it realized a record price of \$49,938.

The present coin is an attractive Select example, with a much better-than-average strike, which is almost always a problem with this issue. Aside from the slightest touch of softness on the stars on the left, this coin exhibits sharp definition throughout. Prooflike reflectivity is evident in the fields on both sides, mixed with vibrant satiny mint luster. The pleasing orange-gold surfaces show some scattered, grade-consistent contact marks that do little to detract from the outstanding overall visual appeal. This specimen is tied with one other coin at PCGS for finest-certified honors, and this important Type Two condition rarity is seldom offered in any Mint State grade. We expect intense competition from series specialists and Registry Set enthusiasts when this lot is called. Census: 1 in 63, 0 finer (1/16).

Ex: Rarities Sale (Stack's Bowers, 5/2015), lot 86, realized \$49,938.  
NGC ID# 26A9, PCGS# 8959

1872-CC Double Eagle, AU55  
Partially Lustrous Fields

**3437 1872-CC AU55 PCGS. Variety 1-A.** The 1872-CC is a better date in the Carson City double eagle series, infrequently seen in the upper AU grades with problem-free surfaces. Mint State coins are rare and most of the higher-end pieces in AU and Mint State show heavy abrasions. This is the first time we have handled this particular Choice About Uncirculated coin. The surfaces display rich straw-gold patina with significant luster in the fields. Little wear affects the design elements, and a single small cut behind Liberty's eye is the only mentionable abrasion — coincidentally, ideal for pedigree identification. Overall, the eye appeal is far above average for the issue and grade. Population: 30 in 55, 32 finer (12/15). NGC ID# 26AE, PCGS# 8964

1873 Liberty Double Eagle, MS62+  
Scarcer Closed 3 Example  
Finest Certified at PCGS

**3438 1873 Closed 3 MS62+ PCGS.** Coins struck early in 1873 show a Closed 3 in the date, but Chief Coiner A. Loudon Snowden noted that the final digit looked too much like an 8, so the punch was redesigned. Most Philadelphia Mint double eagles of this date display the later Open 3 logotype, but a number of coins were released before the 3 was modified and show the old Closed 3 in the date.

The present coin is a high-end MS62 example of the Closed 3 subtype, with well-detailed design elements and lustrous orange-gold surfaces that show the minimum number of minor contact marks for the grade. Overall eye appeal is quite strong and no coins have been certified in higher numeric grade at either of the leading grading services. Population: 3 in 62 (1 in 62+), 0 finer (12/15). NGC ID# 26AL, PCGS# 8966

**1877-CC Liberty Twenty, AU55**  
Smooth and Appealing

- 3439** 1877-CC AU55 NGC. CAC. Variety 1-A. Marginally available in lower grades, the 1877-CC double eagle becomes elusive above AU55. This Choice About Uncirculated example boasts excellent detail and flashes of luster throughout the wheat-gold surfaces. Liberty's cheek and the fields are pleasantly smooth, and eye appeal is correspondingly high for the grade. From a mintage of only 42,565 pieces. NGC ID# 26AZ, PCGS# 8983

**1877-CC Twenty Dollar, AU55**  
Eye-Appealing Collector Coin

- 3440** 1877-CC AU55 PCGS. CAC. Variety 1-A. The 1877-CC double eagle is marginally available in AU grades, but Mint State pieces are far out of reach for many collectors. This Choice About Uncirculated representative displays well-detailed design elements with bright yellow-gold surfaces that reveal hints of luster in the fields when rotated beneath a light. Light, scattered abrasions are typical of the grade. NGC ID# 26AZ, PCGS# 8983

**1884-CC Twenty, Lustrous AU58**  
Lovely Cartwheel Effect

- 3441** 1884-CC AU58 NGC. Variety 1-A. The 1884-CC is a popular choice when a single Carson City double eagle is desired. The date had a mintage of 81,139 pieces and is more available in high grade than many other issues in the series from this mint. This piece displays sharp detail and frosty yellow-gold surfaces with significant luster in the fields. Eye appeal is excellent for the grade. NGC ID# 26BK, PCGS# 9001

**1890-CC Liberty Twenty, AU55**  
Sharp Motifs, Still-Lustrous Fields

- 3442** 1890-CC AU55 NGC. Variety 1-A. Slightly busy with tiny abrasions, this Carson City twenty retains a large amount of mint luster on both sides with no major marks — a definite “plus” for an issue that often exhibits deep and distracting bagmarks. The attractive, orange-gold color befits the Choice About Uncirculated grade, as does the nice remaining definition on the motifs. Struck from a late die state, with the right-side tail feathers weak. NGC ID# 26BY, PCGS# 9014

**1890-CC Twenty Dollar, AU58**  
Lustrous and Pleasing for the Grade

- 3443** 1890-CC AU58 NGC. CAC. Variety 1-A. The typically seen late die state, showing the eagle's tailfeathers partially effaced by die lapping. This near-Mint 1890-CC double eagle displays rich yellow-gold color with significant luster illuminating the fields. The design elements are well-defined, and light, scattered abrasions accompany the grade. No obvious wear is present, although slight friction on Liberty's cheek and in the adjacent field precludes a Mint State designation. NGC ID# 26BY, PCGS# 9014

1892-CC Liberty Twenty, MS60  
Popular Carson City Type Three Issue

**3444 1892-CC MS60 PCGS. Variety 1-A.** The 1892-CC Liberty double eagle is not quite as elusive in high grade as its mintage of 27,265 examples would suggest, due to its presence in a few hoards that surfaced in the late 1990s. Doug Winter estimates the surviving population at 800-900 examples in all grades, but Mint State coins are still somewhat scarce. This impressive Mint State example offers well-detailed design elements, with just a touch of softness on the star centers. The pleasing orange-gold surfaces radiate vibrant mint luster and show the expected number of minor contact marks for the grade. The overall presentation is quite attractive. NGC ID# 26C6, PCGS# 9020

1893-CC Twenty, MS62+  
Bright Yellow-Gold Surfaces

**3445 1893-CC MS62+ PCGS. CAC.** The 1893-CC twenty has a couple of factors working in its favor. It has a remarkably low mintage of only 18,402 pieces, and it was shipped to Europe and held there for many years giving collectors Uncirculated coins when they were repatriated. One of the problems this issue often has are alloy spots on many of the Uncirculated pieces. This example lacks that particular problem; rather, the surfaces are bright, even yellow-gold. Additionally, the mint luster is bright and frosted, and the abrasions present are small, widely scattered, and individually inoffensive. These factors undoubtedly explain the Plus designation. Exceptional for a Carson City type coin. NGC ID# 26C9, PCGS# 9023

---

1904 Double Eagle, MS66+  
Top-Shelf Example

**3446** 1904 MS66+ NGC. There are virtually no marks on either side of this top-shelf Premium Gem coin, showing attractive orange-gold patina and good preservation and eye appeal. A few tiny dark flecks are insignificant compared to the broad quality on display here. Boldly struck and delightful. Census: 4 in 66+, 2 in 66 ★, 1 finer (11/15). NGC ID# 26CY, PCGS# 9045

---

1905 Liberty Twenty, MS62  
Scarcer Low-Mintage Issue

**3447** 1905 MS62 PCGS. The 1905 Liberty double eagle claims a small business-strike mintage of just 58,919 pieces and few examples were saved by contemporary collectors, making the issue decidedly elusive in high grade today. This pleasing MS62 example exhibits sharply detailed design elements and lustrous orange-gold surfaces, with a scattering of minor contact marks on both sides. NGC ID# 26D2, PCGS# 9047

---

1905-S Twenty Dollar, MS64+  
Excellent Eye Appeal

**3448** 1905-S MS64+ PCGS. As a 20th century issue with a mintage exceeding 1.8 million coins, the 1905-S double eagle falls through the cracks when seeking better dates. Yet, it does become more of a challenge at the Choice grade level and finer pieces are rarely seen. This Plus-graded MS64 example shows a sharp strike and radiant yellow-gold luster. A few faint grazes are not out of line for the grade. Just 12 coins are finer at PCGS (1/16). NGC ID# 26D3, PCGS# 9048

---

PROOF LIBERTY DOUBLE EAGLE

1903 Double Eagle, PR58  
Slight High-Point Friction

**3449** 1903 PR58 PCGS. CAC. This is still an attractive coin in spite of light rub over the high points and in the fields. Both sides retain almost complete strike definition with bright, uniformly reflective surfaces throughout. As one would expect, there is virtually no contrast between the fields and devices as that was the new method of striking proof coinage between 1902 and 1905. A few scattered hairlines can be found on each side, and a small contact mark on Liberty's cheek is the only singularly mentionable distraction. One of a mere 158 pieces produced, fewer than 30 of which are believed extant today.  
Ex: 2000 Santa Clara Signature (Heritage, 11/2000), lot 7327. NGC ID# 26ER, PCGS# 9119

## SAINT-GAUDENS DOUBLE EAGLES

1908-D No Motto Twenty, MS65  
Rare Any Finer

**3450 1908-D No Motto MS65 PCGS.** The 1908-D is the scarcest No Motto, Arabic Numerals Saint-Gaudens double eagle in high grade. This Gem example represents the finest most collectors will have the chance to acquire, as higher-end pieces are distinctly rare. Liberty's figure and the eagle are boldly rendered, and the satiny surfaces yield soft honey-gold luster. No abrasions are worthy of mention. PCGS lists 11 Premium Gems finer (12/15). NGC ID# 26F7, PCGS# 9143

1908 Saint-Gaudens Double Eagle, MS65  
First Year With Motto, Scarce This Fine

**3451 1908 Motto MS65 PCGS.** While the No Motto double eagles of 1908 are readily available in high grades today (thanks to the Wells Fargo hoard), the much lower-mintage Motto twenties of the same year are far more elusive. Gems are borderline condition rarities and anything finer easily qualifies; PCGS has certified just 13 such pieces (1/16).

This attractive MS65 survivor offers strong wheat-gold luster and pleasing overall definition, though the torch and the hand holding it show slight striking softness. The central devices are clean for the grade, though a number of small ticks appear on the surrounding rays.

Ex: FUN Signature (Heritage, 1/2010), lot 2286. NGC ID# BNAK, PCGS# 9147

---

**1909 Double Eagle, MS64+**  
**Scarce in This Grade, Rare Finer**

- 3452 1909 MS64+ PCGS.** The Plus designation will make this Choice 1909 double eagle highly appealing to a range of collectors. Half of a grade point finer in MS65, this early With Motto issue is genuinely rare. The present piece displays bold detail and satiny wheat-gold luster. A few trivial marks hidden within the eagle's feathers define the grade, while the obverse fields are beautifully preserved. PCGS reports 26 finer representatives (12/15). NGC ID# 26FC, PCGS# 9150

---

**1910-D Double Eagle, Exceptional MS66**  
**Nearly Unobtainable Any Finer**

- 3453 1910-D MS66 PCGS.** This Denver issue is challenging to obtain finer than the MS65 grade level, and it becomes rare at the high end of the Premium Gem grade such as the current outstanding example. Sharply struck and beautifully preserved, the coin displays lovely medium orange-gold surfaces, abundant luster, and a near-total absence of distracting abrasions. The eye appeal is extraordinary. PCGS and NGC combined have graded only four pieces numerically finer (12/15). NGC ID# 26FG, PCGS# 9155

---

**1910-S Double Eagle, MS65**  
**Radiant Eye Appeal**

- 3454 1910-S MS65 PCGS.** The 1910-S double eagles have a reputation for sharp strikes and attractive color, and both attributes are clearly on display for this visually impressive Gem example. Brilliant, sun-gold surfaces radiate cartwheel luster with lemon-gold highlights. A few light abrasions require magnification to view and define the assigned grade, yet the coin is an ideal addition to any high-grade collection of double eagles or gold type. PCGS reports just nine numerically finer coins (12/15). NGC ID# 26FH, PCGS# 9156

---

**1911 Saint-Gaudens Twenty, MS65**  
**Rarely Seen Any Finer**

- 3455 1911 MS65 PCGS. CAC.** Eye appeal alone would qualify this double eagle for Gem consideration, but the technical aspects of the coin's surfaces are equally impressive. Like most 1911s, the strike is characteristically sharp — in this case, essentially full. The finely granular surfaces seemingly repel any marks, with only a few tiny ticks in evidence. Mint bloom coruscates from the flashy, sun-gold fields, with lime-green highlights and a touch of peach color enriching the frosty luster.

As an MS65 survivor, this gorgeous twenty is a bonafide condition rarity. One of the scarce issues of the era, a finer example will be challenging to find. Population: 45 in 65 (3 in 65+), 12 finer (12/15).

Ex: Fort Worth ANA Signature (Heritage, 3/2010), lot 2761. NGC ID# 26FK, PCGS# 9157

---

**1915 Twenty, MS65  
None Finer at PCGS**

**3456 1915 MS65 PCGS.** Given its reputation for sharp strikes and rich-gold coloration — not to mention overall eye appeal and surface quality — one has to wonder why so few Gem survivors of the 1915 exist, with virtually no coins graded finer than MS65 by either service. This example is close to fully struck and minimally bagmarked, with only a few tiny ticks on the knee, leg, and fields.

Orange accents enhance the satiny, sun-gold sheen while cartwheel mint luster radiates from both sides. The low mintage of 152,050 contributes to the high-grade rarity, making this Gem example among the finest certified. Population: 47 in 65 (2 in 65+), 0 finer (1/16). NGC ID# 26FV, PCGS# 9167

**1923-D Twenty Dollar, MS66+  
High-End Eye Appeal**

**3457 1923-D MS66+ PCGS. CAC.** The 1923-D double eagles seldom disappoint in the areas of eye appeal or technical merit, and this Plus-graded Premium Gem is no exception. Immersed in mint frost, the rich gold surfaces radiate olive-gold and rose highlights with strong luster shining through. A mark on Liberty's mouth is indiscernible in-hand but visible with a lens. More than 1600 grading events at the MS66 level have yielded just 58 coins with the PCGS Plus designation, confirmed by the CAC endorsement (12/15). NGC ID# 26G6, PCGS# 9176

**1926-S Double Eagle, MS63  
Low-Survival San Francisco Issue**

**3458 1926-S MS63 PCGS.** Formerly considered a major branch mint rarity, a small percentage of the 1926-S double eagles escaped the 1930s gold melt by way of foreign holdings, while a moderate number other coins have emerged domestically over the years. Still elusive in Select Uncirculated or finer grades, the issue retains its collector appeal. This satin-smooth, vibrant example exudes eye appeal. Small marks determine the grade, while peripheral die crumbling at the obverse stars and a bold die crack across Liberty's bottom gown folds suggest a late die state. NGC ID# 26GF, PCGS# 9185

---

1931 Twenty Dollar, MS64  
One of the Keys to the Late-Date Saints

**3459 1931 MS64 PCGS Secure.** The final issues in the Saint-Gaudens double eagle series are representative of a time when the United States was in the throes of the Great Depression, wrestling with a deflationary spiral, high unemployment rates, and correspondingly low demand for large denomination coins like the double eagle. The low demand for coinage is not necessarily reflected in the mintages of the twenty dollar issues with which the series concludes, but rather in the number of pieces distributed. The 1929, 1931, and 1932 Philadelphia issues all boast high mintages in excess of one million coins (2.9 million pieces in 1931). Yet, along with the 1930-S and 1931-D, they represent some of the most challenging and elusive dates in the set.

An essential component to understanding why the 1931 and its later-date counterparts prove so elusive is the number of pieces “put out” by the Treasury at the time. (The term “put out” is an unusual one in numismatics, and is generally thought to mean the number of coins sent by the mint of origin to the Treasury in Washington. An imprecise term for certain.) Despite the vast quantities produced, the coins were merely stored in vaults as reserves for United States currency, which was on the Gold Standard at the time. In fact, few double eagles were actually paid out. When Roosevelt issued the Gold Recall in April 1933, all but a small handful of late-date twenties avoided conversion into gold bars and ingots. In 1947, Dr. Charles W. Green, whose double eagle collection drew significant attention when it was sold at auction by B. Max Mehl in 1949, went to the office of the Director of the Mint to look into exactly how many coins were paid out by the Treasury Department. He found that 45 examples of the 1931 had been released through official channels. By contrast, Green reported that 110 1932 double eagles had been “put out,” while 25,170 1929-dated coins left the Treasury. Examination of the Vault Record for the Philadelphia Mint, however, reveals that the maximum number of pieces available for sale to collectors was 308. Today, there are between 100 and 150 examples available to supply collector demand.

Since few coins, if any, were exported overseas, the 1931 is often found in high grades — typically in MS64 and MS65 condition. Sharp strikes and vibrant luster are also characteristic of the issue, as seen on this example. A few small abrasions are scattered over each side, but none are of singular importance. The basic yellow-gold color shows just the slightest tinge of reddish patina over both obverse and reverse. Population: 27 in 64, 37 finer (1/16). NGC ID# 26GN, PCGS# 9192

## COMMEMORATIVE SILVER

### 1900 Lafayette Dollar, MS65 A Highly Appealing Type Coin

**3460** 1900 Lafayette Dollar MS65 PCGS. DuVall 3-D. This is a scarcer Lafayette dollar variety, identified in part by recutting on the AT in STATES. Overall, this Gem is well-struck and displays vibrant cartwheel luster. The blended autumn-gold and stone-gray centers are framed by peripheral jade-green and plum-red toning. A couple small ticks on Washington's forehead provide the only contact of note. NGC ID# BYKW, PCGS# 9222

### 1937-D Arkansas Half Dollar, MS68 Tied for Finest Certified

**3461** 1937-D Arkansas MS68 PCGS. Arkansas Centennial half dollars were struck at all three active U.S. mints every year from 1935 to 1939, despite the fact that the real centennial date was 1936. The coins were marketed by the Arkansas Centennial Commission at \$1 per coin, but some coin dealers, notably B. Max Mehl, bought up a large percentage of the 1935 branch mint mintage, creating an artificial shortage and driving the price up to unreasonable levels on the secondary market. The Arkansas Centennial Commission followed suit by raising the price of an individual coin to \$1.50 in February of 1936, and prices continued to rise throughout the production run. The extended production program, with so many different branch mint issues, was a thinly veiled attempt to exploit collector demand, as a full set of Arkansas half dollars would comprise not less than 15 coins. This, and the erratic method of distribution, caused much controversy at the time.

Only 5,505 Arkansas Centennial half dollars were struck at the Denver Mint in 1937, and this spectacular MS68 example is tied with one other specimen at PCGS for finest-certified honors (12/15). The design elements are sharply detailed throughout, and the impeccably preserved surfaces radiate satiny mint luster, with attractive hints of greenish-gold and amber toning at the peripheries. A must-have coin for Registry Set enthusiasts. NGC ID# BYFC, PCGS# 9242

**1937-S Arkansas Half Dollar, MS67  
None Certified Finer at PCGS**

- 3462 1937-S Arkansas MS67 PCGS.** This delightful Superb Gem is one of the finest survivors from a modest distribution of 5,506 pieces. The design elements are well-detailed and the impeccably preserved surfaces show highlights of magenta, greenish-gold and amber toning, with satiny mint luster and outstanding eye appeal. Population: 6 in 67, 0 finer (1/16). NGC ID# BYFD, PCGS# 9243

**1935/34-D Boone Half Dollar, MS68  
Tied for Finest at PCGS**

- 3463 1935/34-D Boone MS68 PCGS.** Only 2,003 examples of the 1935/34-D Boone half dollar were struck, the lowest mintage of the classic silver commemorative series. This spectacular MS68 example is one of the finest survivors, with sharply detailed design elements and satiny mint luster, under shades of lavender-gray and greenish-gold toning. Population: 9 in 68, 0 finer (1/16). NGC ID# BYFU, PCGS# 9263

**1893 Columbian Half Dollar, MS67  
Vivid Multicolor Toning**

- 3464 1893 Columbian MS67 PCGS.** Despite the large distribution of 1.5 million pieces, the 1893 Columbian half dollar is seldom encountered at the MS67 grade level. This impressive Superb Gem offers well-detailed design elements and impeccably preserved surfaces, with attractive highlights of greenish-gold and magenta toning. Population: 24 in 67 (2 in 67+), 0 finer (1/16). NGC ID# BYGG, PCGS# 9297

**1922 Grant With Star Half, MS66  
Scarce This Fine, Rare Finer**

- 3465 1922 Grant With Star MS66 PCGS.** In MS66, the With Star Grant Memorial half dollar is significantly scarcer than its No Star counterpart, and the issue is rare any finer. This Premium Gem example displays a bold strike and satiny mint luster. Mottled lavender-gray, gold, and russet-olive toning blankets each side. A conditionally elusive acquisition for the classic commemorative specialist. Population: 44 in 66 (7 in 66+), 5 finer (12/15). NGC ID# BYPP, PCGS# 9307

**1938 New Rochelle Half Dollar, MS66  
Rare Specimen Finish Example**

- 3466 1938 New Rochelle, Specimen Finish, MS66 NGC.** Both Prooflike and Specimen strikings are known and certified for the New Rochelle half dollar. The Specimen coins, such as this one, are only graded by NGC. Such pieces are presumably from the 50 coins presented to various dignitaries, members of the Coinage Committee, and selected members of the Westchester County Coin Club. This is a deeply mirrored example with only slight contrast evident between the fields and devices. There are no obvious contact marks present, and each side is primarily brilliant with a slight reddish tinge evident. NGC has only certified 14 coins as Specimen strikings, and six others have been graded the same as this coin with six finer, minus possible resubmissions (12/15). PCGS# 99335 Base PCGS# 9335

**1938-S Oregon Trail Half Dollar, MS68  
Among the Finest Certified**

- 3467 1938-S Oregon MS68 PCGS. CAC.** This issue commemorates the Oregon Trail and the pioneers who traversed it during the early 19th century. A total of 14 issues were struck between 1926 and 1939 at three mints. The 1938-S had a distribution slightly over 6,000 pieces. Light sky-blue toning dominates the highly lustrous surfaces of this Superb Gem, accented with whispers of lavender, orange-gold, and violet patina. Sharply defined design elements and impeccably preserved surfaces contribute to the outstanding eye appeal. Population: 14 in 68 (1 in 68+), 0 finer (1/16).  
Ex: Eugene H. Gardner Collection, Part IV (Heritage, 10/2015, as MS68 NGC with CAC approval), lot 98821. NGC ID# BYHK, PCGS# 9350

**1936-S Texas Centennial Half, MS68  
Among the Finest Certified**

- 3468 1936-S Texas MS68 NGC.** With a distribution of 9,055 pieces (including assay coins), the 1936-S Texas Centennial half dollar is scarce in Superb Gem condition; MS68 is the finest numeric level achieved, and only eight examples are so-designated by NGC (six coins, one in MS68+★) and PCGS (two coins) combined (12/15). This frosty NGC representative boasts well-executed details and seemingly pristine surfaces. Hints of iridescence accentuate soft champagne luster, delivering ample eye appeal. The Texas Centennial half dollar is a popular classic commemorative, collected by date and mintmark and by type. For either purpose, this piece is virtually unsurpassable. NGC ID# BYJG, PCGS# 9388

**1951 Booker T. Washington Half Dollar, MS67+  
Tied for Finest at PCGS**

- 3469 1951 Booker T. Washington MS67+ PCGS.** The 1951 Booker T. Washington half dollar claims a substantial distribution of over half a million pieces and this high-end Superb Gem is one of the finest survivors seen at PCGS. The impeccably preserved surfaces are blanketed in vivid shades of golden-brown and violet toning, with vibrant mint luster underneath and tremendous visual appeal. Population: 17 in 67 (3 in 67+), 0 finer (1/16). NGC ID# BYK9, PCGS# 9424

## COMMEMORATIVE GOLD

### 1905 Lewis and Clark Gold Dollar, MS66 Frosty and Brilliant Sun-Gold Surfaces

- 3470 1905 Lewis and Clark Gold Dollar MS66 NGC. In the absolute sense, the two Lewis and Clark gold dollar issues are about equal in terms of availability, but in Premium Gem and finer condition, the 1905's certified population declines significantly below that of the 1904. The quantity of 1905-dated pieces struck totaled 35,000 coins (plus 41 additional representatives for assay purposes), but 25,000 pieces were later melted as unsold, leaving a net distribution of only 10,041 coins (including assay pieces). This Premium Gem example displays well-struck motifs and flashy yellow sun-gold luster. Close study with a glass fails to find any obtrusive flaws. Census: 54 in 66 (3 in 66+, 1 in 66 ★), 3 finer (12/15). NGC ID# BYLG, PCGS# 7448

### 1915-S Panama-Pacific Quarter Eagle Attractive MS65 Example

- 3471 1915-S Panama-Pacific Quarter Eagle MS65 NGC. CAC. The 1915-S Panama-Pacific quarter eagle claims a small distribution of 6,749 pieces, but the issue has a relatively high survival rate. This attractive Gem exhibits well-detailed design elements and the pleasing orange-gold surfaces radiate vibrant mint luster, with only minor signs of contact. The eye appeal cannot be denied. NGC ID# BYLP, PCGS# 7450

### 1915-S Panama-Pacific Quarter Eagle Superb Gem, None Certified Finer

- 3472 1915-S Panama-Pacific Quarter Eagle MS67 NGC. Neither NGC nor PCGS have yet to certify a 1915-S Pan-Pac quarter eagle in numerically finer grade, making the MS67 level the ultimate opportunity for high-grade gold commemorative specialists. This vibrant, yellow-gold example is sharp and attractive with pervasive mint luster. Importantly, it is free of alloy spots save for two insignificant specks beneath the first S of STATES. NGC ID# BYLP, PCGS# 7450

### 1915-S Panama-Pacific Quarter Eagle, MS67 Tied for Finest Certified

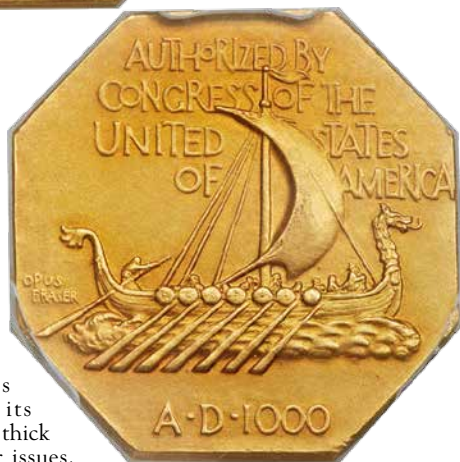

- 3473 1915-S Panama-Pacific Quarter Eagle MS67 PCGS. The Panama-Pacific gold issues are among the iconic coins of the classic commemorative series, and the quarter eagle is highly sought for its denomination as well as its design, symbolic of medicine's triumph over yellow fever. This Superb Gem example is among the finest certified, with lustrous, greenish-gold coloration and sharply struck devices. Pleasing orange-gold overtones add eye appeal to the frosty surfaces. Population: 39 in 67 (1 in 67+), 0 finer (12/15). NGC ID# BYLP, PCGS# 7450

## PROOF COMMEMORATIVE GOLD

Gold 1925 Norse Medal, PR66  
Net Mintage of 53 Pieces

- 3474 1925 Norse Gold PR66 PCGS. CAC.** The Norse medal is known to collectors primarily for its 1-1/2" thin and thick planchet silver issues. They have been honorary members of the silver commemorative series since their 1925 issue. Gold examples were struck in a smaller one-inch format with a matte proof finish. They are much rarer than the familiar silver varieties. The gold mintage was 100 pieces, but 53 were melted as unsold, leaving a net production of 47 pieces. The present high-grade orange-gold and olive-green example is pristine save for a tiny obverse rim mark at 9 o'clock. Population: 6 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 28NU, PCGS# 9452

## MODERN ISSUE

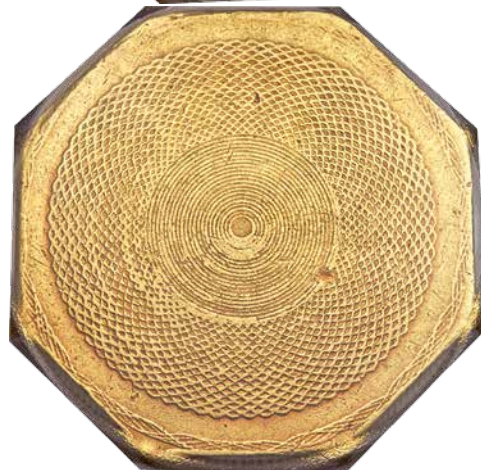

1989-D Congress Silver Dollar, MS70

- 3475 1989-D Congress MS70 PCGS.** Untoned silver-white perfection is the hallmark of this Congress Bicentennial silver dollar, one of only 17 in this ultimate grade at PCGS (1/16). Contrarians try to order the modern commemorative coins that will be unpopular, and in cases such as this, such bets can pay off in spades. The number of "circulation" strikes of this issue made in Denver was less than one-fifth the number of proofs struck in San Francisco. NGC ID# 28R2, PCGS# 9634

## TERRITORIAL GOLD

1851 Humbert Fifty, XF40  
Popular K-6, Reeded Edge, 887 Thous Variety

- 3476 1851 Humbert Fifty Dollar, Reeded Edge, 887 Thous. XF40 PCGS. CAC. K-6, R.4.** The iconic Humbert octagonal fifty-dollar slugs have become more symbolic of the Gold Rush era than any other issue in the minds of most collectors. They were struck under the auspices of the United States Assay Office, with Augustus Humbert as assayer. The Reeded Edge fifty dollar slugs were much more efficient than their older Lettered Edge counterparts from a production stand point, as the Lettered Edge specimens required impressing the appropriate lettering into each individual side in eight separate operations. The K-6 variety shows the outer ribbon on the reverse close to the edge.

The present coin is an attractive XF specimen, with light wear on the well-detailed design elements and pleasing orange-gold surfaces that show only minor abrasions. Housed in a green label holder. Population: 16 in 40, 52 finer (1/16). NGC ID# ANH9, PCGS# 10214

---

1855 Kellogg & Co. Twenty Dollar, AU Details  
K-3c Variety, Unlisted in Kagin

- 3477 1855 Kellogg & Co. Twenty Dollar — Improperly Cleaned — NGC Details. AU. K-3c, R.5. This interesting variety was not listed by Don Kagin in his series reference. It shows Short Arrows on the reverse and has the O of CO embedded in the hair, like the more familiar K-3b, but the placement of the date is different, with the second 5 left of the curl rather than underneath. This still-attractive specimen shows some evidence of a light cleaning in the past, but the design elements show only a trace of wear and the surfaces show only minor abrasions. NGC ID# ANJ2, PCGS# 10225

---

1861 Clark, Gruber Five, MS64 Red and Brown  
Copper Die Trial, K-6, Reeded Edge

- 3478 1861 Clark, Gruber \$5 Copper Die Trial MS64 Red and Brown PCGS. K-6, Reeded Edge, R.7. A Clark, Gruber five-dollar copper die trial, struck from the regular dies with a reeded edge. Although the Clark, Gruber patterns are very rare in an absolute sense, they are among the more collectible off-metal strikings in the series. The original red surfaces of this impressive Choice example have mellowed to light brown in many areas, with minimal signs of contact. The design elements are strongly impressed and overall eye appeal is outstanding. This is currently the only example certified by PCGS, and is pictured on the CoinFacts website (1/16) PCGS# 568813 Base PCGS# 10151

---

S.S. CENTRAL AMERICA GOLD BAR

Kellogg & Humbert Gold Ingot Faceplate  
Accompanied by Certificate of Authenticity

- 3479 Kellogg & Humbert Gold Faceplate. CABG-445. The original weight of the ingot when it was pulled from the ocean floor was 150.32 ounces. Many ingots were cut laterally, leaving only the faceplate. The bulk of the gold was then used to strike commemorative gold coins that resembled Territorial gold pieces. This faceplate is nicely laid out with No 504 at the top, followed by the Kellogg & Humbert company logo / 150.32 Oz / 892 FINE / \$2771.79. The surfaces are bright, yellow-gold with no evidence of rust encrustation from the hull of the ship, as sometimes seen. Accompanied by a COA by PSA / DNA that guarantees authenticity. They include measurements on the certificate: 65 x 149 x 3 mm.

## PATTERNS

### 1870 Standard Silver Dime, Struck in Silver Judd-825, PR66

**3480** 1870 Standard Silver Ten Cents, Judd-825, Pollock-915, Low R.7, PR66 NGC. A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield, and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. On the reverse 10 / CENTS is within an open wreath of cotton and corn, tied with a bow at the bottom. STANDARD — in small letters — is found at the edge above the wreath, and the rim is unusually wide. Struck in silver with a reeded edge.

Nine distinct classes of 1870 dime patterns are known, including seven Standard Silver issues such as the current offering. The first eight of the nine dime groups comprise six variations: silver, copper, and aluminum, each with either a reeded or plain edge. The result is a total of 51 different dime patterns dated 1870—more than any other year by a wide margin.

Attractive cobalt and azure hues intermingle with peach toning throughout. The average strike of this Premium Gem proof is redeemed by substantial eye appeal and remarkably clean surfaces. Pollock (1994) notes that the current offering weighs 38.4 grains and has a diameter of 0.703 inches. The die alignment is 170 degrees. Ex: Bareford Collection (*Stack's*, 10/1981); Lemus Collection, *Queller Family Collection Part Two* (*Heritage*, 1/2009), lot 1727; Long Beach Signature (*Heritage*, 5/2009), lot 1419. NGC ID# 29V2, PCGS# 61069

### 1870 Standard Silver Quarter in Aluminum Judd-911, PR66+ Cameo

**3481** 1870 Standard Silver Quarter, Judd-911, Pollock-1000, High R.7, PR66+ Cameo PCGS. CAC. Ex: Denali Collection. This Standard Silver design depicts a bust of Liberty facing right on the obverse. Liberty's cap is ornamented with three stars and a ribbon with the inscription LIBERTY, the motto IN GOD WE TRUST is on a scroll at the lower periphery. The reverse depicts the denomination within a wreath of oak and laurel with STANDARD SILVER above and the date below. Struck in aluminum with a plain edge. This obverse / reverse design combination is frequently seen, but it is rare in aluminum, perhaps even rarer than the USPatterns.com estimate of less than half a dozen known. This piece was produced 16 years before aluminum became easier to extract by the Hall-Héroult process. Prior to the late-1880s, aluminum planchets were difficult to manufacture without surface problems, such as laminations, and they were expensive. This is a magnificent aluminum pattern. No surface irregularities are seen and there is no trace of oxidation. The fields are deeply mirrored and the devices show strong mint frost, which provides stark cameo contrast. PCGS# 800067 Base PCGS# 61155

**1870 Aluminum Standard Silver Quarter  
Judd-922, PR66 Cameo**

- 3482** 1870 Standard Silver Quarter, Judd-922, Pollock-1027, High R.7, PR66 Cameo PCGS. CAC. Ex: Denali Collection. A bust of Liberty faces right with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty is wearing a headband inscribed LIBERTY and her hair is tied in a bun. On the reverse, the denomination 25 CENTS is centered in an oak and laurel wreath with STANDARD SILVER above and the date 1870 below. Struck in aluminum with a reeded edge. Less than a half dozen examples are believed known of this variant, this surely being one of the finest. This problem-free aluminum striking shows the expected deep mirroring in the fields and thick mint frost over the devices. Problem-free throughout and showing no signs of oxidation.

Ex: Central States Signature (Heritage, 4/2012), lot 5413. PCGS# 800081 Base PCGS# 61166

**1870 Standard Silver Half in Copper  
Judd-989, PR65 Red and Brown  
Beautiful Coloration**

- 3483** 1870 Standard Silver Half Dollar, Judd-989, Pollock-1118, R.7, PR65 Red and Brown PCGS. Standard Silver design with Liberty facing right wearing a headband with a star, a scroll below reading IN GOD WE TRUST, and UNITED STATES OF AMERICA above. The reverse is similar to the one used in 1869 with 50 CENTS in the center and surrounded by a wreath of oak and laurel with 1870 below and STANDARD SILVER above. Struck in copper with a reeded edge. While the Standard Silver series is a frequently encountered group among patterns, individual issues such as this one are infrequently encountered. Rich red and blue-green toning is seen over each side with strong mirrors that further enhance the coloration. PCGS# 71235

**1870 Aluminum Seated Half Pattern, PR66 Cameo  
Judd-994, High R.7**

- 3484** 1870 Half Dollar, Judd-994, Pollock-1124, High R.7, PR66 Cameo PCGS. CAC. Ex: Denali Collection. From regular issue Seated Liberty half dollar dies, but struck in aluminum with a reeded edge. An extremely rare die trials pattern that may have been produced as part of an aluminum alloy proof set for presentation purposes, or for sale to well-connected collectors. This specimen, crisply struck and remarkably light in the hand, also is carefully preserved with faint glimpses of greenish-gold patina over the pale whiteness of aluminum. Clearly contrasted fields and devices make for excellent all-around eye appeal. One of the most remarkable survivors from this extremely rare issue. PCGS# 800069

## EARLY PROOF SET

1856 Nine-Piece Proof Set, PR64-67  
All PCGS Secure and CAC-Endorsed

---

**3485 1856 Nine-Piece Proof Set, PR64-67. All PCGS Secure, All CAC-Endorsed.** This significant early proof set is wonderfully preserved and well-matched. Previous NGC inserts also accompany the set. Included are:

**Half Cent PR66 Red and Brown Secure. CAC. B-3, R.4.** Characterized by doubling on the T in CENT and doubling on the wreath. The fields are deeply mirrored and the rims are wide and squared off, as only seen on proofs. The surfaces display variegated cherry-red and blue color. The strike details are pinpoint-sharp throughout. A lovely, problem-free proof half cent. This is the finest proof 1856 certified at PCGS, regardless of color designation (1/16).

**Large Cent Slanted 5 PR66 Red and Brown Secure. CAC. N-5, Low R.5.** While as many as 60 proofs exist of this late-date Braided Hair cent, relatively few are known in high grades and with significant portions of original red luster remaining. This piece ranks within the top 10 examples known. More red remains than brown, with only slight mellowing seen on the reverse and almost none evident on the obverse. Fully struck with deeply reflective fields and problem-free surfaces. Population: 3 Slanted 5 proofs in Red and Brown, none finer (1/16).

**Flying Eagle Cent PR64+ Secure. CAC. Snow-9.** By far the most frequently encountered 1856 FEC variety, the Snow-9 coins are also among the most attractive. The original surfaces show the presence of 160 years of age with slight reddish-brown patina that partially subdues the mirrored reflectivity in the fields (more so on the obverse, however). The strike is crisp on each side and the only observable (barely) contact marks are two tiny ones seen in the field below the eagle.

**Three Cent Silver PR66 Secure. CAC.** With no official records kept for proofs from the pre-1858 era, it is difficult to know how many pieces were actually minted. But the best estimate of survivors seems to be in the range of 30-40 pieces. This is unquestionably among the finest known. The fields are deeply mirrored with streaks of light reddish-russet patina in the center of each side and the margins surrounded by bright blue toning. PCGS has only certified one other piece at this level with none finer (1/16).

**Half Dime PR66 Cameo Secure. Gold CAC.** Like the three cent silver, probably 30-40 proofs remain from whatever the original mintage may have been. Also, like the three cent silver above, this example is among the finest known. This is the finest Cameo of this date, and there are two PCGS-certified non-Cameo proofs. Such brightness is seen on this proof that at first glance it appears brilliant. But there are numerous light reddish-russet streaks of color seen across each side. The devices are heavily frosted, as expected, and they display stark contrast against the deep mirroring in the fields.

**Dime, Small Date, PR66 Cameo Secure. CAC. Fortin-101, High R.6.** Doubled Obverse Die, Medium Level Date. This reverse die was used again in 1857, as seen by the die line through the R in AMERICA on both dates. PCGS has estimated that as many as 30-40 proofs may exist of the 1856 dime. The fields on this piece are exceptionally deep and reflective, making cameo contrast even more evident against the frosted devices. The centers are nearly brilliant, but the margins display rich reddish patina around each side. This is the finest of only three Cameo 1856 dimes certified by PCGS (1/16).

**Quarter PR67 Cameo Secure. CAC. Upright 5. Briggs 10-H.** There may have been as many as 100 proof quarters struck in 1856. A surprisingly high percentage of proofs have survived with an estimated 75+ pieces believed known today. This is a radiant Cameo example with extraordinarily deep, mirrored fields and sharply contrasting frosted devices. The interior of each side is brilliant and surrounded by blue-golden color around the margins. A number of interesting die polishing marks are seen in the fields on both sides, the most interesting located above the eagle's right (facing) wing. This piece is far and away the finest Cameo certified as well as non-Cameo of this date by PCGS.

**Half Dollar PR66 Cameo Secure. CAC.** The 1856 proof half dollar is a remarkably rare coin. There are no reliable estimates of the number struck, but perhaps as many as 20-25 pieces exist today in all grades. This example is tied for finest certified at PCGS (1/16). The fields are glassy-smooth and moderate mint frost over the devices provides the contrast necessary for the Cameo designation. As with the Flying Eagle cent, three cent silver, and half dime in this set, this piece also has faint streaks of golden-rose across the interior of each side. The margins display light golden and blue patina. Like the other coins in this remarkable proof set, problem-free.

**Seated Dollar PR66+ Cameo Secure. Gold CAC.** What a remarkable coin. Pre-1858 proof coins are seldom encountered in any grade. This is the largest silver coin struck, in the highest grade obtainable at PCGS, and with a gold CAC sticker. For many, that is all they need to know. But there is more. Of the estimated 50-75 proofs believed known of this date, this is the finest certified by PCGS. The flashy proof fields set up a "black" background for the obviously frosted devices. Each side is golden-toned, more speckled in the centers and more solidly colored at the margins. Of special interest, though, is a long, perfectly straight graver's line that runs from the obverse rim *under* star 6 through the field, and into the opposite rim (faintly). We have never seen this previously and cannot imagine why the Coiner would trace a perfectly straight line across the obverse die. So, we not only have a coin of unparalleled quality at PCGS, but a proof worthy of study by an advanced numismatist. *Selections from The Bob R. Simpson Collection.* (Total: 9 coins)

Snow-9, Obverse Clashed With  
Seated Liberty Half

# SESSION TWO

## COLONIALS

- 3501** 1760 Hibernia-Voce Populi Halfpenny MS62 Brown PCGS. N. 4, Z. 2-A, W-1382X, R.1. A charming mahogany-brown example. The centers are incompletely brought up and retain the granular texture of the flan prior to the strike. An intermediate die state with moderate crumbling on POPULI. Certified in a green label holder. Listed on page 49 of the 2016 *Guide Book*. Population: 12 in 62 Brown, 18 finer (12/15). NGC ID# 2AUC, PCGS# 262

### 1788 Connecticut Copper, AU55+ Mailed Bust Left, M. 7-F.2

- 3502** 1788 Connecticut Copper, Mailed Bust Left AU55+ PCGS. M. 7-F.2, W-4485, R.6. A splendid chocolate-brown state copper. Evenly struck with minimal wear. Essentially unabraded and carbon-free, and planchet imperfections are limited to a minor clip (flan cutting error) at 9:30 and a flake out of the unstruck portion of the reverse at 4:30. Struck 15% off center toward 1:30, which affects the tops of several letters but allows a full date. A rare die marriage, and the sole pairing for reverse F.2. Miller 11-G is the usually encountered 1788 Mailed Bust Left variety. Listed on page 62 of the 2016 *Guide Book*. NGC ID# 2B3B, PCGS# 403

- 3503** 1789 Mott Token, Thin Planchet, Plain Edge MS63 Brown NGC. Breen-1021, Rulau-E-NY-611. An unmarked and coruscating medium to deep brown example. The late die state with a buckled central obverse, a large break from the upper left clock corner, and soft definition on the central reverse. A small curved clip is noted at 2:30, as made. Although dated 1789, the Mott token was likely issued during the Hard Times era. Listed on page 74 of the 2016 *Guide Book*. NGC ID# 2B5L, PCGS# 604

## HALF CENTS

- 3504** 1833 C-1, B-1, R.1, MS64 Red and Brown PCGS. CAC. Manley Die State 2.0. Brick-red outlines design elements. The open fields and high points are gunmetal-gray. A coruscating and well struck near-Gem that shows only trivial contact. A minor gray spot is relegated to the reverse exergue. Our EAC grade MS63. NGC ID# 4FRS, PCGS# 35283 Base PCGS# 1163
- 3505** 1833 C-1, B-1, R.1, MS64 Red and Brown PCGS. CAC. Manley Die State 2.0. A Choice Classic type coin that boasts a crisp strike and extensive orange-red color. Liberty's cheek and the central reverse field are brown, and a few minor spots are relegated to the lower left reverse. Contact is absent save for a small tick on the chin. Our EAC grade MS63. NGC ID# 4FRS, PCGS# 35283 Base PCGS# 1163
- 3506** 1853 C-1, B-1, R.1, MS66 Brown NGC. Rich tan-brown toning encompasses all but the obverse margin, which retains hints of brick-red. Fully struck and satiny with excellent eye appeal. Contact is confined to a solitary minute field tick near star 12. Our EAC grade MS62. NGC ID# 26YX, PCGS# 35327 Base PCGS# 1227

- 3507** 1854 C-1, B-1, R.1, MS65 Brown PCGS. CAC. Deep walnut-brown toning dominates this fully struck Gem, although glimpses of faded red accompany design crevices. Both sides are essentially mark-free. An original and desirable type representative. Our EAC grade MS60. NGC ID# 26YY, PCGS# 35330 Base PCGS# 1230

- 3508** 1855 C-1, B-1, R.1, MS64 Red PCGS. This fire-red Choice half cent shows only a hint of mellowing toward steel-gray. The dentils are lightly brought up, but the remainder of the design is crisp. The surfaces are smooth aside from a hair-thin vertical mark on the field near the profile. Our EAC grade MS64. Population: 3 in 64 (1 in 64+) Red, 2 finer (12/15).  
Ex: *New York Signature (Heritage, 10/2015)*, lot 3735. NGC ID# 26YZ, PCGS# 35335 Base PCGS# 1235

## LARGE CENTS

### 1793 Chain Cent, Fine Details AMERICA, S-2

- 3509** 1793 Chain, AMERICA, S-2, B-2, High R.4 — Mount Removed — PCGS Genuine. Fine Details. A nicely defined example with readable legends and no noticeable abrasions. The surfaces exhibit even moderate granularity, and appear recolored in mahogany and sea-green shades. The edge appears discolored and smoothed near 12 and 6 o'clock, where the cent was formerly mounted. Nonetheless, an opportunity to acquire a fairly sharp Chain cent at an affordable price. Our EAC grade Good 4. NGC ID# 223F, PCGS# 35435 Base PCGS# 1341

### 1794 Liberty Cap Cent, XF40 Head of 1794, S-51

- 3510** 1794 Head of 1794, S-51, B-42, Low R.5, XF40 PCGS. Breen Die State III, with prominent die cracks through the date. This die state is called very rare by Breen. This impressive chocolate-brown specimen shows only light wear on the design elements and the surfaces appear quite smooth to the naked eye. The dentils are weak on the right side of the reverse, and the legend on that side is a little soft. Our EAC grade VF25. NGC ID# 223P, PCGS# 35615 Base PCGS# 901374

**1794 Head of 1794 Cent, VF30  
S-65, Later Die State**

**3511** 1794 Head of 1794, S-65, B-51, R.1, VF30 NGC. Breen Die State VII. The Shielded Hair variety, also attributable in the present die state by the linear breaks near the second S in STATES, the final A in AMERICA, and the 1 and 9 in the date. An attractive deep brown cent with minimally abraded and only mildly granular surfaces. Our EAC grade Fine 15. NGC ID# 223P, PCGS# 35654 Base PCGS# 901374

**3512** 1796 Reverse of 1794, S-101, B-25, Low R.5, Fine 12 PCGS. Breen Die State II. A walnut-brown cent with generally unmarked surfaces and minor granularity on the field above the bust tip. Liberty's shoulder shows wear but ample hair detail remains. A very scarce Sheldon marriage. Our EAC grade VG8. NGC ID# 223W, PCGS# 35783 Base PCGS# 1404

**1797 S-139 Cent, AU Details  
Reverse of 1797, Stems  
Uncentered Broadstrike**

**3513** 1797 Reverse of 1797, Stems, S-139, B-21, R.1 — Broadstruck, Environmental Damage — PCGS Genuine. AU Details. Breen Die State II. This richly detailed Draped Bust cent appears struck approximately 10% off center toward 9:30. The PCGS holder states it is a broadstrike. The medium brown surfaces lack abrasions but show granularity on the left obverse field and the reverse near D, AT, NE, and ERL. Our EAC grade Fine 15. NGC ID# 2242, PCGS# 35948 Base PCGS# 1422

**1801 S-213, B-1 Cent, AU53  
Near-Census Quality**

**3514** 1801 S-213, B-1, R.2, AU53 PCGS. Breen Die State V, or intermediate between Die State V and VI. Heavily double-clashed from LIBER below UN and the fraction. A series of bold, parallel die cracks slant down in the right obverse field, with weakening at RTY most visible at the Y. The medium-brown surfaces are smooth and attractive, with nice definition on the motifs and only minor, small marks. Relatively few S-213 examples are finer. Our EAC grade VF30. NGC ID# 224B, PCGS# 36236 Base PCGS# 1458

**1802 S-232 Cent, Choice AU  
Late Die State, Reverse Cud**

**3515** 1802 S-232, B-12, R.1, AU55 PCGS. Breen Die State VI-VII. A late die state with a large cud over the AT in STATES. A well-defined medium brown example that shows pleasing, problem-free surfaces. Liberty's cheek and shoulder exhibit moderate wear, appropriate for the grade. Our EAC grade VF30. S-232 Population: 2 in 55, 4 finer (12/15). NGC ID# 224E, PCGS# 36305 Base PCGS# 1470

**3516** 1807 Comet, S-271, B-1, R.1 — Environmental Damage — PCGS Genuine. AU Details. Breen Die State V. The "comet" above the hair ribbon is well advanced. The deep walnut-brown surfaces are evenly granular and free from apparent abrasions. Liberty's hair displays impressive definition. A popular *Guide Book* variety. Our EAC grade Fine 15. NGC ID# 224M, PCGS# 36454 Base PCGS# 1531

**3517** 1808 S-277, B-1, R.2, VF30 NGC. Breen Die State IV. Multiply clashed within the wreath, and a die crack crosses the upper left reverse. The obverse is medium brown and the reverse is primarily mahogany-brown. This nicely detailed Classic cent is attractive despite field granularity near star 7. Our EAC grade Fine 12. NGC ID# 224P, PCGS# 36457 Base PCGS# 1543

**3518** 1808 S-279, B-3, R.1, VF30 PCGS. Breen Die State II with the right-side stars drawn to the rim. A problem-free midgrade representative of the conditionally elusive Classic type. The medium brown surfaces are minimally marked. Our EAC grade Fine 15. NGC ID# 224P, PCGS# 36463 Base PCGS# 1543

**3519** 1808 S-279, B-3, R.1, VF35 PCGS. An attractive two-toned specimen with deep steel fields and lighter gray-brown devices. Minor handling marks and microscopic surface roughness were of no concern to the grading service. Our EAC grade VF20. Ex: *FUN Signature (Heritage, 1/2012)*, lot 4095, which brought \$2,070. NGC ID# 224P, PCGS# 36463 Base PCGS# 1543

**3520 1810/09 S-281, B-1, R.1 — Scratch — PCGS Genuine. AU Details.** Breen Die State II. A thin straight diagonal mark on the upper obverse explains the PCGS designation. Otherwise, a charming and briefly circulated olive and golden-brown example of the popular 1810 overdate. A lens displays a cluster of small spots near the F in OF. Our EAC grade Fine 12. NGC ID# 224T, PCGS# 36469 Base PCGS# 1552

**3521 1820 Large Date, N-13, R.1, MS64 Brown NGC.** Bold die cracks through the date and stars identify the Randall Hoard N-13 marriage. This deep brown Choice cent is unabraded and nicely struck. A hint of granularity is localized to the date area. Our EAC grade AU50. NGC ID# 2256, PCGS# 36673 Base PCGS# 1615

**3522 1822 N-4, R.2, MS62 Brown PCGS. CAC.** A splendid golden-brown Matron Head cent. Lustrous and lightly marked with hints of steel-gray toning on the high points. Star 1 is much closer to the date than star 13, the identifying characteristic of Newcomb-4. Our EAC grade AU55. NGC ID# 2259, PCGS# 36721 Base PCGS# 1624

**3523 1823 Restrike, N-3, R.2, AU58 PCGS.** The late die state with bisecting cracks above ONE and across the portrait. The medium brown surfaces display narrow strike-throughs near ICA and below the wreath stem. Privately struck circa-1860 from broken and rusted dies sold by the Mint as scrap metal. The obverse die of 1823 N-2 is paired with the reverse die of 1813 S-293. Our EAC grade AU50. NGC ID# 225C, PCGS# 81627

**3524 1835 Head of 1836, N-17, R.1, MS64 Brown PCGS.** The late, rusted die state of N-7. A deep brown near-Gem with glimpses of lighter mahogany toning in reverse design crevices. Lustrous and devoid of contact with a small planchet flaw (as made) near the E in ONE. Certified in a first-generation holder. Our EAC grade MS60. PCGS# 37057 Base PCGS# 1714

**3525 1845 N-13, R.2, MS63 Red and Brown PCGS.** Fire-red is plentiful, particularly on the reverse, although the portrait and obverse field are steel-gray. Well struck and satiny with minor carbon near the date and moderate strike-throughs near star 11. Our EAC grade MS60. PCGS# 405792 Base PCGS# 1863

**3526 1850 N-10, R.2, MS65+ Brown PCGS. CAC.** Grellman Die State c. The late state of N-21 with cuds at 12 o'clock and 1:30 on the reverse. Fire-red and apple-green toning enriches this lustrous and virtually unmarked Gem. Incidental carbon is all that limits the grade. Our EAC grade MS60. NGC ID# 226G, PCGS# 405910 Base PCGS# 1889

**3527 1851 N-2, R.1, MS66 Brown PCGS. CAC.** Grellman Die State a. A golden-brown Premium Gem with apple-green accents and potent cartwheel luster. Virtually void of either contact or carbon. The strike is precise on the major devices although portions of the dentils show softness. Our EAC grade MS62. NGC ID# 226H, PCGS# 406650 Base PCGS# 1892

**3528 1852 N-15, R.3, MS66 Red and Brown NGC.** Grellman Die State c. A nicely struck fire-red, sea-green, and steel-gray Premium Gem. Pristine save for a small spot between the RI in AMERICA. Die lines near the Y in LIBERTY and a tiny lump atop Liberty's throat are the pick-up points for both N-15 and N-24. N-15 is confirmed by the lump on the left base of the N in ONE. Our EAC grade MS63. PCGS# 147267 Base PCGS# 1899

**3529 1853 N-10, R.1, MS66 Brown NGC. CAC.** Grellman Die State b. Considerable mint red is present, especially on the reverse, though the open fields and motifs are toned brown. Unabraded save for minor contact on the nose, and relevant carbon is confined to the C in CENT. Our EAC grade MS62.  
*Ex: Dallas Signature (Heritage, 10/2012), lot 3142, which realized \$1,292.50. NGC ID# 226K, PCGS# 406003 Base PCGS# 1901*

## 1855 Upright 55 Cent, N-4, MS65 Red Attractive Hoard Coin

**3530 1855 Upright 55, N-4, R.1, MS65 Red PCGS.** Grellman Die State a. The small die lumps on the jawline attribute the available N-4 variety. The surfaces are largely pumpkin-orange with occasional glints of brown on the high points, still well within the Red designation and showing only a few minor flecks. An attractive example of this hoard coin variety. Our EAC grade MS64. Population: 3 in 65 (1 in 65+) Red, 1 finer (1/16). PCGS# 406155 Base PCGS# 1909

## FLYING EAGLE CENTS

**3531 1857 MS64 NGC.** An olive-green and apricot-gold Choice cent. Coruscating luster sweeps mark-free surfaces. Each side displays a few minor tan freckles. The strike is good despite blending on the back of the tail and the right-side cotton leaves of the wreath. NGC ID# 2276, PCGS# 2016

**3532 1857 MS64 NGC.** This orange-red near-Gem is sharply struck, since only the lower leaf cotton leaf shows any signs of weakness. Nearly free from contact, and only minor gray freckles on the upper reverse field stand in the way of an even higher grade. NGC ID# 2276, PCGS# 2016

**3533 1857 MS64 PCGS. CAC. Snow-14.** UNITED STATES OF AMERICA is lightly die doubled clockwise. Die crumbling on ED S allows prompt attribution. Lustrous and nicely struck with dusky sea-green, pumpkin-gold, and lavender toning. Smooth aside from unobtrusive contact on the O in ONE. NGC ID# 2276, PCGS# 2016

**1857 Flying Eagle Cent, Snow-9, FS-402  
Obverse Die Clashed With  
Seated Liberty Half Obverse Die, MS64**

- 3534 1857 Obverse Die Clash with Seated Half, Snow-9, FS-402, MS64 PCGS. CAC.** The obverse die for a Flying Eagle cent clashed with that of a Liberty Seated half dollar, head-to-head, when the dies were being changed from half dollars to cents, according to researcher Chris Pilliod (as quoted from *Cherrypickers*):

"In the process, the press was cycled through once and clashed the half dollar obverse dies with the cent obverse die. Why are the dies head-to-head? Chris has shown through die cud research that the Flying Eagle dies were installed in the press with the obverse die in the anvil (lower) position, while Liberty Seated half dollars had their obverse die in the hammer (upper) position."

This piece shows the diagnostic bold retained cud, a clash from the right (facing) edge of Liberty's downstretched right arm, at the extreme right rim of the cent; remnants of Liberty's upstretched other hand, holding the Liberty pole and cap, appear under ST(ATES). Generous luster and eye appeal are present in abundance on this no-problem, fascinating cent. Population: 11 in 64 (1 in 64+), 5 finer (1/16). NGC ID# 2276, PCGS# 37375

- 3535 1857 Reverse Die Clash with Seated Quarter, Snow-8, FS-901, MS64 PCGS.** Ex: Fivaz. The field near ONE exhibits clash marks that correspond to the neck and upper left wing of the eagle from a Seated Liberty quarter. Coins struck from the corresponding quarter die, bearing cent clash marks, are known and one is in the present auction. A well struck, smooth, and lustrous peach-gold and olive-gray near-Gem. FS-901 Population: 2 in 64, 2 finer (1/16). NGC ID# 2276, PCGS# 37377

- 3536 1858 Large Letters MS64 PCGS. Snow-15.** STATES OF AMERICA is lightly die doubled toward the rim. High Leaves, Close E. Well struck for the type, as only the claw and the upper right wreath show incomplete definition. A lustrous golden-brown near-Gem with a small strike-through (as issued) near the 1 in the date. Ex: *Baltimore Signature (Heritage, 7/2003)*, lot 5232, which realized \$1,092.50. NGC ID# 2277, PCGS# 2019

- 3537 1858 Small Letters MS64 PCGS. CAC.** Low Leaves Reverse. Closed E in ONE. A fully struck and lustrous Choice cent. Sun-gold, peach, and lime-green shades further ensure the eye appeal. Smooth aside from minor marks near the ON in ONE. NGC ID# 2279, PCGS# 2020

**1858/7 Cent, Borderline Uncirculated  
Snow-1, FS-301, Guide Book Overdate**

- 3538 1858/7 Large Letters, Snow-1, FS-301, AU58 PCGS. CAC.** Eagle Eye Photo Seal, card not included. High Leaves reverse. Closed E in ONE. The tell-tale corner of an underdigit 7 is apparent northeast of the second 8 in the date. Other diagnostics of the *Guide Book* overdate include a broken wingtip and a small die lump above the first 8 in the date. A momentarily circulated walnut-brown example with smooth, satiny surfaces. NGC ID# 2277, PCGS# 37383 Base PCGS# 2022

**INDIAN CENTS**

- 3539 1859 MS64 PCGS. CAC.** The pleasing, lightly marked surfaces of this attractive Choice example have mellowed to light brown in most areas, but flashes of original red still linger at the peripheries, with vibrant mint luster and well-detailed design elements under the patina. NGC ID# 227E, PCGS# 2052

- 3540 1859 MS65 PCGS.** Razor-sharp definition shows on the feather tips and diamonds and the lightly toned surfaces of this attractive Gem show only the most insignificant signs of contact. PCGS has graded 27 numerically finer examples (1/16). NGC ID# 227E, PCGS# 2052

- 3541 1864 Copper-Nickel MS65 PCGS.** A delightful Gem representative struck in the old copper-nickel composition, with sharply detailed design elements and vibrant mint luster on both sides. PCGS has graded 26 numerically finer examples (12/15). NGC ID# 227K, PCGS# 2070

- 3542 1864 Copper-Nickel MS65 PCGS. CAC.** A peach-gold and olive-green Gem. Sharply struck and unmarked with vibrant luster and minor carbon. A heavy die crack affects the upper right reverse. A Snow-unlisted variety that shows the base of the 4 in the date repunched west. The 6 displays "extra metal" and is possibly repunched. NGC ID# 227K, PCGS# 2070

**1864 Copper-Nickel Cent, MS66  
Only One Coin Finer**

- 3543 1864 Copper-Nickel MS66 PCGS. CAC.** Ex: Perfection 1. The 1864 is the final copper-nickel Indian cent issue, and it is significantly scarcer in high grade than the immediately preceding date. This Premium Gem example is conditionally rare, and finer pieces are almost unknown. CAC has only green-stickered nine pieces in this grade and none finer. The present representative is boldly struck with satiny bronze-gold luster. Hints of peach and rose emerge from the fields when rotated in-hand. Population: 25 in 66 (2 in 66+), 1 finer (12/15).  
*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 227K, PCGS# 2070

- 3544 1867 MS65 Red and Brown PCGS. CAC.** The lustrous, well-preserved surfaces of this attractive Gem show a blend of original red and light brown patina, with well-detailed design elements and outstanding eye appeal. Population: 65 in 65 (1 in 65+) Red and Brown, 1 finer (1/16). NGC ID# 227R, PCGS# 2089

- 3545 1869/69 Snow-3g, FS-301, AU58 PCGS.** A popular *Guide Book* variety. The 69 in the date is repunched north. The blundered date obverse die was paired with eight different reverses. Snow-3g is attributed by a small spur from the E in CENT. This deep brown example is void of marks and displays traces of translucent residue on the reverse. NGC ID# 227T, PCGS# 37474 Base PCGS# 2094

- 3546 1869/69 Snow-4, FS-303, MS62+ Brown PCGS. CAC.** The 69 in the date is repunched on this popular *Cherry-pickers'* variety. The present Mint State coin displays a bold strike with tinges of coppery-orange luster emerging from beneath burgundy-brown toning. There are no significant abrasions. PCGS# 148716 Base PCGS# 2094

- 3547 1869/69 Snow-4, FS-303, MS64 Red and Brown PCGS.** The repunching is similar to the popular *Guide Book* FS-301 variety, but the date is placed differently, with the flag of the 1 partly west of the bust point. The apricot-gold surfaces are lustrous and mark-free. A minor strike-through is noted below the obverse ribbon end. PCGS# 148717 Base PCGS# 2095

**1873 Indian Cent, Snow-1, XF40  
Dramatic Doubled LIBERTY**

- 3548 1873 Doubled LIBERTY, Snow-1, FS-101, XF40 PCGS. CAC.** To series specialists the Snow-1 variety needs no further identifier than the widely, and wildly, doubled LIBERTY. This XF example features evenly worn nut-brown surfaces with no major distractions, although the 7 in the date is softly struck up. A bit of buildup shows in some of the reverse devices, consistent with the grade and this coin's original surfaces. For the doubled LIBERTY and FS-101 combined, PCGS reports 19 in 40 and 89 finer. CAC narrows down the number, however, to five in XF40 and only four Brown examples finer, plus one MS63 Red and Brown (1/16). NGC ID# 227X, PCGS# 37504 Base PCGS# 2115

- 3549 1877 XF45 NGC.** The 1877 Indian cent is the most sought-after issue of the series, due to its low mintage of 852,500 pieces. This Choice XF specimen shows some wear on the ribbon end, but most interior detail remains intact and the pleasing brown surfaces are lightly abraded. NGC ID# 2284, PCGS# 2127

- 3550 1877 XF45 NGC.** A Choice XF example of this low-mintage key, with medium brown surfaces that show a scattering of minor abrasions on both sides. Light wear shows on the design elements, but much interior detail remains intact. NGC ID# 2284, PCGS# 2127

- 3551 1881 MS65 Red PCGS. CAC.** Ex: Perfection 1. With a mintage of more than 39 million pieces, the dies were often overused and eroded, yet this Gem example displays exceptional surface quality with excellent copper-red coloration. Mint luster radiates from angle of the sharply struck, essentially mark-free surfaces. PCGS reports just 29 Red pieces in higher numerical grade, and of the MS65 Red coins certified by both services combined, only three examples have received CAC endorsement (1/16).  
*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 2288, PCGS# 2141

- 3552 1884 MS66 Red and Brown PCGS. CAC.** The well-preserved, mostly red surfaces of this attractive Premium Gem show a few highlights of lilac and light brown toning, with vibrant mint luster on both sides. The design elements are razor-sharp and eye appeal is outstanding. Population: 5 in 66 Red and Brown, 0 finer (1/16). NGC ID# 228B, PCGS# 2149

- 3553 1884 MS65 Red NGC.** Sharply detailed in most areas, this attractive Gem shows just a touch of softness on the ribbon and lower hair strands. The well-preserved red surfaces radiate vibrant mint luster throughout. Census: 23 in 65 Red, 7 finer (11/15). NGC ID# 228B, PCGS# 2150

- 3554 1885 MS65 Red PCGS. CAC.** Ex: Perfection 1. A spectacular Gem, with sharply detailed design elements and vibrant mint luster on both sides. The original red surfaces show no mentionable distractions. Only six coins have been verified by CAC in MS65 Red, with a single specimen finer (1/16). Population: 73 in 65 (1 in 65+) Red, 17 finer (1/16).  
*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 228C, PCGS# 2153

- 3555 1891 MS65 Red PCGS. CAC.** Ex: Perfection 1. This sharply detailed Gem displays well-preserved original red surfaces with vibrant mint luster throughout. Only six examples have been verified by CAC in MS65 Red, with one finer (1/16). Population: 72 in 65 (1 in 65+) Red, 11 finer (1/16).  
*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 228K, PCGS# 2180

**3556 1894 MS65+ Red PCGS.** This high-end Gem displays original red surfaces with satiny mint luster and no mentionable distractions. The design elements are well-detailed and overall visual appeal is outstanding. Population: 77 in 65 (3 in 65+) Red, 32 finer (1/16). NGC ID# 228N, PCGS# 2189

**3557 1902 MS66 Red PCGS.** This impressive Premium Gem displays original red surfaces with a few hints of crimson and no mentionable distractions. The design elements are sharply rendered and frosty mint luster adds to the considerable eye appeal. Population: 55 in 66 (5 in 66+) Red, 11 finer (1/16). NGC ID# 228X, PCGS# 2213

#### 1905 Indian Cent, MS66 Red Vibrant, Original Mint Color

**3558 1905 MS66 Red PCGS. CAC.** Ex: Perfection 1. This delightful Premium Gem offers sharply detailed design elements and impeccably preserved original red surfaces with vibrant mint luster on both sides. Only 10 examples have been verified by CAC in MS65 Red, with none finer (1/16). Population: 58 in 66 (6 in 66+) Red, 1 finer (1/16).  
*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 2292, PCGS# 2222

**3559 1907 MS66 Red PCGS. CAC.** Ex: Perfection 1. Highly lustrous, natural peach-red toning blankets both sides of this frosty cent. The 1907 is challenging in high technical grades, as shown by the scant certified population and the few CAC-endorsed examples. This sharply struck piece deservedly earns both the Premium Gem and CAC recognition. A small planchet irregularity is noted in the dentils above R and I of AMERICA. Just two coins carry the CAC endorsement in MS66 Red, with one finer in MS67. PCGS population: 33 in 66 (1 in 66+) Red, 5 finer (1/16).  
*From The Perfection 1 & 2 Collections, Part 2.* NGC ID# 2294, PCGS# 2228

**3560 1908 MS66 Red PCGS.** A beautiful peach-red type coin. Hints of sea-green visit lustrous and unabraded surfaces. Pinpoint carbon is all that limits the grade. Encapsulated in a green label holder. Population: 68 in 66 (5 in 66+) Red, 1 finer (1/16). NGC ID# 2295, PCGS# 2231

**3561 1908-S MS64 Red PCGS.** A sharply detailed Choice specimen of this late series issue, with lustrous original red surfaces that show a few microscopic specks of carbon. From a smallish mintage of 1.1 million pieces. NGC ID# 2296, PCGS# 2234

#### 1908-S Cent, MS66 Red

**3562 1908-S MS66 Red PCGS. CAC.** The first branch mint cent issue, the 1908-S has a tiny mintage relative to, for example, the 1907. Fortunately for today's collectors, hundreds of examples have survived in Uncirculated grades, although full Red Premium Gems are very scarce. This apricot-gold and olive-green cent has a bold strike and appears void of contact. Both sides exhibit only inconsequential carbon. Population: 46 in 66 (1 in 66+) Red, 1 finer (1/16). NGC ID# 2296, PCGS# 2234

**3563 1909 MS66 Red PCGS.** This attractive final-year Premium Gem offers well-detailed design elements and impeccably preserved original red surfaces with vibrant mint luster on both sides. PCGS has graded 11 numerically finer examples(1/16). NGC ID# 2297, PCGS# 2237

### PROOF INDIAN CENTS

**3564 1863 PR64+ Cameo NGC. CAC.** A high-end Choice specimen from an extremely low Civil War proof mintage of 370 pieces, this coin exhibits razor-sharp definition on all design elements and the deeply mirrored fields contrast nicely with the frosty devices. Census: 10 in 64+ Cameo, 20 finer (11/15). NGC ID# 26SX, PCGS# 82262

**3565 1864 Copper Nickel PR64 Cameo NGC. CAC.** Gorgeous golden-orange surfaces reveal bold field-motif contrast throughout this Choice Cameo proof, one of an estimated 370 proof Indian Head cents struck in 1864. Light ticks on the cheek limit the grade, but the eye appeal remains simply outstanding, as affirmed by the CAC approval sticker. Census: 10 in 64 Cameo, 19 finer (11/15). NGC ID# 229E, PCGS# 82265

#### 1864 Indian Cent, PR65 Cameo Elusive Copper-Nickel Proof

**3566 1864 Copper Nickel PR65 Cameo PCGS.** The design elements of this spectacular Gem exhibit razor-sharp detail throughout and the frosty texture of the devices creates intense cameo contrast with the deeply mirrored fields. The copper-red surfaces are free of all but the most insignificant signs of contact, and eye appeal is terrific. Population: 30 in 65 (1 in 65+) Cameo, 7 finer (12/15). NGC ID# 229E, PCGS# 82265

**3567 1864 Bronze No L PR64 Brown PCGS. CAC.** Only 150 proof Indian cents were struck in 1864, making the issue scarce-to-rare in all grades. This well-detailed Choice example offers pleasing light brown surfaces, with hints of lilac and original red patina. Population: 16 in 64 Brown, 18 finer (1/16). NGC ID# 229F, PCGS# 2276

**3568 1865 PR64 Red PCGS. Snow-PR2.** The 1 in the date is lightly repunched north. A radiant orange-red specimen that boasts a full strike and undisturbed surfaces. A subtle obverse spot at 7 o'clock is the sole visible imperfection. NGC ID# 229H, PCGS# 2284

**3569 1866 Cameo PR65 Red and Brown NGC.** Gleaming fields highlight modestly contrasted devices on this Gem proof 1866 cent, while the strike is fully rendered throughout. Rich bronze-gold and coppery-red hues render each side immensely eye-appealing. Census: 6 in 65 Red and Brown Cameo, 4 finer (1/16). NGC ID# 229J, PCGS# 82286

**1866 Cent, PR65 Red  
Intricately Impressed**

**3570 1866 PR65 Red NGC.** This Reconstruction-era Gem has peach-gold fields and olive high points. The lustrous surfaces are unabraded and exhibit only two minuscule flecks, on the 1 in UNITED and the top of the Indian's neck. Census: 8 in 65 Red, 3 finer (11/15). Ex: *Long Beach Signature* (Heritage, 2/2009), lot 337, which realized \$2,645. NGC ID# 229J, PCGS# 2287

**3571 1882 PR65+ Red PCGS.** Reflective fields and virtually flawless original red surfaces are the calling cards of this high-end Gem, with sharply detailed design elements throughout. Population: 19 in 65 (1 in 65+) Red, 20 finer (1/16). NGC ID# 22A3, PCGS# 2335

**1882 Indian Cent, PR65 Red  
Razor-Sharp Strike**

**3572 1882 PR65 Red PCGS. CAC. Ex: Perfection 2.** A delightful Gem, with razor-sharp definition on the feather tips and diamonds, and well-preserved original red surfaces that display deeply reflective fields. Only four coins have been verified by CAC in PR65 Red, with one finer (1/16). Population: 19 in 65 (1 in 65+) Red, 20 finer (1/16). From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 22A3, PCGS# 2335

**3573 1883 PR65 Red PCGS. CAC. Ex: Perfection 2.** Just 2,195 proofs were struck, and the scarcity of 1893 Gem Red proofs seems undervalued. This vivid and reflective Red proof is fully struck with a few microscopic carbon flecks but no strike-throughs or other distractions often seen, since the 1893 issue was struck from recoinced cents and two-cent pieces. This is the sole CAC-endorsed Red proof at the MS65 level, with five others in higher grades with CAC approval. PCGS population: 17 in 65 Red, 6 finer (1/16). From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 22A4, PCGS# 2338

**1890 Indian Cent, PR65+ Red and Brown  
Purple Toning Highlights**

**3574 1890 PR65+ Red and Brown PCGS. CAC. Ex: Perfection 2.** A delightful Red and Brown proof, high-end for the Gem grade as confirmed by the PCGS Plus designation and CAC endorsement. A blush of royal purple toning highlights the portrait, while variegated copper-red hues flow across the reflective proof surfaces. This piece is hallmarked by a small planchet void between the 8 and 9 of the date. A dozen Gem or finer 1890 proof cents in Red and Brown have received CAC confirmation, yet only this single example with the PCGS Plus designation. Population: 35 in 65 (1 in 65+) Red and Brown, 5 finer (1/16). From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 22AC, PCGS# 2358

**1892 Cent, PR65 ★ Red  
Vivid Multicolor Toning**

**3575 1892 PR65 ★ Red NGC.** Remarkable bands of cherry-red and apple-green frame lemon-gold centers. This well struck and unmarked Gem exhibits outstanding eye appeal, and will be a show-stopper at any exhibition. As of (1/16), NGC has bestowed the Star designation on only two proof 1892 Indian cents. NGC ID# 22AE, PCGS# 2365

**3576 1893 PR66 Red and Brown PCGS. CAC.** The impeccably preserved, mostly red surfaces of this delightful Premium Gem have mellowed to light brown in a few areas, and the fields are deeply reflective. The design elements are sharply detailed throughout. Population: 10 in 66 Red and Brown, 1 finer (1/16). NGC ID# 22AF, PCGS# 2367

**3577 1895 PR66 Red and Brown PCGS. CAC.** The 1895 proof Indian cent is not an absolute rarity but this Premium Gem Red and Brown PCGS example is certainly a conditional rarity, one of 20 so graded with none finer (12/15). The surfaces are mostly red and show uniformly impeccable preservation and a razor-sharp strike. No carbon or other distractions are visible; on the contrary, this piece offers excellent eye appeal. CAC reports only four in this grade and none finer. NGC ID# 22AH, PCGS# 2373

**1900 Indian Cent, PR66 Red  
Resplendent Proof Surfaces**

- 3578 1900 PR66 Red PCGS. CAC.** Ex: Palm Beach Collection/Perfection 2. The devices are nicely frosted, set against reflective, blaze-red fields. The strike is razor sharp. A few minuscule carbon flecks require a glass, but they do not disturb the Premium Gem surfaces of this resplendent proof. Just three 1900 cents at the PR66 Red level have received CAC endorsement, along with a single finer example. PCGS population: 17 in 66 (1 in 66+) Red, 5 finer (1/16).  
From *The Perfection 1 & 2 Collections, Part 2*. NGC ID# 22AN, PCGS# 2389

**LINCOLN CENTS**

- 3579 1909-S VDB MS62 Brown NGC.** The medium brown surfaces of this first-year key show flashes of original red on the reverse and only minor signs of contact are evident. The design elements are sharply detailed and the designer's initials are bold. NGC ID# BYKW, PCGS# 2426
- 3580 1909-S VDB MS62 Brown NGC. CAC.** The lightly marked surfaces of this important series key show a mix of light brown and crimson patina, with a few traces of original red. The design elements are sharply detailed and a few hints of original mint luster shine through the toning. NGC ID# BYKW, PCGS# 2426
- 3581 1909-S VDB MS63 Red and Brown NGC.** An attractive Select specimen of this first-year key, with lightly marked, lustrous surfaces that show a mix of original red and light brown patina. The design elements are sharply detailed and the designer's initials are bold. NGC ID# 22B2, PCGS# 2427

**1909-S VDB Cent, Fiery MS65 Red**

- 3582 1909-S VDB MS65 Red PCGS.** The 1909-S VDB is the most sought-after regular issue of the Lincoln cent series. This delightful Gem is sharply detailed, showing bold initials and vibrant mint luster. The unmarked surfaces are fiery original red, with only a few microscopic specks of carbon visible on close inspection.  
Ex: *Summer FUN Signature* (Heritage, 7/2012), lot 3154, which brought \$4,888. NGC ID# 22B2, PCGS# 2428
- 3583 1909-S Lincoln MS65 Red PCGS. CAC.** Orange-red and jade-green intermingle across this precisely struck and lustrous first-year branch mint Gem. Marks are absent, and a loupe is required to locate infrequent pinpoint carbon. Housed in a green label holder. NGC ID# 22B4, PCGS# 2434

- 3584 1911 MS66 Red PCGS. CAC.** An exquisite orange-red Premium Gem. The strike is intricate and no marks are apparent. A lens locates only pinpoint carbon. CAC Population: 24 in 66 Red, 3 finer (1/16).  
Ex: *Connelly Collection* (Heritage, 9/2010), lot 3295, which realized \$1,610. NGC ID# 22B7, PCGS# 2443
- 3585 1911-S MS65 Red PCGS.** The 1911-S has always been a scarce date in all grades, but fully red Gems may be found with a bit of searching. This coin displays nicely struck design elements, with sharp detail showing in Lincoln's hair and beard and in the wheat stalks. The lustrous surfaces display reddish-orange patina with tan undertones. A somewhat streaky appearance is seen in the right obverse field. PCGS has certified only 13 Red pieces finer (12/15). NGC ID# 22B9, PCGS# 2449
- 3586 1912-D MS65 Red PCGS.** Bowers notes of the 1912-D, "gems with full original color and with sharply struck surfaces in all areas, including the borders, are rare." This MS65 Red offering meets those stringent standards, with just a trace of softness on ST in TRUST. Rarely seen finer. NGC ID# 22BB, PCGS# 2455
- 3587 1912-D MS65 Red PCGS. CAC.** Light copper-orange color dominates the eye appeal of this attractive Gem. The well-defined obverse displays beautifully, and both sides are minimally marked. Only a small flyspeck below the RI in AMERICA precludes an even finer designation. PCGS has graded just 20 finer Red representatives (9/09). NGC ID# 22BB, PCGS# 2455

**1912-S Cent, MS65 Red  
Semikey Lincoln Issue**

- 3588 1912-S MS65 Red PCGS.** Light copper-gold color shows occasional strawberry-cream accents on this 1912-S cent, an example better-defined than often seen for this San Francisco issue that was neglected in its day. Red Gems such as the present coin are significant in Registry Set collectors, as few survive finer. Population: 86 in 65 (8 in 65+) Red, 2 finer (1/16).  
Ex: *New York Signature* (Heritage, 2/2014), lot 3132. NGC ID# 22BC, PCGS# 2458
- 3589 1913-D MS65 Red PCGS.** A vibrant pumpkin-orange Gem with a blush of sea-green color near the bowtie. Lustrous and unabraded with only inconsequential carbon. The strike is crisp except on the O in ONE. Housed in a green label holder.  
Ex: *Dallas Signature* (Heritage, 4/2007), lot 243, which realized \$2,760. NGC ID# 22BE, PCGS# 2464

**1914-D Lincoln Cent, MS63 Red and Brown  
Deep, Variegated Coloration**

- 3590 1914-D MS63 Red and Brown ANACS.** The 1914-D has long been considered a key issue to the series with its tiny mintage of just over a million coins. This example has deep, variegated shades of pale green, brown, and muted red that cover each side in an unusual color scheme. The strike is complete and there are no mentionable surface flaws. NGC ID# 22BH, PCGS# 2472

**1914-D Cent, MS64 Red and Brown  
Rich Coloration**

- 3591 1914-D MS64 Red and Brown PCGS.** Rose, burgundy, amber, and coppery-orange hues blanket each side of this Choice Red and Brown example, while the satiny surfaces yield sharp design elements. The 1914-D is a key date in all grades but is genuinely scarce above MS64. This piece will please a plethora of interested collectors. NGC ID# 22BH, PCGS# 2472

**1914-S Lincoln Cent, MS65 Red  
Challenging Early Series Issue**

- 3592 1914-S MS65 Red PCGS.** Slightly faded Red on the obverse, brighter on the reverse. The surfaces are clean and lack the abrasions so often encountered on inferior coins. Fully struck on Lincoln's beard, the date and most of the motto, although slight weakness is found on the tops of WE. On the reverse the wheat ears and peripheral lettering are crisp. The 1914-S is a scarce issue in Gem condition. The early mintmarked Lincoln cents tend to be difficult to find and most present quite a challenge for the Registry collector. The present coin will certainly be on many want lists. Population: 37 in 65 Red, 3 finer (1/16).  
Ex: FUN Signature (Heritage, 1/2004), lot 4778; Kendall Marie #4 All-Time Finest PCGS Registry of Lincoln Cents with Varieties, Circulation Strikes, 1909-1958; Central States Signature (Heritage, 4/2006), lot 483. NGC ID# 22BJ, PCGS# 2476

- 3593 1915 MS66 Red PCGS.** The well-preserved original red surfaces of this impressive Premium Gem show just a few hints of light brown patina in selected areas, with satiny mint luster and sharply detailed design elements throughout. Population: 89 in 66 (2 in 66+) Red, 12 finer (1/16). NGC ID# 22BK, PCGS# 2479

- 3594 1916-D MS65 Red NGC.** A delightful Gem representative of this early series branch mint issue, with sharply detailed design elements and original red surfaces that show no mentionable distractions. Census: 13 in 65 Red, 4 finer (11/15). NGC ID# 22BP, PCGS# 2491

- 3595 1916-S MS64 Red PCGS. CAC.** Peach-red and straw-gold compete for territory across this nicely struck and lustrous Choice cent. No marks are apparent, and carbon is minimal. A retained lamination is noted above LIBERTY. Encapsulated in a green label holder. NGC ID# 22BR, PCGS# 2494

- 3596 1917-D MS66 Red and Brown PCGS. CAC.** The well-preserved surfaces of this remarkable Premium Gem show a mix of original red and olive-brown patina, with sharply detailed design elements and slightly subdued mint luster. Population: 2 in 66 Red and Brown, 0 finer (12/15). NGC ID# 22BT, PCGS# 2499

- 3597 1917-D MS65 Red NGC.** A sharply detailed Gem, with well-preserved original red surfaces that have mellowed to light brown in a few areas. No mentionable distractions are evident and original mint luster adds to the strong visual appeal. Census: 19 in 65 Red, 0 finer (11/15). NGC ID# 22BT, PCGS# 2500

**1918-D Gem Red Lincoln Cent  
One of Two Such With CAC Approval**

- 3598 1918-D MS65 Red PCGS. CAC.** Certified in a PCGS green-label holder with the CAC green approval sticker, this flashy Gem Red 1918-D cent offers blazing luster on golden-orange surfaces that deepen to fire-red on portions of the reverse. Both sides are virtually devoid of abrasions, and infrequent tiny toning flecks are undistracting. The 1918-D is quite elusive in this grade and seldom seen finer. Population: 30 in 65 (1 in 65+) Red, 8 finer. CAC: 2 in 65 Red, 0 finer (1/16).  
Ex: Long Beach Signature (Heritage, 9/2002), lot 5543; Dallas Signature (Heritage, 12/2004), lot 5274; Kendall Marie PCGS Registry Set (Heritage, 4/2006), lot 495; NGC ID# 22BW, PCGS# 2509

- 3599 1920-D MS65 Red PCGS.** An olive, rose, and gold Gem. Lustrous and lightly marked with a bold strike and minor carbon. Like other Denver issues from its decade, the 1920-D is scarce in full Red. Certified in a green label holder. Population: 103 in 65 (1 in 65+) Red, 7 finer (1/16). NGC ID# 22C4, PCGS# 2527

- 3600 1920-S MS65 Red and Brown PCGS. CAC.** Considerable orange luster remains on both sides of this Gem, exhibiting delicate blue overtones that enhance the overall aesthetic appearance. An above average strike for the issue increases its importance. Population: 25 in 65 (1 in 65+) Red and Brown, 1 finer (1/16). NGC ID# 2547, PCGS# 2529

- 3601 1920-S MS64 Red PCGS.** A coruscating, nicely struck, and unmarked early branch mint near-Gem. Generally orange-gold throughout, although high points display olive-green, the obverse field displays streaks of lime, and the area above the 0 in the date shows steel-blue color. In a green label holder. Population: 89 in 64 Red, 11 finer (1/16). NGC ID# 22C5, PCGS# 2530

- 3602 1920-S MS64 Red PCGS.** Scarce in Uncirculated grades, the 1920-S is an important collector coin in MS64 and with Red color. This piece displays a surprisingly strong, bright original color, and a few scattered (grade-limiting) spots scattered about. Population: 89 in 64 Red, 11 finer (1/16). NGC ID# 22C5, PCGS# 2530
- 3603 1921 MS66 Red PCGS.** Philadelphia Mint production of cents declined 87% in 1921 from the prior year, due to a Mint effort to replace Pittman Act melts with new silver dollars. This 1921 cent displays potent luster, a bold strike, and exemplary apricot-gold surfaces. In a green label holder. Population: 74 in 66 (4 in 66+) Red, 14 finer (1/16). NGC ID# 22C6, PCGS# 2533
- 3604 1921-S MS64 Red PCGS.** The original red surfaces of this attractive Choice example show a few streaks of light brown on the obverse, but the design elements are sharply detailed and few signs of contact are evident. Housed in a green label holder. Population: 87 in 64 Red, 18 finer (1/16). NGC ID# 22C7, PCGS# 2536
- 3605 1922-D MS65 Red NGC.** A peach-red and apricot-gold Gem with lustrous and essentially unabraded surfaces. A lens reveals incidental carbon. Full red 1922-D cents are surprisingly elusive. The Mint was busy striking silver dollars during 1922, and only the Denver facility struck cents that year. Certified in a prior generation holder. Census: 22 in 65 Red, 2 finer (11/15). NGC ID# 22C8, PCGS# 2539
- 3606 1924 MS66 Red PCGS.** Orange, rose-red, and sea-green enrich the obverse, while the reverse is sun-yellow with glimpses of ruby-red near the rim. Booming luster and undisturbed surfaces ensure the quality of this exactly impressed Premium Gem. Population: 80 in 66 (7 in 66+) Red, 9 finer (1/16). NGC ID# 22CC, PCGS# 2551
- 3607 1924 MS66 Red PCGS. CAC.** A blazing Red Premium Gem, this well-struck coin boasts CAC-recognized visual appeal and minimal abrasions. Although the 1924 is a common date in most grades (75 million coins struck), examples at this lofty level always generate significant interest among type and Registry enthusiasts. PCGS shows only nine submissions in higher numeric grades (12/15).  
*Ex: Dallas Signature (Heritage, 12/2004), lot 5294; Central States Signature (Heritage, 4/2006), lot 509. NGC ID# 22CC, PCGS# 2551*
- 3608 1924-S MS64 Red PCGS.** The present lustrous near-Gem is well struck, although the obverse die was late-in-life with incomplete definition on the portrait. Marks are virtually absent. The orange-gold surfaces show moderate mellowing on the reverse. Population: 85 in 64 (1 in 64+) Red, 9 finer (1/16). NGC ID# 22CE, PCGS# 2557

**1925-D Cent, Fresh MS65 Red  
Important Registry Set Coin**

- 3609 1925-D MS65 Red PCGS.** The surfaces are surprisingly fresh with a mix of pale copper-gold and richer peach shadings, the deepest hues concentrated on the inner reverse. The portrait side is minimally marked, although a shallow cut affects the top of the O and the middle of the N in ONE. Population: 60 in 65 Red, 2 finer (1/16).  
*Ex: New York Signature (Heritage, 2/2014), lot 3151. NGC ID# 22CG, PCGS# 2563*

- 3610 1925-S MS64 Red PCGS.** An orange-red and olive-gray Choice representative. Free from marks, and flecks are relegated to the reverse exergue. The 1925-S ranks among the most challenging Lincoln issues to secure in full Red. Encapsulated in a green label holder. Population: 57 in 64 (1 in 64+) Red, 10 finer (1/16). NGC ID# 22CH, PCGS# 2566
- 3611 1926-D MS65 Red PCGS.** This lustrous Gem is predominantly peach-red, although each side displays a wisp of olive-green. The strike is bold and no marks are perceptible. Carbon is minuscule save for a fleck inside the O in ONE. Encapsulated in an old green label holder. Population: 52 in 65 Red, 4 finer (1/16). NGC ID# 22CK, PCGS# 2572
- 3612 1927 MS67 Red PCGS.** Among the finest certified, this Superb Gem Red 1927 Lincoln cent is an ideal choice for the Registry Set enthusiast. The devices are bold, and the preservation is exceptional. Warm coppery-orange luster blankets each side. Population: 46 in 67 (2 in 67+) Red, 0 finer (1/16). NGC ID# 22CM, PCGS# 2578
- 3613 1927-S MS65 Red and Brown PCGS.** The well-preserved surfaces of this impressive Gem display a mix of original red and light brown patina, with sharply detailed design elements and bright luster, under the toning. Population: 7 in 65 (1 in 65+) Red and Brown, 0 finer (1/16). NGC ID# 22CP, PCGS# 2583

**1928-S Cent, Elusive MS65 Red  
Seldom Seen Finer**

- 3614 1928-S MS65 Red PCGS.** Flame-red surfaces show brilliant luster and few marks of any import, although one small brownish fleck appears in the left obverse field. The strike is nicely brought up throughout both sides, including on the sometimes-weak O of ONE CENT. A search for a finer example would entail a long hunt. The last example we offered in this exact grade and service was in our Central States Signature (Heritage, 4/2015), lot 3366, which brought \$3,290. Population: 54 in 65 (7 in 65+) Red, 5 finer (1/16). NGC ID# 22CT, PCGS# 2593

**1929-S Cent, MS66 Red  
Among the Finest at PCGS**

- 3615 1929-S MS66 Red PCGS.** The 1929-S Lincoln cent is difficult to locate in high-grade full Red, and this conditionally scarce Premium Gem is among the finest at PCGS. The satiny surfaces yield glowing luster. Close examination reveals minor die erosion on the obverse, but the strike sharpness is not overly affected. Population: 37 in 66 (1 in 66+) Red, 0 finer (1/16). NGC ID# 22CW, PCGS# 2602

- 3616 1931-S MS66 Red PCGS.** This is one of the finer '31-S cents that we have seen recently. The surfaces are slightly mellowed, as always on this issue, but are remarkably clean. Housed in a green label holder. None have been graded in finer numeric grades by either of the major services (06/05).  
*Ex: Santa Clara Signature (Heritage, 11/2002), lot 5510; San Francisco Signature (Heritage, 7/2005), lot 5309. NGC ID# 22D4, PCGS# 2620*

**1932 Lincoln Cent, MS67 Red  
Obvious Registry Set Choice**

- 3617 1932 MS67 Red PCGS.** The Lincoln cent issues of 1932 and 1933 form a neat little subset of cent collecting all their own, each low-mintage Depression-era issues that can be found for a price in Mint State Red condition. As a bonus, they are well-produced coins. This Superb Gem Red 1932 is an outstanding example that has full, blazing mint red with a hint of lilac around the margins. The strike is sharp, and there are no mentionable abrasions. An obvious choice for a Registry Set collector. Population: 31 in 67 Red, 0 finer (1/16). NGC ID# 85ZB, PCGS# 2623

- 3618 1933 MS67 Red PCGS.** The vibrant, unturned surfaces are primarily copper-orange with occasional elements of peach. The strike is crisp, and the fields and devices are equally well-preserved. An impressive coin in every respect. Population: 51 in 67 (2 in 67+) Red, 0 finer (1/16).  
*Ex: Central States Signature (Heritage, 4/2008), lot 259. NGC ID# 22D7, PCGS# 2629*

**1933-D Lincoln Cent, MS67 Red  
Outstanding Registry Set Contender**

- 3619 1933-D MS67 Red PCGS.** This attractive Superb Gem is among the finest Red examples certified by either NGC or PCGS. The fresh copper-orange surfaces offer marvelous vibrancy, and the boldly impressed devices are magnificently preserved. A great example from this lower-mintage Denver issue of just 6.2 million pieces. Population: 29 in 67 Red, 0 finer (1/16). NGC ID# 22D8, PCGS# 2632

**1934-D Lincoln Cent, MS67 Red  
Rarely Seen This Fine**

- 3620 1934-D MS67 Red PCGS.** A surprisingly fresh example that ranges from pale copper-gold to richer peach but never falls into the "Brown" range. Well-struck overall with a few minor flyspecks on the reverse. Despite a mintage of more than 28.4 million pieces, the 1934-D cent is elusive this fine. Population: 31 in 67 (1 in 67+) Red, 0 finer (1/16). NGC ID# 22DA, PCGS# 2638

- 3621 1943 MS68 PCGS.** An unimprovable representative of the single-year zinc-plated steel alloy. Copper was diverted to the World War II effort that year. This brilliant and lustrous cent displays only minute imperfections, such as on Lincoln's forehead. Population: 46 in 68, none finer (1/16).  
*Ex: Joshua and Ally Walsh Collection (Heritage, 1/2006), lot 295, which realized \$1,725. NGC ID# 22E4, PCGS# 2711*

- 3622 1943-D MS68 PCGS.** This one-year type was saved in large numbers, but high-grade survivors are needed to complete all 20th century type sets. This piece is a marvel of preservation. The surfaces are bright and spot-free, fully struck and almost mark-free. NGC ID# 22E6, PCGS# 2714

**1943-S Lincoln Cent, MS68  
Wartime Steel Composition, Unimprovable Example**

- 3623 1943-S MS68 PCGS.** *Ex: Joshua and Ally Walsh.* A lustrous and mildly prooflike Superb Gem with a good strike and gorgeous surfaces. Scarcer in all grades than the 1943 or 1943-D issues. After the one year steel experiment, the cent returned to a bronze alloy in 1944, with the copper claimed from spent cartridge shells. Population: 55 in 68, 0 finer (1/16).  
*Ex: Long Beach Signature (Heritage, 9/2002), lot 5623; FUN Signature (Heritage, 1/2006), lot 297. NGC ID# 22E8, PCGS# 2717*

- 3624 1944-D/S FS-511 MS65 Red and Brown NGC.** The upper third of a San Francisco mintmark looms above the Denver mintmark. The S is faint but its upper curve is obvious upon inspection beneath a lens. Although a less apparent overmintmark variety (FS-512) exists, FS-511 is the variety listed in the *Guide Book*. A brick-red and olive-green Gem with incidental contact near the date. PCGS# 37833

- 3625 1947 MS67 Red PCGS.** The post-World War II Lincoln cents through 1958 are just beginning to gain popularity as collectors learn of their true rarity in high grades. This Superb Gem has a bold strike with fully brilliant and frosty orange luster. Population: 22 in 67 Red, 0 finer (1/16). NGC ID# 22EN, PCGS# 2752

- 3626 1951 MS67 Red PCGS.** Ex: Tom Mershon Collection. Fire-red centers and margins cede to olive-gold fields. Fully struck, unabraded, and highly lustrous. One fleck noted at 10 o'clock on the reverse. Population: 26 in 67 Red, none finer (1/16). Ex: Tom Mershon Collection (Heritage, 5/2005) lot 5426; Rosemont Central States Signature (Heritage, 4/2011), lot 4241, which realized \$4,887.50. NGC ID# 22F3, PCGS# 2788

**1953-D Lincoln Cent, MS67+ Red  
Tied for Finest Certified**

- 3627 1953-D MS67+ Red PCGS.** Shimmering luster shining through vivid fiery-orange hues on this Superb Gem 1953-D cent produces the appearance of dancing flames when rotated beneath a light. The strike is bold, and Lincoln's shoulder is remarkably devoid of the oft-seen mint-made debris marks. An exemplary coin from every perspective. Population: 44 in 67 (2 in 67+) Red, 0 finer (1/16). NGC ID# 22FA, PCGS# 2809

- 3628 1955 Doubled Die Obverse, FS-101 — Cleaning — PCGS Genuine. AU Details.** The obverse legends are die doubled with a remarkable spread, characteristic of the celebrated 1955 FS-101 variety. This lightly circulated but recolored representative is principally golden-brown, although hints of jade-green emerge throughout. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

- 3629 1955 Doubled Die Obverse, FS-101 — Questionable Color — PCGS Genuine. Unc. Details.** A fully defined and satiny representative of the famous doubled die obverse 1955 cent. Void of spots or marks. The obverse displays wood-grain streaks of tan and olive. The reverse exhibits deep forest-green patina. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Doubled Die Obverse Cent  
Vividly Toned MS64 Red and Brown**

- 3630 1955 Doubled Die Obverse, FS-101, MS64 Red and Brown NGC.** This coin is certified in an older-holder NGC slab showing the old *Cherrypickers'* variety number, FS-021.8, which predates the 2012 fifth edition of the standard reference (we are now on the sixth edition of volume I). Vivid wine, orange, and blue patina is quite appealing, and the widely spaced doubling error is as dramatic and perplexing as ever. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

**1969-S Cent, MS67 Red  
Tied for Finest at PCGS**

- 3631 1969-S MS67 Red PCGS.** Coppery-red and rose hues grace the frosty surfaces of this Superb Gem 1969-S Lincoln cent. The strike is sharp, and the radiant surfaces are free of carbon. Eye appeal is excellent. PCGS lists 14 in this grade and none finer (1/16), these being immensely popular among Registry Set enthusiasts. NGC ID# 22GH, PCGS# 2920

- 3632 1970-D MS67 Red PCGS.** This spectacular Superb Gem exhibits well-detailed design elements and virtually pristine original red surfaces, with blazing mint luster on both sides. Eye appeal is terrific. Population: 14 in 67 Red, 0 finer (1/16). NGC ID# 22GL, PCGS# 2929

**1970-S Large Date, Doubled Die Obverse Cent  
FS-101, MS64 Red and Brown  
Seldom Seen in Any Grade**

- 3633 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red and Brown PCGS.** The dramatic spread doubling visible through IN GOD WE TRUST, particularly the left-side letters, as well as LIBERTY characterizes this dramatic and in-demand Doubled Die Obverse variety. This piece boasts a range of toning from red to orange to pale blue, the latter the source of the Brown part of the color designation. A few digs on the neck and eye area accounts for the numeric grade. Plenty of eye appeal is present on this piece, however. The *Cherrypickers'* authors (volume I, sixth edition: Fivaz and Stanton) write that "to this point, fewer examples are known than the previous listing, the 1969-S." Auction appearances of this variety are quite rare in any grade. Population: 3 in 64 Red and Brown, 1 finer (1/16). NGC ID# 22GN, PCGS# 37998 Base PCGS# 2938

- 3634 1970-S Small Date, FS-1401, MS67 Red PCGS.** A gorgeous orange-red Superb Gem. Virtually void of contact or carbon. The TY in LIBERTY are delicate; the pick-up point to identify the Small Date (or High 7) variety. Most of the branch issue is the Large Date (or Low 7) variety with a bold LIBERTY. Population: 11 in 67 Red, none finer (12/15). PCGS# 504137 Base PCGS# 2935

- 3635 1971-D MS67 Red PCGS.** Both sides of this impeccably preserved Superb Gem radiate blazing copper-red mint luster, with well-detailed design elements and terrific eye appeal. Population: 20 in 67 Red, 0 finer (1/16). NGC ID# 22GR, PCGS# 2944

**1971-D Cent, MS67 Red  
Registry-Grade Example**

**3636 1971-D MS67 Red PCGS.** One of the 20 finest coins at PCGS (1/16), this Superb Gem 1971-D cent boasts unsurpassed Registry potential. Satiny luster glows with carbon-free luminance on each side, delivering outstanding eye appeal. The strike is bold. An unimprovable Registry Set acquisition, worthy of a strong bid. NGC ID# 22GR, PCGS# 2944

**3637 1971-S MS67 Red PCGS.** The design elements of this delightful Superb Gem are sharply detailed throughout, and the completely red surfaces are virtually flawless, with vibrant mint luster on both sides. Population: 21 in 67 (3 in 67+) Red, 0 finer (1/16). NGC ID# 22GS, PCGS# 2947

**3638 1972 Doubled Die Obverse, FS-101, MS66 Red PCGS.** A splendid peach-red Premium Gem with occasional splashes of apple-green. Lustrous and exceptionally free from marks or carbon. Cherrypickers' lists nine different 1972 doubled die obverse varieties, but the dramatic FS-101 is the *Guide Book* key. Housed in an old green label holder. NGC ID# 22GU, PCGS# 38013 Base PCGS# 2950

**3639 1972-D MS67 Red PCGS.** Although both sides of this well-struck Superb Gem example display appealing color, the reverse is particularly attractive with blazing shades of deep orange and small splashes of pink and violet. Vibrant luster further enhances the eye appeal. A few tiny flecks of carbon are present. Population: 14 in 67 (3 in 67+) Red, 0 finer (1/16). NGC ID# 22GV, PCGS# 2956

**1972-D Cent, MS67+ Red  
Tied for Finest Certified**

**3640 1972-D MS67+ Red PCGS.** An orange-red Superb Gem with dazzling luster and an absence of marks. The strike is sharp and any carbon is minimal. A short slender tan streak is above the N in CENT. Unimprovable in grade, and thus ideal for the competitive Registry holding. Population: 14 in 67 (3 in 67+) Red, none finer (1/16). NGC ID# 22GV, PCGS# 2956

**3641 1974-S MS67 Red PCGS.** Ex: Jack Lee. A fully struck pumpkinkin-red Superb Gem. Lustrous and unabraded with only microscopic carbon. 1974 was the final year that San Francisco coined business strike cents. Population: 14 in 67 Red, 0 finer (1/16). Ex: *Jack Lee Registry Set (Heritage, 12/2008)*, lot 329, which realized \$1,495. NGC ID# 22H5, PCGS# 2978

**1977-D Cent, MS68 Red  
The Sole Finest at PCGS**

**3642 1977-D MS68 Red PCGS.** The sole finest 1977-D Lincoln cent at PCGS, comparable only to a single MS68 Red coin at NGC (1/16). This carbon-free example is almost flawlessly preserved and glows with satiny copper-red luster. Eye appeal far surpasses the typical full Red coin from this issue. An unimprovable Registry coin. NGC ID# 22HA, PCGS# 2987

**1979-D Cent, MS67+ Red  
Sole Finest Registry Coin**

**3643 1979-D MS67+ Red PCGS.** PCGS has designated only 20 1979-D cents as Superb Gem Red, and this Plus-graded coin is the sole finest (1/16). The preservation is nearly flawless, and the frosty surfaces display radiant coppery-orange luster. Minor die fatigue and faint parallel polishing lines (mint-made) barely affect the sharpness of the strike. NGC ID# 22HE, PCGS# 2998

**3644 1983 Doubled Die Reverse, FS-801, MS67 Red PCGS.** The Lincoln Memorial and all reverse legends are strongly die doubled north. The most spectacular among several doubled die varieties known for the issue. A mark-free orange-red Superb Gem, perfect aside from inconsequential minute obverse tan flecks. Population: 47 in 67 (1 in 67+) Red, 0 finer (1/16). NGC ID# 22HW, PCGS# 38063 Base PCGS# 3056

**3645 1984 Doubled Ear, FS-101, MS68 Red PCGS.** Lincoln's ear, beard, and bowtie are strongly die doubled. A lustrous and boldly struck orange-red Superb Gem. An obverse field fleck is noted near 3 o'clock, and both sides display myriad tiny trapped gas bubbles, as usual for this early copper-plated zinc issue. Population: 21 in 68 Red, none finer (12/15). NGC ID# 22HZ, PCGS# 38088 Base PCGS# 3062

**1992-D Lincoln Cent, MS62 Red and Brown  
Close AM, FS-901 Variety**

- 3646 1992-D Close AM, FS-901, MS62 Red and Brown PCGS.** Officially, the Mint did not adopt the Close AM configuration of AMERICA until 1993 cents were struck, begging the question of why a Close AM was found on a select few 1992 Philadelphia and Denver-minted business strikes. In addition, the designer's initials "FG" are located farther from the lower right side of the Lincoln Memorial building than on normal 1992 cents. Many have speculated the Close AM cents were part of a test run for die changes planned for 1993. Philadelphia coins with the Close AM are extremely rare, while the D-Mint coins of the modified legend are slightly more available — yet only about 15 examples are known. Listed as #38 in the Scott Schechter and Jeff Garrett reference *100 Greatest U.S. Modern Coins*. A necessity for the major variety Registry Set. Population: 1 in 62 Red and Brown, 2 finer (1/16). PCGS# 391428 Base PCGS# 83100

**SMS LINCOLN CENT**

- 3647 1965 SMS MS68 Red PCGS.** A magnificent MS68 representative of this popular Special Mint Set issue, with deeply reflective fields and impeccably preserved original red surfaces. Eye appeal is terrific. Population: 6 in 68 Red, 0 finer (1/16). NGC ID# 22LU, PCGS# 3290

**PROOF LINCOLN CENTS**

- 3648 1909 Lincoln PR65 Red and Brown PCGS.** A razor-sharp Gem bathed in rich ruby-red, jade-green, and orange-gold shades. Carbon is unobtrusive and contact is absent. Matte proof Gems are scarce and always in demand. Housed in a green label holder. NGC ID# 22KS, PCGS# 3304
- 3649 1909 Lincoln PR65 Red PCGS.** A razor-sharp Gem with predominant butter-gold color. Arcs of rose-red, sea-green, and orange congregate along the right-side margins. A loupe shows only incidental carbon. Very scarce in the present quality. Certified in a green label holder. Population: 58 in 65 (1 in 65+) Red, 52 finer (1/16). NGC ID# 22KS, PCGS# 3305
- 3650 1910 PR65 Red PCGS.** This delightful Gem exhibits razor-sharp definition on all design elements and the well-preserved surfaces show unusually bright matte luster on both sides. Housed in a green label holder. Population: 42 in 65 Red, 28 finer (1/16). NGC ID# 22KT, PCGS# 3308
- 3651 1911 PR66 Red and Brown NGC. CAC.** A delightful Premium Gem representative with strong, but subtle, matte luster and impeccably preserved, mostly red, surfaces. The design elements exhibit razor-sharp definition throughout. Census: 16 in 66 Red and Brown, 1 finer (11/15).  
*Ex: Boston Rarities Sale (Bowers and Merena, 8/2010), lot 180, realized \$3,738.* NGC ID# 22KU, PCGS# 3310

**1912 Cent, PR65 Red  
Rare With Full Red Color**

- 3652 1912 PR65 Red PCGS.** The 1912 is the third-scarcest issue in the short-lived matte proof series from 1909 through 1916. The surfaces on this example are remarkably vibrant with a pronounced matte texture and even red patina over each side with no mellowing evident. A highly attractive example of this scarcer proof. NGC ID# 22KV, PCGS# 3314

- 3653 1913 PR65 Red NGC.** The original red surfaces of this spectacular Gem radiate strong, but subtle, matte luster, with no mentionable distractions. The design elements exhibit razor-sharp detail throughout. Census: 24 in 65 Red, 17 finer (11/15). NGC ID# 22KW, PCGS# 3317

**1936 Satin Finish Cent, Attractive PR65 Red  
One of Nine Such With CAC Approval**

- 3654 1936 Type One — Satin Finish PR65 Red PCGS. CAC.** Among the few finest obtainable of this first modern-era Lincoln cent proof issue, the present Satin Finish Gem boasts attractive orange-red patina with an occasional foray into lighter yellow-gold. Scattered contact marks are limited to the reverse. Population: 57 in 65 (1 in 65+) Red, 34 finer. CAC: 9 in 65 Red, 3 finer (1/16). NGC ID# 22L2, PCGS# 3332
- 3655 1936 Type Two — Brilliant Finish PR65 Red NGC. CAC.** The second proof type of the year, the Brilliant Finish proved much more popular with collectors than the Satin Finish that preceded it, and the Brilliant Finish was carried through to the end of the series. This is an exceptionally pleasing coin with even red luster, no obvious spots, and no detracting contact marks. NGC ID# 22L3, PCGS# 3335
- 3656 1938 PR66 Cameo PCGS. CAC.** A spectacular Premium Gem, with impeccably preserved original red surfaces and deeply mirrored fields that contrast boldly with the sharply detailed frosty design elements. Population: 24 in 66 (2 in 66+) Cameo, 2 finer (1/16). NGC ID# 22L5, PCGS# 83341
- 3657 1942 PR66 Red PCGS. CAC.** A magnificent Premium Gem proof, with impeccably preserved orange-red surfaces and deeply mirrored fields. The design elements are sharply detailed and eye appeal is outstanding. PCGS has graded only two numerically finer examples (1/16). NGC ID# 22L9, PCGS# 3353
- 3658 1942 PR66 Red PCGS. CAC.** This incredible Premium Gem displays original red surfaces with no mentionable flaws. The design elements are sharply detailed and the fields are deeply reflective, with terrific eye appeal. PCGS has graded two numerically finer examples (1/16). NGC ID# 22L9, PCGS# 3353

**3659 1950 PR67+ Cameo NGC.** The deeply mirrored fields of this high-end Superb Gem provide intense cameo contrast with the sharply detailed frosty design elements. The original red surfaces are virtually pristine and eye appeal is terrific. Census: 37 in 67 Cameo (2 in 67 ★ Cameo), 4 finer (11/15). NGC ID# 22LA, PCGS# 83359

**3660 1983-S PR70 Deep Cameo PCGS.** Peach and gold colors dominate this flashy and intricately struck specimen. Hints of rose hues visit Lincoln's jaw. The obverse is completely devoid of trapped gas bubbles. Population: 48 in 70 Deep Cameo, (1/16). Ex: *Dallas Signature (Heritage, 12/2004), lot 5447*. NGC ID# 27WY, PCGS# 93476

## TWO CENT PIECES

**3661 1864 Large Motto MS66 Red and Brown PCGS. CAC.** First year of issue, and by far the largest mintage in the series with 19.8 million pieces struck. This is a Red and Brown piece with heavy emphasis on the Red. Fully struck throughout and showing complete venation on the wreath leaves. Population: 19 in 66 Red and Brown, 0 finer (1/16). NGC ID# 22N9, PCGS# 3577

**3662 1865 Plain 5 MS65 Red PCGS.** A salmon-pink and apple-green Gem. The strike is good and the lustrous surfaces are unabraded. A small spot below the N in CENTS denies an even finer grade. A popular Civil War type coin. PCGS# 38249 Base PCGS# 3584

**3663 1867 Doubled Die Obverse, FS-101, MS61 Brown NGC.** FS-101 is the only two-cent piece Cherrypickers' variety listed in the *Guide Book*. It secures that distinction due to prominent doubling on the Motto and arrows. A golden-brown and olive-green example with blushes of lavender-red in protected areas. Smooth aside from thin marks near UNITED. NGC ID# 22NB, PCGS# 38271 Base PCGS# 3594

## PROOF TWO CENT PIECES

**3664 1865 PR65 Red and Brown NGC.** The original red surfaces of this impressive Gem have mellowed to walnut-brown and lilac in some areas, with sharply detailed design elements and hazy, reflective fields, under the patina. Census: 32 in 65 Red and Brown, 11 finer (11/15). NGC ID# 274U, PCGS# 3628

1869 Two Cent, PR65 Red  
Subtle Obverse Contrast

**3665 1869 PR65 Red PCGS.** A razor-sharp Gem proof two cent piece, showing modest cameo contrast on the obverse. Both sides display rich coppery-orange, amber, and rose hues intermingled in the deeply reflective fields. The 1869 proof is scarce in Gem Red condition and rare any finer. Population: 45 in 65 Red, 13 finer (1/16). NGC ID# 274Y, PCGS# 3641

**3666 1871 PR66 Brown PCGS. CAC.** A fully struck and unblemished representative. The reverse field displays steel-gray, but the legends are pumpkin-gold, as is a majority of the obverse. TRUST is nicely die doubled, as seen on all proofs of this date. NGC ID# 22NH, PCGS# 3645

## THREE CENT SILVER

**3667 1851 MS66 NGC.** Glowing golden luster deepens toward the borders on the obverse and appears in irregular patterns over the reverse. This Premium Gem silver three cent type coin is well-struck and devoid of bothersome abrasions. Census: 81 in 66 (4 in 66+, 1 in 66 ★), 12 finer (1/16). NGC ID# 22YX, PCGS# 3664

**3668 1851-O MS64 PCGS.** What's not to like about the 1851-O? First year of issue and also the only year of New Orleans production in the series. This is a lightly frosted example with pale, pastel toning that deepens slightly around the margins. NGC ID# 22YY, PCGS# 3665

**3669 1851-O MS64 PCGS. CAC.** A pleasing Choice example of the only branch mint silver three cent piece, this coin exhibits well-detailed design elements and lustrous, well-preserved surfaces under shades of bluish-gray and champagne-gold toning. NGC ID# 22YY, PCGS# 3665

**3670 1857 MS64 PCGS. CAC.** The 1857 silver three cent becomes increasingly scarce in succeeding Mint State grades. This Choice example remains accessible by most enthusiasts of the series. The strike is well-executed, although a heavily lapped die leaves portions of the obverse indistinct. The surfaces are well-preserved and show a hint of pale champagne toning. NGC ID# 22Z6, PCGS# 3673

**3671 1857 MS65 NGC.** Type Two three cent silver pieces are one of the more challenging issues for the collector of 19th century type. Even though more than a million 1857s were produced, few are known in Gem and finer grades. This sharply defined example displays rich scarlet and light blue toning over each side. Census: 35 in 65, 16 finer (11/15). NGC ID# 22Z6, PCGS# 3673

**3672 1858 MS65 PCGS.** The Type Two is the most challenging of three design types for the silver three cent pieces — a short-lived type from 1854 to 1858. This final-year example is typical for the design, with some strike weakness on the peripheries but sharper at the centers. Frosted and lightly toned shades of silver-gray, khaki-gold, and teal-blue visit the lustrous surfaces. NGC ID# 22Z7, PCGS# 3674

**3673 1859 MS66 PCGS.** Forest-green, ruby-red, and amber-gold shades appear on both sides of this sharply struck and remarkably toned three cent silver. This first-year Type Three issue is readily available in lesser grades, but it becomes scarce in Gem condition. Premium Gems are rare. Population: 17 in 66 (1 in 66+), 4 finer (12/15). NGC ID# 22Z8, PCGS# 3677

**3674 1862 MS66 PCGS. CAC.** Luminous gold and orange tints visit the borders, but the softly lustrous centers remain silver-white. An excellent Premium Gem example of this last widely distributed three cent silver business strike issue. PCGS has graded just 16 numerically finer coins (1/16). NGC ID# 22ZB, PCGS# 3680

**3675 1871 MS64 NGC.** Vivid shades of golden-brown and violet toning blanket the well-preserved surfaces of this attractive Choice specimen, with sharply detailed design elements and satiny mint luster underneath. Census: 37 in 64, 74 finer (11/15). NGC ID# 22ZM, PCGS# 3692

## PROOF THREE CENT SILVER

**3676 1864 PR66 ★ NGC.** Some dramatic clash marks show on the obverse of this spectacular Premium Gem, with sharply detailed design elements and deeply mirrored fields. The well-preserved surfaces are blanketed in shades of greenish-gold, powder-blue, and gray toning. Census: 16 in 66 (1 in 66 ★), 9 finer (11/15). NGC ID# 27CA, PCGS# 3714

**1865 Three Cent Silver, PR65  
Attractively Toned**

**3677 1865 PR65 NGC.** Pale blue, gold, and rose patina on each side of this Gem proof three cent silver complements surfaces that are well-struck and thoroughly attractive. A scattering of light flecks fails to defeat the broad eye appeal. A curving lintmark in the right obverse field serves as a pedigree marker. Only 500 examples were struck of this proof issue, and this example is slightly finer than the average certified survivor. NGC ID# 27CB, PCGS# 3715

**3678 1866 PR65 NGC.** A pleasing Gem proof, showing full definition of the design elements and deep mirroring in the fields. Lovely rose-gold, champagne, and sea-green hues grace each side, and the surfaces are free of marks. Census: 35 in 65, 19 finer (11/15). NGC ID# 27CC, PCGS# 3716

**3679 1867 PR66 Cameo NGC.** Delicate shades of pale gold and cerulean-blue toning blanket the impeccably preserved surfaces of this attractive Premium Gem, with sharply detailed frosty design elements that contrast dramatically with the deeply mirrored fields. Census: 54 in 66 Cameo (1 in 66+ Cameo, 5 in 66 ★ Cameo), 7 finer (11/15). NGC ID# 27CD, PCGS# 83717

**1871 Three Cent Silver, PR66 Cameo  
Low Total-Mintage Date**

**3680 1871 PR66 Cameo PCGS. CAC.** Struck toward the end of the series, and a redundant coin at that point, only 3,400 circulation strikes were produced, placing significant date pressure on the 960 proofs. This splendidly preserved example is deeply mirrored on each side. That reflectivity serves to enhance the marginal reddish-russet patina. Sea-green centers also provide considerable visual interest. Population: 12 in 66 Cameo, 1 finer (1/16). NGC ID# 27CG, PCGS# 83722

**3681 1873 PR64 NGC.** This Choice proof 1873 silver three cent is ideal for the budget-conscious collector, as the availability of this issue declines sharply one grade point higher. The surfaces show deep mirrors and fully rendered relief elements. Dusky lavender-gray and gunmetal-blue hues color the fields. NGC ID# 27CJ, PCGS# 3724

**THREE CENT NICKELS**

**3682 1871 MS66 PCGS.** Light silver-gray toning embraces this lustrous and unabraded Premium Gem. The strike is crisp except for softness on Liberty's shoulder curl. Certified in a green label holder. Population: 48 in 66 (5 in 66+), 1 finer (1/16). NGC ID# 22NN, PCGS# 3737

**3683 1874 MS66 PCGS. CAC.** This impressive Premium Gem offers sharply detailed design elements throughout and the well-preserved surfaces radiate satiny mint luster, with some prooflike reflectivity in the fields. Population: 14 in 66 (1 in 66+), 1 finer (1/16). NGC ID# 2759, PCGS# 3742

**1876 Three Cent Nickel, MS66  
None Finer**

**3684 1876 MS66 PCGS. CAC.** Just a tinge of iridescent ice-blue toning accents the frosty nickel-gray surface of this conditionally rare three cent nickel. The left-hand numeral in the denomination is not fully brought up, but the strike is otherwise sharp. Only a few minor grazes on Liberty's cheek preclude an even finer grade from PCGS. Population: 12 in 66, 0 finer (1/16). NGC ID# 275A, PCGS# 3744

**3685 1885 VF30 PCGS.** Only 1,000 business strikes were produced of the 1885, making it the key to the series as a circulation strike. This piece saw years of circulation, but the surfaces display even wear over the high points, light gray patina, and no distracting abrasions. NGC ID# 275G, PCGS# 3753

**3686 1888 MS67 NGC. CAC. Fletcher-Flynn RPD-002.** A pristine and fully struck Superb Gem. The lustrous surfaces display ice-blue, lime-green, and honey-gold patina. The final two date digits are lightly repunched. A low mintage date. Certified in a former generation holder. Census: 16 in 67, 0 finer (11/15). NGC ID# 275H, PCGS# 3757

**PROOF THREE CENT NICKELS**

**1866 Three Cent Nickel, PR66  
Rare Deep Cameo Specimen**

**3687 1866 PR66 Deep Cameo PCGS. CAC.** This delightful Premium Gem proof exhibits sharply detailed design elements throughout. The devices are richly frosted, creating intense cameo contrast with the deeply reflective fields. The well-preserved surfaces show a few hints of pale gold toning, and eye appeal is outstanding. Population: 9 in 66 Deep Cameo, 3 finer (1/16). NGC ID# 275L, PCGS# 93762

**3688 1870 PR66 PCGS.** Razor-sharp definition is evident on all design elements of this spectacular Premium Gem, with immaculate, untuned surfaces and deeply mirrored fields. Eye appeal is tremendous. Population: 10 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 275R, PCGS# 3766

---

### 1871 Three Cent Nickel, PR67

**3689 1871 PR67 NGC. CAC.** Satiny and fully struck with pastel gold and ice-blue patina. Although 960 1871 proof sets were produced, the net mintage is likely considerably lower, since unsold sets were melted. Some proof 1871 three cent nickels were also sold individually. NGC has certified a total of 380 specimens, with many duplicate submissions over the past 30 years. Census: 9 in 67, 9 finer in 67 Cameo, 0 finer (1/16). NGC ID# 275S, PCGS# 3767

---

**3690 1872 PR66 Cameo PCGS.** The deeply mirrored fields of this delightful Premium Gem contrast boldly with the sharply detailed, frosty design elements to create an intense cameo effect. The surfaces are impeccably preserved. Population: 13 in 66 (1 in 66+) Cameo, 0 finer (1/16). NGC ID# 26JT, PCGS# 83768

**3691 1875 PR65 Cameo PCGS.** A few hints of pale gold toning visit the well-preserved surfaces of this impressive Gem, and the deeply reflective fields create distinct cameo contrast with the sharply detailed, frosty design elements. Population: 26 in 65 (1 in 65+) Cameo, 8 finer (1/16). NGC ID# 22NV, PCGS# 83771

**3692 1877 PR64 Cameo NGC.** Well-known as a proof-only date, when one adds cameo contrast into the mix that adds another dimension of rarity to this key issue. This is an all-white example with stark contrast between the frosted devices and deeply mirrored fields. NGC ID# 275X, PCGS# 83773

---

### 1884 Three Cent Nickel, PR66 Deep Cameo One of Two Examples in This Format

**3693 1884 PR66 Deep Cameo PCGS.** Nearly 4,000 proof three cent nickel pieces were minted in 1884, and almost 1,400 examples have been certified by PCGS. A mere two specimens have been designated Deep Cameo by that service, the current Premium Gem and a PR67 (1/16). Both sides are clearly contrasted with only hints of blue and gold-rose color to the fields. A small planchet depression on Liberty's cheek does not distract. NGC ID# 2766, PCGS# 93780

---

**3694 1887/6 FS-302 PR66 Cameo NGC. CAC.** A Strong Overdate example with ample portions of a 6 apparent below the crossbar of the 7. Both 8s are repunched. Light honey-gold toning graces satiny and essentially immaculate surfaces. A small strike-through (as made) is noted on the upper reverse field. PCGS# 416357 Base PCGS# 83784

**3695 1888 PR67+ NGC. CAC.** Modestly reflective fields and boldly rendered design elements characterize the seemingly flawless surfaces of this high-end Superb Gem proof 1888 three cent nickel. A trace of champagne toning warms the silver-blue surfaces. Census: 25 in 67 (2 in 67+, 2 in 67 ★), 1 finer (1/16). NGC ID# 276B, PCGS# 3785

---

## SHIELD NICKELS

---

### 1868 Shield Nickel, MS66+ Only One Coin Finer at PCGS

**3696 1868 MS66+ PCGS. CAC.** A high-end example of this early Shield nickel issue, trailing only a single Superb Gem at PCGS (1/16). The strike is well-executed, and the satiny surfaces display soft champagne color. A few peripheral die cracks are typical of the type in general. Population: 41 in 66 (5 in 66+), 1 finer (1/16). NGC ID# 22P2, PCGS# 3795

---

### 1870 Shield Nickel, MS66 Among the Finest at PCGS

**3697 1870 MS66 PCGS.** This impeccably preserved, Registry-quality Shield nickel has fully brilliant surfaces and needle-sharp design detail. As usual, prominent die cracks appear on each side. The nickel composition proved exceedingly difficult to work with in the early years of the series. Population: 16 in 66 (3 in 66+), 0 finer (1/16). NGC ID# 22P4, PCGS# 3797

---

### 1875 Shield Nickel, MS66 Among the Finest Certified

**3698 1875 MS66 PCGS.** A beautifully preserved example with satiny luster and amber-gold toning. The obverse is slightly weak on select wreath leaves and the horizontal crossbars of the shield, with the usual array of peripheral die cracks. The 1875 Shield nickel is seldom seen in Gem or better condition and is rare at the MS66 level. Population: 14 in 66 (2 in 66+), 0 finer (1/16). NGC ID# 22PA, PCGS# 3804

---

**3699 1876 MS65 PCGS. CAC.** Light wheat-gold toning visits this lustrous and sharply struck Gem. Marks are absent and carbon is minimal. The date is lightly repunched, evident above the 876 and below the flag and base of the 1. The variety is unlisted in the Fletcher reference. Population: 47 in 65 (1 in 65+), 17 finer (1/16). NGC ID# 22PB, PCGS# 3805

## PROOF SHIELD NICKELS

### 1866 Rays Shield Nickel, PR66 Cameo Delicate Golden Toning

- 3700 1866 Rays PR66 Cameo PCGS.** The debut proof Shield nickel, the 1866 is an ideal Rays type coin but is only infrequently seen in Cameo grades. This Premium Gem representative is conditionally scarce, and finer pieces are rare. The strike is full, and the fields are starkly contrasted and deeply mirrored. Lovely golden toning warms each side. Population: 33 in 66 Cameo, 3 finer (1/16). NGC ID# 276G, PCGS# 83817

### 1867 No Rays Shield Nickel, PR66 Cameo Attractive Early-State Dies

- 3701 1867 No Rays PR66 Cameo PCGS.** Reverse Style D, per the Bowers Guide Book of Shield and Liberty Head Nickels, showing stars pointing to the right-bottom serif of the E in STATES and between AM in AMERICA. The obverse die state is early, per Bowers, marginally (and here imperceptibly) different from that used with Reverse Style C, showing stars pointing under the upright of E and the center of A. This would mean this piece is likely an early delivery from the second striking, after the 25 proofs showing Style C had been delivered, and that would explain both the early die state and the cameo contrast remaining from the still-fresh dies. This is an extremely appealing and well-preserved example of this first-year type, showing rose, tan, and saffron patina on surfaces that show considerable mint frost on the devices and well-mirrored fields. A small planchet flaw appears in the lower-left obverse field near the rim. Population: 24 in 66 (1 in 66+) Cameo, 0 finer (1/16). NGC ID# 5EB6, PCGS# 83821

- 3702 1870 PR66 PCGS.** Traces of pastel rainbow toning emerge from the mirrored fields of this Premium Gem proof 1870 Shield nickel, highlighting the bold design elements and well-preserved surfaces. Among the finest non-Cameos certified. Population: 13 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 276L, PCGS# 3824

### 1871 Shield Nickel, PR66+ One Coin Finer at PCGS

- 3703 1871 PR66+ PCGS. CAC.** Modest field-motif contrast appears on both sides of this high-end Premium Gem proof, accentuating a hint of light golden toning that delivers outstanding eye appeal. The strike is sharp, and the fields exhibit pleasing depth of mirroring. Population: 37 in 66 (5 in 66+), 1 finer (1/16). NGC ID# 276M, PCGS# 3825

- 3704 1873 Closed 3 PR66+ PCGS. CAC. Fletcher-2.** A blush of warm golden toning reveals hints of rose, blue, and mint-green on each side of this high-end Premium Gem proof. The strike is sharp. All proof 1873 Shield nickels show the Closed 3 logotype. The 1 in the date is recut. Population: 27 in 66 (3 in 66+), 4 finer (1/16). NGC ID# 5KX3, PCGS# 3827

- 3705 1873 Closed 3 PR66 Cameo PCGS. Fletcher-2.** The 1 in the date is recut at its base and the flag. This Closed 3 proof is sharply struck and deeply contrasted with warm golden toning over each side. There are no bothersome marks or hairlines. Population: 27 in 66 (1 in 66+) Cameo, 1 finer (1/16). NGC ID# 276P, PCGS# 83827

- 3706 1874 PR66+ PCGS. CAC.** A fully struck, moderately reflective Premium Gem proof with exceptional quality for the grade. This CAC-endorsed 1874 Shield nickel is essentially brilliant and displays a hint of contrast on each side. Population: 44 in 66 (2 in 66+), 10 finer (1/16). NGC ID# 276R, PCGS# 3828

- 3707 1874 PR66 Cameo PCGS. Fletcher-4.** The 74 in the date is lightly repunched north. This satiny high-grade proof Shield nickel is essentially brilliant despite hints of golden patina on the reverse. Contact is absent, and a strong lens is required to locate infrequent and trivial carbon. Population: 26 in 66 (2 in 66+) Cameo, 4 finer (1/16). NGC ID# 276R, PCGS# 83828

### 1877 Shield Nickel, Appealing PR63 Cameo Proof-Only Key Date

- 3708 1877 PR63 Cameo NGC.** A reflective nickel-white example of this key proof-only date, struck to the extent of a meager 900 coins. This piece exhibits great contrast between mirrored fields and frosted devices, with some light field haze and minor chatter that account for the grade. Much eye appeal is present, more than the modest grade might imply. NGC ID# 276U, PCGS# 83831

- 3709 1878 PR65 NGC.** A proof-only issue and an essential acquisition for a complete date set. This Gem proof 1878 Shield nickel boasts crisp detail and moderately reflective fields. An essentially brilliant coin, although a faint blush of gold does emerge from the outer peripheries when tilted beneath a light. NGC ID# 276V, PCGS# 3832

**3710 1878 PR66 PCGS.** Second of two successive proof-only years, the 1878 saw an increased production over the previous year with 2,350 pieces struck. This is a brightly mirrored example with brilliant centers and rich golden toning surrounding the margins. NGC ID# 276V, PCGS# 3832

**3711 1878 PR66 PCGS. CAC.** A proof-only issue, seldom seen finer than the current Premium Gem grade level. This CAC-approved representative displays bold detail and reflective fields. Warm champagne toning colors much of the interiors, while the peripheries display pastel multicolor hues. PCGS has seen 18 finer non-Cameos (1/16). NGC ID# 276V, PCGS# 3832

**3712 1879 PR66 Cameo PCGS.** Lavender and champagne hues grace the reflective fields of this Premium Gem proof Cameo, highlighting the bold design elements and delivering outstanding eye appeal. The proof 1879 Shield nickel is seldom seen this fine with field-device contrast. Population: 15 in 66 Cameo, 5 finer (1/16). NGC ID# 22PG, PCGS# 83833

## LIBERTY NICKELS

**3713 1883 No Cents MS67 PCGS.** Untoned and struck with pinpoint sharpness, although stress on the dies is beginning to show with a series of peripheral die cracks on the obverse. Vast quantities of Uncirculated pieces still exist, but the number of survivors at this lofty level dwindles appreciably. Population: 32 in 67, 0 finer (1/16). NGC ID# 2772, PCGS# 3841

**3714 1883 With Cents MS66 PCGS. CAC.** A delightful Premium Gem example of this first-year type coin, struck later in the year and including the word CENTS in the denomination. The design elements are well-detailed and the lustrous surfaces show no mentionable flaws. Population: 64 in 66 (6 in 66+), 4 finer (12/15). NGC ID# 22PH, PCGS# 3844

### 1886 Liberty Nickel, MS64 Sought-After Key Date

**3715 1886 MS64 PCGS.** An attractive Choice example of this elusive key, from a mintage of 3.3 million pieces. Dusky shades of lavender-gray and golden-brown toning blanket the well-preserved surfaces, with sharply detailed design elements and slightly subdued mint luster underneath. Housed in a green label holder. PCGS has graded 50 numerically finer examples (1/16). NGC ID# 277U, PCGS# 3847

### 1888 Liberty Nickel, MS66

Ex: Dale Friend

**3716 1888 MS66 PCGS.** Ex: Friend. This gorgeous Premium Gem has even light tan color on the obverse, and deeper reddish-gold-gray color on the reverse. The design elements are sharply struck throughout, and the lustrous surfaces are devoid of any significant contact marks. Two or three tiny flecks on the reverse are mentioned solely for accuracy. Population: 21 in 66 (2 in 66+), 0 finer (1/16). Ex: FUN Signature (Heritage, 1/2005), lot 5751; FUN Signature (Heritage, 1/2010), lot 478. NGC ID# 2774, PCGS# 3849

### 1889 Liberty Nickel, MS66+

Excellent Registry Set Prospect

**3717 1889 MS66+ PCGS.** Both sides of this coin are richly frosted with a bright, silver-white sheen that is devoid of mentionable toning. As befits the grade, the surfaces are essentially blemish-free with a sharp strike. An obviously important coin for the Liberty Nickel collector. Population: 27 in 66 (3 in 66+), 0 finer (1/16). Ex: FUN Signature (Heritage, 1/2004), lot 5202. NGC ID# 2775, PCGS# 3850

**3718 1890 MS66 PCGS.** A sharply detailed Premium Gem, with vibrant mint luster and well-preserved surfaces that show hints of lavender and pale gold toning. Housed in a green label holder. Population: 20 in 66 (5 in 66+), 1 finer (1/16). NGC ID# 22PM, PCGS# 3851

**3719 1891 MS66 PCGS.** Light nickel-white color is a prominent undertone on this Premium Gem. The shining obverse has considerable gold, orange, and sage coloration, while those colors are less extensive on the reverse. Well struck and smooth. Population: 28 in 66 (2 in 66+), 2 finer (1/16). Ex: Long Beach Signature (Heritage, 9/2006), lot 847; FUN Signature (Heritage, 1/2010), lot 481. NGC ID# 2776, PCGS# 3852

**3720 1894 MS66 PCGS.** Satiny and well-preserved with iridescent champagne-gray luster. A few scattered specks appear on the obverse, and minor strike weakness is seen on the lower-left portion of the wreath and on several stars. The 1894 Liberty nickel is seldom seen this fine and extremely rare any finer. Population: 35 in 66 (4 in 66+), 1 finer (12/15). NGC ID# 2779, PCGS# 3855

**3721 1894 MS66 PCGS.** The major design elements are particularly well defined and a deep, satiny glow emanates from each side. One of the finer business strike 1894 nickels one is likely to encounter. Population: 36 in 66 (4 in 66+), 1 finer (1/16). Ex: Long Beach Signature (Heritage, 9/2004), lot 5776. NGC ID# 2779, PCGS# 3855

**3722 1898 MS66 PCGS. CAC.** Unlisted in *Cherrypickers'*, the entire date is minutely recut on this Premium Gem 1898 nickel; recutting is visible on the upper edges of the 18 and the left edges of the 98. As a type coin, this piece is boldly struck throughout the wreath and stars and shows smooth, satiny luster. Champagne and ice-blue hues grace each side. Population: 37 in 66 (2 in 66+), 1 finer (12/15). NGC ID# 22PP, PCGS# 3859

**3723 1900 MS66+ PCGS.** Always popular as a type coin, this 1900 nickel displays remarkably vibrant mint luster. The obverse is untuned and there is just the slightest hint of golden on the reverse. Population: 57 in 66 (6 in 66+), 9 finer (1/16). NGC ID# 22PS, PCGS# 3861

**3724 1910 MS66 PCGS.** This delightful Premium Gem offers well-detailed design elements and impeccably preserved, lustrous surfaces, under delicate shades of pale gold toning. Housed in a green label holder. Population: 24 in 66 (3 in 66+), 1 finer (1/16). NGC ID# 277L, PCGS# 3871

#### 1912-D Liberty Nickel, MS66 Popular Final-Year Issue

**3725 1912-D MS66 PCGS.** Bright and lustrous for this issue with a hint of light gold on the obverse. The strike is sharp on the obverse stars, Liberty and the wreath save for the lower left corn ear, which is soft. Carefully preserved with minimal carbon, and among the finest certified by PCGS. Population: 41 in 66 (3 in 66+), 0 finer (1/16). Ex: FUN Signature (Heritage, 1/2006), lot 1373; FUN Signature (Heritage, 1/2010), lot 503. NGC ID# 277P, PCGS# 3874

#### 1912-S Nickel, MS66 Among the Finest at PCGS

**3726 1912-S MS66 PCGS.** A conditionally rare example of the semikey 1912-S Liberty nickel, among the finest certified by either service. This Premium Gem displays satiny luster with iridescent champagne-gray toning. Weakness on the corn ear to the left of the bowknot is characteristic of the issue. The 1912-S had a scant mintage of 238,000 pieces, and top-grade survivors are rarely seen. Population: 33 in 66 (1 in 66+), 0 finer (1/16). NGC ID# 277R, PCGS# 3875

## PROOF LIBERTY NICKELS

### 1884/188 Nickel, PR67+ Cameo Repunched Date, Stark Contrast

**3727 1884/188 FS-301 PR67+ Cameo PCGS.** The 188 in the date is boldly recut on this popular *Cherrypickers'* variety. As a proof Liberty Head type coin, this Superb Gem Cameo 1884 nickel is almost unimprovable. The strike is razor-sharp, and field-device contrast is incredibly eye-catching. A hint of light golden toning adds a degree of warmth to each side. Population: 16 in 67 (3 in 67+) Cameo, 0 finer (1/16). NGC ID# 22PV, PCGS# 410660 Base PCGS# 83882

**3728 1885 PR64 PCGS. CAC.** Date pressure from the low-mintage circulation strikes adds value to the proofs from 1885. This example is moderately mirrored with light, even golden patina. Fully struck, of course. NGC ID# 277T, PCGS# 3883

### 1891 Liberty Nickel, PR66 Rare Deep Cameo Example

**3729 1891 PR66 Deep Cameo PCGS Secure.** Despite a substantial mintage of 2,350 pieces, the 1891 proof Liberty nickel is rarely encountered with Deep Cameo surfaces. This spectacular Premium Gem displays intense cameo contrast between the deeply mirrored fields and the sharply detailed, frosty design elements. A few wisps of pale orange toning accent the impeccable surfaces. Population: 9 in 66 (3 in 66+) Deep Cameo, 0 finer (1/16). Ex: ANA Signature (Heritage, 10/2012), lot 3440. NGC ID# 548V, PCGS# 93889

### 1892 Nickel, PR65 Ultra Cameo

**3730 1892 PR65 Ultra Cameo NGC.** The portrait and wreath exhibit blatant white-on-black contrast. This precisely struck Gem proof type coin is brilliant save for distributed minute carbon. As of (1/16), NGC has certified only three specimens as Ultra Cameo, and PCGS has graded just six coins as Deep Cameo. NGC ID# 54DT, PCGS# 93890

**3731 1901 PR67 PCGS.** Razor-sharp definition is evident on all design elements of this spectacular Superb Gem and the fields are deeply mirrored throughout. Close inspection reveals no mentionable distractions and eye appeal is terrific. Population: 37 in 67 (4 in 67+), 1 finer (1/16). NGC ID# 278B, PCGS# 3899

**3732 1903 PR67 Cameo PCGS. CAC.** Superb Gem examples of the 1903 are rare and in high demand among Liberty nickel Registry Set collectors. Moderately intense golden patina on each side complements dollops of pale lilac and blue that appear closer to the rims on this well-contrasted Superb Gem Cameo proof, a fully struck and delightful example. Population: 17 in 67 (4 in 67+) Cameo, 1 finer (12/15).

*Ex: Long Beach Signature (Heritage, 9/2003), lot 6084; Central States Signature (Heritage, 4/2011), lot 3114; Pittsburgh Signature (Heritage, 10/2011), lot 3391; The Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98148. NGC ID# 278D, PCGS# 83901*

**3733 1909 PR67 PCGS. CAC.** This Superb Gem proof displays bold detail and exceptional aesthetic appeal. The fully mirrored fields and satiny central devices suggest the possibility of a Cameo designation, although with its light, natural patina the contrast is limited. Both sides exhibit pale champagne-gray toning with splashes of warmer gold throughout. Population: 43 in 67, 3 finer (12/15).

*Ex: Baltimore Signature (Heritage, 3/2009), lot 591; The Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98150. NGC ID# 278K, PCGS# 3907*

## BUFFALO NICKELS

**3734 1913-S Type Two MS64 PCGS. CAC.** Lovely concentric bands of ruby-red, sea-green, and orange-gold toning grace the reverse border. The remainder of the coin is powder-blue and lavender. The strike is sharp except on the hair above the braid. Among the lowest mintage issues of the series, and a better value in Uncirculated grades. Encapsulated in an old green label holder. NGC ID# 22R3, PCGS# 3923

### 1913-S Type Two Nickel, Lustrous MS65 Light Iridescent Patina

**3735 1913-S Type Two MS65 PCGS.** Given the rather shallow price-grade curve of a 1913-S Type Two Buffalo nickel — so that PCGS retail-prices an MS65 example at less than eight times that of a Fine 12 coin — we cannot understand why a collector would not attempt to obtain a high-Mint State example of this issue, as they are relatively available despite being considered a key date. This Gem PCGS example exhibits ample luster and excellent preservation on surfaces that show no more than a touch of iridescent patina, quite attractive. The strike is well-impressed, save for slight softness over the braid. PCGS reports 35 in MS66 (31) and MS67 (4) (1/16). NGC ID# 22R3, PCGS# 3923

**3736 1915 MS66+ PCGS. CAC.** Glistening satin luster illuminates beautifully preserved surfaces on each side of this champagne-toned 1915 Buffalo nickel, while the Plus grade denotes remarkable quality for the Premium Gem level. Eye appeal is fully satisfying. Few coins are certified finer. NGC ID# 22R7, PCGS# 3927

**3737 1916 No F, FS-401 MS65 PCGS.** James Earle Fraser's F initial is missing from this lustrous, well struck, and unmarked chestnut-gold Gem. It was inadvertently lapped from the die during its preparation. As of (1/16), PCGS has certified 40 examples, but only 14 as Mint State, and only three (including the present lot) as MS65 with none finer. NGC ID# 22RA, PCGS# 395247

**3738 1917-D MS65 PCGS.** Glistening mattelike luster glows with a light golden hue over each side of this Gem 1917-D Buffalo nickel. Save for minor incompleteness on the central high points, the strike is bold. There are no significant abrasions, and eye appeal is excellent. PCGS lists 21 finer representatives (12/15). NGC ID# 22RE, PCGS# 3935

### 1917-D Buffalo Nickel, MS65 Well-Preserved, Sharply Detailed

**3739 1917-D MS65 PCGS. CAC.** This impressive Gem exhibits sharply detailed design elements, with fine definition on the Bison's head and shoulder. The mostly brilliant surfaces show just a trace of greenish-gold toning, with vibrant mint luster on both sides. Eye appeal is terrific. PCGS has graded 21 numerically finer examples (1/16). NGC ID# 22RE, PCGS# 3935

**3740 1918/7-D FS-101 VG10 PCGS. CAC.** The crossbar and downstroke of the underdigit 7 are apparent on this stone-gray representative. Protected areas display charcoal-gray, characteristic of original circulated examples. A problem-free piece without any relevant abrasions. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**3741 1919-D MS63 PCGS.** Blended cream-gray and straw-gold toning grace this lustrous and unabraded early branch mint nickel. Minor laminations are noted on the bison's back legs and the field near the bison's forehead. The strike shows blending at the centers and portions of the borders, as often encountered on the lower mintage 1919-D. Housed in a first-generation holder. NGC ID# 22RM, PCGS# 3942

### 1919-D Nickel, MS64 Attractive Luster

**3742 1919-D MS64 PCGS. CAC.** The 1919-D Buffalo nickel is seldom seen above MS64. This accessible Choice example displays satiny luster and warm champagne toning. There are no major abrasions, although die fatigue and central strike weakness are consistent with the issue's reputation. The CAC-endorsement emphasizes excellent quality for the grade. NGC ID# 22RM, PCGS# 3942

**1920-S Nickel, Rose-Gold MS64+  
Condition Rarity**

- 3743 1920-S MS64+ PCGS.** Flowing luster is complete but unobtrusive on both sides of this MS64+ 1920-S nickel, one boasting a decent strike although clearly impressed from dies that were showing a bit of fatigue at the time. Attractive rose-gold patina and a relative absence of mentionable contact put this piece into a small minority for this conditionally rare S-mint issue. Population: 5 in 64+, 23 finer (1/16). NGC ID# 22RS, PCGS# 3946

**1924-S Nickel, MS63  
Well-Struck, Lightly Toned**

- 3744 1924-S MS63 NGC.** The 1924-S is a scarcer issue in the Buffalo nickel series, but pieces in MS63 and MS64 remain obtainable by most collectors. This Select example shows warm golden toning and minimal abrasions. A bold strike defines the motifs despite considerable die erosion and rust on each side — both of which are characteristic attributes of San Francisco issues from this period. NGC ID# 22RZ, PCGS# 3953

**1925-D Nickel, Vividly Toned MS65**

- 3745 1925-D MS65 PCGS.** Vivid rose and pale violet patina encompasses both sides of this splendid Gem, which shows evidence of striking from overworked dies, more so on the obverse, but the reverse is fairly sharp with a pointed horn on the bison and good rugose detail on his back — but not a split tail. A couple of minor marks are in accord with the Gem grade and overall preservation. PCGS reports only 10 in MS66 and none finer (1/16). NGC ID# 22S3, PCGS# 3955

- 3746 1935-D MS66+ PCGS. CAC.** Soft, satiny luster glistens over each side of this high-end Premium Gem 1935-D nickel, illuminating warm rose-gold and lavender-gray toning. A touch of softness on the bison's shoulder and the hair above the Indian's braid is barely worthy of mention. PCGS lists nine finer representatives (1/16). NGC ID# 22SP, PCGS# 3975

**PROOF BUFFALO NICKELS**

**1914 Nickel, PR67  
Sharp, Attractive Matte Proof**

- 3747 1914 PR67 NGC. CAC.** A razor-sharp proof with glistening matte luster and nearly perfect preservation. Rose-gold, champagne, amber, and ice-blue hues encompass each side, attesting to the originality of the surfaces. The CAC endorsement caps the overall appeal. The 1914 matte proof is a well-made issue, suitable for type purposes. Census: 70 in 67 (1 in 67+, 5 in 67 ★), 13 finer (1/16). NGC ID# 278T, PCGS# 3991

- 3748 1915 PR64 PCGS. CAC.** Proof nickel coinage dropped to 1,050 pieces in 1915, the second-lowest total in the matte proof series. This CAC-endorsed Choice example displays needle-sharp definition with iridescent champagne toning over glowing matte luster. Remarkably well-preserved for the grade and boasting remarkable eye appeal. NGC ID# 278U, PCGS# 3992

- 3749 1915 PR66 PCGS.** This impressive Premium Gem exhibits the razor-sharp definition and subtle luster characteristics expected from a matte proof issue. Virtually pristine surfaces add to the outstanding visual appeal. NGC ID# 278U, PCGS# 3992

**JEFFERSON NICKELS**

- 3750 1943-S MS67+ Full Steps PCGS.** Fully struck and lightly toned champagne, this high-end Superb Gem 1943-S nickel displays exceptional preservation and eye appeal. Faint parallel die striae accompany modest reflectivity in the fields. A Registry-grade example of this wartime-alloy Jefferson issue. Population: 91 in 67 (6 in 67+) Full Steps, 0 finer (1/16). NGC ID# 22TT, PCGS# 84021

**1948-D Nickel, Toned MS67+ Full Steps  
Sole Finest at PCGS**

- 3751 1948-D MS67+ Full Steps PCGS.** Ineffable beauty appears on this Superb Gem Jefferson nickel in the form of rose-violet central toning ceding to pale blue and lemon-gold toning nearer the rims amid flowing luster, a bold strike, and impeccable preservation. The 1948-D is a major strike rarity in the series with Full Steps designation. Population: 15 in 67 (1 in 67+) Full Steps, 0 finer (1/16). NGC ID# 22U9, PCGS# 84035

- 3752 2005-D Speared Bison MS66 PCGS.** A narrow and raised vertical line passes through the center of the bison. The variety is reminiscent of the FS-901 "Wounded Eagle" 2000-P Sacagawea dollar. Light golden toning visits smooth semiprooflike surfaces. Population: 24 in 66, 1 finer (12/15). NGC ID# 56DY, PCGS# 84159

## PROOF JEFFERSON NICKELS

**3753 1940 Reverse of 1938, FS-901, PR67 PCGS. CAC.** A small number of proof 1940 nickels were struck with the mushy-steps reverse of 1938. This Superb Gem example is second to few. The strike is full, and the mirrored fields display a blush of golden toning. Population: 26 in 67 (1 in 67+), 2 finer (1/16). NGC ID# 279Y, PCGS# 38540 Base PCGS# 94177

**3754 1971 No S PR67 PCGS.** The *Guide Book* estimates the 1971 No S proof nickel has a mintage of 1,655 pieces. It is the largest diameter proof issue with a No S error; several dime varieties and one cent variety are also known. A fully struck and flawless Superb Gem with obvious cameo contrast; undesignated as such due to its old green label holder. NGC ID# 22YN, PCGS# 4204

### 1971 No S Nickel, PR68 Deep Cameo

**3755 1971 No S PR68 Deep Cameo PCGS.** The 1971 No S Jefferson nickel proofs were likely struck to the extent of several hundred pieces, but Deep Cameo examples survive in far fewer numbers, estimated by CoinFacts at 50 pieces. This PR68 Deep Cameo example boasts pristine surfaces with a light golden cast. One tick shows on the central portico of Monticello, but otherwise the preservation is pristine. Population: 11 in 68 Deep Cameo, 6 finer (1/16). NGC ID# 22YN, PCGS# 94204

## EARLY HALF DIME

### 1794 Half Dime, V-3, LM-3, VF20 Lightly Toned, Well-Suited for a Type Set

**3756 1794 V-3, LM-3, R.4, VF20 PCGS.** The leaf tip nearly to the center of U(NITED) with two berries under I in the same word attributes the very scarce 1794 V-3, LM-4 die pairing, much commoner than LM-1, commoner than LM-2, and scarcer than LM-4. (An example of the V-3, LM-3 is also known struck in copper with reeded edge as a pattern, cataloged as Judd-15, Pollock-19.) Extensive but even wear covers the rose- and gold-toned surfaces, which show a few dark spots and a few light scrapes on each side. Plenty of eye appeal remains on this piece, well-suited for a midgrade type set. NGC ID# 22ZT, PCGS# 38583 Base PCGS# 4250

## BUST HALF DIMES

### 1831 Half Dime, MS65 V-6, LM-1.1

**3757 1831 V-6, LM-1.1, R.1, MS65 PCGS. CAC.** A satiny Gem Capped Bust type coin, showing well-preserved surfaces and warm champagne-gray toning with hints of gold and lavender. The high points of the hair curls and the eagle's plumage around the shield perimeter show slight incompleteness, not unusual for the issue. Population (all varieties included): 44 in 65, 53 finer (1/16). PCGS# 38654 Base PCGS# 4278

**3758 1835 Large Date, Large 5C, V-3, LM-3, R.1, MS64 PCGS.** The second S in STATES is entered low on the collectible LM-3 marriage. Medium cream-gray centers are framed by chestnut-brown and jade-green borders. This near-Gem example is well-struck and satiny with a mark-free appearance. NGC ID# 232H, PCGS# 38709 Base PCGS# 4282

## SEATED HALF DIMES

**3759 1844 MS66 PCGS. CAC.** This lightly toned Gem half dime is a pleasing example of the issue, featuring golden toning over Liberty with maroon splashed in the contrasting fields. A few marks consistent with the grade are hidden within the central figure, and a curved line shows just inside star 11. The reverse exhibits a brilliant center surrounded by russet with scattered patches of blue. The present piece is "a lot of coin for the money," combining eye appeal, collectibility, provenance, and high technical grade. Moreover, the CAC verification attests to its status as an especially desirable example within the assigned grade. Ex: *Globus and Shulman Collections (Stack's, 12/1998)*, lot 1239. NGC ID# 2335, PCGS# 4333

**3760 1856 MS66 PCGS.** This attractive Premium Gem displays well-detailed design elements, with just a touch of softness on the lefthand stars. Satiny mint luster shines through shades of greenish-gold and lavender-gray toning. Population: 11 in 66 (2 in 66+), 1 finer (12/15). NGC ID# 233P, PCGS# 4363

**3761 1856 MS66 NGC. CAC.** Rich orange-red and jade-green embrace this lustrous and unabraded Premium Gem. Sharply struck save for the dentils. Certified in a former generation holder. Census: 38 in 66, 6 finer (11/15). Ex: *John and Rebecca Moores (Sotheby's, 11/1999)*, lot 118. NGC ID# 233P, PCGS# 4363

**3762 1858 MS67 PCGS.** These small coins were prone to die clashing, and evidence of clashed dies shows on both sides of this otherwise unmarked coin. The *Guide Book* lists three date varieties for the 1858 half dime — a scarce Repunched High Date and an equally scarce Inverted Overdate, as well as a Normal Date. This is the Normal Date variety. The frosted surfaces of the coin are lustrous and lightly toned on both sides, where orange-gold toning mingles with lilac accents and bold mint luster. Only two coins are numerically finer than this sharply struck and attractive Superb Gem at PCGS. Population: 16 in 67 (1 in 67+), 2 finer (12/15). NGC ID# 233U, PCGS# 4367

**3763 1864-S MS64 NGC. CAC.** With a mintage of only 90,000 pieces, the 1864-S half dime is a better date in all grades. This Choice example is conditionally rare. Slight strike softness occurs on the upper-left portion of the wreath, but the obverse is well-defined. Softly frosted lavender-gray luster spans the well-preserved surfaces. Census: 5 in 64 (1 in 64+), 11 finer (11/15). NGC ID# 234F, PCGS# 4385

**3764 1866 MS64 PCGS. V-1, Flynn-RPD-001.** A scant mintage of 10,000 pieces ensures the scarcity of this fully struck and satiny Choice half dime. The apple-green, orange-gold, and stone-gray surfaces are faintly clashed but minimally marked. The date is lightly repunched, apparent above the base of the 1. The Flynn photo shows repunching on the 8, not seen on the present coin. Population: 18 in 64 (1 in 64+), 14 finer (12/15). NGC ID# 234J, PCGS# 4388

### 1867-S Half Dime, Well-Preserved MS65 Low-Mintage Issue, Seldom Seen So Fine

**3765 1867-S MS65 PCGS. V-1a,** showing repunching on the top of the lower base of the 1. Some lumpy die clash marks also appear nearby, below Liberty's rock, from the reverse upper wreath. The surfaces are well-preserved and show attractive dusky golden-gray patina. Only 120,000 of this issue were made, and few survive remotely so fine as this remarkable Gem example. Population: 4 in 65, 2 finer (1/16). NGC ID# 234M, PCGS# 4391

**3766 1869 MS65 PCGS.** A nicely balanced and reflective Gem with sky-blue peripheries and pinkish-gold centers that emit flashy mint luster. The fields are semiprooflike and provide contrast for the lightly frosted devices. Conditionally scarce, with a surprisingly low population despite the moderate mintage of 208,000 pieces. Population: 12 in 65 (1 in 65+), 16 finer (12/15). NGC ID# 234R, PCGS# 4394

## PROOF SEATED HALF DIMES

### 1858 Half Dime, PR65 Deeply Toned and Reflective

**3767 1858 PR65 PCGS.** The proof 1858 Seated half dime is a sought-after issue with an unrecorded but undeniably small mintage. This Gem survivor displays deep aquamarine and lavender-gray toning over reflective fields and bold devices. Few Gem or finer representatives are certified, and at least a handful of resubmissions are believed to be reflected in the official data at this level. Population: 13 in 65 (1 in 65+), 4 finer (1/16). NGC ID# 235N, PCGS# 4437

**3768 1859 PR64 PCGS. Flynn-RPD-001.** Apple-green and apricot-gold endow this flashy and exquisite near-Gem. Well struck except for portions of the dentils. The 1 and 9 in the date are repunched south. Paquet's briefly used obverse subtype with unusual hollow-centered stars and a different rendition of Liberty. NGC ID# 235P, PCGS# 4438

**3769 1865 PR66 PCGS. CAC.** A boldly struck, deeply mirrored Premium Gem proof with lovely gold, aquamarine, and lavender-gray toning over each side. The 1865 proof half dime is rarely seen this fine, and higher-grade pieces are extremely rare. Population: 13 in 66, 1 finer (1/16). NGC ID# 2362, PCGS# 4448

**3770 1865 PR66 Cameo PCGS.** A lovely Premium Gem proof Cameo with stark contrast and deep mirroring. Vivid sun-gold, ocean-blue, and violet peripheral toning surrounds warm champagne interiors, accentuating the field-device separation. Untouched surfaces and stellar eye appeal. Population: 12 in 66 (2 in 66+) Cameo, 2 finer (12/15). NGC ID# 2362, PCGS# 84448

**3771 1869 PR67 NGC.** Bold multicolor toning embraces the glasslike fields of this Superb Gem 1869 proof half dime. There is a single point of strike softness on the upper-left portion of the wreath, but the obverse portrait is bold. A few die polish lines should not be mistaken for hairline scratches, of which there are none seen. Census: 12 in 67 (1 in 67 ★), 1 finer (1/16). NGC ID# 2366, PCGS# 4452

**3772 1869 PR67 NGC. Ex: Childs.** Navy-blue dominates the obverse field, though the high points are silver-gray, and glimpses of golden-brown also emerge. The reverse has a light peach-gold center framed by rich lavender-red toning. The Childs Collection is famous for its holding of the finest-certified 1804 dollar. Ex: *Walter H. Childs Collection* (Bowers and Merena, 8/1999), lot 171. NGC ID# 2366, PCGS# 4452

**3773 1869 PR66 Cameo PCGS.** Only 600 proofs were struck of this Legend Obverse half dime. Of that number, surprisingly few have survived in high grade and with cameo contrast. The fields seen here are brightly mirrored, while each side is covered with a significant amount of deep reddish patina accented by sky-blue. Population: 4 in 66 Cameo, 1 finer (12/15). NGC ID# 2366, PCGS# 84452

**3774 1870 PR66 PCGS.** Bold devices and glassy fields on each side characterize this lovely Gem proof, enhanced by vivid ocean-blue, violet, and rose-gold hues with a few tinges of mint-green evident on the reverse. From a mintage of only 1,000 proofs. Population: 15 in 66 (1 in 66+), 3 finer (12/15). NGC ID# 2367, PCGS# 4453

**3775 1872 PR64+ Ultra Cameo NGC. CAC.** The importance of this coin lies not in its near-Gem grade but in the fact that it is one of just three Ultra Cameo proofs certified in any grade by NGC (1/16). And there is no doubt about its status. The fields show unfathomable depth of reflectivity, which is set against the thickly frosted devices. The centers are mostly brilliant and there is scattered golden-russet toning around the margins. Census: 1 in 64 Ultra Cameo (1 in 64+ Ultra Cameo), 2 finer (1/16). PCGS# 94455

## EARLY DIME

### 1802 Dime, JR-4, VG10 Pleasing Detail Remaining

- 3776** 1802 JR-4, R.4, VG10 PCGS. Stars 1, 7, and 8 distant from curl 2, L, and Y in LIBERTY, respectively, attribute the obverse, with the eagle's lower beak biting down on star 12 diagnosing the reverse. The JR-4 is the most available of the four 1802 dime varieties, even though it is still very scarce. The rose-gray surfaces of this piece are well- but evenly worn, showing a modicum of pleasing detail remaining for the major devices on each side. A few stray scrapes are as expected at this grade level. NGC ID# 236K, PCGS# 38761 Base PCGS# 4472

## BUST DIMES

- 3777** 1814 Large Date, JR-3, R.2, AU58 PCGS. Die breaks within the shield and a boldly clashed obverse field are characteristics of the collectible JR-3 variety. A dove-gray and rose-gold Borderline Uncirculated example. Richly detailed, and smooth aside from a solitary diagonal mark on the cheek. NGC ID# 236W, PCGS# 38775 Base PCGS# 4488
- 3778** 1820 Small O, JR-2, R.3, MS62 PCGS. A satiny and unabraded almond-gold and ivory-white example. The strike is sharp except on a few left-side stars. One of just two 1820 die marriages (along with JR-3) that constitute the Small O *Guide Book* variety. NGC ID# 236X, PCGS# 38782 Base PCGS# 4493

### 1835 Capped Bust Dime, MS64 Popular JR-1 Variety

- 3779** 1835 JR-1, R.1, MS64 PCGS. The JR-1 is among the more accessible die pairs for the date, and a number of high-end examples have survived, making it popular with type collectors. Rich toning lends this warmly lustrous near-Gem particularly strong eye appeal. Gold-orange, reddish-tan, and sage shadings are separated into outer rings and an inner core on the obverse, but the reverse has a more dappled appearance.  
Ex: *Central States Signature* (Heritage, 4/2011), lot 3275. PCGS# 38887 Base PCGS# 4527
- 3780** 1836 JR-3, R.3, MS62 PCGS. The Wide 10C variety. The second T in STATES is repunched. Medium to deep golden-brown and sea-green toning embraces this nicely struck, satiny, and unblemished Capped Bust type coin. NGC ID# 237G, PCGS# 38890 Base PCGS# 4528

## SEATED DIMES

- 3781** 1837 No Stars, Small Date, F-103a, R.3, AU58 PCGS. CAC. F-103a is listed as a Top 100 variety by Gerry Fortin, and is noteworthy for a prominent die crack across the central reverse. This satiny near-Mint example is mostly cream-gray but also displays splashes of golden-brown toning. Sharply struck and unmarked. PCGS# 537640 Base PCGS# 4562

### 1841-O Large O Dime, XF40 Closed Bud, F-101, FS-902 Key Transitional Variety

- 3782** 1841-O Closed Bud, Large O, F-101, FS-902, R.6, XF40 PCGS. F-101 is the sole 1841-O Large O die variety, and one of two Closed Bud marriages, along with the Small O F-102. Both transitional reverse varieties are included in specialist Gerry Fortin's Top 100 variety list for the Seated dime series. This is a problem-free stone-gray example with bold star centrals and a sharply defined shield. Free from any remotely mentionable marks. NGC ID# 2385, PCGS# 145487 Base PCGS# 4580

### 1841-O Small O Dime, Choice Fine Very Rare Closed Bud Variety F-102, FS-901, Top 100

- 3783** 1841-O Closed Bud, Small O, F-102, FS-901, R.7, Fine 15 PCGS. The Small O variant of the 1841-O transitional reverse Closed Bud variety is even rarer than its Large O counterpart (F-101). Both F-101 and F-102 are listed in *Cherry-pickers'* and included in Gerry Fortin's Top 100 list. Fortin suggests a 10,000 to 20,000 percent premium for F-102. The present Choice Fine example has steel-gray centers. The microgranular surfaces display unobtrusive contact below star 8 and the N in ONE. NGC ID# 2385, PCGS# 145486 Base PCGS# 4580
- 3784** 1854 Arrows, F-107, R.3, MS66 NGC. The large mintage of nearly 4.5 million pieces suggests the Mint pushed dies to their limit — just 12 die pairs are identified by Gerry Fortin for the 1854 issue. Not surprisingly, die wear is evident on this frosty, lustrous Premium Gem example, and die clashing is prominent on both sides. The Variety Three Arrows dime is a necessity for type, and collectors have no choice but to vie for the few examples that were put aside in high Mint State. The population at both services is remarkably low in MS66 and finer. Census: 13 in 66, 10 finer (1/16). PCGS# 538019 Base PCGS# 4605
- 3785** 1857-O Large O, F-101, R.4, MS64 PCGS. Apple-green, lilac, and straw-gold toning encompass this coruscating and essentially unabraded New Orleans dime. The strike is full except across portions of the dentils. The early die state with a radial crack through the final A in AMERICA. NGC ID# 238Y, PCGS# 538107 Base PCGS# 4615

**3786 1862-S F-101, R.4, XF40 PCGS.** At the time of issue, there was no collector interest for the 1862-S. Numismatists of the day instead purchased Philadelphia Mint proofs. The typical 1862-S survivor is well-worn and granular, but the present silver-gray representative has pleasing definition. The surfaces are smooth save for field marks near the first A in AMERICA. PCGS# 538197 Base PCGS# 4636

**1865 F-101a Dime, MS64+  
Repunched Date**

**3787 1865 Repunched Date, F-101a, R.5, MS64+ PCGS.** Fortin states that "the top loop of a previously punched 6 is visible between the 8 and 6 digits in the date." A semiprooflike and essentially brilliant near-Gem. A lens reveals only infrequent and minute contact. The strike is intricate, and both sides exhibit a partial wire rim. The 1865 has a scant mintage of 10,000 pieces, since fractional currency replaced silver coinage during that Civil War year. PCGS# 538204 Base PCGS# 4641

**1866 Seated Dime, MS66  
Reverse Clash Marks**

**3788 1866 F-102b, R.6, MS66 PCGS. CAC.** The late die state variety of this scarce Legend Obverse Philadelphia issue, with clash marks on the reverse. This piece is boldly struck and has a semiprooflike obverse field. Dappled multicolor toning blankets each side in lavender-gold, champagne-gray, blue, and violet hues. Population: 7 in 66, 1 finer (12/15). PCGS# 538214 Base PCGS# 4643

**1869-S F-101 Dime, MS66  
Iridescent Multicolor Toning**

**3789 1869-S F-101, R.3, MS66 NGC.** The attractive orange-gold, cobalt-blue, and stone-gray surfaces are coruscating and appear devoid of contact. Liberty's hair is well struck but the corners of Liberty's rock show blending, as do the letters in AMERICA. For all die marriages, Census: 2 in 66, 1 finer (11/15). NGC ID# 239Z, PCGS# 538246 Base PCGS# 4650

**3790 1870-S Misplaced Date, F-101, R.3, AU53 PCGS.** A briefly circulated cream-gray example. Luster illuminates the legends and motifs. No marks are remotely of interest. The tops of an 8 and 7 lurk in the denticles near the 8 in the date, according to Gerry Fortin. The sole die variety known for this low mintage issue. Very scarce in all grades. PCGS# 538254 Base PCGS# 4652

**3791 1872 Misplaced Date, F-102, FS-301, R.2, MS65+ NGC. CAC.** Faint segments of misplaced numerals appear in Liberty's gown at the end of the shield ribbon. This high-end Gem Fortin-102 coin displays well-detailed relief elements and satiny luster. Gold, lavender, and blue-gray toning blankets each side. Census: 7 in 65 (1 in 65+), 5 finer (1/16). NGC ID# 385A, PCGS# 145493 Base PCGS# 4656

**1873 Arrows Dime, Very Fine  
Doubled Die Obverse, FS-101  
Rare Guide Book Variety**

**3792 1873 Arrows, Doubled Die Obverse, F-103, FS-101, R.6, VF20 PCGS.** Strong die doubling on the upper right portion of the shield distinguishes this rare and popular *Guide Book* variety. Additionally, a misplaced date digit lurks in the denticles near 5:30. One of Gerry Fortin's Top 100 varieties for the series; he states that "locating a choice and original Variety 103 example will take patience and considerable effort." An evenly circulated representative with deep gunmetal-gray fields and selected cream-white high points. NGC ID# 39YE, PCGS# 145495 Base PCGS# 4665

**3793 1876-S MS66 PCGS. Fortin-118, R.4. Early Die State.** Turquoise and mauve toning meet in irregular-shaped patches over both sides of this interesting Seated dime. The strike is sharp on Liberty's portrait and equally so on the cereal wreath. Struck from seemingly perfect dies, with few distinguishing characteristics matching the Fortin variety reference. Mint luster glows beneath the unusual patina. A coin of high technical merit and a fascinating toning scheme. Population: 11 in 66, 0 finer (12/15). NGC ID# 23AK, PCGS# 4681

**3794 1879 Repunched Date, F-104a, R.4, MS66 PCGS.** The 18 in the date are clearly repunched. Due to large-scale mintages of silver dollars, the U.S. Mint struck only 14,000 dimes for commerce during 1879. Rich ocean-blue and rose-gold toning encompasses this satiny high-grade example. The strike is good and no marks are apparent. Population: 63 in 66 (5 in 66+), 25 finer (1/16). NGC ID# 23AS, PCGS# 538642 Base PCGS# 4687

**1887 Dime, Superb Gem  
Notable Condition Rarity**

- 3795 1887 F-108, R.2, MS67 PCGS. CAC.** Dappled golden-brown and dove-gray dominate both sides, save for a band of apple-green across the obverse periphery. A lustrous, virtually immaculate, and well-struck Superb Gem. Population: 4 in 67, none finer (12/15).  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 2379; Legend Numismatics (11/2005); Eugene H. Gardner Collection, Part III (Heritage, 5/2015), lot 98257. PCGS# 538728 Base PCGS# 4698*

**1889 Dime, MS67  
Misplaced Date, F-126**

- 3796 1889 Misplaced Date, F-126, R.4, MS67 NGC.** The tops of a 1 and 8 are misplaced in the lower half of the shield. Jim Smith is credited with the discovery of the variety. This crisply struck Superb Gem is pristine aside from wispy field contact near Liberty's knee. Rich forest-green borders frame plum-red, steel-gray, and golden-brown centers. For all 1889 varieties, Census: 8 in 67, 0 finer (11/15). PCGS# 538819 Base PCGS# 4702
- 3797 1890 MS66 PCGS. CAC. Fortin-Unlisted.** The obverse date position is similar to Obverse 1, but a crack from Liberty's foot through the final A in AMERICA and additional cracks in the reverse wreath differ from F-101. The strike is boldly rendered, and the frosty surfaces yield brilliant, unabraded luster. Population: 47 in 66 (2 in 66+), 6 finer (1/16). NGC ID# 23BB, PCGS# 4704
- 3798 1891 MS67 NGC. F-121, R.3.** A hint of golden toning visits the borders of this otherwise brilliant Superb Gem. Close to immaculate from the technical perspective, although we note a couple of shallow, mint-made strike-throughs near the D and M in DIME. Census: 21 in 67 (3 in 67 ★), 1 finer (11/15). NGC ID# 23BD, PCGS# 4706

**PROOF SEATED DIMES**

- 3799 1859 F-101, R.4, PR63 PCGS.** A stone-white Select representative. The strike is sharp except for blending on the dentils. The reflective fields display delicate hairlines commensurate with the grade. Breen believed that among the 800 proof sets coined, 450 were sold and the remainder melted. NGC ID# 23CD, PCGS# 538999 Base PCGS# 4748

**1862 Dime, Reflective PR65 Cameo**

- 3800 1862 PR65 Cameo PCGS.** The silver centers are complemented by lilac and rose patina nearer the rims and a daub of blue-sage nearest the edges, despite the presence of appreciable contrast between reflective fields and nicely frosted devices. The prominent die line through shield stripes 11-12 is diagnostic of the Fortin-101 proof obverse, not that there was ever a doubt on this piece. Population: 1 in 65 Cameo, 3 finer (1/16). NGC ID# 23CL, PCGS# 84755

**1867 Seated Dime, PR64 Deep Cameo  
Well-Contrasted and Lightly Toned**

- 3801 1867 PR64 Deep Cameo PCGS. CAC.** The untuned silver-white centers are untuned save for a dash of amber patina near the rims. Highly mirrored fields contrast well against frosted devices. The strike is incomplete, showing softness on UNITED STATES and Liberty's portrait, along with some parallel planchet striations seen throughout the obverse. Some raised die lines also appear on the lower reverse, but this coin retains a good deal of eye appeal. Population: 2 in 64 (1 in 64+) Deep Cameo, 0 finer (1/16). NGC ID# 23CR, PCGS# 94760
- 3802 1878 PR65 Cameo PCGS. F-101, R.3.** Narrow bands of ocean-blue toning accompany the rims, while the remainder this flashy Gem offers only faint tan patina. A lens is required to view the minor field imperfections near Liberty's raised arm. NGC ID# 23D3, PCGS# 84775
- 3803 1878 PR65 Cameo NGC. F-101, R.3.** Type Two Reverse, as seen on all 1878 proofs. Almond-gold toning endows the majority of this flashy Gem. The lower reverse exhibits powder-blue and olive shades. Nicely struck and scarce in proof format. Census: 9 in 65 Cameo (1 in 65 ★ Cameo), 6 finer (11/15). NGC ID# 23D3, PCGS# 84775
- 3804 1880 F-101, R.3, PR65 PCGS.** Attractive shades of champagne-gold and cerulean-blue toning blanket the well-preserved surfaces of this sharply detailed Gem proof. The fields are brightly reflective under the patina. Population: 48 in 65, 42 finer (12/15).  
*Ex: Houston Signature (Heritage, 12/2014), lot 3366. NGC ID# 23D5, PCGS# 539047 Base PCGS# 4777*
- 3805 1891 PR65 Cameo PCGS. F-130, R.3.** A Fortin-unlisted die state that shows repunching in the lower loop of the 8 and a rising die crack through the right ribbon loop. Impressive white-on-black contrast combines with mirrored fields to provide exemplary eye appeal. Brilliant save for hints of tan toning near STATES. NGC ID# 23DG, PCGS# 84788

## BARBER DIMES

- 3806 1895 MS64+ PCGS.** The Plus designation draws attention to the unusually well-preserved surfaces of this near-Gem 1895 dime. Satiny luster is only slightly inhibited by deep gunmetal-blue, lilac, and steel-gray toning that encompasses each side. Population: 38 in 64 (3 in 64+), 39 finer (12/15). NGC ID# 23DV, PCGS# 4806
- 3807 1895-S MS64 NGC.** Vivid shades of sea-green, turquoise, and stone-gray toning blanket the well-preserved surfaces of this attractive Choice example. The design elements are sharply detailed throughout. Census: 45 in 64 (1 in 64+), 8 finer (11/15). NGC ID# 23DX, PCGS# 4808
- 3808 1901-O O Over Horizontal O, FS-501, MS63 NGC.** A lustrous Select example with light silver-gray surfaces save for medium tan freckles near the denomination. The strike exhibits minor blending but marks are inconsequential for the grade. The underappreciated FS-501 appears to be a significant rarity in Uncirculated grades. As of (1/16), NGC has certified three such coins, and PCGS has graded only two. NGC ID# 23EG, PCGS# 145523 Base PCGS# 4825

1904 Dime, MS66+  
Colorful Patination

- 3809 1904 MS66+ PCGS. CAC.** A beautiful Barber type coin. The obverse has an ocean-blue field, a sun-gold border, and a lilac-gray portrait. The reverse displays rose-red and olive-green patina. The well struck surfaces are lustrous and virtually immaculate. Lightly clashed near the Es in ONE DIME. Population: 15 in 66 (5 in 66+), 1 finer (1/16). NGC ID# 23GH, PCGS# 4833

1904 Dime, Toned MS67  
The Single Finest Known

- 3810 1904 MS67 PCGS.** This remarkable Superb Gem is the sole finest 1904 Barber dime certified (1/16), an essential acquisition for the competitive Registry Set enthusiast. This piece displays satiny luster and bold design elements. Lemon-gold, sea-green, and lavender-gray hues encompass each side. Even one grade level lower in MS66, the 1904 dime is genuine rarity. NGC ID# 23GH, PCGS# 4833
- 3811 1906-S MS65 PCGS.** A well-struck, beautifully preserved Gem example of the 1906-S Barber dime, showing vibrant luster on the obverse and semireflective fields on the reverse. Both sides display golden-orange and lavender-gray toning. Rarely encountered finer. Population: 25 in 65, 26 finer (1/16). NGC ID# 23F2, PCGS# 4841

- 3812 1916-S MS66 PCGS.** A well-preserved, satiny example of this final Barber dime issue. The wreath bowknot is a trifle soft, but the remaining details are clear. The obverse shows mottled olive, gold, and russet toning, while the reverse is primarily yellow-gold with tinges of olive around the periphery. Just one coin is numerically finer at PCGS. Population: 26 in 66 (8 in 66+), 1 finer (12/15). NGC ID# 23FZ, PCGS# 4871

## PROOF BARBER DIMES

- 3813 1895 PR65 NGC.** A pleasing Gem proof example of this popular date, showing sharp design elements and a touch of cameo contrast. The interiors are nearly brilliant, while the borders display vivid amber, violet, and ocean-blue toning. The fields are deeply mirrored and mark-free. NGC ID# 23G8, PCGS# 4879
- 3814 1898 PR67 Cameo PCGS.** The fields showcase seemingly infinite depth of mirroring, while the design elements exhibit sharp, frosty details. Warm golden toning accentuates the eye appeal and contrast. The proof 1898 Barber dime is seldom seen this fine. Population: 10 in 67 (1 in 67+) Cameo, 3 finer (1/16). NGC ID# 26KV, PCGS# 84882
- 3815 1903 PR66 PCGS.** Shades of yellow, sea-green, and orange-gold radiate from the obverse of this glittering proof dime, while violet and blue toning blankets the reverse. Glassy, deep mirrors surround lightly frosted motifs on both sides. A fully struck Premium Gem. Population: 28 in 66, 10 finer (1/16). NGC ID# 23GG, PCGS# 4887

1905 Dime, Richly Toned PR67

- 3816 1905 PR67 PCGS. CAC.** This patinated Superb Gem proof displays deep violet, crimson, and cobalt-blue at the borders and margins with smoky golden-gray in the extreme centers. Both sides yield sharply struck design elements and impeccable preservation. This issue is relatively available in numerical grades through PR66, but is elusive any finer. Population: 17 in 67 (1 in 67+), 0 finer (1/16). NGC ID# 23GJ, PCGS# 4889
- 3817 1912 PR65 Cameo PCGS.** A seldom seen Gem Cameo example of this otherwise plentiful proof Barber dime issue. The strike is bold, and the deeply mirrored fields yield a blush of light golden toning near the borders. Population: 12 in 65 Cameo, 13 finer (1/16). NGC ID# 23GT, PCGS# 84896

## MERCURY DIMES

- 3818 1916 MS67 Full Bands PCGS. CAC.** A lovely first-year type coin with beautifully preserved surfaces and bold interior detail. Unabraded, satiny surfaces yield deep sun-gold, amber, russet, and forest-green toning. PCGS has seen only 11 finer submissions (1/16). NGC ID# 23GX, PCGS# 4905
- 3819 1916-S MS67 PCGS.** The 1916-S Mercury dime is rare in Superb Gem condition, with or without a Full Bands designation. This piece shows nearly complete separation of the horizontal bands and displays comparably bold peripheries. Satiny luster is unabraded and shows hints of ice-blue and champagne toning. Population: 12 in 67 (1 in 67+), 0 finer (1/16). NGC ID# 23GZ, PCGS# 4908

**3820 1916-S MS66 Full Bands PCGS.** Few Full Bands examples of the 1916-S Mercury dime are certified above MS66. This Premium Gem example displays satiny luster with a hint of champagne toning. A thin vertical die crack appears on Liberty's portrait, but there are no significant abrasions. PCGS lists 22 finer representatives with Full Bands (1/16). NGC ID# 23GZ, PCGS# 4909

**3821 1917-S MS66 Full Bands PCGS.** Wisps of pale lavender toning appear throughout the warm golden surfaces of this Premium Gem 1917-S Mercury dime. The strike is boldly executed, and a few faint disturbances on Liberty's cheek are all that preclude an even finer grade. Population: 66 in 66 (1 in 66+) Full Bands, 11 finer (1/16). NGC ID# 23H4, PCGS# 4915

**3822 1919-D MS65 PCGS. CAC.** A conditionally scarce Gem 1919-D Mercury dime that is a little too weakly struck on the central fasces to garner a Full Bands designation. The obverse is better rendered, and both sides exhibit lavender-gray and champagne toning with occasional russet accents. Population: 30 in 65 (2 in 65+), 6 finer (1/16). NGC ID# 23H9, PCGS# 4924

#### 1919-D Mercury Dime, MS64 Sharply Detailed Full Bands Example

**3823 1919-D MS64 Full Bands PCGS.** Despite a substantial mintage of more than 9.9 million pieces, the 1919-D Mercury dime is an elusive issue in high grade. This attractive Choice specimen exhibits sharply detailed design elements throughout, with full split bands on the fasces. Several interesting die cracks are evident on the lower obverse. The well-preserved surfaces radiate satiny mint luster, with highlights of pale gold toning. Population: 91 in 64 (3 in 64+) Full Bands, 19 finer (12/15). NGC ID# 23H9, PCGS# 4925

**3824 1920 MS66+ Full Bands PCGS. CAC.** Better struck than typical and in a grade that is seldom surpassed for the 1920 Mercury dime. This high-end Premium Gem yields radiant luster and hints of lavender and champagne toning. PCGS has seen 23 finer pieces with Full Bands (1/16). NGC ID# 23HB, PCGS# 4929

**3825 1920-S MS63 Full Bands PCGS. CAC.** Lightly toned in lavender and light golden hues, with minimal abrasions for the grade. This 1920-S Mercury dime is slightly weak around the peripheries, but the central detail is fully deserving of the Full Bands designation. A better date with pleasing strike sharpness. NGC ID# 23HD, PCGS# 4933

**3826 1923 MS67 Full Bands PCGS. CAC.** Razor-sharp design elements are set against frosty, unabraded surfaces with radiant luster and soft golden and ice-blue toning. The 1923 Mercury dime is seldom seen this fine with Full Bands, and finer pieces are extremely rare. Population: 78 in 67 (1 in 67+) Full Bands, 4 finer (1/16). NGC ID# 23HG, PCGS# 4939

#### 1924-S Mercury Dime, MS64 Full Bands Sharply Detailed and Lustrous

**3827 1924-S MS64 Full Bands PCGS.** This attractive Choice specimen exhibits sharply detailed design elements throughout, with full split bands on the fasces. The well-preserved surfaces show hints of ice-blue, greenish-gold, and amber toning, with vibrant mint luster on both sides. PCGS has graded only 19 numerically finer examples (12/15). NGC ID# 23HL, PCGS# 4947

**3828 1925 MS66 Full Bands PCGS. CAC.** A sharply rendered, CAC-endorsed Premium Gem example, showing frosty luster with a hint of champagne color. No significant abrasions are seen, and the eye appeal is high. The 1925 Mercury dime is a better date in the upper Full Bands grades. Population: 64 in 66 (5 in 66+) Full Bands, 29 finer (1/16). NGC ID# 23HM, PCGS# 4949

**3829 1925-S MS64 Full Bands PCGS.** A conditionally elusive San Francisco issue with Full Bands detail. This Choice 1925-S Mercury dime displays frosty luster and well-struck interiors. The obverse is brilliant in the center, while the peripheries and entire reverse display lavender-gray and gold toning. NGC ID# 5LX3, PCGS# 4953

**3830 1926-S MS62 Full Bands ANACS.** Cherry-red, apple-green, and lemon-gold encompass this lustrous and low mintage Mercury dime. No marks are apparent, and incompleteness of strike is confined to the peripheral letters near 9 o'clock. Housed in an old small-sized holder. NGC ID# 5LX7, PCGS# 4959

**3831 1929 MS67 Full Bands PCGS. CAC.** Seldom seen so fine and extremely rare finer. This Superb Gem Full Bands 1929 Mercury dime showcases smooth, frosty surfaces and sharp detail. Rose-gold and champagne interiors yield to aquamarine and amber peripheral hues. Population: 83 in 67 (6 in 67+) Full Bands, 1 finer (1/16). NGC ID# 23J2, PCGS# 4973

#### 1930-S Dime, MS66+ Full Bands Few Known Finer

**3832 1930-S MS66+ Full Bands PCGS.** In Full Bands, the 1930-S Mercury dime is scarce in MS66 and rare any finer. This Plus-designated Premium Gem boasts sharp design elements and frosty, glistening luster that has a hint of iridescent toning. No significant abrasions are present. PCGS records 17 Superb Gems finer (1/16). NGC ID# 84NT, PCGS# 4981

**3833 1930-S MS66 Full Bands PCGS. CAC.** Glowing luster emerges from beneath champagne and lavender-gold toning on each side of this Premium Gem 1930-S Mercury dime. A bold strike denotes the Full Bands designation, and the eye appeal is excellent. PCGS lists 17 finer representatives (1/16). NGC ID# 84NT, PCGS# 4981

**3834 1935-S MS67 Full Bands PCGS. CAC.** Seldom seen this fine and almost unknown finer. This 1935-S dime showcases bold detail and satiny, virtually untuned luster. No severe abrasions are present, and eye appeal is pleasing. PCGS lists a single MS68 Full Bands coin finer (1/16). NGC ID# 23JE, PCGS# 4997

**3835 1935-S MS67 Full Bands PCGS. CAC.** Only a single MS68 Full Bands coin is finer at PCGS (1/16), making this Full Bands 1935-S Mercury dime an outstanding Registry Set acquisition. The strike is bold, and the champagne-tinted luster glistens, radiating immense eye appeal. NGC ID# 23JE, PCGS# 4997

**3836 1940-S MS67+ Full Bands PCGS. CAC.** Bold multicolor toning over each side accentuates frosty, luminous luster, while almost flawless surfaces denote the lofty, Plus-designated Superb Gem grade. The strike is bold, and the Registry potential is high. PCGS has seen six finer representatives (1/16). NGC ID# 23JW, PCGS# 5027

**3837 1942/1-D FS-101 AU58 PCGS. CAC.** Dappled tan-gold and steel-gray toning visits this satiny and unmarked key date dime. The strike is sharp, and the high points show only a trace of rub. As with the 1942/1 variety, a working obverse die was hubbed with working hubs of different dates. NGC ID# 384N, PCGS# 145475 Base PCGS# 5040

**3838 1945-S Micro S, FS-512, MS66 Full Bands PCGS.** Lovely butter-gold and ice-blue patina graces this lustrous and pristine representative. The strike is full save for minor fadeaway on the tops of the RT in LIBERTY. A popular *Guide Book* variety. The Micro S mintmark is not found on any other Mercury dime issue. NGC ID# 37PD, PCGS# 145415 Base PCGS# 5063

## PROOF MERCURY DIMES

**3839 1936 PR66 PCGS. CAC.** A gleaming Premium Gem example of the debut proof in the Mercury dime series. This piece delivers profound eye appeal and shows a brilliant obverse opposite a light golden reverse. Finer pieces are infrequently seen. NGC ID# 27DG, PCGS# 5071

**3840 1936 PR66+ NGC. CAC.** This high-end Premium Gem represents the resumption of proof coinage at the Philadelphia Mint after a two decade hiatus. The design elements are razor-sharp and the well-preserved surfaces feature reflective fields with a few hints of green and violet toning. NGC ID# 27DG, PCGS# 5071

## ROOSEVELT DIMES

**3841 1947-D MS68 PCGS.** Tied with just two others as the finest non-Full Bands 1947-D dime at PCGS (1/16), a distinction that marks it ideal for Registry Set collectors. This high-end Superb Gem is well-struck and luminously frosted. Vivid multicolor toning graces the obverse periphery, leaving much of the remainder in a light champagne hue. Stellar eye appeal. NGC ID# 23KN, PCGS# 5086

**3842 1950-S MS67+ Full Bands PCGS.** A stellar Registry coin, almost flawlessly preserved with glistening luster and a bold strike. Much of each side displays original rose, aquamarine, and olive-gold toning, delivering excellent eye appeal. Few 1950-S dimes are known finer in a PCGS holder. Population: 40 in 67 (9 in 67+) Full Bands, 4 finer (12/15). NGC ID# 23KZ, PCGS# 85096

**3843 1950-S MS67+ Full Bands PCGS.** Olive, rose, and aquamarine hues grace much of the frosty surfaces on this high-end Registry coin. The strike is bold, and the preservation is exceptional. Few 1950-S dimes are certified this fine and all are heavily sought-after by Registry Set competitors. Population: 40 in 67 (9 in 67+) Full Bands, 4 finer (12/15). NGC ID# 23KZ, PCGS# 85096

**3844 1955-S MS68 PCGS.** Tied with three others as the finest at PCGS (1/16), this Registry-grade 1955-S Roosevelt dime boasts frosty, luminous luster and exceptional preservation. A dash of silvery-blue appears in the center of each side, while the margins show deep multicolor hues. The torch is slightly soft on its lower-end. NGC ID# 23LG, PCGS# 5111

**3845 1957 MS67 Full Bands PCGS.** A boldly struck, glistening Registry-grade example, showing brilliant interiors and light golden peripheries. The eye appeal is exceptional, as one might expect for the grade. Few 1957 Roosevelt dimes are certified this fine, and none are numerically finer. Population: 12 in 67 (2 in 67+) Full Bands, 0 finer (1/16). NGC ID# 23LK, PCGS# 85114

## PROOF ROOSEVELT DIMES

**3846 1950 PR67 Deep Cameo PCGS.** This debut proof Roosevelt dime is seldom seen in Deep Cameo grades; PCGS records just 22 such coins, including 15 in PR67 and five finer (1/16). The present white-on-black example displays crisp luster and glimmering mirrors. The strike is full, and the preservation is seemingly flawless. An outstanding Registry coin. NGC ID# 27EJ, PCGS# 95225

### 1970 No S Dime, PR69 Cameo Flawless Error Proof Coin

**3847 1970 No S PR69 Cameo PCGS.** The brilliant silver-white surfaces are essentially flawless and show a complete absence of mentionable distractions. The cameo contrast present is clear and perceptible but falls shy of that needed for a Deep Cameo designation. The 1970 No S dime proofs were the second year of these errors, 1968 being the first. The error occurred again with the 1983 No S dimes. About 500 examples are known of the 1970 No S dimes, but PR69 Cameo examples are at the top of the lot; PR69 Deep Cameo coins are unknown at PCGS. Population: 8 in 69 Cameo, 0 finer (1/16). NGC ID# 59SD, PCGS# 85248

## TWENTY CENT PIECES

**3848 1875-CC — Scratch — PCGS Genuine. Unc. Details. BF-3, R.4.** Vivid orange-gold and lavender-gray hues encompass much of each side, allowing semiprooflike fields to deliver excellent eye appeal. Slight softness on portions of the relief elements is due to strike — as often seen on this issue — and not wear. An unobtrusive horizontal scratch in Liberty's lower gown folds precludes a numeric grade from PCGS, while a few other trivial abrasions are seen in the fields. NGC ID# 23R6, PCGS# 5297

**3849 1875-CC MS62 PCGS. BF-4, R.2.** The dusky caramel-gold and silver-gray surfaces show luster and lack consequential contact. Sharply struck and pleasing for the MS62 level. The only collectible Carson City issue of the short-lived denomination. NGC ID# 23R6, PCGS# 5297

**3850 1875-S MS63+ NGC. CAC. BF-13, R.2.** BF-13 is identified by its "misplaced 8 high in the dentils below the date," according to the Brunner-Frost standard reference. This butter-gold and aquamarine Select representative displays vibrant luster and a sharp strike. Smooth aside from wispy contact near the TE in STATES. NGC ID# 23R7, PCGS# 5298

## BUST QUARTERS

- 3851 1825/4/(2) B-2, R.2, AU53 PCGS.** A sharply defined example of the Browning-2 variety. Ongoing debate continues about the exact nature of the underdigits beneath the primary 5. The *Guide Book* cites both a 4 and a 2 comprising the underdate. Of the three die marriages in 1825, the B-2 variety is the most available. This pleasing AU example shows orange-gold toning at the margins with silver-gray centers. The glossy fields are only lightly abraded. NGC ID# 23RS, PCGS# 38975 Base PCGS# 5336

### 1828 25 Over 50C Quarter, B-3, MS61 Stunning Early Mint Blunder

- 3852 1828 25 Over 50C, B-3, R.5, MS61 NGC.** This is a stunning error from the early 19th century, the blundered 25/50 denomination still quite perceptible today, of course. This rose-gold- and violet-toned example of the B-3 variety boasts surprisingly few signs of contact for the grade, which is largely determined by a die grease stain on the reverse, at the left (facing) eagle's wing. One nick does appear on Liberty's cheek, but despite these small flaws, much eye appeal will encourage potential bidders. Census for the 25 Over 50C variety: 1 in 61, 2 finer (1/16). NGC ID# 23RV, PCGS# 38979 Base PCGS# 5343

- 3853 1835 B-1, R.1, MS61 NGC.** Golden-brown, slate-gray, lavender, and navy-blue toning embraces this satiny Capped Bust type coin. The strike is sharp save for blending on the high points of the cap and curls. The descending die crack across the upper reverse is always seen on B-1, since the reverse die was formerly used to strike 1834 B-3 quarters. NGC ID# 23S2, PCGS# 38997 Base PCGS# 5354

## SEATED QUARTERS

- 3854 1842-O Small Date Fine 12 PCGS. Briggs 1-A.** A problem-free steel-gray quarter that shows partial drapery and plumage detail. LIBERTY is generally sharp, though the top of the L and base of the Y are faint. Much rarer than its Large Date counterpart, and pursued by specialists in all grades. NGC ID# 23SN, PCGS# 5403

- 3855 1851-O VF25 PCGS. Briggs 1-B.** The 1851-O was produced at a time when an influx of West Coast gold led to widespread melting of Seated coinage. The mintage was just 88,000 pieces. This lavender and gunmetal-gray example is minimally abraded and retains ample drapery and plumage detail. NGC ID# 23T7, PCGS# 5418

- 3856 1852-O VF30 PCGS.** A midgrade representative of this scarce and low mintage New Orleans issue, struck during an era when Seated coinage was melted by speculators to reclaim the bullion. The microgranular cream-gray, tan-gold, and ice-blue surfaces show only inconsequential contact. NGC ID# 23T9, PCGS# 5420

### 1855 Arrows Quarter, Attractive MS64 Struck From Axially Misaligned Dies

- 3857 1855 Arrows MS64 PCGS. Briggs 1-A,** showing a die break from the lower left rear of the arrow to the 1 in the date, and die scratches on the reverse above TAT and ME. A curious and interesting example of this type issue, struck from dies that appear to have been axially misaligned, creating a sharp strike at areas near the rims on each side and notable weakness in other peripheral areas. The weakest area of strike on the obverse is 9 to 12 o'clock, and on the reverse 6 to 9. Attractive sandy-gold luster with deeper rose color and a patch of pale blue complement the overall good eye appeal and decent preservation. Population: 18 in 64, 11 finer (1/16). NGC ID# 23U8, PCGS# 5435

### 1856-S Quarter, AU50 Underrated Early S-Mint Issue

- 3858 1856-S AU50 NGC. Briggs 2-C.** Golden-brown and dove-gray toning embraces this well defined and lightly circulated better date quarter. Abrasions are essentially limited to three inconspicuous marks on the eagle. 1856-S quarters were needed in West Coast commerce and had a low survival rate. NGC has certified just 24 pieces in all grades (1/16). NGC ID# 23TD, PCGS# 5440

### 1857 FS-901 Quarter, MS64 Flying Eagle Cent Clash Marks Single Finest Certified

- 3859 1857 Reverse Die Clashed with Flying Eagle Cent, FS-901, MS64 PCGS. Briggs 6-F.** Ex: Fivaz. 1857 Flying Eagle cents exist with clash marks from a double eagle (FS-403), a half dollar (FS-402), and a Seated quarter (FS-901). No 1857 double eagles or half dollars are known with cent clashes, but there are 1857 quarters struck from the same die that clashed the FS-901 cent. NGC has certified five examples; the finest as MS63. As of (1/16), PCGS has certified 13 pieces, all in AU50 or lower grades except for the present near-Gem. It is lustrous and well preserved with dusky russet-brown, jade-green, and dove-gray toning. PCGS# 146037 Base PCGS# 5442

**1874-S Arrows Quarter, MS65  
Rich Multicolor Patina**

**3860 1874-S Arrows MS65 PCGS. Briggs 1-A.** Dusky peach centers are bounded by broad navy-blue and lilac-red margins. This coruscating Gem is free from consequential contact. The centers are boldly struck, and the peripheries show moderate inexactness of impression. The Motto, Arrows subtype was coined only for two years. Population: 50 in 65, 40 finer (12/15). NGC ID# 23VY, PCGS# 5495

**3861 1877-CC MS65 PCGS. Large CC.** Orange-gold and stone-gray embrace this sharply struck and lustrous Carson City Gem. No marks are apparent. An outstanding representative of the legendary Old West facility. Population: 39 in 65 (1 in 65+), 26 finer (1/16). NGC ID# 23V6, PCGS# 5505

**3862 1877-CC MS65 PCGS. Briggs 10-J.** Large CC. The blue-green obverse border encompasses a golden-brown field and a dove-gray seated Liberty. The reverse displays blended aquamarine, gunmetal-gray, and olive-gold patina. Coruscating and smooth. The strike is full except on star 8. Population: 39 in 65 (1 in 65+), 26 finer (1/16). NGC ID# 23V6, PCGS# 5505

**3863 1881 MS64 PCGS. CAC. Briggs 1-A.** To the unaided eye, this 1881 Seated quarter appears almost two grade points finer, but a loupe reveals faint hairlines in the fields that limit the numeric designation. Liberty and the eagle are boldly rendered, and the frosty luster glows with a light golden hue. Population: 37 in 64, 40 finer (12/15). NGC ID# 23VD, PCGS# 5513

**PROOF SEATED QUARTERS**

**3864 1860 PR63 PCGS. Briggs 8-G.** Type Two Obverse and Reverse. Light to medium tan-gold toning graces the mirrored fields. The borders offer jade-green patina. The seated Liberty is frosty, although the reverse lacks cameo contrast. Incompleteness of strike is confined to the left-side stars. NGC ID# 23WM, PCGS# 5556

**3865 1864 PR64 PCGS. Briggs 3-C.** Splashes of lavender, jade-green, and golden-brown embrace this fully struck Civil War specimen. The mirrored fields appear undisturbed. A lint mark below star 5 serves as an identifier. A meager 470 proofs were produced. NGC ID# 23WS, PCGS# 5560

**1867 Quarter, Beautifully Toned PR66**

**3866 1867 PR66 PCGS.** When a good light shines on this lovely Premium Gem proof, considerable contrast appears between the reflective fields and nicely frosted devices, although the beautiful patina — more so on the obverse — is too deep for a Cameo designation, apparently. Electric blue prevails against daubs of pale violet and a crescent of iridescent orange and lemon-yellow closer to the rims on the obverse, while the reverse is largely pale violet with hints of blue and green. This coin shows evidence of die relapping in the form of brilliant areas on Liberty's rock and thinned-out lines in some of the shield stripes. This piece would make an excellent representative of the date or type in a nice collection of toned coins. Population: 12 in 66 (1 in 66+), 2 finer (1/16). NGC ID# 23WY, PCGS# 5566

**1883 Quarter, Boldly Struck PR66+**

**3867 1883 PR66+ PCGS.** Deep coral-gold accents cede to tinges of blue at the extreme rims of this nicely preserved Premium Gem 1883 quarter, one of only 1,039 proofs made along with 14,400 business strikes. Some bands of irregular lighter toning appear on each side but there is plenty of eye appeal and a strong strike present. Population: 26 in 66 (3 in 66+), 11 finer (12/15). NGC ID# 23XF, PCGS# 5584

**1883 Quarter, Colorful PR66**

**3868 1883 PR66 PCGS. CAC.** Colorful patina in shades of mint-green and rose-gold complements good preservation and the expected-but-not-always-delivered bold strike on this Premium Gem proof quarter. What may be the remains of an old thumbprint appear in the left obverse field and Liberty's midsection, but the effect is not overly blatant given the mask of toning. Only 14,400 circulation strike quarters were produced of this date, along with 1,039 proofs. Population: 26 in 66 (3 in 66+), 11 finer. CAC: 6 in 66, 9 finer (12/15). NGC ID# 23XF, PCGS# 5584

---

**1886 Seated Liberty Quarter, PR66 Cameo  
Deep Mirrors and Strong Contrast**

**3869 1886 PR66 Cameo PCGS.** Only 886 proof Seated Liberty quarters were struck in 1886, to accompany a small business-strike mintage of just 5,000 pieces. This spectacular Premium Gem exhibits sharply detailed design elements and deeply mirrored fields that contrast dramatically with the frosty devices. Delicate shades of champagne-gold toning add to the terrific eye appeal. Population: 11 in 66 (3 in 66+) Cameo, 7 finer (12/15). NGC ID# 23XJ, PCGS# 85587

**3870 1889 PR66 PCGS. Briggs 2-B.** Rose and lilac patina shows some streaky untuned areas on parts of the obverse, accented by tinges of pale blue at the extreme rims. The strike is sharp and contact marks are absent. Only 711 proofs were struck of this late-series issue, and few survive as fine as this example. NGC ID# 44CX, PCGS# 5590

---

**BARBER QUARTERS**

---

**1896-O Barber Quarter, MS64  
Subtle Satiny Luster**

**3871 1896-O MS64 PCGS.** Sharply detailed in most areas, this impressive Choice specimen shows just a touch of softness on the lower-left stars. A few delicate hints of golden-tan toning testify to this coin's originality. The well-preserved surfaces radiate satiny mint luster on both sides and eye appeal is outstanding. Population: 8 in 64 (1 in 64+), 11 finer (1/16). NGC ID# 23Y8, PCGS# 5614

---

**1897-O Quarter, MS65  
Elusive This Fine**

**3872 1897-O MS65 PCGS.** A beautiful Gem example of this better New Orleans issue, showing bold relief detail in all areas except the eagle's right (facing) talons and the fletchings. Both sides display satiny champagne-tinged luster and are free of major abrasions. The 1897-O is rare this well-preserved and highly sought-after. Population: 12 in 65, 16 finer (1/16). NGC ID# 23YB, PCGS# 5617

**3873 1897-S AU53 NGC.** This better-date Barber quarter is challenging in all grades but particularly the AU and Mint State levels. This About Uncirculated coin displays trivial high-point friction with remnants of luster in the fields. Bits of russet-olive appear near the borders, while the interiors display golden-gray toning. Census: 2 in 53, 56 finer (1/16). NGC ID# 23YC, PCGS# 5618

---

**1899-O Quarter, Elusive MS65  
Delightfully Toned**

**3874 1899-O MS65 NGC.** Blatant eye appeal is the hallmark of this lovely Gem 1899-O Barber quarter, an issue that is far more elusive in this grade than generally realized. Rose, wine, violet, and lilac shades intermingle to delightful effect on surfaces that show no mentionable abrasions other than a couple of ticks on the shield. Even the problematic right shield corner is close to a full strike. Census: 10 in 65, 2 finer (11/15). NGC ID# 23YH, PCGS# 5623

**1901 Quarter, MS66+  
Ideal 20th Century Type Coin**

**3875 1901 MS66+ PCGS. CAC.** The 1901 Barber quarter is an available date in Mint State grades, at least in the context of a series wherein most issues become conditionally rare in Gem and finer condition. As the first issue of the 20th century, the 1901 is of obvious importance to type collectors. This boldly struck turn-of-the-century coin exhibits satiny cartwheel luster shining through blended olive and rose-gold toning, with an area of deeper ocean-blue along the upper-right reverse border. A few light grazes on Liberty's cheek are all that preclude an even finer grade. Population: 16 in 66 (1 in 66+), 2 finer (1/16).

Ex: Purchased by Eugene Gardner from Larry Whitlow (11/2001); Eugene H. Gardner Collection, Part IV (Heritage, 10/2015), lot 98566. NGC ID# 23YN, PCGS# 5628

**3876 1908 MS66 NGC.** Ebullient luster endows this lovely Premium Gem, complemented with well-struck design elements. Soft yellow-gold, violet, sky-blue, and reddish patination bathes each side. A few light obverse marks do not detract. Census: 2 in 66, 4 finer (12/15).

Ex: Houston Signature (Heritage, 12/2009), lot 568. NGC ID# 23ZC, PCGS# 5649

**3877 1911 MS66 PCGS.** Thick mint frost covers this carefully preserved example. This Premium Gem 1911 Barber quarter offers delicate golden surfaces and sharply detailed devices. A few trivial ticks do nothing to affect the eye appeal. Population: 22 in 66 (6 in 66+), 1 finer (1/16). NGC ID# 23ZN, PCGS# 5659

**3878 1916-D MS66 PCGS.** A delightful Premium Gem representative of this popular final-year issue, with sharply detailed design elements and vibrant mint luster, under iridescent shades of golden-brown and violet toning. PCGS has graded 15 numerically finer examples (12/15). NGC ID# 2426, PCGS# 5674

**3879 1916-D MS67 NGC.** A spectacular Superb Gem from the final year of the design, with well-detailed design elements and vibrant mint luster, under vivid shades of champagne-gold, violet, and amber toning. Census: 13 in 67 (2 in 67+, 1 in 67 ★), 2 finer (11/15). NGC ID# 2426, PCGS# 5674

**PROOF BARBER QUARTERS**

**1892 Quarter, PR67+ Cameo  
Well-Contrasted, First-Year Issue**

**3880 1892 PR67+ Cameo PCGS. CAC.** Type Two Reverse. Light amber-gold and cinnamon patina rings the rims of this first-year Barber quarter proof, while the interiors remain largely untuned and deeply contrasted, seemingly on the verge of a Deep Cameo designation. Few examples exceed this Superb Gem proof, either numerically or aesthetically. Population: 12 in 67 (1 in 67+) Cameo, 3 finer (1/16). NGC ID# 59J7, PCGS# 85678

**1893 Barber Quarter, PR67  
Only 792 Pieces Struck**

**3881 1893 PR67 NGC.** Only 792 proof Barber quarters were struck in 1893, the second year of the design. This delightful Superb Gem offers sharply detailed, frosty design elements and reflective, flawless fields under attractive shades of pale gold and cerulean-blue toning. Census: 19 in 67 (2 in 67 ★), 12 finer (11/15). NGC ID# 2428, PCGS# 5679

**1896 Quarter, PR67 Cameo  
Glowing Central Devices**

**3882 1896 PR67 Cameo PCGS.** A starkly contrasted Superb Gem Cameo proof that might have garnered a Deep Cameo designation were it not for a hazy tan-gold hue that softens both sides. The devices are nonetheless set off quite well from the deeply mirrored fields, and the strike is tack-sharp throughout. Eye appeal is excellent. Population: 10 in 67 (2 in 67+) Cameo, 2 finer (1/16). NGC ID# 59JB, PCGS# 85682

---

### 1901 Quarter, Beautiful PR67 Cameo

**3883 1901 PR67 Cameo NGC.** This beautiful Barber quarter combines the best of both worlds, showing splendid amber-rose patina with well-contrasted cameo surfaces and nicely frosted devices front and back. Minimal strike weakness shows on the right shield corner — more a fault of the design than the coin. Census: 18 in 67 Cameo (4 in 67 ★ Cameo), 5 finer (1/16). NGC ID# 242G, PCGS# 85687

---

**3884 1905 PR66 PCGS.** This PCGS-certified Premium Gem proof has excellent eye appeal with blue, gold, and iridescent toning over its fully mirrored fields and satiny devices. Both sides are pristine and without blemishes. A hint of cameo contrast is visible through the toning. Population: 30 in 66 (1 in 66+), 13 finer (1/16). NGC ID# 242L, PCGS# 5691

**3885 1908 PR66 PCGS. CAC.** The obverse of this Premium Gem remains brilliant overall, with subtle hints of light toning present. The reverse displays toning in shades of yellow, gold, red, copper, light green, cerulean-blue, and olive-green. Only 545 proof Barber quarters were struck in 1908. Population: 19 in 66, 22 finer (1/16). NGC ID# 242P, PCGS# 5694

---

### 1913 Quarter, PR67+ Conditionally Rare

**3886 1913 PR67+ NGC.** The obverse of this high-end Superb Gem proof might have garnered a Cameo designation by itself, but the reverse is not as starkly contrasted. Warm sun-gold hues grace each side with deeper blue-green and violet around the peripheries. The strike is bold, and the eye appeal is exceptional. Few 1913 proofs survive this fine. Census: 19 in 67 (2 in 67+), 5 finer (11/15). NGC ID# 242V, PCGS# 5699

---

## STANDING LIBERTY QUARTERS

**3887 1917 Type One MS66 Full Head NGC.** Deep original toning sets this sharply struck Type One Standing Liberty quarter apart from most other examples of the issue. The interiors display warm gold and champagne hues, while the margins exhibit deep crimson and russet. Well-preserved with satiny luster. NGC ID# 242Z, PCGS# 5707

---

### 1917 Type One Quarter, MS67 Full Head Excellent Luster and Eye Appeal

**3888 1917 Type One MS67 Full Head PCGS.** A boldly rendered, glistening Type One Standing Liberty quarter with mattelike luster and a blush of iridescent champagne toning. For type or date purposes, a finer bare-breast coin would be hard to come by. The 1917 Type One is infrequently seen in Superb Gem Full Head, and none are numerically finer than this MS67. Population: 86 in 67 (5 in 67+) Full Head, 0 finer (1/16). NGC ID# 242Z, PCGS# 5707

---

### 1917-S Type One Quarter, MS66 Full Head Smooth, Frosty Luster

**3889 1917-S Type One MS66 Full Head PCGS. CAC.** The Type One 1917-S quarter is accessible through most grade levels, but not so in MS66 Full Head. Scarcely are sharp examples seen so well-preserved, and finer pieces are rare. This Premium Gem displays light golden-russet hues around the rims and frosty luster over mostly brilliant interiors. The leading edge of the eagle's left (facing) wing is incomplete, but the strike is otherwise sharp. PCGS reports 15 finer submissions (1/16). NGC ID# 2433, PCGS# 5711

---

**3890 1918 MS66 PCGS.** Although the definition on Liberty's head is just short of full, the shield rivets and other devices are razor-sharp. The impeccably preserved brilliant surfaces radiate vibrant mint luster and eye appeal is terrific. Population: 24 in 66 (2 in 66+), 3 finer (12/15). NGC ID# 3TWT, PCGS# 5720

**3891 1918-D MS64 Full Head PCGS.** A satiny ice-blue example of this better Denver issue, showing soft luster and well-preserved surfaces. Save for a pair of shield rivets, the obverse is boldly struck; the reverse shows some minor softness on the eagle's breast, as usual. Pleasing for the grade and issue. NGC ID# 3TWU, PCGS# 5723

**1920 Quarter, MS66 Full Head  
Bold Head and Date**

- 3892 1920 MS66 Full Head PCGS.** Razor-sharp on both Liberty's temple and the date — the two areas on the 1920 that are most frequently weak. This coin is frosty and lustrous with scattered tiny ticks. Warm champagne-gold toning bathes each side, allowing occasional glimpses of russet in the obverse recesses. Population: 35 in 66 (4 in 66+) Full Head, 7 finer (1/16). NGC ID# 243E, PCGS# 5735

- 3893 1921 AU55 PCGS. CAC.** A bold date and remnants of luster add to the appeal of this golden-russet 1921 Standing Liberty quarter. A touch of friction over the high points of the design precludes a Mint State grade, but sharp detail persists throughout each side — save for Liberty's temple, which is characteristically incomplete. NGC ID# 243H, PCGS# 5740

**1921 Standing Liberty Quarter, MS65  
Attractive Philadelphia Series Key**

- 3894 1921 MS65 NGC. CAC.** A delightful Gem specimen of this important series key, with vibrant mint luster and well-preserved brilliant surfaces on both sides. The design elements are sharply detailed in most areas, though the definition on Liberty's head is just short of full. Only the slightest softness is evident on the shield rivets and eye appeal is outstanding. Census: 82 in 65, 22 finer (11/15). NGC ID# 243H, PCGS# 5740

**1923 Quarter, MS66 Full Head  
Warm Luster and Toning**

- 3895 1923 MS66 Full Head NGC.** The 1923 is more challenging in Full Head than sometimes recognized. Many coins exhibit weakness at Liberty's temple that precludes such a designation. The present Premium Gem boasts frosty luster and warm champagne toning. Liberty's head is not razor-sharp, but adequate separation of the hairline is present. There are no significant abrasions. Census: 13 in 66 (1 in 66+) Full Head, 4 finer (11/15). NGC ID# 243J, PCGS# 5743

**1923-S Quarter, Appealing MS65**

- 3896 1923-S MS65 PCGS.** Tawny-gold surfaces feature generous luster and thoroughgoing eye appeal on this nicely preserved Gem 1923-S quarter, which shows a bold strike overall but falls a tad short in the head details. An untoned silvery area shows in the upper-left obverse. Abrasions are minimal on either side. This low-mintage date was struck in the amount of only 1.36 million coins. Population: 96 in 65 (3 in 65+), 43 finer (1/16). NGC ID# 243K, PCGS# 5744

**1923-S Standing Liberty Quarter, MS67  
No Numerically Finer Coins at PCGS**

- 3897 1923-S MS67 PCGS.** Ex: J.H. Cline. The 1923-S Standing Liberty quarter is a condition rarity that is infrequently encountered in Superb Gem quality. Scintillating mint luster is accented by gold and iridescent toning at the borders of this delightful Superb Gem, and the frosty surfaces are virtually pristine. Housed in a green label holder. Population: 6 in 67 (1 in 67+), 0 finer (1/16). *From The Jay Cline Collection of Standing Liberty Quarters.* NGC ID# 243K, PCGS# 5744

- 3898 1924-S MS65+ PCGS.** A well-preserved and frosty high-end Gem example of this slightly better San Francisco issue but deficiently struck in the centers, as are many 1924-S quarters. This piece is frosty and light golden with faint die striations in the fields, resultant from an effort to efface clash marks. NGC ID# 243N, PCGS# 5750

**1925 Quarter, MS66 Full Head  
Lightly Toned, Excellent Eye Appeal**

- 3899 1925 MS66 Full Head PCGS. CAC.** Largely brilliant centers show elements of powder-blue and gold coloration, while the margins display deeper amber-russet hues. Carefully preserved with a strongly detailed shield and bold rivets. Liberty's head is expectedly razor-sharp. Housed in a green label holder. PCGS has graded just 12 finer Full Head coins (12/15). *Ex: Long Beach Signature (Heritage, 2/2010), lot 432; Central States Signature (Heritage, 4-5/2010), lot 784.* NGC ID# 243P, PCGS# 5753

- 3900 1927 MS66 Full Head PCGS.** A boldly struck, frosty example of this available Philadelphia issue, showing icy-blue luster and excellent eye appeal. A few trivial ticks are all that preclude an even finer grade. Population: 59 in 66 (5 in 66+) Full Head, 7 finer (1/16). NGC ID# 243U, PCGS# 5761
- 3901 1927-S AU55 NGC.** The 1927-S Standing Liberty quarter is known for its scarcity in Mint State, but even more elusive in an overall sense are attractive AU coins. This Choice AU example displays above-average definition and remnants of luster amid light golden toning. The usual die striae are seen in the fields upon close examination. NGC ID# 243W, PCGS# 5764
- 3902 1929-S MS66 Full Head PCGS.** A boldly struck, frosty example of this available San Francisco issue, showing well-preserved surfaces and a hint of champagne toning. Eye appeal is excellent. PCGS lists 15 finer Full Head representatives (1/16). NGC ID# 2444, PCGS# 5777
- 3903 1930 MS66 Full Head PCGS. CAC.** Frosty luster rolls over well-preserved surfaces that show a hint of light champagne toning. The strike is bold on Liberty's head and the shield, and the corresponding eye appeal is excellent. An outstanding type coin with few superiors in the Full Head category. NGC ID# 2445, PCGS# 5779
- 3904 1930 MS67 Full Head NGC.** A boldly struck Superb Gem type coin with frosty champagne-toned luster. The 1930 Standing Liberty quarter is infrequently seen this fine, and higher-grade pieces are prohibitively rare. Census: 32 in 67 (1 in 67 ★) Full Head, 0 finer (1/16). NGC ID# 2445, PCGS# 5779
- 3905 1930-S MS66 Full Head PCGS.** A well-struck, lightly toned example of this final-year S-mint issue, showing tinges of olive-gold and amber-orange around the borders with light champagne in the centers. A few trivial marks do not detract. PCGS lists 25 finer Full Head representatives (1/16). NGC ID# 2446, PCGS# 5781

## WASHINGTON QUARTERS

- 3906 1932-D MS63 PCGS.** A collectible Select Mint State example of this key Denver issue, showing bold design elements and minimal abrasions. Dusky champagne-silver luster delivers original eye appeal on each side. NGC ID# 2448, PCGS# 5791
- 3907 1932-D MS64 NGC.** Dappled caramel-gold, lilac, and olive-green toning visits this lustrous key date near-Gem. No marks are consequential, though a small dark area is noted on the A in QUARTER. NGC ID# 2448, PCGS# 5791
- 3908 1932-D MS64 PCGS. CAC.** Lightly toned and lustrous with smooth surfaces save for incidental contact on the portrait. The 1932-D is the key to the Washington series, with a low mintage and low survival rate caused by the hardships of the Great Depression. Certified in a green label holder. NGC ID# 2448, PCGS# 5791

### 1934 Doubled Die Obverse Quarter, MS64 FS-101, With CAC Approval

- 3909 1934 Doubled Die Obverse, FS-101, MS64 PCGS. CAC.** Blatant die-doubling appears on the motto IN GOD WE TRUST, the date, and LIBERTY on the obverse, shifted southwest. This is a popular *Guide Book* and *Cherrypickers' Guide* variety. The present near-Gem offers champagne-gold patina with one tick on Washington's cheek that likely precludes a Gem grade. Abundant eye appeal nonetheless remains on this interesting "naked eye" variety. NGC ID# 244A, PCGS# 5900 Base PCGS# 5795

- 3910 1937-S MS67 PCGS.** Among the finest certified, this Registry-grade 1937-S Washington quarter displays dazzling luster and seemingly flawless surfaces with traces of champagne and rose-gold toning. The strike is bold, and the eye appeal is superb. Population: 40 in 67 (3 in 67+), 0 finer (1/16). NGC ID# 244M, PCGS# 5805
- 3911 1941-D MS67 PCGS. CAC.** This Registry Set contender displays satiny golden-toned luster with hints of amber and olive around the borders. The strike is boldly executed and there are no bothersome abrasions. Population: 50 in 67 (13 in 67+), 1 finer (1/16). NGC ID# 244Y, PCGS# 5815
- 3912 1943-S Doubled Die Obverse, FS-101, MS64 PCGS.** The dramatic *Guide Book* variety with strong clockwise die doubling on the obverse legends, especially IN GOD WE TRUST. Only a whisper of golden patina adorns this lustrous and carefully preserved Choice quarter. NGC ID# 2457, PCGS# 145154 Base PCGS# 5823
- 3913 1948 MS67+ PCGS. CAC.** Thin rainbow crescents appear around portions of the peripheries on this Registry-grade 1948 Washington quarter, while the interiors display dusky champagne luster. The strike is bold, and the original surfaces are unmarred by abrasions. PCGS lists a single MS68 coin finer (1/16). NGC ID# 245L, PCGS# 5836
- 3914 1950-D/S FS-601 MS64 NGC.** Traces of the San Francisco mintmark appear west and north of the strike-doubled Denver mintmark. This lustrous and carefully preserved near-Gem displays subtle peripheral freckles of magenta and apple-green patina. Certified in a former generation holder. Census: 15 in 64, 6 finer (11/15). NGC ID# 245T, PCGS# 145638 Base PCGS# 5843
- 3915 1950-D/S FS-601 MS64+ PCGS.** The curve of an undermintmark S is apparent northwest of the strike-doubled Denver mintmark. Well struck and lustrous with attractive almond-gold and olive-gray surfaces. A conditionally scarce *Guide Book* variety. NGC ID# 245T, PCGS# 145638 Base PCGS# 5843
- 3916 1953-S MS67+ PCGS. CAC.** Superb mint frost and radiant luster adorn the vividly toned surfaces of this Registry-grade 1953-S quarter — among the finest at PCGS. Portions of each side display warm amber-orange hues, with secondary areas of powder-blue, violet, and forest-green. Eye appeal is exceptional. Population: 98 in 67 (15 in 67+), 0 finer (1/16). NGC ID# 2466, PCGS# 5854
- 3917 1956-D MS67 PCGS.** Dappled olive, gold, and russet toning encompasses each side of this Registry-grade Superb Gem, while the underlying surfaces are vibrantly lustrous and devoid of abrasions. The 1956-D quarter is scarce this well-preserved and unknown numerically finer. Population: 26 in 67, 0 finer (1/16). NGC ID# 246C, PCGS# 5861
- 3918 1959 MS67 PCGS.** Satiny luster is borderline reflective in the fields on this Superb Gem 1959 quarter — among the finest certified of the issue. Much of the reverse is brilliant, while the obverse displays vivid navy-blue and amber hues in the margins. Boldly struck and exceptionally well-preserved. Population: 17 in 67 (1 in 67+), 0 finer (1/16). NGC ID# 246H, PCGS# 5866

### 1968-D Quarter, Toned MS68 Incredible Coloration

- 3919 1968-D MS68 PCGS.** A top-grade Registry coin with intense coloration and immaculate preservation. Lavender and powder-blue interiors yield to deep olive-gold, crimson, and lemon-yellow peripheral hues. Eye appeal is superb. PCGS reports only six coins this fine and none finer (1/16). The Registry Set competitor will find this acquisition a must. NGC ID# 2472, PCGS# 5882

## PROOF WASHINGTON QUARTERS

- 3920 1936 PR65 PCGS. CAC.** The proof 1936 has the lowest mintage of any Washington issue. This smooth and satiny Gem displays light pearl-gray, lime-green, and almond-gold toning. Housed in a green label holder. NGC ID# 27HN, PCGS# 5975
- 3921 1936 PR66 PCGS.** A brilliant and satiny high-grade representative of the lowest mintage Washington proof issue. Well struck and without any detractors. The cheek displays delicate raised circular lathe lines, as made. Housed in a green label holder. NGC ID# 27HN, PCGS# 5975
- 3922 1936 PR66 PCGS. CAC.** The inaugural Washington quarter proof issue had a mintage of just 3,837 pieces, few of which survive finer than the present Premium Gem example. This piece shows glossy surfaces with dusky golden and ice-blue toning. PCGS lists 10 submissions in higher grades (12/15). NGC ID# 27HN, PCGS# 5975
- 3923 1936 PR66 NGC. CAC.** Deeply mirrored and fully struck, this Premium Gem first-year proof showcases near-brilliant interiors with dusky olive-gold hues around the peripheries. Eye appeal is outstanding, and only 25 pieces are finer at NGC (1/16). NGC ID# 27HN, PCGS# 5975
- 3924 1937 PR67+ PCGS. CAC.** Impressively sharp and deeply mirrored, this high-end Superb Gem proof showcases almost perfect preservation and excellent eye appeal. The reverse and internal obverse show near-brilliant color, while the outer peripheries exhibit deeper tan-gold hues. PCGS lists three finer coins (1/16). NGC ID# 27HR, PCGS# 5976
- 3925 1942 PR67+ PCGS. CAC.** This rim-toned 1942- Washington quarter shows virtually immaculate preservation that puts it among the couple of dozen finest certified at PCGS. The beautiful patina is a plus. Population: 17 in 67+, 9 finer (12/15). NGC ID# 27HV, PCGS# 5981

## STATEHOOD QUARTERS

- 3926 Three-Piece 2004-D Wisconsin Variety Set MS68 NGC.** The set includes the Extra Leaf High, FS-5901; Extra Leaf Low, FS-5902; and the regular Wisconsin quarter. All three coins are identically graded MS68 by NGC, and are housed in a single large format NGC holder. A brilliant and essentially immaculate trio that lacks the planchet chatter typically found on state quarter circulation strikes. (Total: 3 coins)

## EARLY HALF DOLLARS

1794 Flowing Hair Half Dollar, Fine Details  
Elusive O-106, T-4 Variety

- 3927 1794 O-106, T-4, Low R.6 — Improperly Cleaned — NGC Details. Fine.** From the Normal Head obverse die, this elusive die variety is recognized by the position of star 2 piercing the lowest curl and the 10 x 11 arrangement of the berries on the reverse. The rims, all lettering, and the date remain bold, and the major design elements are complete in outline, with some interior detail still intact. The surfaces are retoned in shades of lavender-gray, blue, and greenish-gold. A couple of vertical scratches in the lower right obverse field are the only marks of note. NGC ID# 24E6, PCGS# 39208 Base PCGS# 6051

- 3928 1795 2 Leaves, Small Head, O-127a, T-23, High R.6 — Repaired — PCGS Genuine. VG Details.** Overton designated his 126 through 128 marriages as Small Head. Within that group, O-127 and O-127a are the rarest. Nearly all survivors are in Fine or lower grades. This deep walnut-brown example shows evidence of repairs on the portrait, eagle, and nearby fields. The reverse exhibits adjustment marks, as made. NGC ID# 37TS, PCGS# 39250 Base PCGS# 6054

The image shows the cover of a book titled "EARLY United States HALF DOLLARS Volume 1 1794-1807" by Steve M. Tompkins. The cover features a background image of several early half dollars. Below the book cover, there is a text box with the following text:

**Steve Tompkins** has written a new reference on early half dollars (1794-1807). His system uses **T numbers** to indicate the variety and die sequence. We will use his numbering system for varieties, alongside the Overton numbers.

1803 O-103, T-3 Half Dollar, AU50  
Large 3, Large Reverse Stars

- 3929 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, AU50 NGC.** The variety is distinguished by the Large 3 in the date and Large Stars reverse. Light clash marks appear between the bust and date, and elsewhere on the obverse. Pleasing, deep rose-gray toning over both sides yields to occasional areas of forest-green, gold, and amber iridescence, especially near the borders. The design elements are well-struck. A shallow pinscratch extends upward from between 8 and 0 in the date to the bust, while another travels from the lower left point of star 5 diagonally into the field. Scattered marks and high-point wear are in line with the grade.  
Ex: *Bayside New York Collection / ANA Signature (Heritage, 8/2008), lot 1672.* NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066

**3930** 1805 O-107, T-7, R.5, VF30 NGC. A very scarce Overton variety attributed by a cluster of die lines near the right shield corner. A dove-gray and wheat-gold midgrade example that lacks any mentionable marks. The surfaces show occasional microgranularity. NGC ID# 24EG, PCGS# 39280 Base PCGS# 6069

**3931** 1806 Knob 6, Small Stars, O-106, T-4, R.4, XF40 NGC. CAC. A nice Choice XF cream-gray representative. The strike is good except for the usual blending near the bust tip and the upper right reverse stars. Marks are incidental save for a couple of tiny rim nicks. *Ex: New York Signature (Heritage, 12/2011), lot 3548.* NGC ID# 24EJ, PCGS# 39306 Base PCGS# 6075

**3932** 1806 Pointed 6, Stem, O-116, T-20, R.3, XF40 NGC. *Ex: Highland Collection.* A charming cream-gray example that shows occasional glimpses of golden-brown toning. Luster glimmers from protected areas, and apparent marks are confined to minor hairlines and a slight reverse edge nick at 5:30. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071

**1806 O-124 Half Dollar, VF  
E Over A in STATES  
Rare Guide Book Variety**

**3933** 1806 E Over A in STATES, O-124, T-22, R.6, VF20 NGC. A rare *Guide Book* blundered legend variety usually encountered with problems such as cleaning or damage. But the present cream-gray Very Fine half dollar has an original appearance, and abrasions are chiefly confined to a minor field lines below the chin and the L in LIBERTY. The strike shows weakness near the eagle's head, as seen on all examples of the variety due to the high relief of Liberty's shoulder. NGC ID# 24EJ, PCGS# 39330 Base PCGS# 6071

**3934** 1807 Draped Bust, O-106, T-6, R.3, XF40 NGC. A die crack across the lower reverse border helps identify this problem-free XF example. Luster dominates the curls, borders, and eagle. Cream-gray high points accompany straw-gold fields and margins. NGC ID# 24EM, PCGS# 39345 Base PCGS# 6079

## BUST HALF DOLLARS

**3935** 1807 Capped Bust, Large Stars, 50 Over 20, O-112, R.1, AU53 NGC. Blended tan-brown, gunmetal-gray, and aqua-blue toning embraces this well detailed Bust half. The subdued surfaces have relatively few marks. The popular blundered denomination variety.

*Ex: Long Beach Signature (Heritage, 9/2008), lot 2037, which realized \$2,415.* NGC ID# 24EN, PCGS# 39356 Base PCGS# 6086

**3936** 1810 O-102, R.1, AU55 NGC. Dusky olive-brown and dove-gray toning embraces this satiny and unmarked Capped Bust half dollar. The eagle's left (facing) wing is softly defined, as seen on the Overton plate coin and most if not all examples of O-102. NGC ID# 24ET, PCGS# 39406 Base PCGS# 6095

**3937** 1813 O-105, R.1, AU58 PCGS. Forest-green and tan-brown freckles overlies unblemished cream-gray surfaces. A coruscating and nicely struck near-Mint representative. The dies clashed at least eight times, based on the overlapping clashes on the field beneath UNUM. PCGS# 39463 Base PCGS# 6103

**3938** 1814 O-103, R.1, AU55 NGC. A prominent vertical die line connects the left scroll end to the left wing, and allows arm's length confirmation as Overton-103. This satiny representative exhibits deep dove-gray, sea-green, lavender, and autumn-brown toning. The clashed surfaces are smooth save for a small granular area above the eagle's neck. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105

**1814 Capped Bust Half Dollar, AU55  
E Over A, O-108a Variety**

**3939** 1814 E Over A in STATES, O-108a, R.1, AU55 PCGS. CAC. The E in States is cut over an A, and a number of dramatic clash marks and die cracks are evident on both sides, identifying the late die state O-108a variety. Just a touch of wear is evident on the well-detailed design elements and the pleasing lavender-gray surfaces are lightly abraded, with a few traces of original mint luster. Population for the variety: 4 in 55, 1 finer (1/16). NGC ID# 24F3, PCGS# 39490 Base PCGS# 6107

**3940** 1821 O-104a, R.2, AU58 NGC. Die polish lines near Liberty's throat attribute this partially lustrous and well-struck Bust half. Light straw-gold and blue-green toning adheres to the margins, while the remaining areas are virtually brilliant. Minimally abraded and highly attractive. NGC ID# 24FF, PCGS# 39581 Base PCGS# 6128

**1825 O-114 Half Dollar, Nicely Toned MS63**

**3941** 1825 O-114, R.1, MS63 PCGS. CAC. The recutting visible on the base of the shield border, between vertical stripes 2 and 3, diagnoses the reverse of the O-114, as does the I in PLURIBUS centered beneath the left side of T3. The obverse shows slight recutting on the left side of the 1 in the date. This pastel-toned coin deepens to rose on portions of the interiors and shows late-state die erosion that draws the star points towards the edge. A few dark flecks are small and minor. NGC ID# 24FL, PCGS# 39661 Base PCGS# 6142

**3942** 1826 O-101a, R.2, AU58 PCGS. A satiny silver-gray representative that boasts smooth surfaces and excellent eye appeal for the third-party grade. The strike is crisp except on the first two stars. The curls near the cap display slight wear. NGC ID# 24FM, PCGS# 39667 Base PCGS# 6143

**3943** 1826 O-113, R.3, MS63 NGC. A satiny steel-gray representative with smooth surfaces despite unobtrusive field granularity near star 3. Among the highest-graded examples of O-113 ever sold at auction. We know of only one other appearance of an MS63 coin, lot 701 in our 2009 Cincinnati Central States Signature, a PCGS example that realized \$1,782.50. PCGS# 39683 Base PCGS# 6143

**3944 1827 Square Base 2, O-142, R.3, MS61 PCGS.** A diagonal line into the wing from the upper right shield border identifies Overton-142. This smooth and satiny example displays medium olive-gray and chestnut-gold toning. The strike is good save for blending on the claws and upper stars. NGC ID# 24FN, PCGS# 39742 Base PCGS# 6144

**3945 1828 Curl Base 2, Knob, O-107, R.2, MS61 PCGS.** Light to medium chestnut-gold and steel-gray adorn this lustrous Bust half dollar. The reverse toning is slightly deeper than on the obverse. Marks are absent save for a faint graze near the beak.  
*Ex: Long Beach Signature (Heritage, 2/2013), lot 3484, which realized \$2,115. NGC ID# 24FR, PCGS# 39760 Base PCGS# 6149*

**3946 1829/7 O-102, R.2, MS61 PCGS.** Peripheral golden-brown freckles overlie stone-gray surfaces. A sharply struck, lustrous, and unblemished example. The two overdated 1829 varieties (O-101 and O-102) are readily distinguished by the shape of the top of the 5 in 50 C. O-101 has a curved top 5, and O-102 has a triangular top 5. NGC ID# 24FT, PCGS# 39809 Base PCGS# 6155

**3947 1829 Small Letters, O-114, R.3, AU58+ PCGS.** Light almond-gold toning adorns this coruscating and nicely struck near-Mint half dollar. Marks are virtually absent, although Liberty's neck has a small planchet flaw (as made). The vertical shield lines are crude on O-114, and provide the attribution marker for the variety. NGC ID# 24FS, PCGS# 39799 Base PCGS# 6154

**3948 1832 Small Letters, O-111, R.1, AU58+ PCGS.** The borders display golden-brown and sea-green, while the fields and motifs are primarily steel-gray. Some stars are soft but the strike is generally good. A few faded thin field marks are noted near the eagle's beak. NGC ID# 9KXV, PCGS# 39869 Base PCGS# 6160

**3949 1833 O-108, R.1, MS62 NGC.** A splendid Capped Bust type coin that boasts vibrant luster, minimal marks, and a nice strike. Lightly toned overall, though protected areas display traces of sea-green patina. NGC ID# 24FX, PCGS# 39896 Base PCGS# 6163

**3950 1834 Large Date, Large Letters, O-102, R.1, MS62 PCGS.** A cream-gray representative with occasional glimpses of tan-brown toning. The lustrous surfaces are smooth save for a solitary horizontal line on Liberty's neck. The strike is good aside from blending on the right-side stars. NGC ID# 24FY, PCGS# 39906 Base PCGS# 6164

**3951 1835 O-107, R.1, MS62 PCGS.** A coruscating powder-blue, golden-brown, lavender-red, and pearl-gray Capped Bust type coin. Marks are minimal and the strike is bold except on the upper stars. An extended right shield tip is an identifier for the collectible Overton-107. NGC ID# 4EKB, PCGS# 39933 Base PCGS# 6168

#### 1836 Half Dollar, MS64 Lettered Edge, O-109

**3952 1836 Lettered Edge, O-109, R.3, MS64 NGC.** Rich orange-gold toning dominates, although the borders and Liberty's cheek display gunmetal-blue. Marks are limited to a diagonal line on the cheek. Star 7 and the branch stem are repunched. A few proofs are known of this die variety, and nice Mint State examples are equally rare. The present lot is challenged in third-party grade only by a PCGS MS64 piece that appeared in a January 2015 Goldberg auction. NGC ID# 24G2, PCGS# 39945 Base PCGS# 6169

## REEDED EDGE HALF DOLLARS

**3953 1837 GR-6, R.3, MS62 PCGS.** The 7 is repunched above the crossbar, characteristic of the conditionally rare GR-6. Peach-gold fills the borders but the fields and devices are close to brilliant. Lustrous and pleasing with a crisp strike on the major motifs. NGC ID# 24G4, PCGS# 531052 Base PCGS# 6176

**3954 1839-O GR-1, R.1, XF40 PCGS.** A late die state example with several obvious cracks across both borders. Deep gunmetal-gray toning blankets inoffensively marked surfaces. The only collectible Capped Bust issue struck at a branch mint, the 1839-O is requisite for a New Orleans type set. NGC ID# 24G7, PCGS# 531106 Base PCGS# 6181

## SEATED HALF DOLLARS

**3955 1839 With Drapery, WB-102, MS61 NGC.** A pleasing example of this first year issue for the Seated Liberty design, this being the modified design with the addition of drapery at Liberty's elbow. Both sides display bright silver luster with satiny surfaces. The obverse showcases a thin band of peripheral blue toning, with gold and blue margins on the reverse. A sharp strike renders the clearly defined obverse motifs, while softness on the eagle's right (left facing) leg and claw, as well as at the arrow fletchings, appears on the reverse. A handful of minuscule marks are noted but of minor concern. Census: 11 in 61, 42 finer (11/15). PCGS# 572001 Base PCGS# 6232

**3956 1840 Small Letters, WB-101, MS62 NGC.** Deep blue and gray toning covers most of the obverse with splashes of luster peering through. The obverse stars show a decent strike, but a touch of weakness is seen on the upper feather tips on the eagle. This coin has a heavy die crack from the rim through the cap to Liberty's head that forms the general shape of a checkmark.  
*Ex: The Kim Mitchell Collection / FUN Signature (Heritage, 1/2005), lot 7235. NGC ID# 24GM, PCGS# 572002 Base PCGS# 6234*

#### 1840 Seated Half Dollar, MS64+ Small Letters Reverse of 1839

**3957 1840 Small Letters, Repunched Date, FS-301, WB-102, MS64+ NGC.** Peach-to-orange peripheral toning gives way to pale silver and deeper medium-gray color in the centers. The surfaces are lustrous with light abrasions that dot the reverse, while the design elements are sharply defined. Despite a mintage of more than 1.4 million pieces, the 1840 Reverse of 1839 half dollar is somewhat scarcer in Mint State than is generally realized by nonspecialists. Select Mint State examples are seldom seen, and Gem-quality pieces are rare. This near-Gem example is one of just two pieces with the NGC Plus designation. Census: 12 in 64 (3 in 64+), 15 finer (1/16).  
*Ex: The Eugene H. Gardner Collection, Part IV (Heritage, 10/2015, as MS63 PCGS with CAC), lot 9840. NGC ID# 24GM, PCGS# 392647 Base PCGS# 6234*

**3958 1840 Small Letters, Repunched Date, FS-302, WB-104, MS63 PCGS.** Butter-gold toning blends with slate-gray throughout this satiny and minimally abraded second-year Seated half. Although more available than its Medium Letters counterpart, the 1840 Small Letters is elusive in Mint State. This piece shows shows vertical roller marks on the obverse, mint-made. Population: 17 in 63, 28 finer (1/16).  
*Ex: Long Beach Signature (Heritage, 2/2011), lot 3691. NGC ID# 24GM, PCGS# 392648 Base PCGS# 6234*

**3959 1840-O Small Letters, Small O, WB-103, Die Pair 10, R.3, MS61 PCGS.** Ex: Dick Osburn Collection. Popular and easy to identify as the only 1840 reverse with a Small O mintmark, the variety is scarce by demand as well as by condition. The date is higher and further left than any other 1840-O variety, and the reverse die shows extensive die cracks with internal die cuds starting to form near the olive leaves and between RI of AMERICA. This lustrous, silver-gray Mint State 61 coin is among the finest of the variety, and its prominent die cracks are sure to entice the Seated specialists. PCGS# 572005 Base PCGS# 6235

**3960 1842 Small Date, Large Letters, WB-101, MS61 NGC.** The dusky cream-gray surfaces reveal ocean-blue along the borders once rotated beneath a light. A boldly struck and slightly subdued example that has no obtrusive marks. Considered scarcer than its Medium Date counterpart. Census: 0 in 61, 0 finer (1/16). Ex: *Central States Signature (Heritage, 4/2008), lot 1112; Houston Signature (Heritage, 12/2008), lot 725.* NGC ID# 24GT, PCGS# 572011 Base PCGS# 6240

**3961 1843-O Repunched Date, WB-103, Die Pair 18, R.3, FS-301, MS62 NGC.** Ex: Jules Reiver Collection. The date is obliquely repunched, but in a later die state and not as bold as the other use of the obverse (Die Pair 17). The repunching is most visible at the top of 3. Small areas of bluish-gray toning add natural appeal to the lustrous, frosty surfaces of this silver-gray example. The strike is sharp throughout. The surfaces are generally smooth, with only light abrasions consistent with the grade. Census (all varieties): 13 in 62, 24 finer (1/16). PCGS# 413712 Base PCGS# 6244

#### 1844-O Half Dollar, MS64 Sharp, Toned Example

**3962 1844-O WB-101, Die Pair 6, R.3, MS64 PCGS.** A sharp, well-preserved example of this early New Orleans Seated half, showing luminous luster beneath mottled olive-gold and peach toning. The eye appeal is excellent for the grade and issue. Heavy die lines amid the reverse peripheral legends indicate the die variety. The toning deepens toward the borders. Population: 15 in 64 (1 in 64+), 1 finer (1/16). PCGS# 572030 Base PCGS# 6246

**3963 1846-O Tall Date, WB-106, Die Pair 27, R.4, AU50 NGC.** This lightly circulated AU example represents the scarce New Orleans Tall Date variety. The design elements are well-detailed, with slight wear limited to the high points of the devices, and the lightly toned pink and gold surfaces show only minor abrasions. Struck on a planchet with unusually broad rims, from a transitional reverse die also utilized in 1847. Census: 2 in 50, 12 finer (1/16). NGC ID# 24H9, PCGS# 572053 Base PCGS# 6256

**3964 1846-O Tall Date, WB-106, AU53 NGC.** The scarce 1846-O Tall Date variety is much scarcer than its Philadelphia Tall Date counterpart, and eagerly sought by Seated half specialists. This About Uncirculated example displays lustrous gray surfaces with a crescent of blue and iridescent toning at the right side of the obverse and reverse. Some luster remains. Census (all Tall Date varieties): 3 in 53, 9 finer (1/16). Ex: *Long Beach Signature (Heritage, 6/2002), lot 7222; Summer FUN Signature (Heritage, 7/2013), lot 4987.* NGC ID# 24H9, PCGS# 572053 Base PCGS# 6256

**3965 1847/(6) WB-102, FS-301, Late Die State, XF40 PCGS.** A lightly toned, silver-gray example of this interesting variety, which is rare in its early die state with remnants of an earlier punched 1 46 far southwest of the primary 1847 date. The current late die state does not show the underdigits due to die polishing, but the WB-102 die pair is identified by the date position higher and further to the right than other 1847 varieties, as well as prominent doubling of the vertical obverse shield stripes. Die clashing at the drapery and a diagnostically cracked reverse die confirm the variety. PCGS# 537379 Base PCGS# 6258

**3966 1848 Repunched Date, WB-103, MS63 PCGS.** Ex: Dick Osburn Collection. The 18 in the date is boldly recut south on this variety, the only PCGS-attributed example of the die pairing. Overall, the 1848 half is scarce in Mint State. This piece is impressively sharp throughout, showing bright luster with tinges of amber-gold toning near the borders. Abrasions are minimal. Population: 10 in 63, 12 finer (1/16). PCGS# 572064 Base PCGS# 6260

**3967 1849 Repunched Date, WB-103, MS63 PCGS.** Ex: Dick Osburn Collection. The WB-103 is the second-most blatant example of date repunching for the 1849 issue — not as widely shifted as the rare WB-102 variety, which shows the remnants of all four digits far to the east of the primary date. The WB-103 repunched date is dramatic as well, obliquely repunched far to the north at the 1, with progressively lesser downward repunching on the 849. This Select Uncirculated half is frosty and attractive, with pale amber-gold, blue, and pearlescent silver toning. The strike is sharp, with just a few scattered marks of little consequence. A necessity for the Seated half variety collector. Population (all varieties): 11 in 63, 26 finer (12/15). PCGS# 572070 Base PCGS# 6262

**3968 1849-O WB-101, Die Pair 6, R.3, MS62 PCGS. CAC.** Struck from a heavily rusted die obverse die with patchy rust lumps across the portrait of Liberty. The fields, though, are smooth and lustrous with light, pearlescent bluish-gray and russet-red toning that deepens slightly at the margins. Sharply struck at the centers, the peripheries are not as bold, with rounding of the star centers and numerous faint die cracks. CAC endorsed, this New Orleans half displays strong eye appeal. Population: 3 in 62, 16 finer (1/16). PCGS# 572073 Base PCGS# 6263

#### 1850 Liberty Seated Half Dollar, MS63 Normal Date, Undervalued Issue

**3969 1850 WB-101 MS63 PCGS.** Seated halves from the early 1850s become increasingly scarce for the 1850, 1851, and 1852 issues, a result of low mintages and fluctuating silver values in relation to the influx of California gold. Balance was restored in 1853, but not until many coins were melted for their intrinsic silver value. This Select Mint State example is prooflike on both sides with pale-gold toning and sharply struck devices. A few faint, hair-thin field lines are noted. Population: 8 in 63, 18 finer (12/15). PCGS# 572074 Base PCGS# 6264

**3970 1850 Repunched Date, WB-102, MS60 NGC.** Golden-gray accents appear on the high points of this otherwise brilliant, better-date half, with silver luster shining brightly from both sides. Minor blending at the eagle's right talon and at Liberty's head accompany a sharp strike on the rest of the motifs. Struck from an obverse die that shows recutting at the lower right of 0 in the date. Census: 2 in 60, 28 finer (1/16). NGC ID# 24HG, PCGS# 572075 Base PCGS# 6264

**3971 1850-O WB-101, Die Pair 6, R.5, MS62 NGC.** Two small lumps near the dentils by star 4 and doubling of the upper shield lines and right-hand shield border on the obverse help confirm the die pair. A tiny tine protrudes from the top right side of 1 in the date. A scarce variety from a conditionally scarce New Orleans issue, with few Mint State examples despite the large mintage of more than 2.4 million pieces. Natural olive-gold patina blankets both sides. Census: 5 in 62, 33 finer (1/16). NGC ID# 24HH, PCGS# 572076 Base PCGS# 6265

**1851 Seated Half Dollar, MS63  
WB-101, Conditionally Scarce Early 1850s Issue**

**3972 1851 WB-101 MS63 NGC.** Ex: Dick Osburn Collection. A mostly brilliant, frost-white example of this challenging date, with a faint glimpse of gold toning at the lower left obverse border. The 1851 suffered much the same fate as the 1852 half dollars, although helped by a larger mintage, when the influx of California gold pushed silver prices beyond melt value. This Select Uncirculated survivor is sharply struck with surfaces that are remarkably unabraded for the issue. Frosty cartwheel luster flashes from both sides. Census (all varieties): 8 in 63, 18 finer (1/16). PCGS# 572078 Base PCGS# 6266

**1851 Seated Half, AU58  
WB-103, Repunched Date**

**3973 1851 Repunched Date, WB-103, AU58 PCGS.** The tiny remnant of a misplaced 1 appears far to the left of the second 1 in the date. The repunching is further obscured by the rich patina that is deepest at the date area and across the entire left obverse. A light reveals iridescent colors that emerge between areas of gunmetal-blue and reddish-gold toning. The star centers are sharp, as is Liberty's hair detail, and the fields are reflective beneath the toning. A scarce date and die pair, originally toned and in a much-sought AU58 collector grade. Population (all varieties): 7 in 58, 37 finer (1/16). PCGS# 572080 Base PCGS# 6266

**1852 WB-101 Seated Half, MS62  
Frosty, Minimally Marked Surfaces**

**3974 1852 WB-101 MS62 PCGS.** Ex: Dick Osburn Collection. The modest 77,130-piece mintage does not give an accurate picture of the true scarcity of the 1852 issue, since many coins never left the Mint and were melted due to an imbalance in the price of silver. It was a residual effect from the influx of California gold, and balance was not restored until mintage of the 1853 Arrows half dollars, which contained less silver. This lightly toned MS62 example is lustrous with richly frosted surfaces and only minor marks. The strike is razor-sharp. Population: 11 in 62, 28 finer (1/16). NGC ID# 24HL, PCGS# 572083 Base PCGS# 6268

**3975 1853-O Arrows and Rays, WB-101, Die Pair 13, R.3, AU55 NGC.** The obverse shows no drapery, a result of die preparation rather than design. A radial die crack between stars 2 and 3 confirm the obverse die, while a die crack through the olive leaves and HALF identifies the reverse. Faint ivory-gold patina covers both sides of this Choice AU coin, with a considerable amount of mint luster remaining on both sides. Light abrasions and high point wear determine the grade. Census (all varieties): 31 in 55, 49 finer (1/16). NGC ID# 24JK, PCGS# 572086 Base PCGS# 6276

**3976 1861 WB-101 MS64 NGC.** For the period, the 1861 is one of the more plentiful Seated half issues in Mint State, ideal to represent the No Motto type. This piece shows the sharp design definition that is a hallmark of the issue, along with satiny luster that shows soft lavender and gold hues around portions of the peripheries. Mild die rust is discernible in the obverse fields near the borders. NGC ID# 24J7, PCGS# 572144 Base PCGS# 6302

**3977 Three-Piece S.S. Republic New Orleans Half Dollar Set. (Total: 3 Coins)** Ex: S.S. Republic. This lot includes: 1861-O — Shipwreck Effect — NGC Details, XF, WB-103, Die Pair-13, R.2 (CSA Issue); 1861-O — Shipwreck Effect — NGC Details, Unc, WB-101, Die Pair 8 (LA Issue); 1860-O — Shipwreck Effect — NGC Details, Unc, WB-101, Die Pair 4 (USA Issue). All three NGC-certified items are housed in separate holders within a rosewood presentation case with slipcover. Certificate of authenticity included. This set is in like-new condition with all of its original packing. (Total: 3 coins)

**3978 1861-O WB-101, Die Pair 9, R.2, AU55 NGC.** A CSA issue, this example showing bright surfaces with remnants of luster in the fields. The central devices are well-detailed, showing slight friction over the high points of the figure. Die erosion around the reverse periphery is consistent with the late state of this variety. After the Civil War, the New Orleans Mint resumed operations in 1879, but half dollars were not coined again until 1892 with the Barber design. PCGS# 572146 Base PCGS# 6303

**1861-O Seated Half, MS63 Prooflike  
WB-101, Louisiana Issue**

**3979 1861-O WB-101, Die Pair 4 Louisiana Issue, R.2, MS63 Prooflike NGC.** Louisiana Issue. Half dollars were struck under three different authorities in 1861: the United States government (Union), the State of Louisiana, and the Confederacy. The Union issues are by far the rarest of the three, and the Confederate varieties are the most available. Louisiana issues fall in between in terms of overall availability. This Select Uncirculated example is rare for a Louisiana variety by virtue of its NGC-recognized prooflike surfaces. Struck from an early state of the dies (confirmed by a small tine from the top serif of the first 1 in the date as well as bolder-than-usual drapery and foot support definition), the fields and devices display attractive gold and sky-blue toning with only minor marks and lines for the assigned grade. An overall sharp strike shows a touch of blending on stars 7 and 8 as well as Liberty's topmost hair strands. Census (all varieties): 1 in 63 Prooflike, 1 finer (1/16). PCGS# 572146 Base PCGS# 6303

**3980 1863-S Small Broken S, WB-102, Die Pair 3, R.3, MS62 PCGS.** The date is positioned far to the left, confirming the variety. The Small S mintmark is partially broken at the upper loop, positioned vertically below the feather tip. Several raised die lines above Liberty's head and shoulder are additional pick-up points for the variety. An untoned and lustrous example, with only a few minor marks. The strike is uniformly sharp except at Liberty's head and the surrounding stars 6, 7, and 8. Population (all varieties): 16 in 62, 42 finer (1/16). PCGS# 572157 Base PCGS# 6310

**1871-CC Seated Half, XF45  
Elusive in All Grades**

**3981 1871-CC WB-101, Die Pair 6, R.4, XF45 PCGS.** Boasting a low mintage of little more than 150,000 pieces, the 1871-CC half dollar is elusive in all grades. This Choice XF representative displays bright silver-gray surfaces with remnants of luster in the protected regions of the fields. Light wear over the high points of Liberty's figure is all that limits the grade. NGC ID# 646D, PCGS# 572196 Base PCGS# 6331

**3982 1871-S Very Small S, WB-102, Die Pair 2, R.3, MS62 NGC.** A new mintmark replaced the Small Wide S in 1871, with one of the variants being a Very Small S mintmark with a thick top, designated as WB-102 in the Wiley-Bugert reference. The present example of the WB-102 variety is a trifle weak at Liberty's hair detail and at a few of the star centers. A halo effect ("Longacre doubling") is apparent on some of the peripheral elements, while the obverse surfaces reveal pleasing rose-gray toning, and the reverse exhibits a more golden-gray tint. The coin is highly lustrous and only trivially abraded. Census: 7 in 62, 14 finer (1/16). Ex: *Long Beach Signature* (Heritage, 2/2005), lot 7073. NGC ID# C4X9, PCGS# 572199 Base PCGS# 6332

**1872-CC Half Dollar, XF45  
Better Carson City Date**

**3983 1872-CC WB-101, Die Pair 6, R.4, XF45 PCGS.** The 1872-CC half dollar is elusive in all grades and rare in Mint State. This Choice XF example remains accessible for the average collector, showing remnants of luster throughout bright silver-white surfaces. Light wear on the high points of Liberty and the eagle defines the grade. NGC ID# 64EJ, PCGS# 572203 Base PCGS# 6334

**3984 1877-CC Open Bud, Small CC, WB-101, Die Pair 2, R.5, AU58 PCGS.** A delightful example of this scarce Carson City variety, showing a bold strike with moderate luster in the fields. A brush of friction over the high points of Liberty's figure is all that precludes a Mint State designation. Both sides display mottled olive-gold toning. Housed in a first generation holder. PCGS# 572248 Base PCGS# 6356

**1877-CC WB-101 Half Dollar, MS63 Prooflike  
Sharply Struck, One of Three Certified**

**3985 1877-CC Open Bud, Small CC, WB-101, Die Pair 3, R.5, MS63 Prooflike NGC.** Type One Reverse. One of just three Prooflike examples graded by NGC, this ivory-toned example displays a full strike and distinctly reflective surfaces. Silver luster gleams beneath the faint gold patina. The Small CC with wide spacing determines the variety, since the prooflike obverse confirms by the date position only, with other obverse diagnostics minimized by the freshly polished dies. Given the often rough handling of and transport of Carson City half dollars (which were hard-used in the West), this Prooflike coin is a surprising treasure from the 1877-CC issue. Census: 2 in 63 Prooflike, 1 finer (1/16). PCGS# 572248 Base PCGS# 6356

**3986 1879 Closed Bud, WB-102, MS64 PCGS.** The combined effects of the Bland-Allison Act of 1878 and a glut of silver coins in commerce resulted a drastic cutback in Seated half dollar production starting in 1879, when just 4,800 business strikes plus 1,100 proofs were made. Coin dealers quickly hyped the low mintages, and many coins were speculatively put aside. This near-Gem example is partially prooflike with mottled lilac, blue, and gold toning. Well-struck on Liberty's head, the obverse stars, and at the eagle's leg and talons, a scattering of small marks across the softly lustrous surfaces determine the grade. NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

**1879 WB-102 Half Dollar  
Colorfully Toned Gem**

- 3987 1879 Closed Bud, WB-102, MS65 PCGS.** Iridescent surfaces are imbued with splashes of bluish-green and golden-tan with rainbow margins, especially on the reverse. The motifs are sharply struck and both sides are well-preserved with prooflike tendencies to achieve the Gem grade. The 1879 circulation strike has a mintage of just 4,900 pieces. NGC ID# 24KS, PCGS# 572260 Base PCGS# 6361

**PROOF SEATED HALF DOLLARS**

**1863 Half Dollar, Originally-Toned PR64+  
Only 460 Proofs Struck**

- 3988 1863 PR64+ NGC.** Viewed at the proper angle, this nicely mirrored proof reveals olive-gold and lilac-gray toning dispersed across the obverse, with more colorful hues of blue, pink, and bluish-gray on the reverse. The coin is sharply struck, with a small planchet flaw near the right (facing) wing but outstanding natural appeal. Census: 29 in 64 (4 in 64+), 23 finer (1/16). NGC ID# 27TP, PCGS# 6417
- 3989 1869 PR64 Cameo NGC. WB-101.** Razor-sharp definition is evident on all the design elements of this attractive Choice specimen and the deeply mirrored fields contrast boldly with the frosty devices. The well-preserved surfaces show a few highlights of pale gold and amber toning. Census: 3 in 64 Cameo, 7 finer (11/15). NGC ID# 27U4, PCGS# 86427

**1877 Seated Liberty Half Dollar, PR66  
Tied for Finest at PCGS**

- 3990 1877 PR66 PCGS. WB-103.** From a tiny mintage of just 510 pieces, the 1877 proof Seated Liberty half dollar is a prime condition rarity at the Premium Gem level. This delightful specimen is sharply detailed in most areas, with just a touch of the usual softness on the eagle's claw. The surfaces are well-preserved, with deeply reflective fields and attractive shades of greenish-gold and cerulean-blue toning. Population: 3 in 66, 0 finer (1/16). NGC ID# 27UC, PCGS# 6438

- 3991 1880 PR64 PCGS. WB-102.** This nearly untoned proof displays a few gold highlights, with silver-mirrored surfaces that are strongly contrasted with frosted devices. Housed in an early blue label holder, PCGS did not recognize the Cameo designation on Seated halves until later holder generations. A few light lines define the near-Gem proof grade. The coin is sharply struck with generous eye appeal. NGC ID# 27UF, PCGS# 6441

- 3992 1881 PR64 PCGS. CAC. WB-101.** A crisply struck and beautifully toned Choice specimen of this later Seated half issue, displaying blue-green, rose, and orange on the obverse with deeper plum shades on the reverse. CAC endorsed. One of only 975 pieces coined, PCGS has graded 40 finer examples (1/16). NGC ID# 27UG, PCGS# 6442

**BARBER HALF DOLLARS**

- 3993 1892-S MS64 PCGS.** Attractive shades of golden-brown and magenta toning enliven the well-preserved surfaces of this impressive Choice example from the first year of the Barber design. The design elements are sharply detailed and satiny mint luster shines through the patina. Population: 33 in 64 (1 in 64+), 17 finer (1/16). NGC ID# 24LJ, PCGS# 6464

- 3994 1893 MS64 PCGS Secure.** A few hints of champagne-gold and violet toning enhance the outstanding eye appeal of this attractive Choice specimen, with sharply detailed design elements and well-preserved lustrous surfaces. Population: 37 in 64 (2 in 64+), 33 finer (1/16). NGC ID# 24LK, PCGS# 6465

- 3995 1893-O MS64 PCGS.** Dusky shades of stone-gray, lavender, and golden-brown toning visit the lightly marked surfaces of this pleasing Choice example, with satiny mint luster underneath. The design elements are well-detailed, with just a touch of the usual softness on the shield point and eagle's claw. Population: 43 in 64 (1 in 64+), 9 finer (12/15). NGC ID# 24LL, PCGS# 6466

- 3996 1893-S AU53 PCGS.** The 1893-S is a semikey issue usually seen in heavily circulated grades. Problem-free AU examples are rare. This steel-gray representative displays glimpses of tan and gold toning. Substantial luster rolls across unblemished and lightly worn surfaces. NGC ID# 24LM, PCGS# 6467

- 3997 1899 MS64+ PCGS.** A prooflike near-Gem with delicate almond-gold toning and a bold strike. The moderately mirrored surfaces display only minimal marks. A tiny spot is noted on the center of the right (facing) wing. Population: 54 in 64 (2 in 64+), 37 finer (1/16). NGC ID# 24M6, PCGS# 6483

**3998 1901 MS64 NGC.** Splashes of navy-blue and lavender-red overlaid lustrous pearl-white surfaces. A sharply struck and unmarked Barber type coin. The 1901 is plentiful in well-circulated condition but Choice Uncirculated examples are surprisingly scarce. Census: 36 in 64 (1 in 64+), 16 finer (11/15). NGC ID# 24MC, PCGS# 6489

**3999 1902-S AU55 PCGS. CAC.** As with most S-mint issues from the turn of the century, the 1902-S Barber half dollar was circulated widely, and few examples were saved by collectors. Satin luster and golden-gray surfaces with hints of rose appear on this Choice AU representative. Population: 10 in 55, 54 finer (1/16). NGC ID# 24MH, PCGS# 6494

**4000 1903-S MS62 PCGS.** Glimpses of forest-green toning cling to the borders, but this coruscating half dollar is mostly white. The strike is sharp and the reverse is well preserved. The portrait and right obverse field display minor contact. NGC ID# 24ML, PCGS# 6497

**4001 1905-O AU55 PCGS.** This is a partially lustrous Choice About Uncirculated representative with entirely untuned surfaces. The design elements are well-struck and show an expected amount of light friction over the high points. A low-mintage date in the Barber half dollar series. NGC ID# 24MS, PCGS# 6502

### 1905-O Half Dollar, MS65 Better New Orleans Issue

**4002 1905-O MS65 PCGS. CAC.** Most issues in the Barber half series become conditionally rare in MS65, even otherwise common dates. The 1905-O is no exception. With a low mintage of 505,000 pieces, it is also a better date in the absolute sense. This CAC-endorsed Gem is well-preserved with light golden toning. The eagle's right (facing) wing junction shows some of the expected softness. Population: 13 in 65 (1 in 65+), 10 finer (1/16). NGC ID# 24MS, PCGS# 6502

**4003 1907-O MS65 PCGS.** From a large mintage of nearly 4 million pieces, the 1907-O Barber half dollar is surprisingly difficult to locate at the Gem level. To date, PCGS has certified only 15 examples in MS65 (one in MS65+) with nine finer, while NGC has graded 17 specimens at the Gem level and seven finer (12/15). The present coin is sharply struck, save for minor softness on the eagle's lower feathers. Soft gold-tan patina is imbued with hints of gray and green.  
*Ex: Long Beach Signature (Heritage, 6/2010), lot 786.* NGC ID# 24N2, PCGS# 6510

**4004 1908-O MS64 PCGS.** The strike is rather meticulous throughout both sides of this near-Gem Barber half dollar, including full radials on all stars and limited weakness even at the problematic area of the reverse — the upper-right shield stripes and the right-top eagle's wing nearby, both of which show far more detail than usual (and especially for an O-mint strike). Light golden-gray toning deepens to occasional tinges of pale charcoal on this difficult date. Population: 77 in 64, 71 finer (12/15). NGC ID# 24N6, PCGS# 6514

**4005 1908-O MS64 PCGS. CAC.** An available Barber half dollar for type purposes, the 1908-O often comes with excellent eye appeal as well. This Choice example displays a bold strike and frosty luster. Warm golden toning spans each side but is slightly deeper on the obverse. CAC-endorsed and within the grasp of many collectors. NGC ID# 24N6, PCGS# 6514

### 1908-O Half Dollar, Vivid MS66

**4006 1908-O MS66 NGC.** Vivid patina in shades of wine, rose, and amber decorate both sides of this conditionally elusive Premium Gem 1908-O Barber half dollar. Marks are minimal and scattered, save for a sole nick at the corner of Liberty's mouth. Finer examples of this issue seldom appear, as the population data attest. Census: 8 in 66, 5 finer (11/15). NGC ID# 24N6, PCGS# 6514

**4007 1910 MS63 PCGS.** Dusky golden-gray luster blankets each side, while the devices are boldly struck and there are no singularly mentionable abrasions. An undeniably original example of this conditionally elusive Philadelphia issue in a grade that is within the grasp of budget-conscious collectors. NGC ID# 24NB, PCGS# 6519

**4008 1912-D MS64+ NGC.** This Plus-graded Choice specimen possesses outstanding eye appeal to complement its high technical quality. The design elements are sharply detailed, except for a few star centers, and the well-preserved brilliant surfaces radiate vibrant mint luster. NGC ID# 24NH, PCGS# 6525

## PROOF BARBER HALF DOLLAR

**4009 1895 PR65 NGC.** Chalk it up to the vagary of numismatics that this 1895 proof half dollar has the identical mintage to the 1895 Morgan dollar proof issue, yet its value in Gem condition is at least 2,000 times less. A few delicate hairlines are microscopic and non-distracting, and the strike is amazingly full on the eagle. An untuned, brilliant proof — lightly contrasted — of full Gem quality. NGC ID# 24NX, PCGS# 6542

## WALKING LIBERTY HALF DOLLARS

**4010 1916-D MS64+ PCGS. CAC.** Blended cream-gray and chestnut-gold toning enriches lustrous and unblemished surfaces. The patina is consistent across both sides. A nicely struck and original first-year branch mint near-Gem. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

**4011 1917-D Reverse MS62 PCGS.** An impressively bold strike and mattelike luster deliver exceptional eye appeal for the grade on this Mint State 1917-D Reverse Mintmark half dollar. The surfaces are unusually smooth for the MS62 level and display lovely champagne toning. NGC ID# 24PS, PCGS# 6571

**4012 1917-S Reverse MS63 PCGS.** A lustrous stone-white Select half dollar that has a surprisingly unabraded appearance. The strike is good aside from slight blending on the central skirt lines and the center of Liberty's head. NGC ID# 24PU, PCGS# 6573

**1917-S Half Dollar, MS64  
Reverse Mintmark**

- 4013 1917-S Reverse MS64 PCGS.** Mottled olive-gold and blue-gray toning covers much of this Choice 1917-S Reverse Mintmark half dollar, while the underlying surfaces are free of major abrasions. As often seen on this issue, Liberty's figure and the central eagle's feathers display moderate strike weakness. Finer examples are scarcely seen. NGC ID# 24PU, PCGS# 6573

**1920-S Walking Liberty Half Dollar, MS64  
Very Scarce Any Finer**

- 4014 1920-S MS64 PCGS.** From a mintage of 4.6 million pieces, the 1920-S Walking Liberty half dollar is available in circulated grades, but Mint State examples are elusive. This attractive Choice example displays well-detailed design elements, with some of the usually seen softness on the wreath hand and the eagle's leg. The well-preserved surfaces exhibit delicate shades of golden-brown toning, with satiny mint luster underneath. NGC ID# 24R5, PCGS# 6582

- 4015 1927-S AU58 PCGS.** The 1927-S is a slightly better date, being the only issue struck at any mint for the year. This nearly Uncirculated example displays a trace of light golden toning over mostly lustrous surfaces. The strike is well-executed, and there are no significant abrasions. NGC ID# 24RA, PCGS# 6587

**1928-S Walking Liberty Half Dollar, MS64  
Elusive Issue in High Grade**

- 4016 1928-S MS64 PCGS.** From a smallish mintage of 1.9 million pieces, the 1928-S Walking Liberty half dollar becomes quite scarce at the MS64 grade level. This attractive Choice example displays well-detailed design elements, with just a touch of the usual softness on the wreath hand and eagle's leg. The well-preserved fields radiate vibrant mint luster, with a few hints of greenish-gold toning. NGC ID# 24RB, PCGS# 6588

- 4017 1929-D MS64 PCGS. CAC.** A precisely struck Choice 1929-D half dollar with distinctly original "skin." Both sides display frosty luster with hints of ice-blue and champagne toning throughout. A few scattered ticks are consistent with the grade and pose little distraction. NGC ID# 24RC, PCGS# 6589

**1929-S Half Dollar, Frosty MS65**

- 4018 1929-S MS65 PCGS.** The year 1929 was a curiosity for Walking Liberty half mintage: None were struck in Philadelphia, but around 1 million were struck in Denver and more than 1.9 million in San Francisco. Most examples of the latter circulated for a while, some extensively. This Gem is a pleasing exception, a frosty silver-white coin with a trace of a rounded thumb and generous detail on the olive branch. The eagle is sharply brought up on the reverse, and few marks show on either side. PCGS reports only 47 at the MS66 level and one each in MS66+ and MS67 (12/15). NGC ID# 24RD, PCGS# 6590

- 4019 1934-D MS65 PCGS.** Small D. Ice-blue and almond-gold toning visit this minimally abraded and lustrous Great Depression Gem. The strike is good and the eye appeal is superior for the designated grade. NGC ID# 24RG, PCGS# 6593

- 4020 1937-S MS66+ PCGS. CAC.** Few finer 1937-S Walkers are certified. This Plus-graded Premium Gem displays impressively sharp detail and frosty luster that is cast in warm champagne toning. A lack of bothersome abrasions confirms the lofty grade. PCGS shows 35 Superb Gems finer (1/16). NGC ID# 24RT, PCGS# 6603

- 4021 1938-D MS65 PCGS. CAC.** This well-detailed Gem shows some emerging detail on Liberty's wreath hand and the virtually pristine surfaces radiate vibrant mint luster on both sides. A few delicate hints of pale gold toning add to the outstanding visual appeal. NGC ID# 24RV, PCGS# 6605

- 4022 1938-D MS65 NGC. CAC.** Ex: Stack's West 57th Street Collection. Dappled autumn-brown and silver-gray toning embraces the obverse. The reverse is comparatively brilliant. The 1938-D has by far the lowest mintage of any post-1921 issue. Marks are impressively few, and limited to a tick on the center of Liberty's head. NGC ID# 24RV, PCGS# 6605

**1938-D Half Dollar, MS66+  
Rich, Luminous Luster**

- 4023 1938-D MS66+ PCGS. CAC.** Glowing, frosty mint luster delivers spectacular eye appeal on this high-end Premium Gem 1938-D Walker. The strike is bold, and the surfaces exhibit a trace of light champagne color. Few finer representatives are certified, including 42 at PCGS (1/16). The '38-D is a famous semikey, although it is more available in high grade than some earlier low-mintage dates. NGC ID# 24RV, PCGS# 6605

**4024 1939-D MS67 PCGS. CAC.** Light ice-blue and olive-green toning graces this lustrous and essentially pristine Superb Gem. Liberty's head and skirt lines are well struck. Certified in a green label holder. Population: 85 in 67 (4 in 67+), 2 finer (1/16). NGC ID# 24RX, PCGS# 6607 Base PCGS# 6607

**4025 1943 MS67+ PCGS. CAC.** Honey-gold and aquamarine toning visits this thoroughly lustrous and well struck Superb Gem. The obverse is pristine and the obverse exhibits only unimportant contact. PCGS has graded a mere eight pieces finer (1/16). NGC ID# 24S9, PCGS# 6618

**4026 1944 MS67 PCGS. CAC.** Freckles of peach-gold and jade-green adorn this virtually pristine type representative. Lustrous and nicely struck with original and exceptional eye appeal. CAC Population: 62 in 67, none finer (1/16). NGC ID# 24SC, PCGS# 6621

**4027 1944 MS67 PCGS. CAC.** A pristine Superb Gem that boasts dynamic luster and a good strike. STATES OF displays glimpses of jade-green and tan-gold toning, but the remainder of the coin is brilliant. The fields display a subtle orange-peel texture, as made from long-in-use dies. NGC ID# 24SC, PCGS# 6621

**4028 1946-D MS67 PCGS.** Scarce at the MS67 grade level, the 1946-D Walking Liberty half is unknown in MS68. This outstanding representative displays beautifully preserved, frosty luster beneath a blanket of warm golden toning. Partial thumb separation is visible on Liberty's branch hand. Population: 79 in 67 (2 in 67+), 0 finer (12/15).

*Ex: Central States Signature (Heritage, 4/2015), lot 4690, which brought \$1,528. NGC ID# 24SK, PCGS# 6628*

**4029 1946-S MS67 PCGS. Fox-102.** Trumpet tail S. The mintmark is lightly but widely repunched northwest. Brilliant and lustrous with immaculate fields and a nice strike. Unobtrusive contact on the extended arm determines the grade. Population: 67 in 67 (4 in 67+), 0 finer (1/16). NGC ID# 24SL, PCGS# 6629

## PROOF WALKING LIBERTY HALF DOLLARS

**1937 Walker, PR67+**  
Lightly Toned, Few Finer

**4030 1937 PR67+ PCGS. CAC.** Deeply reflective fields deliver much of the eye appeal on this high-end Superb Gem proof Walker, cast in soft tan-gold toning that deepens toward the peripheries. The strike is sharp, and there are no marks or discernible hairlines. PCGS has seen 10 finer submissions (1/16). NGC ID# 5ESS, PCGS# 6637

## 1940 Walking Liberty Half, PR68 Excellent Registry Set Contender

**4031 1940 PR68 PCGS.** The all-brilliant finish used on proofs of this era limits the field-device contrast, but this magnificent PR68 example displays fully struck design elements and deeply mirrored fields throughout. A few hints of greenish-gold and cerulean-blue toning add to the terrific eye appeal. Population: 35 in 68 (2 in 68+), 0 finer (1/16). NGC ID# 27V8, PCGS# 6640

## FRANKLIN HALF DOLLARS

**4032 1948-D MS66+ Full Bell Lines PCGS. CAC.** Rich plum-mauve, autumn-brown, and jade-green encompass the majority of this lustrous and crisply struck first-year Franklin half. Remarkably devoid of contact, and practically unobtainable any finer. NGC ID# 2549, PCGS# 86652

**4033 1949-D MS66 Full Bell Lines PCGS.** Shades of amber, golden-brown, and lavender-gray toning blanket the well-preserved surfaces of this impressive Premium Gem, with well-detailed design elements and the coveted Full Bell Lines designation. Population: 70 in 66 (5 in 66+) Full Bell Lines, 0 finer (1/16). NGC ID# 5HWE, PCGS# 86654

**4034 1950-D MS66 Full Bell Lines PCGS.** The surfaces are white and show powerful luster on this nicely preserved Premium Gem Franklin half. The strike is impressive and the Full Bell Lines designation well-deserved. Population: 84 in 66 (12 in 66+) Full Bell Lines, 0 finer (1/16). NGC ID# 24SX, PCGS# 86657 Base PCGS# 86657

**4035 1950-D MS66 Full Bell Lines PCGS. CAC.** This CAC-endorsed Premium Gem is among the finest 1950-D Franklin halves certified. Full Bell Lines denote a bold strike, while the frosty, champagne-toned surfaces are free of significant abrasions. Population: 84 in 66 (12 in 66+) Full Bell Lines, 0 finer (1/16). NGC ID# 24SX, PCGS# 86657 Base PCGS# 86657

**4036 1953-D MS66+ Full Bell Lines PCGS. CAC.** Lovely pastel shades of sun-gold, sea-green, lilac, and pearl-gray endow this highly lustrous and well struck half dollar. Delicate contact on the field above the date denies an even finer grade. NGC ID# 24T7, PCGS# 86665

**4037 1958 MS66+ Full Bell Lines PCGS. Gold CAC.** Type One Reverse. Dappled lavender-red, forest-green, orange-gold, and pearl-gray toning bathes this lustrous and pristine representative. As of (1/16), the present lot is the **only** 1958 Full Bell Lines half dollar with a Gold CAC seal. NGC ID# 24TH, PCGS# 86674

**4038 1960 MS66 Full Bell Lines PCGS. CAC.** An outstanding Premium Gem example with the desirable Full Bell Lines designation from PCGS. The clean, well-preserved surfaces display mottled patina that turns to multicolored iridescence near the peripheries. Conditionally scarce. Population: 64 in 66 (2 in 66+) Full Bell Lines, 0 finer (1/16). NGC ID# 5H6J, PCGS# 86678

**1962-D Half Dollar  
MS66 Full Bell Lines**

- 4039 1962-D MS66 Full Bell Lines PCGS.** Narrow bands of orange-red and olive-green accompany the right obverse periphery, but the rest of this lustrous and nicely struck example remains brilliant. Minor marks on the bell and fields merit only passing mention. Although available at the MS64 level, this issue is surprisingly rare as a Premium Gem. Population: 25 in 66 (1 in 66+) Full Bell Lines, 0 finer (1/16). NGC ID# 24TS, PCGS# 86683

**1962-D Franklin Half Dollar, MS66  
Rare Full Bell Lines Example**

- 4040 1962-D MS66 Full Bell Lines PCGS. CAC.** Like most of the dates from the early '60s in the Franklin half dollar series, the 1962-D is rarely encountered in MS66 condition, with the Full Bell lines designation. This attractive Premium Gem exhibits well-detailed design elements and impeccably preserved, lustrous surfaces, with a few hints of greenish-gold toning. Population: 25 in 66 (1 in 66+) Full Bell Lines, 0 finer (1/16). NGC ID# 24TS, PCGS# 86683

**PROOF FRANKLIN HALF DOLLARS**

**1950 Franklin Half, PR66 Cameo**

- 4041 1950 PR66 Cameo NGC. CAC.** A few tiny golden-brown and steel-blue freckles visit the right reverse margin, but the remainder of this satiny specimen is brilliant. Frost on the portrait and bell confirms the coveted Cameo designation. Census: 56 in 66 Cameo (1 in 66+ Cameo, 4 in 66 ★ Cameo), 15 finer (11/15). NGC ID# 27VA, PCGS# 86691

- 4042 1951 PR67 NGC. CAC.** This CAC-endorsed Registry coin possesses bold eye appeal through gleaming fields and sharp, satiny devices. A few hints of golden toning emerge from the peripheries, warming the modestly contrasted interiors. Only 10 PR68 non-Cameo proofs are finer at NGC (1/16). NGC ID# 27VB, PCGS# 6692

- 4043 1954 PR68 Cameo PCGS.** The sharply detailed, richly frosted design elements of this magnificent PR68 specimen contrast intensely with the flawless, deeply mirrored fields. Full definition shows on the bell lines and eye appeal is incredible. Population: 41 in 68 Cameo, 0 finer (1/16). NGC ID# 27VE, PCGS# 86695

- 4044 1959 PR68 Cameo NGC.** A brilliant and high-grade specimen that has glassy fields and evident frost throughout the portrait, bell, and eagle. The surfaces are smooth save for a tiny flake out of Franklin's forehead. NGC ID# 27VJ, PCGS# 86700

**KENNEDY HALF DOLLARS**

- 4045 1964 MS67 PCGS.** Type Two Reverse. Light caramel-gold toning graces this sharply struck, well preserved, and thoroughly lustrous Superb Gem. The margins offer glimpses of apple-green patina. Population: 42 in 67 (2 in 67+), 0 finer (1/16). NGC ID# 27WH, PCGS# 6706

**1967 Kennedy Half Business Strike, MS67  
'Picasso Color' and Impeccable Preservation**

- 4046 1967 MS67 PCGS.** The 1967 business strike (not Special Mint Set-SMS) Kennedy half issue is seldom seen even in MS65, much less MS66 or MS67. These coins were made by the hundreds of millions and jostled about and circulated extensively as the 90% silver 1964 Kennedys were being kept, treasured, and generally withdrawn from circulation — "bad money driving out the good." Guess which issue is rare today in high grade? This example has been described as having "Picasso color," and that is as good a moniker as any for the stunning but unusual toning pattern of jade, gold, fire-red, orange, and untuned silver areas with impeccable preservation. NGC ID# 24WJ, PCGS# 6710

- 4047 1982-P MS67 PCGS.** Attractive ruby-red, apple-green, wheat-gold, and ice-blue toning graces the obverse field and border. The portrait is cream-gray. The reverse displays similar patina but the shades are comparatively muted. A lustrous and immaculate Superb Gem. NGC ID# 24UY, PCGS# 6741

**PROOF KENNEDY HALF DOLLAR**

- 4048 1964 Accented Hair, FS-401, PR66 Deep Cameo PCGS.** Type One Reverse. The scarce introductory proof type with deeply incised hair detail above the ear. This piece is beautiful and prominently mirrored specimen. Brilliant save for a few blushes of autumn-gold toning on the high points. PCGS# 145627 Base PCGS# 96801

**End of Session Two**

# SESSION THREE

## EARLY DOLLARS

- 4049** 1795 Flowing Hair, Two Leaves, B-4, BB-14, R.4 — Obverse Scratched — NGC Details. Good. Three straight thin marks near the final star correspond to the NGC designation. A stone-gray and chestnut-gold silver dollar with moderately hairlined surfaces. All legends are fully readable, although UNITED STATES OF is faint. A better Bolender variety. NGC ID# 24WZ, PCGS# 39981 Base PCGS# 6853
- 4050** 1796 Large Date, Small Letters, B-5, BB-65, R.2 — Damage — PCGS Genuine. VF Details. Bowers Die State IV. The large die break between the IC in AMERICA allows arms-length attribution of this cream-gray Small Eagle dollar. The obverse is minutely granular and the reverse has a slightly blurry appearance. The central portrait displays a few tiny arc-shaped counterstamps, and marks are noted near the left-side obverse stars and the D in UNITED. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861
- 4051** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, Good 4 NGC. Pearl-white high points contrast with charcoal-gray fields. The date and LIBERTY are bold. The reverse legends are partial. The portrait displays scattered tiny marks, and thin field lines are noted below the hair ribbon and east of Liberty's mouth. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865
- 4052** 1798 Large Eagle, Pointed 9, 10 Arrows, B-13, BB-108, R.2 — Cleaning — PCGS Genuine. VF Details. Bowers Die State II. A moderately glossy Heraldic Eagle dollar with steel-gray fields and tan-brown high points. Noticeable marks are limited to a hair-thin line between the left wingtip and the T in UNITED. The slender radial break near the L in LIBERTY is usual for the B-13 variety. NGC ID# 24X6, PCGS# 40025 Base PCGS# 6876
- 4053** 1798 Large Eagle, Pointed 9, B-11, BB-111, R.3 — Cleaning — PCGS Genuine. VF Details. Bowers Die State VII. The retained die break across the final obverse star provides an immediate identifier for the relatively scarce Bolender-11. The lightly hairlined surfaces gunmetal-gray surfaces exhibit navy-blue and tan-brown undertones. A minor rim mark at 1:30. Struck a few degrees off center toward 11:30, unusual for a silver dollar of any type. NGC ID# 24X6, PCGS# 40028 Base PCGS# 6873

1798 Large Eagle, Pointed 9 Dollar  
Rare B-26, BB-114 Dies, AU Sharpness

- 4054** 1798 Large Eagle, Pointed 9, Close Date, B-26, BB-114, R.5 — Cleaning — PCGS Genuine. AU Details. Bowers Die State III, showing a small die crack on the reverse rim above the second T in STATES. The 1798 Large Eagle, Pointed 9, BB-114 dies are rare, although Bowers' second-edition reference cites five coins from AU53 NGC, the Warren Miller specimen, to MS61 PCGS, the Pittman coin. The reverse die is readily identified by the heavy die crack through the tail and the star pointing to the second U in PLURIBUS. An AU example such as this lightly cleaned example is quite a find for early dollar specialists and should see active bidding. The surfaces are retoning nicely, although a carbon spot shows at the rim above the Y in LIBERTY. NGC ID# 24X6, PCGS# 40031 Base PCGS# 6873

- 4055** 1799 7x6 Stars, B-16, BB-158, R.2, VF25 PCGS. Bowers Die State IV with many heavy obverse cracks. Deep gunmetal-gray and olive-green embraces this early dollar, although the portrait high points are stone-white. A problem-free Draped Bust type coin. The obverse border displays minor mint-made adjustment marks. The dies were misaligned, causing softness on LIBER and the U in UNITED. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878
- 4056** 1799 7x6 Stars, B-9, BB-166, R.1 — Improperly Cleaned — NGC Details. VF. Bowers Die State II. The "Apostrophe" variety, named after the die break northeast of the second S in STATES. This midgrade example displays steel-gray toning throughout protected areas. The portrait and obverse field are pearl-white. The obverse displays a few thin marks and is mildly bright from a wipe. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878
- 4057** 1800 Wide Date, Low 8, B-10, BB-190, R.3 — Cleaning — PCGS Genuine. VF Details. Bowers Die State VI with multiple cracks through the C in AMERICA, although the crack from the U in UNITED (Die State V) is absent. This midgrade early dollar has a hairlined and moderately bright obverse. The reverse and lower obverse display medium autumn-brown toning. A thin vertical mark is noted on the portrait. NGC ID# 24X9, PCGS# 40076 Base PCGS# 6888
- 4058** 1801 B-3, BB-213, R.3 — Improperly Cleaned — NGC Details. VF. Bowers Die State II. Light powder-blue and butter-gold toning visits this mostly white early dollar. The surfaces are mildly bright and show granularity on the field near Liberty's chin. Surprisingly free from abrasions. NGC ID# 24XA, PCGS# 40085 Base PCGS# 6893
- 4059** 1802/1 Wide Date, B-3, BB-234, R.3 — Improperly Cleaned — NGC Details. VF. Bowers Die State II. An attractive pearl-white Heraldic Eagle dollar. The surfaces are mildly luminous but show only incidental marks. Traces of luster glimmer from design recesses. B-3 is readily attributed by the die lump in the field above Liberty's nose. NGC ID# 24XC, PCGS# 40094 Base PCGS# 6899
- 4060** 1803 Large 3, B-6, BB-255, R.2 — Damaged — NGC Details. VF. Bowers Die State III. A stone-gray early type coin. All letters in PLURIBUS are at least partly present, and the wings display considerable plumage definition. No marks are of any relevance. Portions of the coin are granular, including the fields near the shoulder curl, the LIB in LIBERTY, the arrowheads, and the TES in STATES. NGC ID# 24XD, PCGS# 40101 Base PCGS# 6901

## SEATED DOLLARS

- 4061** 1842 AU58 NGC. Just a trace of wear shows on the well-detailed design elements of this attractive near-Mint example and the lightly abraded surfaces show pleasing shades of lavender-gray, blue-steel, and golden-brown toning, with traces of original mint luster underneath. NGC ID# 24YC, PCGS# 6928
- 4062** 1843 MS61 PCGS. The issue's availability in circulated grades belies its rarity in Mint State. This steel and gunmetal-gray MS61 Seated dollar exhibits the usual strike softness over the upper stars, Liberty's head, and the eagle's wingtips, but design detail is otherwise pleasing. Lightly marked and semireflective. NGC ID# 24YD, PCGS# 6929
- 4063** 1846-O AU55 PCGS. Seated dollars were struck in New Orleans on a very limited and sporadic basis. The 1846-O is the debut issue from the Southern facility, and its coinage amounted to only 59,000 pieces. This Choice AU example displays virtually complete detail but with a trace of friction that precludes Mint State status. The surfaces are bright and partially reflective with minimal abrasions. Population: 26 in 55, 39 finer (12/15). NGC ID# 26GG, PCGS# 6933

**4064 1849 AU58 PCGS.** The mintage of 62,600 pieces actually circulated domestically for a time, but the discovery of gold and the rapid change in the 16 to 1 ratio value of gold to silver dropped to the point where silver dollars were worth more than their gold dollar brethren. Silver was hoarded, exported, and eventually melted. Even so, the 1849 issue is available in the context of the series. This near-Mint example has a touch of wear but surfaces that are of higher quality than many fully Mint State coins. Attractive and glossy brownish-gold patina covers both sides, with sharply defined motifs and only a few light marks. NGC ID# 24YL, PCGS# 6936

#### 1849 Seated Dollar, Toned MS62

**4065 1849 MS62 NGC.** This broad-rimmed 1849 Seated dollar is boldly struck, with rich, satiny luster illuminating dusky amber-gray toning over each side. The surfaces are unusually smooth, considering the grade. The 1849 is a slightly better date in comparison to the frequently seen 1841 to 1843 issues, and is notably elusive in Mint State. Census: 18 in 62, 37 finer (11/15). NGC ID# 24YL, PCGS# 6936

#### 1870-CC Dollar, Midgrade VF35 Largely Untoned Surfaces

**4066 1870-CC VF35 NGC.** This midgrade 1870-CC dollar is largely untoned and shows the moderate wear expected for the grade on silver-white surfaces. A scattering of minor contact marks congregate on each side, but major abrasions are few. This coin is in about an average grade for the certified survivors of this issue, which are usually seen in the VF35-XF40 range. Slightly more than 12,400 pieces were originally struck. NGC ID# 24ZE, PCGS# 6964

**4067 1872-CC — Improperly Cleaned — NGC Details. Fine.** Lightly cleaned beneath pewter-gray toning, this 1872-CC dollar displays smooth surfaces and pleasing detail for the Fine level. A small rim bump near the second A in AMERICA is the only other flaw. This Carson City issue had a mintage of only 3,150 pieces and is highly sought-after in all grades. NGC ID# 24ZK, PCGS# 6969

#### 1872-CC Seated Dollar, XF Details Pleasing Color

**4068 1872-CC — Improperly Cleaned — NGC Details. XF.** This is a sharply detailed and visually pleasing 1872-CC dollar. The surfaces are unnaturally glossy due to past cleaning, but attractive golden-gray toning has since emerged over each side with hints of iridescence in the peripheral regions. This Carson City issue had a low mintage of 3,150 pieces and is highly sought-after in all conditions. NGC ID# 24ZK, PCGS# 6969

#### 1872-CC Dollar, AU Details Low-Mintage Issue

**4069 1872-CC — Artificial Toning, Cleaned — NGC Details. AU.** A boldly detailed example of this semikey Carson City issue — one of only four from this mint in the Seated dollar series. Moderately reflective fields are evident beneath the deep, mottled toning that blankets each side in lavender-gray, gold, and russet-olive hues. The 1872-CC had a small mintage of 3,150 coins, reflecting limited commercial demand for silver dollars in the Nevada territory in the early 1870s. NGC ID# 24ZK, PCGS# 6969

## PROOF SEATED DOLLARS

- 4070 1859 — Scratch — PCGS Genuine. Proof, Unc. Details.** Walter Breen believed that 350 of the 800 proofs struck were melted by the Mint in 1862. The net mintage of 450 pieces confirms the scarcity of the proof 1859 silver dollar. The present untoned specimen displays narrow streaks near the eagle's beak, from a misguided effort to remove traces of struck-in grease. NGC ID# 252D, PCGS# 7002

### 1863 Silver Dollar, PR62 Scarce Civil War Date

- 4071 1863 PR62 PCGS. CAC.** Medium lavender toning adorns the flashy fields of this precisely struck specimen. Smooth aside from a few ticks on the right obverse field. The seated Liberty and eagle exhibit consistent frost, although no Cameo designation is possible due to the first-generation holder. Just 460 proofs were issued for this Civil War date. NGC ID# 23BS, PCGS# 7006
- 4072 1871 PR58 NGC.** The reflective surfaces of this briefly circulated proof dollar are restrained by a speckling of bluish-gray toning and some busyness in the fields, but the wide, square rims are intact with a noticeable fin surrounding the outer edges on both sides. Sharp detail from the multiple proof strikes remain on the Liberty, the eagle, and on the peripheral elements. NGC ID# 252T, PCGS# 7019

### 1873 Seated Dollar, Final-Year Issue, PR62

- 4073 1873 PR62 NGC. CAC.** This modest-graded proof Seated dollar might provide a good entree into the proof issues of this series that might otherwise be obtainable. Much eye appeal is present on lightly toned surfaces despite some minor flecks and scattered hairlines. Only 600 were struck of this last-year Seated dollar issue. CAC: 5 in 62, 10 finer (1/16). NGC ID# 252V, PCGS# 7021

## TRADE DOLLARS

- 4074 1875-S Type One Reverse MS62 PCGS.** Large S. A brilliant and lustrous example. The strike is good, although the claws, toes, and curls show blending. The fields are lightly to moderately abraded. The usual 1875-S subtype with a berry below the right (facing) claw. NGC ID# 2536, PCGS# 510101 Base PCGS# 7039
- 4075 1876 Type One Obverse, Type Two Reverse, MS63 NGC.** Brilliant aside from a hint of almond-gold toning. Lustrous and nicely struck with a smooth reverse. The obverse field displays moderate grazes. A popular Centennial-year issue.  
*Ex: Houston Signature (Heritage, 12/2008), lot 883, which realized \$1,840.* NGC ID# 2539, PCGS# 40111 Base PCGS# 7041

## MORGAN DOLLARS

- 4076 1878 8TF Alligator Eye, VAM-14.1A, MS65 PCGS.** The usual clashed die state of VAM-14.1. Brilliant, fully struck, and lustrous. The portrait and the reverse are exceptionally free from marks, and the obverse field displays only incidental contact. An impressive example of the briefly coined eight tailfeather design subtype. PCGS# 133796 Base PCGS# 7072
- 4077 1878 8TF Diagonal In 8, VAM-17, MS65 PCGS.** This well-struck Gem has a prooflike obverse. The reverse exhibits vibrant cartwheel luster. Brilliant aside from a glimpse of peach toning on the margin near UNUM, and a few minuscule flecks on the lower reverse. The fields are smooth and the cheek display moderate grazes. NGC ID# 253H, PCGS# 133818 Base PCGS# 7072
- 4078 1878 7/8TF Weak, VAM-41A, MS65+ PCGS.** Fragments of four feathers are present below the seven tailfeathers. The centers of the wings are lapped. The present brilliant Gem has flashy semiprooflike surfaces. The strike is bold and the fields are refreshingly unabraded. Minor grazes on the portrait decide the grade. NGC ID# 2TY3, PCGS# 134038 Base PCGS# 7070
- 4079 1878 7TF Reverse of 1878 MS65+ PCGS. VAM-196.** Splendid arcs of rose-red, apple-green, and peach-gold toning dominate the upper left obverse. The remainder of the coin is stone-white aside from peripheral lemon-gold patina. Lustrous and well struck. LIBERTY and portions of PLURIBUS are nicely die doubled. Portions of the wings are absent due to a polished reverse die. NGC ID# 2TY3, PCGS# 7074
- 4080 1878-CC Lines in Wing, VAM-11, Top 100, MS64 Prooflike PCGS.** Numerous straight die lines are embedded in the eagle's wings. A popular first-year Carson City Morgan dollar variety. This flashy, brilliant, and crisply struck near-Gem is smooth aside from moderate contact on the left obverse field. VAM-11 Population: 6 in 64 Prooflike, 3 finer (1/16). NGC ID# 48VK, PCGS# 40437 Base PCGS# 7081
- 4081 1879 MS66 PCGS.** The centers of each side boast a satiny texture and silver-white color, the eye appeal amplified by attractive, thin rings of pale ice-blue and rose patina near the rims. Near-immaculate preservation accounts for the Premium Gem grade. NGC ID# 253S, PCGS# 7084
- 4082 1879 MS66 PCGS.** Gem 1879 Morgan dollars are readily accessible, but Premium Gems like the one offered here are decidedly scarce and virtually impossible to upgrade. All-brilliant surfaces gleam with cartwheel luster. Well-struck with a hint of blending over the ear, and predictably clean for the grade. NGC ID# 253S, PCGS# 7084

### 1879-O Dollar, Untoned Gem

- 4083 1879-O MS65 PCGS.** Liberty's cheek is smooth and rounded and nicely free of any significant contact, as are the high points of the eagle's breast on the reverse. This silver-white Gem shows a touch of strike weakness on the hair over the ear but is nonetheless a bit better-struck than most of the issue. An example at the Premium Gem grade level will entail a long and costly search; PCGS reports only 22 at that level (12/15). NGC ID# 253X, PCGS# 7090

- 4084 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. Lustrous and lightly toned with a good strike and well preserved fields. The cheek and the N in UNITED display moderate contact. A *Guide Book* variety due to its overdate and Second Reverse die combination. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108
- 4085 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS.** A Top 100 Variety. VAM-4 is the most prominent overdate of the Morgan dollar series. The variety is also significant for its obsolete reverse subtype, a characteristic shared with VAM-7. This lustrous Gem has light gold patina and essentially pristine fields. The cheek shows minor grazes. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108
- 4086 1880-CC 8 Over Low 7, VAM-6, MS65 PCGS. CAC.** A hint of golden patina denies full brilliance, but this lustrous Gem has unabraded fields and a nice strike. Minor facial grazes correspond to the grade. Three different prominent overdate varieties exist for the 1880-CC despite a comparatively low mintage. NGC ID# 2542, PCGS# 133878 Base PCGS# 7104
- 4087 1880-CC 8 Over Low 7, VAM-6, MS65 Prooflike PCGS.** A Top 100 Variety. Mirrored fields and frosty motifs provide uncommon eye appeal for this brilliant Carson City dollar. Marks are minimal and chiefly confined to the field near the arrowheads. Population: 31 in 65 (2 in 65+) Prooflike, 5 finer (1/16). NGC ID# 35BH, PCGS# 41135 Base PCGS# 7105
- 4088 1880-CC MS66 PCGS. VAM-9.** Vibrant, frosty luster and boldly rendered design elements give this Premium Gem 1880-CC Morgan exceptional eye appeal. The surfaces are untuned and show only a few trivial ticks on Liberty's cheek. PCGS lists 32 finer representatives (12/15). NGC ID# 2542, PCGS# 7100
- 4089 1880-O MS64 PCGS. CAC.** Small or micro O. Peach-red and caramel-gold toning adorns the borders of this otherwise pearl-gray Choice dollar. Lustrous and intricately struck with fewer marks than is customary for the MS64 level. NGC ID# 2543, PCGS# 7114
- 4090 1880-S MS67+ PCGS. CAC.** Medium S. The 1880-S will never be rare, but high grade examples are always in demand. The present Superb Gem is brilliant and thoroughly lustrous. The strike is intricate and the surfaces are impressively close to pristine. NGC ID# 2544, PCGS# 7118
- 4091 1881-CC MS66 PCGS.** Just 296,000 pieces were struck, although most still exist today thanks to the GSA sales that placed nearly half the mintage into collector hands — many in high grades. This Premium Gem example shows brief areas of golden-tan toning at the rims and thickly frosted fields and devices. The strike is razor-sharp. NGC ID# 2549, PCGS# 7126
- 4092 1881-CC MS66+ PCGS. CAC.** A high-end Premium Gem representative from a low mintage of 296,000 pieces, this delightful coin offers sharply detailed design elements and vibrant mint luster throughout, with impeccably preserved surfaces. NGC ID# 2549, PCGS# 7126
- 4093 1881-CC MS64 Deep Mirror Prooflike PCGS. VAM-2.** The reverse exhibits spectacular white-on-black contrast, and the portrait also exhibits moderate cameo frost. Brilliant, reflective fields provide imposing eye appeal. A small dab of struck-in grease is noted near the nose. NGC ID# 2547, PCGS# 97127
- 4094 1881-S MS67+ PCGS. CAC.** The virtually pristine surfaces of this high-end Superb Gem exhibit vibrant mint luster with a few hints of prooflike reflectivity at certain angles. The design elements are sharply detailed throughout, with incredible eye appeal. NGC ID# 2549, PCGS# 7130
- 4095 1881-S MS67+ PCGS. CAC.** This high-end Superb Gem exhibits razor-sharp definition on all design elements, with vibrant mint luster and well-preserved surfaces that show vivid shades of greenish-gold and cerulean-blue toning in selected areas. NGC ID# 2549, PCGS# 7130

**1881-S Dollar, MS68  
Incredible Obverse Toning**

- 4096 1881-S MS68 PCGS.** There are certain date and mintmark combinations that are known as “perfect for type.” And their reputation is well-deserved. In the case of the 1881-S it is an issue that is invariably found with clean surfaces, bright mint frost, a full strike, and bright semiprooflike fields. This particular coin adds to that already distinctive list a rich array of crimson and blue toning in irregular swirls of color on the obverse. This is the type of toning that brings multiples of what a brilliant 1881-S is worth. The interior of the reverse is brilliant with faint golden and blue rings of color around the margins. NGC ID# 2549, PCGS# 7130
- 4097 1882-CC MS66 Prooflike PCGS.** A spectacular Premium Gem from the famous Carson City Mint, with sharply detailed design elements and much prooflike reflectivity in the fields. No mentionable distractions are evident and eye appeal is terrific. Population: 99 in 66 (7 in 66+) Prooflike, 1 finer (1/16). NGC ID# 254B, PCGS# 7135
- 4098 1882-O/O VAM-7 MS65 PCGS. CAC.** A Top 100 Variety. The mintmark is widely repunched south. The lower obverse border displays vivid cherry-red, forest-green, and lemon toning. The remainder of this lustrous and smooth Gem is pearl-gray. Despite the New Orleans reputation for soft central strikes, the present Gem is fully brought up. Population: 9 in 65, 1 finer (12/15). NGC ID# 254C, PCGS# 133895 Base PCGS# 7136
- 4099 1882-S MS67 ★ NGC.** Remarkable bands of cherry-red, blue-green, lemon-gold, and powder-blue endow the obverse. The reverse displays similar shades but they are confined to the periphery. The central reverse is brilliant. Lustrous, nicely struck, and smooth save for a thin field mark near the nose. NGC ID# 254F, PCGS# 7140
- 4100 1883-CC MS66+ PCGS. CAC.** A high-end Premium Gem representative of this popular Carson City issue, with well-detailed design elements and vibrant, frosty mint luster on both sides. The brilliant surfaces are impeccably preserved and eye appeal is terrific. NGC ID# 254J, PCGS# 7144
- 4101 1883-CC MS66+ PCGS. CAC. VAM-7.** This exceptional Carson City Morgan boasts bold design definition and brilliant, nearly prooflike fields. Eye appeal is unrivaled for the Premium Gem level. Were it not for a few extremely faint grazes on Liberty's cheek and nose, this piece might have garnered a full MS67 grade. NGC ID# 254J, PCGS# 7144
- 4102 1883-S MS62 NGC.** A boldly struck, incredibly lustrous Mint State example of this better San Francisco issue. The reverse is beautifully preserved, the obverse displays light, scattered abrasions that define the grade. Eye appeal is outstanding for an MS62 coin. NGC ID# 254K, PCGS# 7148
- 4103 1883-S MS62 NGC.** A brilliant and lustrous representative of this conditionally challenging issue. Despite a mintage of 6,250,000 pieces, the 1883-S is scarce in Mint State. The present nicely struck example has smooth fields and displays fewer facial marks than anticipated for the MS62 level. NGC ID# 254K, PCGS# 7148
- 4104 1884-CC MS66+ PCGS. CAC. VAM-6.** One of several VAM varieties for this issue that exhibit minor repunched dates or mintmarks. Brilliant and highly lustrous with light die rust on the portrait. A popular Carson City type coin. NGC ID# 8BBF, PCGS# 7152

- 4105 1884-CC MS66+ PCGS. CAC. VAM-3.** The 18 in the date is repunched. Only a wisp of golden-gray toning visits this highly lustrous, well preserved, and sharply struck Carson City type coin. Although many Uncirculated examples emerged from GSA holdings, few among those can match the quality of the present piece. NGC ID# 8BBF, PCGS# 7152

**1884-CC VAM-4B Dollar, MS67  
High Grade Carson City Type Coin**

- 4106 1884-CC MS67 PCGS. VAM-4B.** A snow-white Superb Gem that boasts booming luster, a good strike, and minimal evidence of contact. Listed as R.6 by VAMworld.com, VAM-4B has various interesting characteristics, such as a “vertical spike from [the] top of the 1,” a “raised break on top left serif of [the] E [in AMERICA],” and a “pinned wing gouge” east of the eagle’s breast. Population: 97 in 67 (2 in 67+), 3 finer (1/16). NGC ID# 8BBF, PCGS# 7152
- 4107 1884-CC MS66 Prooflike PCGS.** The well-preserved surfaces of this attractive Premium Gem are blanketed in vivid shades of greenish-gold toning, with reflective prooflike fields and sharply detailed design elements underneath. Population: 98 in 66 (2 in 66+) Prooflike, 1 finer (1/16). NGC ID# 254M, PCGS# 7153
- 4108 1884-CC MS65 Deep Mirror Prooflike PCGS.** The deeply reflective fields of this impressive Gem specimen contrast profoundly with the sharply detailed, frosty design elements to create a dramatic cameo effect. Overall eye appeal is terrific. NGC ID# 254M, PCGS# 97153
- 4109 1884-S AU58 NGC.** Substantial luster illuminates warm golden toning on each side of this near-Mint 1884-S Morgan dollar. The strike is bold, and only a brush of friction is seen over the high points of the design. Unusually smooth surfaces further accentuate the eye appeal. NGC ID# 254P, PCGS# 7156
- 4110 1884-S AU58 PCGS.** A bright, well-struck example of this conditionally challenging San Francisco issue, showing lustrous fields and a brush of high-point friction over the design elements. A few trivial abrasions on Liberty’s cheek are consistent with the AU58 grade. NGC ID# 254P, PCGS# 7156
- 4111 1885 MS67 PCGS. CAC.** Delicate gold toning is limited to the obverse border of this exceptional Superb Gem. Both sides are frosty and highly lustrous with bold design definition. Although the date is common, PCGS has only certified three higher grades examples (1/16). NGC ID# 254R, PCGS# 7158
- 4112 1885-CC MS65 PCGS. VAM-2.** Brilliant with booming luster and a good strike. Smooth save for a field line near the ICA in AMERICA. The 1885-CC has one of the lowest productions of the series. Fortunately for Carson City collectors, much of the mintage of the 1885-CC was saved in Uncirculated grades and distributed through GSA auctions. NGC ID# 254S, PCGS# 7160
- 4113 1885-CC MS65 PCGS. VAM-2A.** Light olive-gold toning visits this thoroughly lustrous and low mintage Carson City Gem. The strike is good and no marks are consequential. VAM-2A is the intermediate die state of the “Clashed n” variety. Certified in an old green label holder. NGC ID# 254S, PCGS# 7160

**1885-CC Morgan Dollar, MS66+  
In-Demand Branch Mint Issue**

- 4114 1885-CC MS66+ PCGS.** The 1885-CC Morgan dollar is always in demand. From a small mintage of 228,000 pieces, the issue is very scarce in grades above MS66. This high-end Premium Gem offers sharply detailed design elements and impeccably preserved surfaces with vibrant mint luster on both sides. PCGS has graded 74 numerically finer examples (1/16). NGC ID# 254S, PCGS# 7160
- 4115 1885-CC MS64 Deep Mirror Prooflike PCGS. CAC.** The well-preserved surfaces of this attractive Choice specimen feature deeply reflective fields that contrast profoundly with the sharply detailed, frosty design elements to produce a startling cameo effect. A few hints of pale gold toning add to the considerable eye appeal. NGC ID# 254S, PCGS# 97161
- 4116 1885-O MS67 PCGS.** Delicate sun-gold patina adorns lustrous and fully struck surfaces. The fields are immaculate and the portrait shows only trivial imperfections. The center of the cheek is pristine. NGC ID# 254T, PCGS# 7162
- 4117 1885-O MS67 PCGS. CAC.** A nicely struck and highly lustrous Superb Gem. Practically pristine and highly desirable. Like many New Orleans issues, the 1885-O has a high mintage and is available in Mint State, but few examples are comparable in quality with the present coin. NGC ID# 254T, PCGS# 7162
- 4118 1885-S MS65 PCGS.** Honey-gold toning illuminates the peripheries of this highly lustrous and clean-cheeked Gem. The obverse field is also smooth, and the reverse displays only minor marks. The centers show moderate inexactness of strike. NGC ID# 254U, PCGS# 7164
- 4119 1886 MS67 PCGS. CAC. VAM-6A.** The N from IN is clashed near Liberty’s neck. A fully struck Superb Gem that shows only a trace of tan toning. The outstanding preservation and exceptional eye appeal explains the presence of the CAC seal. NGC ID# 254V, PCGS# 7166
- 4120 1886-O MS61 NGC.** Lustrous and well-struck, this Uncirculated 1886-O Morgan dollar displays near-brilliant interiors and hints of gold around the borders. Light, scattered handling marks limit the grade but none are singularly obtrusive. Pleasing for the MS61 level. NGC ID# 254W, PCGS# 7168
- 4121 1886-O MS61+ NGC.** Pleasantly free of major abrasions, as denoted by the Plus designation, this Uncirculated 1886-O Morgan dollar shows only light, scattered marks. Each side is lustrous and light golden in color, with slight strike weakness seen on the eagle’s breast and the hair above Liberty’s ear. NGC ID# 254W, PCGS# 7168
- 4122 1886-O MS62 NGC.** For both the grade and issue, this Uncirculated 1886-O silver dollar boasts incredible eye appeal. The central definition is far above-average, and the fields showcase nearly prooflike reflectivity. Warm champagne toning glistens on each side. Light, scattered abrasions define the grade. NGC ID# 254W, PCGS# 7168

**1886-S Dollar, MS65+  
Exceptionally Clean Surfaces**

**4123 1886-S MS65+ PCGS.** This San Francisco issue becomes challenging in Gem condition and scarce any finer, as confirmed by the population reports and prices realized from recent auction appearances. Brilliant silver luster enlivens clear fields and a full, clean cheek on Liberty. Bold details define Liberty's hair strands and the eagle's plumage. The coin is white except for hints of lilac on the central high points. NGC ID# 254X, PCGS# 7170

**4124 1887/6-O VAM-3 MS62 PCGS.** A Top 100 Variety. The lower loop of the previous 6 is evident to the right of the 7 in the date. This Uncirculated VAM-3 representative shows pleasantly smooth, satiny surfaces with light golden toning overall. The typical strike weakness occurs on the central high points. NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

**1887/6-O Morgan, VAM-3, Flashy MS64**

**4125 1887/6-O VAM-3, MS64 PCGS.** A Top 100 Variety. The remains of a partial underdigit 6 in the form of its bottom-right loop element are blatant, extending into the right obverse field from the bottom of the 7. This is a flashy silver-white near-Gem example of this elusive variety, one usually appearing only in AU or low Mint State levels. VAM-hunters should be all over this lot. This is a relatively unabraded example with strong eye appeal and a decent strike. Population as VAM-3: 3 in 64, 0 finer (12/15). NGC ID# 2552, PCGS# 133912 Base PCGS# 7178

**1887-S Morgan Dollar, Untoned MS65+**

**4126 1887-S MS65+ PCGS.** The 1887-S Morgan dollar is an issue seldom seen in Gem grade, certainly far less frequently than its S-mint older siblings from earlier in the 1880s, the 1880-S, 81-S, and 82-S issues. This silver-white example boasts an excellent if not full strike on attractive surfaces that are free of all but scattered, minor marks. Some roller marks appear on Liberty's cheek, not affecting the grade. NGC ID# 2554, PCGS# 7180

**1888 Morgan Dollar, MS66+ Prooflike  
None Finer at PCGS**

**4127 1888 MS66+ Prooflike PCGS. CAC.** The 1888 Morgan dollar was produced in large numbers, but high-grade examples with prooflike surfaces are quite elusive today. This high-end Premium Gem displays sharply detailed frosty design elements that contrast boldly with the deeply reflective prooflike surfaces. Few signs of contact are evident and eye appeal is terrific. Population: 12 in 66 (2 in 66+) Prooflike, 0 finer (1/16). NGC ID# 2555, PCGS# 7183

**1888-O 'Hot Lips' Dollar, Near-Mint  
VAM-4, Guide Book Doubled Die**

**4128 1888-O Hot Lips, Doubled Die Obverse, VAM-4, AU58 PCGS.** A Top 100 Variety. Strong die doubling on Liberty's lips, chin, and nose identifies the popular Guide Book "Hot Lips" variety. A great rarity in Uncirculated grades, VAM-4 is affordable for the advanced collector at the near-Mint level. This lightly toned and lustrous example displays scattered minor marks but none are obtrusive. The strike is a bit soft at the centers, customary for the famous variety. Population: 31 in 58, 6 finer (1/16). NGC ID# 2556, PCGS# 133919 Base PCGS# 7308

**4129 1888-S MS65 PCGS.** A low-mintage San Francisco mintage (just 657,000 pieces produced) and a somewhat underappreciated dollar in the context of the series. Sharply struck pieces are in the minority. This example is crisply struck over the ear and on the eagle's breast feathers. Brilliant with frosty cartwheel luster, a glass reveals no serious marks aside from a few faint slide marks on the chin. PCGS reports just 32 finer submissions (12/15). NGC ID# 2557, PCGS# 7186

**4130 1889 MS65 Prooflike PCGS. CAC.** Vivid shades of lavender-gray, sea-green, and cerulean-blue toning blanket the well-preserved surfaces of this attractive Gem. The design elements are sharply detailed and reflective prooflike surfaces shine through the patina. Population: 32 in 65 Prooflike, 1 finer (1/16). NGC ID# 349P, PCGS# 7189

**4131 1889-CC VF25 PCGS.** The smoothly worn surfaces show no major marks and the rims are perfect for the grade. Medium-gray toning blankets both sides with deep-gray toning within the recesses of the motifs, which display grade-consistent wear. NGC ID# 2559, PCGS# 7190

**4132 1889-CC — Cleaned — ANACS. AU Details, Net XF40. VAM-2A.** A lightly circulated example of the rarest Carson City Morgan dollar issue. Mostly white but the borders display gold, rose, and aqua toning. Both sides are hairlined, and the right obverse field has a small dig. Struck from boldly clashed dies. NGC ID# 2559, PCGS# 7190

- 4133 1889-CC — Whizzed — NGC Details. AU.** The surfaces of this 1889-CC Morgan dollar exhibit a faint texture from a brush but retain subtle luster. Light golden toning warms each side, and the design elements retain sharp detail. The whizzing has smoothed out any unsightly abrasions, leaving this Details-graded Carson City key with moderately pleasing appeal. NGC ID# 2559, PCGS# 7190
- 4134 1889-CC — Cleaning — PCGS Genuine. AU Details.** The surfaces of this key-date Morgan are a tad overbright, silver-white with little trace of other color, save for some wine-colored rim accents which may indicate that the surfaces will continue to retone. Of course, far more detail remains for the grade level than might be otherwise obtainable on an uncleaned example. Series specialists with a gaping hole in their sets may give this coin serious consideration, as its essential attractiveness remains. NGC ID# 2559, PCGS# 7190
- 4135 1889-S MS65 PCGS Secure.** Brilliant save for hints of tan-gold toning, most apparent near the mintmark. This Gem boasts dynamic luster and a good strike. Marks are minor and the eye appeal is attractive. The lower cheek displays parallel roller marks, as made. NGC ID# 255B, PCGS# 7194
- 4136 1890-CC MS64 PCGS. VAM-5.** The second C in the mintmark is clearly repunched north. Rich peach-gold patina embraces this lustrous and sharply struck better date Carson City dollar. Smooth save for minor marks on the cheek. Housed in an old green label holder. NGC ID# 255D, PCGS# 7198
- 4137 1890-O MS65 PCGS.** Despite a mintage of more than 10 million coins, the 1890-O Morgan dollar is elusive in MS65 and genuinely rare finer. This Gem representative displays frosty luster with large overlays of aquamarine, lavender-gray, and sun-gold toning. Some of the usual strike weakness is observed on the eagle's breast and the hair above Liberty's ear. PCGS reports 27 finer examples (12/15). NGC ID# 255E, PCGS# 7200
- 4138 1890-O MS65 PCGS.** The 9 in the date is slightly repunched, visible as a faint arc above the top loop of the primary digit. The coin is brilliant and frosty with rich silver luster, ranking among relatively few Gem survivors of the issue despite a mintage of more than 10 million pieces. The strike is sharper at the centers than usual, and a single minor abrasion beneath stars 5 and 6 is the sole mark of note. Just 27 pieces are numerically finer at PCGS (12/15). NGC ID# 255E, PCGS# 7200
- 4139 1890-O MS65 PCGS.** An attractive branch mint Gem, with sharply detailed design elements and well-preserved, lustrous surfaces that show a few hints of golden-tan toning. PCGS has graded 27 numerically finer examples (1/16). NGC ID# 255E, PCGS# 7200
- 4140 1890-O MS65 PCGS.** This atypical 1890-O Morgan dollar features a stronger than usual strike, with only slight weakness above Liberty's ear. Both sides are fully lustrous and brilliant with pristine surfaces. PCGS has only certified 27 finer examples (1/16). NGC ID# 255E, PCGS# 7200
- 4141 1890-O MS65 PCGS.** Faint butter-gold toning visits this nearly white New Orleans Gem. The centers exhibit minor blending, but the remainder of the strike is good. The fields are uncommonly free from contact, and the cheek is also clean. NGC ID# 255E, PCGS# 7200
- 4142 1891 MS64+ PCGS.** This Plus-graded Choice Morgan dollar is sharply detailed throughout, with vibrant mint luster and well-preserved surfaces that show only minor signs of contact. Subtle hints of lavender-gray and pale gold toning add to the outstanding visual appeal. NGC ID# 255G, PCGS# 7204
- 4143 1891 MS64+ PCGS. CAC.** The obverse of this high-end Choice example is blanketed in attractive shades of greenish-gold and lavender-gray toning, while the reverse is mostly brilliant, with vibrant mint luster on both sides. The surfaces are lightly marked and the design elements are well-detailed. NGC ID# 255G, PCGS# 7204
- 4144 1891-CC Spitting Eagle, VAM-3, MS64 PCGS.** A Top 100 Variety. Undesignated by variety on the holder, but the die lump at the beak is unmistakable. VAM-3 made a frequent appearance in the GSA auctions for the Carson City issue. The present piece is pleasing for the near-Mint level, due to its smooth and lustrous cream-gray surfaces. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 4145 1891-CC Spitting Eagle, VAM-3 MS64+ PCGS.** A Top 100 Variety. Thick, frosty luster illuminates a bold strike and brilliant surfaces on this high-end Choice 1891-CC Morgan dollar. A few trivial grazes on the obverse preclude Gem classification but pose little distraction. This late Carson City issue is somewhat scarcer in finer grades. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 4146 1891-CC Spitting Eagle, VAM-3, MS64+ PCGS.** A Top 100 Variety. The well-known variety distinguished by a die lump on the field near the eagle's beak. The strike is good despite slight softness at the centers. Brilliant and lustrous with superior eye appeal for the designated grade. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206
- 4147 1891-S MS65 NGC.** Iridescent shades of lavender-gray and champagne-gold toning enhance the well-preserved surfaces of this attractive Gem, with most of the toning on the obverse. The design elements are well-detailed and vibrant mint luster shines through the patina. NGC ID# 255K, PCGS# 7210
- 4148 1891-S MS65 PCGS.** Rich forest-green, cherry-red, and autumn-gold toning consumes the obverse. The reverse is essentially brilliant. Lustrous and nicely struck. Marks are incidental aside from minor chatter on the right reverse field. NGC ID# 255K, PCGS# 7210

#### 1891-S Silver Dollar, MS66

- 4149 1891-S MS66 PCGS.** Dynamic luster and a bold strike endow this lightly toned silver dollar. The reverse is generally smooth, and the obverse displays only delicate grazes on the cheek and left field. Among the more available post-1882 San Francisco issues. Population: 96 in 66 (7 in 66+), 8 finer (1/16). NGC ID# 255K, PCGS# 7210
- 4150 1892-CC MS63 PCGS. VAM-8A.** The base of the 2 is filled, and the N from IN is clashed near Liberty's neck. Splashes of golden-brown, lavender-red, and apple-green endow the margins of this lustrous Carson City dollar. Delicate facial grazes do not deny the eye appeal. NGC ID# 255M, PCGS# 7214

**1892-O Dollar, Seldom-Seen MS65  
Outstanding Satiny Surfaces**

**4151 1892-O MS65 PCGS.** The 1892 New Orleans dollar issue is one for which the Gem grade is reachable but a stretch for many collectors — but higher-graded coins are all but nonexistent. This makes Registry and series specialists pursue Gems such as this coin avidly when they appear. The satiny surfaces of this untuned silver-gray coin are exceptionally clean — note the excellent pristine cheek on Liberty — and show little trace of other color. The roller marks on the cheek and in the hair indicate an incomplete strike but appear on many such coins, as made, and do not affect the technical grade. This is an outstanding example of this conditional rarity. NGC ID# 255N, PCGS# 7216

**4152 1892-S AU53 PCGS.** The 1.2 million-coin mintage of the 1892-S dollar was fairly small for the series, and examples command a premium in all grades. This AU representative retains pleasing detail on the devices and moderate luster in the fields. Both sides are bright with a hint of champagne color. NGC ID# 255P, PCGS# 7218

**1892-S Dollar, Partially Lustrous AU55**

**4153 1892-S AU55 NGC.** After the legendary 1893-S, the '92-S Morgan dollar is the scarcest issue in the series in Mint State. This Choice AU example possesses lustrous fields and bright surfaces that have a hint of champagne toning overall. Eye appeal is comparable to that of most lower-end Uncirculated examples, although this piece is infinitely easier for the budget-conscious collector to acquire. NGC ID# 255P, PCGS# 7218

**1892-S Morgan Dollar, Choice AU  
Optimal Grade Level for Many Collectors**

**4154 1892-S AU55 PCGS.** The Choice AU grade level of the present 1892-S Morgan is an optimal grade level for many collectors, as the price-grade curve tends to get awfully steep in AU58 and higher. This silver-gray example shows a mere touch of light wear and scattered marks, including a couple of hits on the focal points but not overly distracting. A tinge of light rose toning appears, along with a few dark flecks. NGC ID# 255P, PCGS# 7218

**1893-CC Morgan, MS60 Prooflike  
Semikey Carson City Issue**

**4155 1893-CC MS60 Prooflike PCGS.** Blushes of pumpkin-gold toning grace the right borders, but the remainder of this better date Carson City dollar is brilliant. The fields are surprisingly unabraded, though the portrait displays numerous fine marks. The centers are lightly brought up. A majority of certified 1893-CC dollars are in circulated grades, and only a small percentage are designated as Prooflike, yet the present piece is Mint State and shows field reflectivity. It is also encapsulated in an old green label holder. NGC ID# 255S, PCGS# 7223

**4156 1893-O AU58 NGC.** Substantial original luster rolls over the glistening surfaces of this near-Mint 1893-O silver dollar, while the high points of the devices show a trace of friction that precludes an Uncirculated designation. Light marks are consistent with the grade, and weakness on the eagle's breast and the hair above Liberty's ear is characteristic of the issue. NGC ID# 255T, PCGS# 7224

**1893-O Silver Dollar, MS61**

**4157 1893-O MS61 NGC.** The 1893-O Morgan dollar is a scarce issue that resides in the shadow of the 1893-S. Only 300,000 Morgans were coined at New Orleans in 1893, and that production is the fifth lowest of any circulation strike in the series. This example has typical central weakness, exhibiting brilliant, satiny silver luster and delicate gold toning. NGC ID# 255T, PCGS# 7224

**1893-O Morgan Dollar, Untoned MS61**

**4158 1893-O MS61 PCGS.** Certified in a green-label holder, this Mint State 1893-O Morgan dollar is untuned silver-white and boasts generous luster throughout both sides. Magnification reveals the expected: scattered ticks and luster grazes along with a typical O-mint strike. It also reveals, however, a coin with much eye appeal to spare, in the form of generous luster and a reverse that is relatively unabraded in the fields, although one nick shows on the eagle's lower breast. Clash marks also appear on the reverse. NGC ID# 255T, PCGS# 7224

- 4159 1893-S — Obverse Graffiti — NGC Details. Good.** A readily collectible example of this key San Francisco issue, showing full rims and boldly outlined devices. Each side displays medium tan-gray color. NGC notes graffiti on the obverse; we observe three extremely old, unobtrusive scratches in the lower margin. NGC ID# 255U, PCGS# 7226
- 4160 1893-S Good 4 NGC.** All legends are bold on this cream-gray key date silver dollar. The microgranular fields display only unimportant contact, but a few slender marks are noted on the cheek and the left (facing) wing. NGC ID# 255U, PCGS# 7226
- 4161 1893-S — Improperly Cleaned — NGC Details. VG.** The surfaces are slightly reflective due to old cleaning but have since retoned a pleasing olive-gold and gray hue. Detail is pleasing for the VG level. The 1893-S is one of the few “stoppers” to the circulated date and mintmark set of Morgan dollars. This piece will fill the hole for a budget-restricted collector. NGC ID# 255U, PCGS# 7226
- 4162 1893-S — Scratch — PCGS Genuine. Fine Details.** Pinscratches on Liberty’s cheek and the field below her chin confirm the PCGS designation. The obverse has a small rim ding at 5:30, but there are no other mentionable marks. A cream-gray key date dollar with ample wing plumage. NGC ID# 255U, PCGS# 7226
- 4163 1893-S — Repaired — NGC Details. VF.** Bright silver-gray surfaces characterize this circulated key date offering. The highest points of the design show evidence of friction, while the legends and other areas remain well-detailed. The noted repair occurs diagonally from the eagle’s left (facing) wing down through the shoulder to the breast, but it is not overly distracting. This is a pleasing collector-grade example for the specialist on a budget.
- 4164 1894 AU50 PCGS.** An attractive AU specimen of this low-mintage key, with just a trace of high-point wear on the design elements and lightly abraded surfaces that retain much of their original mint luster. The 1894 Morgan dollar is always in demand. NGC ID# 255V, PCGS# 7228
- 4165 1894-O MS61 NGC.** The pleasing surfaces of this attractive Mint State specimen exhibit vibrant mint luster and hints of lavender-gray and greenish-gold toning, with the minimum number of minor contact marks for the grade. NGC ID# 255W, PCGS# 7230
- 4166 1894-O MS61 PCGS.** A better New Orleans issue, highly sought-after in Mint State. This piece is moderately abraded, as the grade suggests, but possesses vibrant luster and brilliant surfaces. The strike is a trifle weak on the central high points, as usual. NGC ID# 255W, PCGS# 7230
- 4167 1894-O MS61 PCGS.** An attractive Mint State example of this popular branch mint issue, with well-detailed design elements and satiny mint luster on both sides. The lightly toned surfaces show the minimum number of minor contact marks for the grade. NGC ID# 255W, PCGS# 7230
- 4168 1894-S MS63 NGC.** A better date in all grades but genuinely elusive in the finer Mint State grades. This Select 1894-S dollar remains within the grasp of most collectors of Uncirculated Morgans. The strike is bold, and the surfaces yield radiant mint luster. A hint of light golden toning graces each side, and abrasions are at a minimum. NGC ID# 255X, PCGS# 7232
- 4169 1894-S MS64+ NGC.** A Plus-graded Choice example of this popular issue, with vibrant, frosty mint luster and well-preserved brilliant surfaces. The design elements are sharply detailed and eye appeal is outstanding. NGC has graded 59 numerically finer examples (12/15). NGC ID# 255X, PCGS# 7232
- 4170 1895-O AU55 PCGS.** The 1895-O — a better date, boasting a low mintage of 450,000 pieces. This Choice AU example is ideal for the average collector who finds an Uncirculated piece to be out of reach. The fields are brightly lustrous and show a hint of champagne toning. The devices are well-defined and exhibit trivial high-point friction. Eye appeal is pleasing for the grade and issue. NGC ID# 255Y, PCGS# 7236
- 4171 1896-O MS61 PCGS.** Softly lustrous and pleasantly eye-appealing for the grade, this 1896-O Morgan dollar displays typical weakness on the high points of the central devices. There are no severe abrasions, only light, scattered handling marks that preclude a finer grade. A better date in Uncirculated condition. NGC ID# 27ZU, PCGS# 7242

#### 1896-O Dollar, Silver-White MS62

- 4172 1896-O MS62 PCGS.** This silver-white conditionally elusive O-mint Morgan dollar lacks any trace of perceptible other color but is awfully well-preserved for the given grade. The typical New Orleans strike is present, showing softness over Liberty’s ear, but bounteous luster and overall excellent eye appeal more than compensate. NGC ID# 27ZU, PCGS# 7242
- 4173 1897 MS66+ PCGS. CAC.** Boldly struck and beautifully preserved with frosty, brilliant luster. This high-end Premium Gem 1897 silver dollar reveals only a few trivial grazes in the left obverse field that preclude a finer grade. PCGS lists 31 Superb Gems finer (12/15). NGC ID# 27P5, PCGS# 7246
- 4174 1897-O MS62 NGC.** The 1897-O Morgan is a challenging issue in Mint State despite a mintage in excess of 4 million coins. This example displays luminous surfaces and light golden toning. The design elements are well-defined, and surface abrasions are refreshingly unobtrusive. NGC ID# 2565, PCGS# 7248
- 4175 1897-O MS62 PCGS.** Golden-brown and forest-green toning graces the obverse margin, but the remainder of this lustrous better-date dollar is brilliant. The strike is good and there are no objectionable marks. NGC ID# 2565, PCGS# 7248
- 4176 1897-S MS66 Prooflike PCGS.** Mirrored fields accompany sharply struck and frosty devices. A well-preserved stone-white silver dollar. Prooflike pieces constitute only about 10% of the certified Mint State examples. Population: 34 in 66 (2 in 66+) Prooflike, 4 finer (1/16). NGC ID# 267S, PCGS# 7251
- 4177 1899-S MS65 PCGS.** This satiny Gem features a sharp strike and brilliant silver surfaces. The design motifs are sharp, including the hair over Liberty’s ear and the eagle’s breast feathers. NGC ID# 256D, PCGS# 7262
- 4178 1900 MS66+ PCGS. CAC.** Blushes of light olive-gold toning adorn the reverse, but this lustrous high-grade silver dollar is predominantly brilliant. The obverse is especially well preserved. An available turn-of-the-century issue, but conditionally challenging in the present quality. NGC ID# 256F, PCGS# 7264
- 4179 1900-O MS66+ PCGS. CAC.** The design elements of this high-end Premium Gem exhibit unusually sharp detail throughout, including the usual trouble spots, like the hair above the ear and the eagle’s breast. The impeccably preserved surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 256F, PCGS# 7266
- 4180 1900-O MS66 Prooflike PCGS.** This remarkable Premium Gem exhibits razor-sharp definition on the frosty design elements and well-preserved brilliant surfaces with prooflike reflective fields on both sides. Eye appeal is terrific. Population: 28 in 66 (1 in 66+) Prooflike, 0 finer (12/15). NGC ID# 256F, PCGS# 7267

**4181 1900-S MS65 NGC.** This is an attractively clean, Gem 1900-S Morgan dollar, and were it not for a few trivial scuffs on Liberty's lower cheek, a Premium Gem grade might have been achieved. As it stands, this eye-appealing coin shows semiprooflike fields and light golden toning, with a few deeper amber accents seen near the peripheries. The hair above Liberty's ear is not quite fully defined. NGC records 28 numerically finer representatives (12/15). NGC ID# 256H, PCGS# 7270

**4182 1900-S MS65 PCGS. VAM-7.** Although plentiful in lower grades, the 1900-S Morgan dollar is scarce above MS65. This Gem example is well-preserved and satiny, showing a hint of light golden toning overall. Trivial strike weakness is seen on the hair above Liberty's ear. VAM-7 shows the second 0 in the date lightly recut at the top and the mintmark minutely doubled on the upper serif. NGC ID# 256H, PCGS# 7270

### 1901 Morgan Dollar, MS61 Pleasing for the Grade

**4183 1901 MS61 PCGS.** The 1901 is famously scarce in Mint State and one of the keys to the 20th century portion of the series. This piece is moderately abraded, as the grade suggests, but lacks any severe imperfections. Hints of champagne color accent satiny silver surfaces, delivering pleasing eye appeal. NGC ID# 256J, PCGS# 7272

**4184 1903 MS66+ PCGS. CAC.** A high-end Premium Gem example of this late series issue, with sharply detailed design elements throughout and vibrant mint luster on both sides. The well-preserved surfaces show a few hints of golden-tan toning and outstanding eye appeal. NGC ID# 256R, PCGS# 7284

**4185 1903-O MS66 NGC.** This lustrous New Orleans dollar is brilliant aside from a hint of rose toning near ONE DOLLAR and PLURIBUS. Smooth except for high-point contact near the final A in AMERICA.  
*Ex: Long Beach Signature (Heritage, 9/2003), lot 9084, which realized \$690. NGC ID# 256S, PCGS# 7286*

**4186 1903-O MS66 PCGS. CAC.** The design elements of this delightful Premium Gem exhibit razor-sharp definition and the virtually flawless surfaces radiate vibrant mint luster throughout. A few hints of champagne-gold toning add to the terrific eye appeal. NGC ID# 256S, PCGS# 7286

### 1903-O Dollar, Original MS67 Tied for Finest at Both Services

**4187 1903-O MS67 PCGS.** The Treasury release of the early 1960s turned the 1903-O — once considered the major rarity in the series — into an available date through most grades. Only at this remarkable grade level does the issue prove challenging. A mostly brilliant obverse shows blushes of gold and rose patina around the edges, while the reverse is toned in similar hues with additional cobalt-blue color near the rims. The centers are typically detailed for the Louisiana branch mint. Population: 76 in 67 (1 in 67+), 0 finer (1/16). NGC ID# 256S, PCGS# 7286

**4188 1921 Morgan MS66+ PCGS.** This high-end Premium Gem exhibits pinpoint definition on all design elements and the well-preserved surfaces radiate vibrant mint luster, with a few hints of golden-tan toning. PCGS has graded 11 numerically finer examples (1/16). NGC ID# 256X, PCGS# 7296

## PROOF MORGAN DOLLARS

### 1879 Morgan Dollar, PR64+ Very Scarce in Higher Grades

**4189 1879 PR64+ PCGS.** From a fairly generous proof mintage of 1,100 pieces, this high-end Choice example is sharply detailed in most areas, with just a touch of softness on the hair above the ear. The fields are deeply mirrored and the well-preserved surfaces are blanketed in shades of champagne-gold toning. Population: 96 in 64 (4 in 64+), 38 finer (12/15). NGC ID# 2722, PCGS# 7314

### 1901 Morgan Dollar, Condition Rarity PR63

**4190 1901 PR63 PCGS.** The 1901 Morgan dollar issue is a conditional rarity either in high-grade Mint State or high-grade proof condition. This Select proof shows moderate patina on both sides but with a few light ticks, largely on Liberty's cheek and hair, that nestle in among the color and account for the grade. This piece is in about a typical grade for the certified survivors of the issue of 813 proof coins. NGC ID# 272Z, PCGS# 7336

## PEACE DOLLARS

- 4191 1921 MS65 NGC.** The obverse die is shared with VAM-1E, the die marriage that struck matte proofs. The present Gem has a better strike than most 1921 Peace dollars, although it was coined for commerce. The lustrous cream-gray and straw-gold surfaces are only minimally marked, and display a natural patina sure to please Peace dollar purists. NGC ID# 2U4E, PCGS# 7356

### 1921 Peace Dollar, Well-Preserved MS66

- 4192 1921 MS66 NGC.** The satin-finished surfaces are remarkably free of mentionable contact on this Premium Gem debut-year Peace dollar, a gray-white coin with a light sprinkling of cinnamon patina confined to the extreme rims on each side. Some strike weakness through the centers is a given on this issue, but seldom does one find one so well-preserved. NGC reports only six certified finer (1/16). NGC ID# 2U4E, PCGS# 7356

- 4193 1922 Earring, VAM-2A, MS63 PCGS.** A Top 50 Variety. VAMworld.com calls the "Earring" variety "the largest die break in the Top 50 Peace dollar series." The vertical break is located at the obverse center, near Liberty's hair-covered ear. A lightly toned and highly lustrous example with pleasing surfaces despite a graze on Liberty's cheekbone. Population: 14 in 63, 6 finer (1/16). NGC ID# 257C, PCGS# 133737

- 4194 1922-S MS65 PCGS.** Bright silver luster dominates the frosty surfaces of this conditionally scarce Peace dollar, which saw a mintage of nearly 17.5 million pieces but few Gem or finer survivors. Sharply struck for the issue, a few faint, golden-gray accents confirm the natural eye appeal. Only a scattering of tiny ticks prevent an even higher grade. PCGS reports just nine numerically finer examples (12/15). NGC ID# 257E, PCGS# 7359

- 4195 1922-S MS65 PCGS. CAC.** A lustrous and lightly toned San Francisco Gem. The obverse field exhibits vertical die polish lines but marks are uncommonly absent. The centers are lightly brought up although peripheral elements are sharp. The date is strike doubled. NGC ID# 257E, PCGS# 7359

### 1923-D Peace Dollar, Beautifully Toned MS66

- 4196 1923-D MS66 PCGS.** Aficionados of beautifully toned Peace dollars should be all over this Premium Gem 1923-D, showing untuned satiny texture in the centers radiating outward to amber-gold and iridescent pale blue, orange, and lilac closer to the rims. The focal points are pristine on each side, and the strike demonstrates the powerful impression that the 1923-D issue is well-known for. Die cracks encircling much of the obverse periphery is not at all unusual on these coins. Population: 95 in 66 (3 in 66+), 1 finer (1/16). NGC ID# 257G, PCGS# 7361

- 4197 1925 MS66+ ★ NGC.** A high-end Premium Gem with the Star designation, this coin possesses tremendous eye appeal to complement its high technical grade. The design elements are well-detailed and the impeccably preserved surfaces display vibrant mint luster, under vivid shades of golden-brown, lavender, and violet toning. NGC ID# 257L, PCGS# 7365

- 4198 1925-S MS64+ PCGS.** The 1925-S Peace dollar is an elusive issue in grades above MS64. This high-end Choice example offers sharply detailed design elements and lustrous, well-preserved surfaces with hints of golden-brown toning. PCGS has graded 41 numerically finer examples (12/15). NGC ID# 257M, PCGS# 7366

- 4199 1926-D MS66 PCGS. CAC.** This lovely Premium Gem Denver Mint Peace dollar exhibits satiny silver luster with full mint brilliance. Each side hosts trivial splashes of gold toning. An exceptional example are rarely encountered finer. PCGS has only certified eight higher grade examples of the 1926-D (1/16). NGC ID# 257P, PCGS# 7368

- 4200 1926-S MS65+ PCGS. CAC.** A hint of champagne toning appears on each side of this fully lustrous and highly attractive Gem Peace dollar. The central obverse and reverse details are a trifle weak as usual, but the overall eye appeal of this Gem is exceptional. PCGS has only certified 83 finer examples of this issue (1/16). NGC ID# 257R, PCGS# 7369

### 1927-D Peace Dollar, Fantastic MS65

#### Condition Rarity With CAC Approval

- 4201 1927-D MS65 PCGS. CAC.** The 1927-D Peace dollar seldom appears in grades above MS64, and this Gem is rarer still as one of the few to achieve that grade level as well as the CAC certification. CAC has awarded its green bean to 41 in MS65 and six finer (1/16). Aside from stickers and labels, this is a fantastic-looking example of this issue, satiny, well-struck through the centers and elsewhere, and boasting excellent preservation amid light glints of amber and jade patina on the largely cream-gray surfaces. NGC ID# 257T, PCGS# 7371

- 4202 1927-S MS64+ PCGS. CAC.** A remarkably unabraded example of the conditionally rare 1927-S. The satiny and sharply struck surfaces display pastel ice-blue and almond-gold patina. As nice as can be obtained short of the costly MS65 level. NGC ID# 26J6, PCGS# 7372

**1934-D Peace Dollar, MS66**  
Excellent Preservation

- 4203 1934-D MS66 PCGS.** Medium D. Pale gold toning is seen across each side of this lustrous and impressively unabraded Premium Gem. The strike is bold throughout with sharp hair details and noticeable feather definition on the eagle's wing. The eye appeal is exemplary on this relatively low-mintage issue. Population: 78 in 66 (3 in 66+), 2 finer (1/16). NGC ID# 257Y, PCGS# 7376

**1934-D Dollar, MS66**  
Bright, Satiny Mint Luster

- 4204 1934-D MS66 PCGS.** Medium D. Only 1.5 million pieces were struck of this penultimate year in the series. In all grades of Uncirculated, the 1934-D is the second scarcest D-mint in the series, second only to the 1927-D. This is a lovely example with satiny mint luster and a few shallow, but not grade-limiting, marks in the chin area of Liberty. NGC ID# 257Y, PCGS# 7376

- 4205 1935 MS66 PCGS.** The 1935 Peace dollar is prohibitively rare in grades above MS66. This delightful Premium Gem offers sharply detailed design elements and well-preserved, lustrous surfaces, with a few hints of pale gold and pink toning. PCGS has graded no coins in numerically finer grades (1/16). NGC ID# 2582, PCGS# 7378

## EISENHOWER DOLLAR

- 4206 1972 Type Two, FS-901, MS65 PCGS.** The Caribbean Islands appear narrow and incused on the scarce Type Two Ike dollar. They have a more conventional relief appearance on the common Type One and Type Three varieties. A lustrous and well preserved chestnut-gold Gem. Population: 83 in 65 (8 in 65+), 7 finer (12/15). PCGS# 510592 Base PCGS# 97409

## GOLD DOLLARS

- 4207 1849 No L MS64 PCGS.** The widely repunched star pair beneath the bust identifies the No L variety, even before the truncation is checked for the presence of Longacre's initial. Sharply struck and lustrous with orange-red, straw-gold, and sea-green toning. NGC ID# 25B9, PCGS# 7501

- 4208 1849-D — Cleaning — PCGS Genuine. Unc Details. Variety 1-A,** mintmark is shifted slightly left. Only 21,588 examples were struck of this debut Dahlonaga issue, and it is eagerly pursued by first-year-of-type and Southern gold specialists equally. The surfaces of this piece are rather bright yellow but retain their essential eye appeal and a huge collectibility quotient. Some planchet roughness shows in some of the peripheral letters on the reverse, but there are only scattered minor ticks. NGC ID# 25BD, PCGS# 7507

**1851-C Gold Dollar, MS62**  
Popular Branch Mint Type Coin

- 4209 1851-C MS62 NGC. Variety 3.** From a mintage of 41,267 pieces, the 1851-C gold dollar is the most plentiful issue from the Charlotte Mint. Examples in MS62 condition are still elusive, however, and finer specimens are quite rare. This attractive MS62 piece is sharply detailed and lustrous, and the surfaces show only scattered, minor contact marks. A die crack from the rim to the second S in STATES identifies the scarce Variety 3 die pair. Census: 33 in 62, 26 finer (11/15). NGC ID# 25BL, PCGS# 7514

- 4210 1851-O MS63 NGC. Variety 2.** A delicate die crack through Liberty's eye and the 2 o'clock star identify the variety. This well-struck canary-gold New Orleans type coin lacks noticeable marks and displays vibrant luster throughout the borders and motifs. Ex: *Dallas Signature (Heritage, 7/2006)*, lot 790, which realized \$2,070. NGC ID# 25BN, PCGS# 7516

**1853 Gold Dollar, MS65+**  
Exceptional Type One Representative

- 4211 1853 MS65+ NGC.** An extraordinary Gem Type One gold dollar with the NGC Plus designation, this piece has satiny yellow-gold luster with beautiful wisps of blue and violet toning. Several curious die lines appear on Liberty's nose, cheek, and temple, including one that pierces the eye. NGC has only certified 47 numerically finer examples of this issue (12/14). NGC ID# 25BU, PCGS# 7521

- 4212 1854 Type Two MS61 NGC. CAC.** Both the Liberty Head and Indian Princess Small Head designs are represented by the 1854 date, with the Type Two Indian Princess design a favorite of collectors for type. This brightly lustrous, pale-gold example shows only minor marks but extensive die clashing on both sides. Sharply struck, the coin is CAC endorsed. NGC ID# 32EH, PCGS# 7531

**1855-O Gold Dollar, AU55**  
Only Type Two O-Mint Issue

- 4213 1855-O AU55 PCGS. Variety 2.** The 1855-O is the sole New Orleans Type Two issue, and has a low mintage of 55,000 pieces. Two die marriages are known, best distinguished by the degree of lapping on the upper portion of the wreath. The present caramel-gold Choice AU representative is refreshingly unabraded and displays luster across the motifs and legends. NGC ID# 25C7, PCGS# 7535

**1875 Gold Dollar, MS60 Details**  
Classic Low-Mintage Rarity

- 4214 1875 — Damaged — ANACS. MS60 Details.** A large contact mark is seen across Liberty's chin that appears to have buckled the planchet. The 1875 is one of the best known scarcities in the gold dollar series, its notoriety derived from the original mintage of 420 pieces, 20 struck as proofs. Like all 1875 business strikes, a tiny "spine" projects downward into the field from Liberty's throat, this still being visible despite the aforementioned mark. Normally the fields are prooflike, a characteristic that is still very much in evidence on this minimally-worn, watery example. Appealing yellow-gold patina overall.  
Ex: Long Beach Signature (Heritage, 2/2006), lot 2570; Long Beach Signature (Heritage, 9/2008), lot 3195. NGC ID# 25DD, PCGS# 7576

- 4215 1878 MS64 Prooflike NGC.** The design elements of this attractive Choice specimen exhibit razor-sharp definition and the well-preserved yellow-gold surfaces show deeply reflective fields throughout. Census: 1 in 64 Prooflike, 1 finer (11/15). NGC ID# 25DG, PCGS# 77579

**1879 Gold Dollar, MS66**

- 4216 1879 MS66 PCGS.** Delicate blue overtones appear on the satiny yellow surfaces of this lovely Premium Gem gold dollar. Both sides are exquisite with bold design motifs and excellent eye appeal. The reflective fields exhibit light clash marks. Population: 38 in 66 (1 in 66+), 8 finer (1/16). NGC ID# 25DH, PCGS# 7580

**CLASSIC QUARTER EAGLES**

- 4217 1836 Script 8 AU53 NGC. Breen-6143, Variety 11, R.2.** Peach-gold toning outlines the legends and devices. The luminous butter-gold fields display scattered tiny marks, none of which are of individual relevance. A late die state with a double die crack through star 6 to the rim. NGC ID# 25FU, PCGS# 7694
- 4218 1836 Script 8 AU55 NGC. Breen-6143, Variety 11, R.2.** Golden-brown luster fills the borders. The centers are olive-gold. A Choice AU Classic type coin with lightly hairlined but bagmark-free surfaces. Variety 11 is the most prevalent of the five Script 8 die marriages for the date. NGC ID# 25FU, PCGS# 7694
- 4219 1836 Block 8 AU50 PCGS. CAC. Breen-6144, Variety 15, R.2.** A peach-gold representative with unmarked surfaces. The borders are well struck and the centers show incompleteness typical of the series. A field bulge is noted below OF. NGC ID# 25FU, PCGS# 97694
- 4220 1836 Block 8 AU58 PCGS. Breen-6144, Variety 15, R.2.** This is the Second Head of 1837 with a Block 8 date style and a detached berry in the olive branch on the reverse. There is no evidence of die cracks or clash marks on either side, while the detached berry suggests slight reverse die lapping. This piece has nearly full luster with scattered marks on the light yellow surfaces. NGC ID# 25FU, PCGS# 97694

**LIBERTY QUARTER EAGLES**

- 4221 1843-C Large Date, Plain 4 — Improperly Cleaned — NGC Details. AU. Variety 1.** An apricot-gold and olive-green Charlotte type coin. The fields are thickly hairlined but appear smooth to the unaided eye. The stars and dentils are well struck, although the centers are incompletely brought up. NGC ID# 7HLG, PCGS# 7728
- 4222 1843-D Small D VF30 NGC. CAC. Variety 4-H.** A tan-gold Dahlonaga type coin that retains the "dirty gold" look prized by Southern gold specialists. Liberty's forehead displays noticeable wear but the remainder of the design is nicely detailed. Marks are minor and chiefly confined to the left obverse field. NGC ID# 25GP, PCGS# 7730

**1845 Quarter Eagle, MS63+**  
High-End Quality for the Grade

- 4223 1845 MS63+ PCGS.** The number of Mint State grading events at the services confirms the scarcity of the 1845 quarter eagle in Select Uncirculated and finer condition. This Select Uncirculated example is high-end for the grade as indicated by the Plus designation by PCGS (the sole piece awarded the honor at the MS63 level). Highly lustrous greenish-gold, partially reflective surfaces show light abrasions but no heavy marks, while the strike is sharp except for slight blending on the eagle's leg. Population: 14 in 63 (1 in 63+), 6 finer (1/16). NGC ID# 25GW, PCGS# 7737

1846 Quarter Eagle, MS61  
Low-Mintage Issue

**4224 1846 MS61 NGC. Breen-6181.** The date is lightly repunched, most apparent west of the bases of the 18. Breen (1988) called the variety an overdate, but instead the 6 punch was defective. A sun-gold representative without any singularly consequential marks. Both sides exhibit reflective fields and bold design motifs. The 1846 is a low-mintage condition rarity from a production of only 21,598 coins. Census: 17 in 61, 4 finer (11/15). NGC ID# 25GZ, PCGS# 7740

**4225 1847-C XF45 NGC. CAC. Variety 1.** A charming green-gold quarter eagle that has the "dirty gold" look preferred by knowledgeable Charlotte Mint specialists. The motifs lack a full impression but peripheral elements are bold. Only 23,226 pieces were issued. The XF45 CAC Population is just four pieces (12/15). NGC ID# 25H6, PCGS# 7745

**4226 1850-O — Minor Rim Clip at 5 O'clock — AU55 NGC. Variety 4.** The slight rim clip is apparent as an incompletely raised rim near OF and star 13. This lower mintage New Orleans quarter eagle has attractive caramel-gold and sea-green surfaces. The eagle is typically brought up, as are the curls near Liberty's ear. NGC ID# 25HK, PCGS# 7758

**4227 1855 MS63 PCGS.** An impressively produced example overall, despite minor softness on the eagle's leg feathers and talons. A mere handful of trivial marks limit the grade. The 1855 quarter eagle is seldom seen finer. Population: 23 in 63, 23 finer (1/16).  
*Ex: ANA Signature (Heritage, 7/2008), lot 2841; Houston Signature (Heritage, 12/2008), lot 1855.* NGC ID# 25J4, PCGS# 7774

**4228 1867-S AU53 PCGS. CAC.** Only 28,000 Liberty quarter eagles were struck in 1867 at the San Francisco Mint. This attractive AU53 example displays lightly abraded antique-gold surfaces with just a touch of wear on the well-detailed design elements. Population: 3 in 53, 30 finer (1/16). NGC ID# 7JRX, PCGS# 7806

**4229 1873-S MS61 NGC.** A softly lustrous and typically struck San Francisco quarter eagle, copper-colored with traces of green and orange. A number of small ticks appear on each side; these are slightly more concentrated at the center of the reverse. Appealing despite any flaws. Census: 12 in 61, 10 finer (11/15). NGC ID# 25KP, PCGS# 7820

**4230 1895 MS63 PCGS.** A beautiful green-gold and orange example whose eye appeal greatly exceeds its designated grade. The strike is precise and no marks are noticeable. A scant 6,000 pieces were issued. Encapsulated in a green label holder. NGC ID# 25LK, PCGS# 7847

**4231 1899 MS65 PCGS.** Pale golden surfaces show hints of apricot and straw. Each side is crisply detailed with shimmer-swirling luster and smooth eye appeal. Despite a mintage of only 27,200 coins, the 1899 quarter eagle is collectible in Mint State. Nonetheless, pieces grading finer than MS65 are scarce. Population: 73 in 65 (1 in 65+), 30 finer (1/16). NGC ID# 25LP, PCGS# 7851

1900 Quarter Eagle, MS67  
Tied for Finest at PCGS

**4232 1900 MS67 PCGS.** The 67,000-piece mintage is small compared to other quarter eagles from the 1900s, yet the issue goes relatively unappreciated even in high grades, where it is demonstrably scarce to rare. Just over a dozen examples are recognized by PCGS in MS67 with none finer, but the 1900 remains priced similarly to the more plentiful later issues. This example displays sun-gold color with rich, satiny surfaces and outstanding mint luster. The strike is fully detailed throughout. A tiny alloy spot near the nose pedigrees the piece. Population: 13 in 67, 0 finer (1/16). NGC ID# 25LR, PCGS# 7852

**4233 1904 MS66 PCGS.** This attractive, Premium Gem quarter eagle displays lemon-gold color and sharp mint luster and stands out as a splendid example of the Liberty Head type. Traces of prooflikeness on the obverse accompany lime-green accents that flash across the otherwise frosty, fully struck surfaces. NGC ID# 25LV, PCGS# 7856

**4234 1905 MS65+ PCGS.** The 1905 quarter eagle is readily available at the Gem level, but of 685 MS65 grading events, a mere eight coins have received the PCGS Plus designation. This example is exceedingly frosty and lustrous, with tempting sun-gold coloration and spectacular eye appeal. The fields and motifs appear mark-free in-hand, and nearly so with a glass. NGC ID# 267S, PCGS# 7857

**4235 1905 MS66+ PCGS.** This high-end Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved yellow-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC ID# 267S, PCGS# 7857

**4236 1907 MS66 PCGS.** The long-lived Liberty Head quarter eagle series concluded with a mintage of 336,294 coins in 1907. Final-year status and availability through Superb Gem condition account for the date's popularity among type specialists. Fully struck devices, clean medium orange-gold surfaces, and coruscating luster give this Premium Gem much to admire. NGC ID# 2688, PCGS# 7859

1907 Liberty Quarter Eagle, MS67  
Extremely Rare Any Finer

**4237 1907 MS67 PCGS.** From the final date of the design, the 1907 Liberty quarter eagle is scarce in MS67 condition, and finer examples are virtually unobtainable. This delightful Superb Gem exhibits razor-sharp definition on all design elements and the virtually pristine peach-gold surfaces radiate vibrant mint luster. Eye appeal is tremendous. Population: 85 in 67 (2 in 67+), 1 finer (1/16). NGC ID# 2688, PCGS# 7859

## INDIAN QUARTER EAGLES

- 4238 1908 MS64 PCGS.** Concerns over stacking and dirt accumulation tempered demand for Pratt-designed quarter eagles when they were first introduced, but a healthy number were saved nevertheless. This attractive Choice example is well-detailed with vibrant frost and splendid yellow-gold color. A small mark behind the tailfeathers is mentioned for accuracy. NGC ID# 288Y, PCGS# 7939
- 4239 1908 MS64 PCGS.** The introductory Indian Head quarter eagle issue saw a production of 564,800 coins in 1908. First-year examples were saved to a considerable extent, but they are rarely seen above MS65. Frosty luster glimmers over pleasing wheat-gold surfaces. Sharply struck, save for the eagle's shoulder. NGC ID# 288Y, PCGS# 7939
- 4240 1909 MS63 PCGS.** Greenish-gold and apricot patina compete for territory over the lustrous surfaces of this Select quarter eagle. The design features are well-struck throughout. Some minute marks determine the grade. The 1909 quarter eagle is collectible through MS64. NGC ID# 288Z, PCGS# 7940
- 4241 1910 MS64 NGC.** An attractive Choice example, with sharply detailed design elements and vibrant mint luster on both sides. The pleasing reddish-gold surfaces show only a few minor contact marks and eye appeal is outstanding. NGC ID# 2892, PCGS# 7941
- 4242 1910 MS64 NGC.** Mint luster glows softly beneath satiny, khaki-gold surfaces. The strike is sharp throughout, with minimal marks visible anywhere on the coin. Some faint diagonal striations in the left obverse field are visible with a glass, but they are Mint-caused and inconsequential in-hand. An attractive, near-Gem example, reminiscent of the so-called "Roman Gold" finish and color seen on some proofs of the year. NGC ID# 2892, PCGS# 7941

### 1911-D Two and a Half, Attractive AU53

- 4243 1911-D AU53 PCGS. CAC.** The sole key to its series, the 1911-D quarter eagle is in demand in all grades but still obtainable at the AU53 grade level of the present piece. The surfaces are relatively unmarked for the grade, showing only light high-point wear, attractive peach-gold patina, and a nice bold mintmark. NGC ID# 7KR7, PCGS# 7943
- 4244 1912 MS63 PCGS.** Lots of eye appeal and minimal contact marks for the grade assigned are among the virtues of this Select quarter eagle, showing abundant luster and appealing orange-gold patina. NGC ID# 7KR8, PCGS# 7944
- 4245 1912 MS63 NGC.** An attractive early series Indian quarter eagle, with sharply detailed design elements and vibrant mint luster throughout. A few scattered minor contact marks explain the grade. NGC ID# 7KR8, PCGS# 7944
- 4246 1914 MS62 PCGS.** A sharp example of the scarcest Philadelphia Mint Indian quarter eagle, with above-average luster for the issue and no conspicuous marks to mention. Coppery-gold color provides plentiful natural appeal. Slight blending at the lower headdress feathers and a few light field lines are of little significance for the assigned grade. NGC ID# 7KRA, PCGS# 7946
- 4247 1914 MS62 NGC.** A pleasing MS62 example of this low-mintage issue, with sharply detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 7KRA, PCGS# 7946

- 4248 1914 MS62 NGC.** A lightly marked MS62 example of this challenging series issue, with sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces add to the considerable eye appeal. NGC ID# 7KRA, PCGS# 7946
- 4249 1914-D MS63 PCGS.** This Denver issue ranks thirdmost challenging date in the series in high grades after the 1911-D and 1914. The present butter-gold example radiates satiny mint luster over minimally marked surfaces. Central strike detail is bold, while the rims show signs of die erosion. NGC ID# 2899, PCGS# 7947
- 4250 1914-D MS63 PCGS.** The 1914-D Indian quarter eagle is a decidedly better date in the series. This attractive Select example is sharply detailed throughout, with lightly marked orange-gold surfaces and vibrant mint luster. NGC ID# 2899, PCGS# 7947
- 4251 1914-D MS63 NGC.** The 1914-D Indian quarter eagle claims a nominal mintage of 448,000 pieces, but the issue is surprisingly elusive in high grade. This sharply detailed Select example displays lustrous reddish-gold surfaces with a few minor signs of contact. NGC ID# 2899, PCGS# 7947
- 4252 1914-D MS63 NGC.** An attractive Select specimen of this challenging branch mint issue, with well-detailed design elements and lightly marked orange-gold surfaces that show only minor signs of contact. NGC ID# 2899, PCGS# 7947
- 4253 1914-D MS64 NGC.** An unusually vibrant Indian quarter eagle, well-struck with satiny surfaces that approach glossiness, and slight reflectivity in the fields. Medium yellow-gold color frames coppery-gold patina in the recesses. For practical purposes, the 1914-D is the rarest issue of the series in Gem or finer grades, making a near-Gem coin such as the present Choice example an attractive opportunity. NGC ID# 2899, PCGS# 7947
- 4254 1914-D MS64 PCGS.** A delightful Choice specimen of one of the scarcer issues in the Indian quarter eagle series, this sharply detailed example displays especially vibrant mint luster and well-preserved yellow-gold surfaces. PCGS has graded 49 numerically finer examples (1/16). NGC ID# 2899, PCGS# 7947
- 4255 1915 MS64 NGC. CAC.** Impressively sharp and well-preserved, showing luminous peach, rose, and apricot-gold hues over unabraded surfaces. A few stray lines, detected with 10x magnification, prevent Gem classification but hardly hinder the eye appeal. NGC ID# 7KRC, PCGS# 7948
- 4256 1926 MS65 PCGS.** An attractive Gem specimen of this popular date, with sharply detailed design elements and virtually pristine orange-gold surfaces that radiate vibrant mint luster. PCGS has graded 46 numerically finer examples (1/16). NGC ID# 7KRE, PCGS# 7950
- 4257 1926 MS65+ PCGS.** A high-end Gem from a late-series mintage of 446,000 pieces, this coin offers sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and ample eye appeal. PCGS has graded 43 numerically finer examples (1/16). NGC ID# 7KRE, PCGS# 7950

**1926 Quarter Eagle, MS65**  
**With Flowing Luster and CAC Approval**

- 4258 1926 MS65 PCGS. CAC.** Certified in an early PCGS blue-label holder, this Gem quarter eagle overflows with bounteous luster and exuberant eye appeal. Caramel-gold color cedes to momentary flashes of deep orange, and the devices front and back are free of major impacts. PCGS reports only 43 finer, all at the MS66 grade level (1/16). NGC ID# 7KRE, PCGS# 7950

- 4259 1928 MS65 PCGS.** The 1928 Indian quarter eagle is seldom encountered in grades above the MS65 level. This spectacular Gem displays sharply detailed design elements and well-preserved, lustrous orange-gold surfaces. PCGS has graded 11 numerically finer examples (1/16). NGC ID# 289E, PCGS# 7952

**1929 Quarter Eagle, Last-Year MS65**  
**Sharp and Attractive**

- 4260 1929 MS65 PCGS.** The fine-grained, mottelike surfaces are a blend of sandy-gold and wheat-gold, showing only a single in the raised "field" before the Indian's brow, near star 6. The strike is quite well-executed throughout both sides, bringing up well the small feathers in the headdress and on the eagle's wings and claws. A few scattered marks show on the reverse. PCGS reports four submissions in MS66 or finer (1/16). The 1929 quarter eagles are popular as the last of their series. NGC ID# 289F, PCGS# 7953

**1929 Indian Quarter Eagle, MS65**  
**Rarely Seen Any Finer**

- 4261 1929 MS65 PCGS.** An attractive Gem from the final year of the denomination, this coin offers lustrous, lightly marked orange-gold surfaces with a few highlights of rose. The design elements are well-detailed and the overall presentation is quite pleasing. The 1929 Indian quarter eagle is a prime condition rarity in grades above MS65 and PCGS has graded only four numerically finer examples (1/16). NGC ID# 289F, PCGS# 7953

**THREE DOLLAR GOLD PIECES**

- 4262 1854 AU58 PCGS.** A virtually undetectable trace of wear prevents an Uncirculated designation, but the appeal of this near-Mint first-year three dollar gold piece is unaffected. Luster swirls around the edges, illuminating minimally marked yellow-gold surfaces. Sharply detailed with minor softness on the bowknot. NGC ID# 25M3, PCGS# 7969

- 4263 1855 AU58 NGC.** The 1855 three dollar pieces were struck in far lesser quantity than the first-year 1854 issue, since public acceptance was clearly lacking for the denomination. It seems amazing the series continued for another 34 years. This medium-gold example is borderline Mint State, with no serious abrasions but some delicate field lines and soft remaining luster. Weakness in the high points of the design is more from strike than wear. NGC ID# 25M6, PCGS# 7972

**1859 Three Dollar Gold, MS61**  
**Glistening Mint Luster**

- 4264 1859 MS61 PCGS.** Six years into the series, Philadelphia three dollar gold production had dropped by nearly 90%, totaling 15,558 pieces in 1859. Most Mint State coins survive in the MS60 to MS62 range, and they become rare in Select Uncirculated condition. Each side of this MS61 representative features a layer of glistening luster over delicate wheat-gold surfaces. The partly reflective reverse displays strong wreath detail, and Liberty's curls and plumes are equally bold. NGC ID# 7K5K, PCGS# 7979

**1867 Three Dollar, Choice AU**  
**Only 2,600 Pieces Minted**

- 4265 1867 AU55 NGC.** Production of three dollar gold coins dropped by 35% from 1866 to 1867, when only 2,600 pieces were struck. Reddish accents and partial luster appear within the recesses, complementing light wheat-gold surfaces overall. A touch of friction and scattered wispy marks are normal for the Choice AU assessment. NGC ID# 25MN, PCGS# 7988

- 4266 1870 AU55 PCGS.** Only 3,500 business-strike three dollar gold pieces were produced in 1870 at Philadelphia. This Choice AU example boasts yellow-gold surfaces that show prooflike reflectivity and tinges of red in the sheltered areas.  
Ex: Long Beach Signature (Heritage, 9/2014), lot 4411. NGC ID# 7K8F, PCGS# 7991

**1877 Three Dollar, Scarce AU50**  
**One of the Key Dates in the Series**

**4267 1877 AU50 PCGS.** The mintage of just 1,468 pieces plus 30 proofs would have made this issue rare under any circumstances, and the Panic of 1877 perhaps reduced the numismatic saving of Mint State examples. Few 1877 three dollars exist in Mint State, with About Uncirculated coins the next best in line. This example displays substantial remaining luster at the margins and pleasing medium-gold color. Marks are small and less numerous than expected for the grade. Population: 7 in 50, 41 finer (1/16). NGC ID# 25MY, PCGS# 7999

**4268 1878 AU58 NGC.** A pleasing lemon-gold near-Mint representative. Liberty's forehead and shoulder curl show slight wear, but there are no noticeable marks. The reverse exhibits minor die doubling on the outer border of the upper right-side wreath. Both 8s in the date are lightly repunched within the upper loops. NGC ID# 25MZ, PCGS# 8000

**4269 1878 AU58 PCGS.** A well struck near-Mint three dollar type coin. Rose-red margins encompass lemon-gold fields. No marks are noticeable. The reverse is lightly die doubled, apparent on the upper right border of the wreath and the ARS in DOLLARS. NGC ID# 25MZ, PCGS# 8000

**1882 Three Dollar, Contrasted MS60**

**4270 1882 MS60 NGC.** Considerable prooflike contrast occurs between the light yellow-gold motifs and the reflective fields, giving this lustrous Uncirculated three dollar gold coin a strong degree of aesthetic appeal. The upper hair strands are somewhat incomplete, but the wreath elements, including the bowknot and adjacent leaves, are sharp. This is one of only 1,500 three dollar gold coins struck in 1882. NGC ID# 25N5, PCGS# 8004

**PROOF THREE DOLLAR GOLD PIECE**

**Proof 1879 Three Dollar**  
**Only 30 Pieces Struck**

**4271 1879 — Altered Surfaces — PCGS Genuine. Proof, Unc. Details.** The 1879 has a tiny *Guide Book* proof mintage of 30 pieces. Most of the few survivors trade for five figures, but the present specimen should prove affordable. The fully struck sun-gold surfaces are flashy and a bit bright. The obverse displays delicate hairlines, and both sides have inconsequential contact marks. NGC ID# 28AM, PCGS# 8043

**EARLY HALF EAGLES**

**1803/2 BD-1 Five Dollar**  
**AU Sharpness**

**4272 1803/2 BD-1, R.4 — Damaged, Cleaned — NGC Details. AU.** Bass-Dannreuther Die State b/c. This canary-gold early half eagle has little if any circulation wear, but the surfaces are hairlined, and the right obverse displays several subdued thin marks. The reverse is minimally abraded aside from a cluster of marks near the beak. NGC ID# 25NY, PCGS# 504948 Base PCGS# 8084

**1809/8 Half Eagle, BD-1, XF Sharpness**

**4273 1809/8 BD-1, High R.3 — Reverse Damage — NGC Details. XF.** Bass-Dannreuther Die State c/b. The die cracks on the obverse are fairly well-advanced, more so than on the reverse. The BD-1 dies are the sole pair used for this issue of a reported nearly 34,000 coins. There is much to commend this piece in terms of luster and color overall as well as only a modicum of wear, save for the reverse area above the right wing, where some miscreant has created a series of digs into the surfaces, limited in area but deep. Attractive otherwise.

**1811 Half Eagle, XF45 Details  
Small 5, BD-2**

- 4274** 1811 Small 5, BD-2, R.3 — Tooled, Cleaned — ANACS. XF45 Details. Bass-Dannreuther Die State d/a. A moderately circulated olive-gold representative without any visible abrasions. A lens reveals hairlines throughout both sides. Only two die marriages are known for this Reich-designed date, and neither presents a stopper for early gold collectors. NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

**CLASSIC HALF EAGLES**

- 4275** 1837 AU55 NGC. Breen-6513, McCloskey 3-C, R.4. Small Date, Script 8. Breen described this variety as “very rare” in his 1988 *Encyclopedia*, but it is now recognized as a scarce R.4. This bright yellow-gold Classic Head half eagle displays radiant luster near the protected areas. A singular pinscratch appears under Liberty’s eye. The devices show good detail with expected high-point rub. NGC ID# 25RZ, PCGS# 8175

- 4276** 1838 AU50 NGC. Breen-6515, McCloskey 2-B, R.1. The reverse has Small Arrows and a Large 5 in the denomination. Struck from perfect dies with no clash marks or die cracks, this piece shows trivial marks on its deep gold surfaces with hints of green and rose overtones. NGC ID# 25S4, PCGS# 8176

**LIBERTY HALF EAGLES**

**1839 Half Eagle, Conditionally Rare AU58  
Rarer Still With CAC Approval**

- 4277** 1839 AU58 PCGS. CAC. Tawny-gold surfaces brim with most of the original luster remaining on this nicely preserved 1839 half eagle. Most survivors of this early issue are no better than VF or XF; a near-Mint State example such as this coin is a condition rarity. There are only a few scattered marks, none of any import. Population: 20 in 58, 21 finer. CAC: 5 in 58, 5 finer (1/16). NGC ID# 25S7, PCGS# 8191

**1841-D Five Dollar, AU53  
Small D Mintmark Variant**

- 4278** 1841-D Small D AU53 NGC. Variety 5-D. Only two varieties are known of the 1841-D, each representing a separate mintmark variant. Of the two, the Tall Mintmark is the scarcer. The mintage of 23,392 pieces shows significant evidence of heavy circulation with the majority of the estimated 225-275 survivors in the VF-XF grade range. This is an even reddish-gold piece that shows a few small abrasions scattered across each side. Only slight high-point friction from handling is evident. Census: 10 in 53, 43 finer (11/15). NGC ID# 25SR, PCGS# 8204

**1855 Liberty Half Eagle, MS62  
Few are Finer at PCGS**

- 4279** 1855 MS62 PCGS. Bagmarks are typically the problem on lower-level Uncirculated gold, and this No Motto five has its share. That said, the orange-gold color and mint-fresh luster of the coin are outstanding, with exceptional eye appeal for the grade. A large abrasion on the cheek must be mentioned, as well as a scattering of field marks, but the strike is relatively strong everywhere except the eagle’s neck. Population: 8 in 62, 10 finer (1/16). NGC ID# 42AP, PCGS# 8261

- 4280** 1881-S MS64+ PCGS. CAC. This attractive high-end Choice example displays well-preserved peach-gold surfaces, with vibrant mint luster and just a few minor contact marks. The design elements are well-detailed and overall eye appeal is quite strong. PCGS has graded five numerically finer examples (12/15). NGC ID# 25XF, PCGS# 8357

- 4281** 1892-CC AU58 PCGS. Variety 1-A. Luster dominates the borders and devices of this Borderline Uncirculated Carson City five. The radiant honey-gold surfaces are minimally marked save for a diagonal line near star 8. Much scarcer in better grades than its 1891-CC predecessor. NGC ID# 25Y7, PCGS# 8380

- 4282** 1893 MS65 NGC. Glowing peach and lavender-gold surfaces are awash in thick mint frost. The design elements are strongly rendered, including full star centers, talons, and fletchings. An interesting die crack travels from the rim through ES OF to the wingtip. Minute ticks define the grade. NGC shows 11 finer submissions (12/15). NGC ID# 25YA, PCGS# 8383

**1907 Liberty Five, MS66+  
Standout Type Coin**

- 4283 1907 MS66+ NGC.** The Plus designation by NGC could have been granted for color alone, yet the full strike and outstanding luster are equally impressive to complement the tempting orange-gold patina with ruby-red accents. Only a few unimportant ticks keep this coin from an even higher grade. Census: 41 in 66 (4 in 66+, 2 in 66 ★), 14 finer (11/15). NGC ID# 25ZC, PCGS# 8416

**INDIAN HALF EAGLES**

- 4284 1908-D MS63 PCGS. CAC.** The 1908-D Indian five is a better date above MS63, coming from a total mintage of only 148,000 pieces. This collectible Select example displays satiny straw-gold luster and minimal abrasions. Slight strike softness on the lower headdress feathers is not unusual for the issue. NGC ID# 93KW, PCGS# 8511
- 4285 1909-D MS64 PCGS. CAC.** An extremely attractive Choice example of this popular type issue, with sharply detailed design elements and vibrant mint luster on both sides. Only minor signs of contact are evident and eye appeal is outstanding. NGC ID# 28DJ, PCGS# 8514
- 4286 1909-S MS60 NGC.** The 1909-S Indian half eagle is surprisingly difficult to locate in all Mint State grades. This impressive MS60 specimen offers well-detailed design elements and pleasing orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 25ZL, PCGS# 8516
- 4287 1910-S MS61 NGC.** The wheat-gold surfaces of this piece show generous eye appeal for the assigned grade. The Indian's cheek is free of mentionable contact, although some scattered ticks show in the obverse field and a couple of thin scrapes on the reverse. Still quite attractive. NGC ID# 28DN, PCGS# 8519
- 4288 1910-S MS61 PCGS.** Despite a mintage in excess of 770,000 pieces, the 1910-S Indian half eagle is a scarce date in Uncirculated condition. This piece is moderately abraded, as the grade suggests, but lacks any individual distractions. Satiny straw-gold luster gives each side a soft glow. The devices are well-struck. NGC ID# 28DN, PCGS# 8519
- 4289 1910-S MS61 PCGS. CAC.** CAC-approved with no major abrasions observed; scattered light grazes account for the grade. This semikey-date coin is well-struck, displaying medium apricot-gold patina. Finer examples are infrequently encountered. NGC ID# 28DN, PCGS# 8519

**1910-S Indian Half Eagle, MS62**

- 4290 1910-S MS62 NGC.** The 1910-S Indian half eagle is a scarce issue in MS62 condition, despite the substantial mintage of 770,200 pieces, and finer examples are rare. This pleasing MS62 example displays sharply detailed design elements and lightly marked yellow and rose-gold surfaces with attractive mint luster. NGC has graded 34 numerically finer examples (1/16). NGC ID# 28DN, PCGS# 8519

**1911 Indian Half Eagle, MS64  
Vivid Color, Nice Luster**

- 4291 1911 MS64 PCGS. CAC.** The 1911 Indian eagle is a reasonably available issue in MS64 condition, but it becomes very scarce in any finer grade. This attractive near-Gem displays well-preserved orange-gold surfaces, with well-detailed design elements and abundant satiny mint luster on both sides. PCGS has graded 62 numerically finer examples (1/16). NGC ID# 28DP, PCGS# 8520
- 4292 1911-D AU55 PCGS.** An attractive Choice AU specimen of this low-mintage series key, with just a trace of wear on the high points of the design elements and lustrous orange-gold surfaces that show only minor abrasions. NGC ID# 28DR, PCGS# 8521

**1913-S Indian Five, MS61  
Popular Early Series Branch Mint Issue**

- 4293 1913-S MS61 NGC.** Before World War I, gold coins circulated widely in the Western part of the country, so circulated specimens of the 1913-S Indian half eagle are not difficult to locate today, but Mint State examples are much more elusive. This charming MS61 example displays well-detailed design elements and pleasing reddish-gold surfaces that show some scattered minor contact marks. NGC ID# 25ZP, PCGS# 8526

**1913-S Indian Half Eagle, MS61  
Challenging Issue in High Grade**

- 4294 1913-S MS61 PCGS.** With a reported mintage of 408,000 pieces, the 1913-S Indian half eagle is not difficult to locate in circulated grades, but Mint State examples are challenging. This attractive MS61 specimen offers sharply detailed design elements and lustrous orange-gold surfaces with the minimum number of minor contact marks for the grade. NGC ID# 25ZP, PCGS# 8526

**1915 Half Eagle, Elusive MS64  
Well-Produced Issue, Seldom Seen Finer**

- 4295 1915 MS64 PCGS.** The 1915 half eagle is a well-made issue overall but one that is surprisingly elusive at the MS64 grade level, even though examples can be found for a price. This MS64 PCGS example demonstrates the issue's many virtues, starting with great reddish-orange color, a bold strike, and overall excellent preservation including only minor marks on the Indian's profile. PCGS reports only 51 submissions at the Gem grade level (including five in MS65+) and none finer (1/16). NGC ID# 28DX, PCGS# 8530

**1916-S Half Eagle, Orange-Gold MS62**

- 4296 1916-S MS62 PCGS. CAC.** Generous luster runs on both sides of this S-mint half eagle, which displays orange-gold and sandy-gold color prevailing with a couple of hazy gray areas, smallish and undistracting. The mintmark is mushy, but the overall eye appeal is high for the issue and grade. CAC: 25 in 62, 41 finer (1/16). NGC ID# 28DY, PCGS# 8532

**LIBERTY EAGLES**

**1839/8 Large Letters Ten Dollar  
AU Details**

- 4297 1839/8 Large Letters — Improperly Cleaned — NGC Details. AU.** The 1838-1839 tens are a distinct two-year type because of the differences in design in the head of Liberty. Examples are seldom found in mint condition. This is a muted yellow-gold example with light hairlining evident when closely examined. The head of Liberty is well-defined, but the other design elements show slight high-point softness. Lightly marked. NGC ID# 54XF, PCGS# 8576

- 4298 1847-O XF45 PCGS. Gold CAC. Variety 8.** Mintages of eagles climbed during 1847, partly due to the Mexican-American War. Eight die marriages of 1847-O tens are confirmed. The present well-defined example displays original pumpkin-gold toning. Minor marks are distributed but none are of singular consequence. Certified in a green label holder. NGC ID# 2632, PCGS# 8598

- 4299 1850 Small Date XF45 NGC.** While the date digits are noticeably different on the Small and Large Date tens from 1850, there is no appreciable difference in scarcity. The Small Date punch was apparently meant for half cents and cents. The surfaces display even wear. There is a cluster of small digs on the lower left of the obverse and a rim-to-rim die crack traverses the top of that side. Rich reddish patina surrounds the devices. Census: 20 in 45, 81 finer (11/15). NGC ID# 2638, PCGS# 8604

- 4300 1852 AU58 NGC.** The even orange-gold surfaces show significant remaining mint luster around the devices. Small abrasions are peppered over each side and the strike is just a bit soft over the high points of the design elements. NGC ID# 263C, PCGS# 8608

- 4301 1855 AU58 NGC.** Mint luster remains at the margins of this lightly circulated mid-50s ten. The 1855 issue is among the more available 1850s-era eagles, and the mintage of 121,701 pieces was the final year of six-digit production for the No Motto design. This example shows scattered tiny marks but no large abrasions, with pleasing straw-gold color and a uniformly sharp strike. NGC reports 42 numerically finer submissions (12/15). NGC ID# 263L, PCGS# 8616

**1859-S Eagle, AU Details  
Just 7,000 Pieces Struck**

- 4302 1859-S — Rim Filing — NGC Details. AU.** Except during 1875, the San Francisco Mint struck gold eagles every year between 1854, the first year of the facility, and 1889. But a majority of issues had low mintages, unlike their double eagle counterparts. The 1859-S ten had a production of only 7,000 pieces, a slender fraction of the 646,445 S-mint twenties coined that year. Collector interest in mintmarked high denomination Liberty gold was minimal prior to the 1890s, and today, the finest-graded 1859-S ten dollar survivor is in an NGC MS60 holder. The present example is lightly circulated, but the mildly glossy butter-gold surfaces display relatively few marks. The rim filing is subtle and would be overlooked by most collectors. NGC ID# 2643, PCGS# 8630

**1868 Ten Dollar, AU55  
Available Choice Motto Issue**

- 4303 1868 AU55 NGC. CAC.** The 1868 is an available Motto ten, and the AU55 grade level represents a good value for the issue. At the next highest grade level (AU58) NGC shows 32 pieces have been graded (1/16), and it is tough sledding after that. This is an original orange-gold example with noticeable traces of mint luster. The surfaces are remarkably free from abrasions. NGC ID# 264N, PCGS# 8653
- 4304 1872-S AU53 PCGS.** This semiprooflike 1872-S ten dollar features a hint reflectivity in the fields, particularly on the obverse. Each side boasts rich yellow-gold color and well-defined devices with light high-point blending. Partly lustrous with minimally distracting marks. From a production of 17,300 coins. Population: 12 in 53, 11 finer (12/15). NGC ID# 2653, PCGS# 8665
- 4305 1878-S AU55 NGC.** Original orange-gold color adds to the appeal of this Choice AU eagle from this elusive S-mint issue. Lavender accents occur primarily on the reverse, while scattered marks appear throughout, including a number on Liberty's cheek. Census: 44 in 55 (2 in 55+★), 29 finer (11/15).  
*Ex: Collection of Donald E. Bently / U.S. Coin Signature (Heritage, 3/2014), lot 30388. NGC ID# 265L, PCGS# 8682*
- 4306 1879 MS62 PCGS.** The date is lightly repunched, apparent within the upper loop of the 8. A well struck caramel-gold example. Luster dominates the borders and motifs. Moderate marks are confined to the left obverse field. NGC ID# 265M, PCGS# 8683
- 4307 1880 MS63 PCGS.** The 1880 Liberty eagle is seldom encountered in grades above the MS63 level. This attractive Select specimen offers sharply detailed design elements and lustrous, lightly marked surfaces. Population: 68 in 63 (2 in 63+), 20 finer (12/15). NGC ID# 265S, PCGS# 8687

- 4308 1880 MS63 PCGS.** While a common date with a correspondingly large mintage (1.6 million pieces), the 1880 has the charm of a type coin from the 19th century. The softly frosted mint luster shows only slight evidence of coin-to-coin contact. Well struck and very attractive. NGC ID# 265S, PCGS# 8687

**1881-O Ten Dollar, Choice AU  
Low Mintage New Orleans Rarity**

- 4309 1881-O AU55 ANACS. Variety 1.** The New Orleans Mint struck two denominations in 1881, 5.7 million Morgan dollars and a mere 8,350 Liberty eagles. The latter are rare and typically encountered in XF and AU grades. The present well-defined Choice AU example has lightly marked and luminous straw-gold surfaces. Minor flan flaws are noted below the G in GOD and the right (facing) wingtip. Certified in an old small-sized holder. NGC ID# 265Y, PCGS# 8693
- 4310 1882 MS63+ PCGS.** A high-end Select specimen of this popular type issue, with sharply detailed design elements and lustrous peach-gold surfaces that show only scattered, minor signs of contact. PCGS has graded 45 numerically finer examples (1/16). NGC ID# 2662, PCGS# 8695
- 4311 1886 MS63 PCGS.** The 1886 has a low population in Select Mint State. This original example is boldly impressed and richly lustrous. Frosted fields and devices convey the natural allure of freshly minted gold. Minor abrasions explain the grade but do not diminish the appeal. Population: 36 in 63, 8 finer (12/15). NGC ID# 266F, PCGS# 8708
- 4312 1889-S MS63+ PCGS.** A high-end Select specimen, with well-detailed design elements and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. PCGS has graded 23 numerically finer examples (1/16). NGC ID# 267L, PCGS# 8716
- 4313 1892 MS62 Prooflike NGC.** Bright, brassy surfaces exhibit numerous light marks, especially on the obverse. The design elements are sharply struck and contrast nicely with the reflective fields. Census: 7 in 62 Prooflike, 0 finer (12/15). NGC also reports one MS62 Deep Prooflike.  
*Ex: Central States Bullet Auction (Heritage, 5/2005), lot 2683. NGC ID# 26JA, PCGS# 78721*
- 4314 1893 MS62+ Prooflike NGC.** This attractive Plus-graded MS62 specimen exhibits sharply detailed design elements and reflective prooflike fields with a scattering of minor contact marks on both sides. Census: 62 in 62 Prooflike, 1 in 62+ Prooflike, 27 finer (12/15). NGC ID# 266Z, PCGS# 78725
- 4315 1894 MS64 PCGS.** The 1894 eagle is readily available up to a point, and that point is the MS64 grade. Thereafter, PCGS reports a single example in MS65 and none finer (12/15). This example is a pleasing near-Gem, with richly frosted surfaces and a pinpoint-sharp strike. Mint luster coruscates beneath wheat-gold coloration. Scattered small marks and luster grazes define the near-Gem grade. NGC ID# 2675, PCGS# 8729
- 4316 1899 MS64+ NGC. CAC.** A high-end Choice example, with vivid orange-gold surfaces that show only minor signs of contact and sharply detailed design elements, with slightly subdued mint luster. Eye appeal is quite strong. NGC ID# 267J, PCGS# 8742

**1901 Ten Dollar Liberty, MS65+  
Perfect for a Gem Type Set**

**4317 1901 MS65+ NGC.** A high-end Gem example of this popular date, with sharply detailed design elements and softly frosted mint luster over both sides. The well-preserved reddish-gold surfaces show a few minor abrasions scattered over both sides, none of which are worthy of individual mention. NGC ID# 7LHF, PCGS# 8747

**4318 1903-O MS63 PCGS. Variety 1.** A conditionally scarce New Orleans issue. Although available in AU to BU grades, the 1903-O is seldom seen as nice as the present well struck green-gold example, and is high-end for the MS63 level. A late die state for the marriage with numerous reverse peripheral cracks. NGC ID# 267W, PCGS# 8753

**1903-S Liberty Eagle, MS65+  
Seldom Encountered Finer**

**4319 1903-S MS65+ PCGS. CAC.** The 1903-S Liberty eagle claims a substantial mintage of 538,000 pieces, but few high-quality specimens were saved by contemporary collectors and the 1903-S is very scarce at the MS65 grade level. This high-end Gem offers sharply detailed design elements and well-preserved peach-gold surfaces with vibrant mint luster on both sides. Eye appeal is terrific. Population: 63 in 65 (5 in 65+), 26 finer (12/15). NGC ID# 267X, PCGS# 8754

**1906-S Liberty Ten, MS63  
Rarely Seen Finer**

**4320 1906-S MS63 PCGS.** The 1906-S Liberty eagle is reasonably available through the MS62 grade level, but MS63 examples are quite elusive. This attractive Select specimen exhibits sharply detailed design elements and lustrous orange-gold surfaces, with the expected number of minor contact marks for the grade. Population: 33 in 63, 11 finer (1/16). NGC ID# 53FB, PCGS# 8762

**4321 1907-S MS62 PCGS.** The 1907-S is a scarce 20th century issue with a mintage of only 210,500 pieces. This is a brightly frosted example with numerous small abrasions scattered over each side. The strike is strong throughout and the yellow-gold color shows just a hint of reddish patina. NGC ID# 38EF, PCGS# 8765

**INDIAN EAGLES**

**4322 1907 No Motto MS62 PCGS.** The inaugural Saint-Gaudens ten dollar issue was saved to a large extent, making this 1907 No Motto an ideal representative of the type. Each side exhibits a mix of straw and orange-gold coloration with an overlay of softly frosted luster. Striking issues during the first year of production account for the typical incompleteness. NGC ID# 28GF, PCGS# 8852

**4323 1907 No Motto MS62 PCGS.** A brightly lustrous MS62 example from the first year of the Indian design. This well-detailed specimen displays pleasing orange-gold surfaces with vibrant mint luster and only minor signs of contact. NGC ID# 28GF, PCGS# 8852

**4324 1907 No Motto MS62 PCGS.** Of the three regular No Motto Indian ten issues, the 1907 is by far the most available overall. This Mint State example displays light abrasions, but none are individually bothersome. Rich straw-gold luster increases the eye appeal, and the design elements are well-struck. NGC ID# 28GF, PCGS# 8852

**1907 Indian Eagle, MS63  
Popular No Motto Type**

**4325 1907 No Motto MS63 PCGS.** From the first year of the short-lived No Motto design, this attractive Select specimen exhibits well-detailed design elements, with just a touch of softness on the eagles feathers. The lustrous orange-gold surfaces show the minimum number of minor contact marks for the grade. NGC ID# 28GF, PCGS# 8852

**4326 1908-D No Motto AU58 PCGS.** An attractive near-Mint example from the last year of the short-lived No Motto design. This coin shows just a trace of high-point wear on the design elements and the lustrous orange-gold surfaces are remarkably free of significant contact marks. NGC ID# 28GH, PCGS# 8854

**4327 1908 Motto MS63 NGC.** Collectors seeking a single 1908-dated example typically target the No Motto coins, as the issue's mintage is more than 10 times that its No Motto counterpart. Khaki-gold color, crisp detail (despite minor central softness), and radiant luster define this pleasing Select representative. NGC ID# 28GJ, PCGS# 8859

**1908 Indian Eagle, MS63+  
Sharp First-Year Motto Type Coin**

**4328 1908 Motto MS63+ PCGS.** The 1908 Motto ten is better-produced and considerably more available than its No Motto counterpart, making it the logical selection for series date collectors. This naturally patinated example is high end for its MS63 grade, signified by the PCGS Plus designation. Rich, yellow gold color is brightly lustrous beneath an original skin of gray and orange overtones. The coin is sharply struck with frosty texture, and shows only a few ticklike marks. NGC ID# 28GJ, PCGS# 8859

**4329 1908-D Motto MS62 NGC.** Despite a substantial mintage of 836,500 pieces, the 1908-D With Motto Indian eagle is difficult to locate in high grade. This well-detailed MS62 example offers lustrous orange-gold surfaces that show a minimum number of minor contact marks for the grade. NGC ID# 28GK, PCGS# 8860

**1908-D With Motto Eagle, MS62  
Seldom Seen With CAC Approval**

**4330 1908-D Motto MS62 PCGS. CAC.** The surfaces show a good deal of eye appeal for the relatively modest grade, but this piece is nonetheless high-end for its MS62 ranking. Wheat-gold color complements generous luster and scattered small marks. CAC has approved only a dozen pieces at this grade level with six finer (12/15). NGC ID# 28GK, PCGS# 8860

**4331 1909 MS62 NGC.** With respect to relative rarity, only the 1933 Indian Head eagle, of which virtually the entire mintage was sent to the melting pots, surpasses the 1909 among Philadelphia issues in the series. The obverse fields are noticeably unabraded, while the cheek is lightly marked. Yellow-gold color combines with vibrant luster and good detail throughout. NGC ID# 28GM, PCGS# 8862

**4332 1909 MS62 PCGS.** The 1909 stands out in the series as the secondmost challenging P-mint issue after the heavily melted 1933. This MS62 ten dollar gold coin exhibits lemon-gold coloration over lustrous, well-preserved surfaces. Sharply struck motifs show a bit of softness on the two lowest headdress feathers and the eagle's shoulder. NGC ID# 28GM, PCGS# 8862

**1909 Indian Ten  
Beautifully Toned Near-Gem**

**4333 1909 MS64 PCGS.** The 1909 is scarce for a Philadelphia Indian ten, and the issue is invariably well-produced when at the near-Gem level. Finer coins are very scarce. The toning alone sets this example apart from other MS64 coins, although the strike is exceptionally sharp, too. Lilac and orange highlights play across the frosty-textured surfaces. Cartwheel mint luster abounds. PCGS recognizes just 29 numerically finer examples (1/16). NGC ID# 28GM, PCGS# 8862

**4334 1909-D MS61 NGC.** A blend of copper-orange and yellow-gold colors the finely textured surfaces this is Uncirculated 1909-D eagle, accentuated with hints of mint-green. The devices exhibit good detail, and abrasions are peppered over each side. A conditionally rare issue from a mintage of 121,540 coins. NGC ID# 28GN, PCGS# 8863

**4335 1909-D MS61 PCGS Secure.** An attractive Mint State specimen of this early series issue, with well-detailed design elements and lustrous orange-gold surfaces that show a scattering of minor contact marks on both sides. NGC ID# 28GN, PCGS# 8863

**4336 1909-D MS62 PCGS.** The 1909-D tends to be overlooked because of its reputation for poor strikes and lackluster surfaces, but even lower-Mint State examples are difficult to locate, and Select coins or better are very scarce. Rose-gold surfaces showcase delicate satin luster and above-average detail for the date. NGC ID# 28GN, PCGS# 8863

**1909-D Eagle, Attractive MS63  
Seldom Seen Finer**

**4337 1909-D MS63 PCGS.** Scattered glints of pale rose patina appear amid the prevailing orange-gold color with generous luster on this Select 1909-D eagle, an attractive survivor from the low mintage of 121,000 pieces for this issue. Tiny marks rather than mentionable contact account for the grade. Finding a higher-grade example might entail a lengthy search: PCGS reports only 42 submitted in MS64 and finer (12/15). NGC ID# 28GN, PCGS# 8863

**4338 1909-S MS61 NGC.** Abrasions are often a problem for this San Francisco eagle, although the present coin shows only small marks. The strike is slightly incomplete at the eagle's shoulder, trailing leg, and talons, as well as at the high points of the curls. Nice mint luster shines beneath medium-gold patina. NGC ID# 28GP, PCGS# 8864

**4339 1909-S MS61 NGC.** This pleasing Mint State example displays orange-gold surfaces with slightly subdued mint luster and a minimum number of minor contact marks for the grade. The design elements are well-detailed. NGC ID# 28GP, PCGS# 8864

**4340 1910-D MS64 NGC.** The 1910-D was mass-produced (2 million coins) and heavily melted, but it remains collectible through MS64. Unlike many survivors, the peripheral elements are well-defined without excessive evidence of die erosion. Satin luster rolls over moderately granular peach-gold surfaces. NGC ID# 28GS, PCGS# 8866

**4341 1910-S MS60 PCGS.** Grade-limiting abrasions appear almost entirely in the form of light, uniform surface chatter on this Uncirculated 1910-S Indian eagle — only a small mark near star 2 and 3 is worthy of individual mention. Each side displays original wheat-gold luster and excellent detail. NGC ID# 268D, PCGS# 8867

**4342 1910-S MS62 NGC.** This San Francisco ten dollar issue is a “classic condition rarity that is one of the cornerstones to a great collection,” according to Garrett and Guth. This collector-grade representative has softly frosted luster over green and rose-gold surfaces. A crisp impression furthers the appeal. NGC ID# 268D, PCGS# 8867

---

**1910-S Ten Dollar, MS62+  
Glowing Honey-Gold Surfaces**

**4343 1910-S MS62+ PCGS. CAC.** The 1910-S is a slightly better date in Mint State grades, with the majority of such pieces grading no finer than MS62. This Plus-graded honey-gold example is sharply struck with glowing luster. Scattered abrasions limit the grade, though none of them are individually detracting. Finer examples are scarcely seen.

*Ex: New York Signature (Heritage, 10/2014), lot 4393. NGC ID# 268D, PCGS# 8867*

**4344 1912-S MS61 PCGS.** Ten dollar gold production at the California mint reached 300,000 coins in 1912, and the issue is a noted strike rarity in the series. This MS61 eagle is typically defined with frosty khaki and wheat-gold surfaces. Expectedly abraded. NGC ID# 269G, PCGS# 8872

**4345 1913-S AU55 PCGS.** A low mintage of 66,000 coins guarantees the perennial popularity of the 1913-S, a semikey date in the Saint-Gaudens series. This minimally circulated example has orange-gold surfaces with smooth obverse fields. Tiny ticks are concentrated on Liberty's cheek and near the eagle. NGC ID# 28GZ, PCGS# 8874

---

**1913-S Eagle, Lustrous AU58  
Low Mintage of 66,000 Coins**

**4346 1913-S AU58 ANACS.** Lavish, nearly complete luster complements attractive orange-gold and honey-gold surfaces that boast considerable eye appeal and only minor ticks consistent with a short spate in circulation. The mintage of only 66,000 pieces for the 1913-S, coupled with extensive circulation for most survivors, puts this piece well ahead of most examples. The strike is decent, although a few larger marks blend into the headdress. NGC ID# 28GZ, PCGS# 8874

**4347 1915 MS63 NGC.** Sharply struck, as expected for this generally well-produced eagle, with bold cartwheel mint luster that radiates from the centers on each side. Rich-gold color covers the lightly textured surfaces of this brilliant Indian ten. Only a few wispy abrasions are visible on the frosty, Select Uncirculated fields and devices. NGC ID# 28H5, PCGS# 8878

---

**1915-S Indian Eagle, AU58  
Low-Mintage Better Date**

**4348 1915-S AU58 PCGS.** From a small mintage of 59,000 pieces, the 1915-S Indian eagle is definitely a better date in the series. This attractive Near-Mint specimen exhibits just a trace of wear on the high points of the design elements, like the eagle's shoulder. The pleasing orange-gold surfaces are remarkably free of distracting contact marks, and both sides retain much original mint luster. NGC ID# 28H6, PCGS# 8879

**4349 1916-S AU58 PCGS.** A slightly better date in Mint State, the 1916-S Indian eagle had a moderately low mintage of 138,500 coins. This is a collectible near-Mint representative with partially lustrous wheat-gold surfaces and only a brush of friction over the high points of the design. Light chatter in the fields is consistent with the grade. NGC ID# 28H7, PCGS# 8880

## LIBERTY DOUBLE EAGLES

### 1851 Twenty Dollar, AU58 Problem-Free Type One Example

- 4350 1851 AU58 NGC. CAC.** The mintage of 2 million pieces is a clear reflection of the massive quantities of gold coming out of the California gold fields. This is an exceptionally clean example that shows no obvious or mentionable abrasions. Just the slightest bit of luster loss is seen in the exposed areas of the fields. Sharply defined throughout. What's not to like? NGC ID# 268H, PCGS# 8904

### 1851-O Twenty Dollar, AU Details Collectible O-Mint Issue

- 4351 1851-O — Scratches — NGC Details. AU. Variety 1.** New Orleans double eagle production peaked in 1851 at 315,000 coins, benefiting from Gold Rush bullion deposits. The 1851-O remains one of only a handful of New Orleans issues in the series that is usually available to collectors. This piece shows trivial high-point wear and rich green-gold color. A few truly faint scratches in the fields preclude a numeric grade but have little affect on the eye appeal. NGC ID# 268J, PCGS# 8905
- 4352 1852 XF45 PCGS.** The 1852 is a collectible Type One issue that is popularly targeted for type representation. Light yellow-gold surfaces show tinges of green and scattered ticks over each side. The only individually noteworthy blemish is a linear depression from the nose to the cheek. Lustrous and well-detailed. NGC ID# 268K, PCGS# 8906

### 1853 Double Eagle, Choice AU Breen-7160, Repunched Date

- 4353 1853 AU55 PCGS. CAC. Breen-7160.** A well struck apricot-gold Choice AU example without any noticeable marks. Luster fills the borders, curls, rays, and plumage, and individually outlines the obverse stars. The 3 in the date is repunched, an impressive variety but different from the FS-301 1853/2.  
Ex: *Chicago Central States Signature* (Heritage, 4/2014), lot 6751, which realized \$4,114.85. NGC ID# 268M, PCGS# 8908

### 1855-S Double Eagle, AU55 Sharp With Light Wear

- 4354 1855-S AU55 NGC. Variety 14A.** Medium S. Broken A in STATES. The granular wheat-gold centers yield to deep orange-gold at the periphery on surfaces that are well-struck with light wear and the usual smattering of marks. The italic or slanting 5s in the date add to the quaintness and appeal of this early S-mint date.  
Ex: *Charlotte ANA Signature* (Heritage, 3/2007), lot 2162. NGC ID# 268X, PCGS# 8916

- 4355 1856 XF45 NGC.** A natural, aged-gold patina covers both sides of this attractive, moderately circulated twenty. Olive-gold coloration displays brief orange accents. Some darker build-up on the devices adds to the original look, an appearance that is highly desired by many collectors of circulated gold. The surfaces show only minor abrasions to earn the Choice XF designation. NGC ID# 268Y, PCGS# 8917

### 1856-S Double Eagle, AU50 Ex: S.S.C.A., Split Serif Variety

- 4356 1856-S AU50 PCGS. Variety 17J.** Ex: S.S. Central America. SSCA 5870. The "Split Serif" variety, as assigned by SSCA numismatist Robert Evans. The attribution markers for Variety 17J include intersecting die lines through the R in AMERICA. A pleasing butter-gold example with minimal wear and few marks. The reverse exhibits substantial luster. Housed in a gold label holder. Included with the lot is a mahogany faux California Gold Rush book, an outer red Blanchard presentation box, and a certificate of authenticity signed by Tommy Thompson. NGC ID# 2692, PCGS# 8919

### 1857 Twenty Dollar, Lightly Circulated AU58

- 4357 1857 AU58 NGC.** A light touch of high-point rub is perceptible by those who know how to grade, but novices might miss the telltale signs. Generous luster and a light sprinkling of marks — really inconsequential — complement the appealing orange-gold color and great luster. An excellent representative of this early double eagle issue. NGC ID# 2693, PCGS# 8920

**1857-S Double Eagle, AU55**  
**Partly Lustrous, Khaki-Gold Surfaces**

- 4358 1857-S AU55 NGC. Breen-7188.** Medium S. The Broken A variety (Breen-7188) was well-represented in the S.S. *Central America* hoard, though this Choice AU example has not been pedigreed to that famous cache. It differs from Variety 20E, which has a defective left serif. The surfaces suggest the origin of this Type One twenty to be terrestrial rather than nautical. Myriad abrasions appear over each partially lustrous, khaki-gold side. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, AU55**  
**Frosty Rose-Gold Surfaces**

- 4359 1857-S AU55 NGC.** Large S, described by Breen as “very rare.” In a July 2000 article in *The Numismatist*, Robert Evans detailed the various 1857-S double eagle die varieties found aboard the S.S. *Central America*. Of the Large S mintmark he noted: “The varieties of 1857 double eagles listed here represent only those recovered from the *Central America*. They were struck before August 20, 1857, and thus do not include varieties produced later in the year, such as the “Large S” version ... .” This Choice AU survivor has surprisingly frosty, rose-gold surfaces that display myriad abrasions. Boldly struck and appealing. NGC ID# 2696, PCGS# 8922

**1858-S Double Eagle, Attractive AU55**

- 4360 1858-S AU55 NGC.** Medium S mintmark. This attractive Choice AU double eagle was struck in the historic year that large cents were discontinued and the American Numismatic Society was formed. More than 840,000 examples were produced in the four-year-old San Francisco Mint, the reinvigorated former Moffat & Co. establishment. Most survivors of this issue are well-circulated, but several dozen examples, mostly AU, were found aboard the shipwreck of the S.S. *Republic*, which sank in 1865. This piece boasts ample luster on attractive orange-gold surfaces but it bears no specific provenance. The surfaces are quite clean for the grade and well-struck, showing a couple of moderate abrasions confined to the reverse. NGC ID# 2699, PCGS# 8925

- 4361 1859-S XF45 NGC.** A surprisingly lustrous example for the grade. The straw-gold surfaces display well-defined motifs and moderate abrasions. The 1859-S is a less often seen issue from this period, elusive in AU and Mint State. NGC ID# 269C, PCGS# 8928

**1859-S Twenty Dollar, AU55**  
**Conditionally Scarce Type One Issue**

- 4362 1859-S AU55 NGC.** Shipwreck hoards have made several Type One issues fairly plentiful in nice Uncirculated grades, but the same cannot be said for the 1859-S. NGC (as of 1/16) has certified only 26 examples as Mint State. Those coins are out of reach for most collectors, but a Choice AU piece is comparatively affordable. This apricot-gold representative displays light wear on the wingtips and curls. Small marks are distributed but none are singularly bothersome. NGC ID# 269C, PCGS# 8928

**1859-S Double Eagle, Lustrous AU55**

- 4363 1859-S AU55 NGC. CAC.** Minor circulation wear and a few of the light abrasions that are concurrent appear on surfaces that retain some luster and range from pale gold to orange and apricot. A bit of smoky patina near star 10 is not overly bothersome. Most certified survivors of this issue are in a somewhat lower grade and/or lack the CAC approval. NGC ID# 269C, PCGS# 8928

- 4364 1861 XF45 PCGS.** This Choice XF Type One twenty was presciently set aside after serving briefly in commerce. Evidence of minor circulation occurs in the form of friction over Liberty's curls and marks in the fields. Otherwise, each side maintains a remarkable degree of luster and eye appeal. NGC ID# 269G, PCGS# 8932

- 4365 1861 AU53 NGC.** The pleasing orange-gold surfaces of this attractive AU53 example are lightly abraded for the grade, with much original mint luster and only light wear on the design elements. Overall eye appeal is quite strong. NGC ID# 269G, PCGS# 8932

**1861 Twenty Dollar, AU55  
Reddish and Green-Gold Color**

- 4366 1861 AU55 NGC.** Glints of reddish patina enhance the green-gold color seen throughout this Choice AU No Motto double eagle. The stars show full centers, and the hair curls feature clear delineation. Partial luster issues from the legends and other design recesses. Minimally marked surfaces and a great overall look make this historically significant Liberty Head twenty dollar well-worth considering. NGC ID# 269G, PCGS# 8932

**1864 Double Eagle, AU Sharpness  
Attractive Civil War Issue**

- 4367 1864 — Cleaning — PCGS Genuine. AU Details.** The surfaces are sandy-gold and perhaps a touch overbright for the amount of luster that should remain at this grade level, but there is still much essential eye appeal present on this coin, which shows mostly light, scattered abrasions consistent with minor circulation and a decent strike. This Civil War-era issue consisted of 204,235 circulation strikes. NGC ID# 269S, PCGS# 8941

**1866 Motto Twenty Dollar, AU53  
FS-801, Doubled Die Reverse**

- 4368 1866 Motto, Doubled Die Reverse, FS-801, AU53 NGC.** The doubling is confined to the motto, especially the N in IN. Perhaps the first working reverse die for the Type Two design. This peach-gold representative displays plentiful pockets of luster. The wings are well defined, and the cheek and curls show only moderate wear. The fields exhibit occasional thin marks. NGC ID# 38JK, PCGS# 145733 Base PCGS# 8949

- 4369 1871-S AU58 PCGS.** Small Squat S. There is minimal actual wear on this piece, but scattered abrasions are mostly light and combine with a few larger marks on the reverse, one above the T(WENTY) and some scrapes on the horizontal shield bars. Generous luster radiates from both sides amid a good strike and attractive honey-gold color. NGC ID# 26ND, PCGS# 8962

- 4370 1873-S Open 3 AU55 NGC.** Green, orange, and reddish-gold tones imbue this Type Two twenty with excellent eye appeal. Both sides maintain strong device detail despite a touch of rub from a short stay in circulation. Luster emanates from the recesses. Scattered abrasions are expected, and the only one of note is a pockmark-like spot on Liberty's temple. NGC ID# 26AM, PCGS# 8979

**1873-S Open 3 Twenty, AU58  
Better Type Two Issue**

- 4371 1873-S Open 3 AU58 PCGS.** Small S. Unlike its Philadelphia counterpart, the 1873-S Open 3 is scarcer than its Closed 3 predecessor, due to the delay in shipment of the dies from the mother mint. The present apricot-gold near-Mint twenty has only a hint of wear, although luster is subdued across the obverse field. Scattered small marks are consistent with a short stint in Old West commerce. NGC ID# 26AM, PCGS# 8979

- 4372 1875 MS61 PCGS.** An attractive Mint State example of this intriguing issue, with lightly abraded orange-gold surfaces that retain much of their original mint luster. The design elements are well-detailed and eye appeal is quite strong. NGC ID# 2547, PCGS# 8973

- 4373 1875 MS61 PCGS.** The 1875 double eagle is the only readily collectible Philadelphia gold issue of the date, as the smaller denominations are all low-mintage rarities. This well-detailed Mint State specimen offers lustrous orange-gold surfaces with a scattering of minor contact marks. NGC ID# 2547, PCGS# 8973

- 4374 1879 MS61 NGC.** The 1879 Liberty double eagle claims a mintage of 207,630 pieces and examples in Mint State condition are scarce in today's market. This attractive MS61 example offers well-detailed design elements and lustrous yellow and rose-gold surfaces, with a scattering of minor contact marks on both sides. NGC has graded 40 numerically finer examples (1/16). NGC ID# 26B6, PCGS# 8988

- 4375 1879-S MS60 NGC.** Sharply detailed design elements and vibrant mint luster are the calling cards of this impressive Mint State representative. The colorful orange-gold surfaces show hints of rose and a number of minor contact marks and luster grazes that define the grade. NGC ID# 26B9, PCGS# 8991

**1889-S Double Eagle, MS63  
Impressively Smooth and Vibrant**

- 4376 1889-S MS63 PCGS.** Many of the high-end 1889-S double eagles known today were recovered from the Saddle Ridge Hoard. This piece is not pedigreed to the hoard, but its bright, radiant luster and smooth surfaces are reminiscent of the Saddle Ridge representatives. The strike is sharp, and eye appeal is excellent for the grade. NGC ID# 26BW, PCGS# 9012

**1890-CC Double Eagle, AU50  
Original Coloration**

- 4377 1890-CC AU50 NGC. CAC. Variety 1-A.** The mintmark is centered, and lapping on the right tailfeathers confirms the late die state. A thin layer of even wear over the sharply struck devices fails to diminish to bold detail. Original coppery-orange surfaces showcase glints of greenish-gold, a highly desirable quality that accounts for the CAC endorsement. This lightly marked Carson City type coin maintains a pleasing amount of original luster in the hidden regions. NGC ID# 26BY, PCGS# 9014

**1895-S Twenty Dollar, High-End MS64**

- 4378 1895-S MS64 PCGS Secure.** The surfaces of this near-Gem late-19th century S-mint twenty boast fantastic eye appeal via crisply struck orange-gold surfaces beaming with luster. Excellent preservation prevails, despite a couple of stray small ticks on each side. Gem examples of this issue are few and far between, and this piece is certainly high-end for the MS64 level. NGC ID# 26CE, PCGS# 9028
- 4379 1896 Repunched Date, FS-301, MS62 NGC.** The date is clearly repunched north. Deeply toned orange-reddish surfaces show effulgent luster, although some light grayish haze appears in a small portion of the left obverse field. This is nonetheless an appealing and well-struck example of this late-19th century P-mint issue, a bit better than usually seen. NGC ID# 26CF, PCGS# 145739 Base PCGS# 9029
- 4380 1897 MS62 NGC. Breen-7325.** The 89 in the date is repunched. The grade is determined by a few light ticks on each side, but ample luster and good eye appeal prevail throughout both sides of this Liberty twenty. Attractive golden color enlivens both sides. These large gold type coins might prove a good long-term buy at today's levels. NGC ID# 26CH, PCGS# 9031
- 4381 1898 MS62 PCGS. CAC.** Flowing luster appears amid honey-gold patina and good eye appeal on this relatively unabraded-for-the-grade Liberty twenty. Both we and CAC give this one a thumbs up. NGC ID# 26CK, PCGS# 9033

**1898-S Twenty Dollar, Richly Lustrous MS64  
Appealing Type Three S-Mint**

- 4382 1898-S MS64 PCGS. CAC.** Rich luster appears on both sides of this near-Gem, complementing attractive honey-gold patina and a fairly well-executed strike. It is more minor grazes to the field luster rather than mentionable contact marks that determine the (appropriate) grade. Type Three S-mint Liberty twenties are highly collectible and appealing in the MS62-MS64 grades. NGC ID# 26CL, PCGS# 9034
- 4383 1899-S MS63+ PCGS.** A high-end Select example of this popular turn-of-the-century issue, with sharply detailed design elements and vibrant mint luster throughout. The light orange-gold surfaces show a scattering of minor contact marks that defines the grade. NGC ID# 26CN, PCGS# 9036
- 4384 1899-S MS63+ PCGS. CAC.** An attractive Plus-graded Select specimen, with vibrant mint luster and needle-sharp definition on the design elements. The vivid orange-gold surfaces are minimally marked for the grade and eye appeal is quite strong. NGC ID# 26CN, PCGS# 9036
- 4385 1900 MS62 PCGS.** Nearly an ounce of pure gold survives in this Type Three Liberty double eagles from the late 19th and early 20th centuries. Considering a piece such as this sumptuous orange-gold 1900, certified MS62 PCGS and with engaging luster and lovely surfaces — at modest prices today — what's not to love? NGC ID# 26CP, PCGS# 9037
- 4386 1900 MS64+ PCGS.** This well-struck orange-gold near-Gem boasts generous luster and is just a tad shy of a full Gem grade due to some small, unobtrusive grazes and small marks. A far nicer coin than most Mint State survivors of this large issue exceeding 1.8 million coins. NGC ID# 26CP, PCGS# 9037
- 4387 1903 MS62 NGC.** The mintage of the 1903 double eagle was a surprisingly low 287,000 coins, coming just before the prodigious 11 million-plus 1904 twenties struck in Philadelphia and San Francisco. This MS62 1903 shows plenty of eye appeal for the grade, well-struck surfaces complementing good luster and relatively few marks, largely confined to the reverse. NGC ID# 26CW, PCGS# 9043
- 4388 1903-S MS62 PCGS.** S-mint Type Three twenties such as this beautiful 1903-S can be fertile collecting ground for those willing to pick and choose between the usually ample numbers of survivors. This MS62 PCGS survivor boasts a bold strike with great orange-gold color and scintillating luster. Contact marks are as expected. The reverse legends are strike doubled. NGC ID# 26CX, PCGS# 9044

**1903-S Liberty Twenty, MS64  
Exceptional Branch Mint Type Coin**

**4389 1903-S MS64 NGC. CAC.** Although the 1903-S Liberty double eagle can be located with just a little patience in MS64 condition, examples in any finer grade are quite rare. This attractive Choice specimen exhibits sharply detailed design elements and well-preserved peach-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC has graded 22 numerically finer examples (11/15). NGC ID# 26CX, PCGS# 9044

**4390 1904 MS62 NGC.** A nicely struck example of this gargantuan production exceeding 6.2 million coins, this piece shows engaging luster, lovely color, and a few light abrasions that are mostly relegated to the reverse. A great type coin for the grade. The S in TRUST is filled due to die breaks within the loops. NGC ID# 26CY, PCGS# 9045

**1904 Twenty Dollar, MS65  
Smooth, Frosty Luster**

**4391 1904 MS65 PCGS.** This glimmering Gem 1904 double eagle is an ideal type coin, showing frosty yellow-gold luster and beautifully smooth surfaces. A few faint grazes on Liberty's cheek are all that preclude an even finer grade. Eye appeal is outstanding. The 1904 is famously available in most grades, but coins grading higher than this Gem are scarcely seen. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65  
Well-Made and Well-Preserved Type Coin**

**4392 1904 MS65 PCGS.** The 1904 double eagle in Gem grade is an optimal type coin for many collectors due to its large mintage and plentiful survival. (It also helps that, for such a prodigious production, it is also a well-made one.) This Gem PCGS example boasts splendid eye appeal — the byproduct of a nice sharp strike, attractive orange-gold luster, and virtually no marks. One small stain behind Liberty's head is not overt. NGC ID# 26CY, PCGS# 9045

**4393 1904 MS60 Prooflike NGC.** One of a relatively small number of prooflike representatives of this favored type issue. The obverse fields are slightly busy with small field marks, although the overall visual impression of this reflective, rich-gold Liberty Head double eagle is that of an even higher grade. NGC ID# 26CY, PCGS# 79045

**4394 1904-S MS62 NGC.** Careful searching and selectivity can yield Type Three late-date twenties with relatively few marks for the MS62 grade and engaging surfaces, as this largely unabraded 1904-S and other similar coins from this consignor prove. Great color and luster prevail throughout. NGC ID# 26CZ, PCGS# 9046

**HIGH RELIEF DOUBLE EAGLE**

**MCMVII High Relief Twenty  
Flat Rim, AU Sharpness**

**4395 1907 High Relief, Flat Rim — Mount Removed — PCGS Genuine. AU Details.** Despite the PCGS designation, we are unable to locate evidence of a mount removal on the present coin. The lightly worn caramel-gold surfaces are somewhat glossy, and a pinscratch is noted on the eagle's upper wing. The strike doubling on LIBERTY is usual for the issue, as is the soft definition on the rays near the sun. The High Relief type has a mintage of only 12,367 pieces, and examples are always in demand. NGC ID# 26F2, PCGS# 9136

**SAINT-GAUDENS DOUBLE EAGLES**

**4396 1909/8 FS-301 AU58 PCGS.** The high-relief areas over Liberty display a sufficient amount of friction to preclude a Mint State assessment, but it is only evident upon close inspection. Primary attributes include swirling luster and strong strike definition over each side. The second nine in the date shows a prominent underlying 8. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**1909-S Double Eagle, Radiant Gem  
Very Rare in Better Condition**

**4397 1909-S MS65 PCGS.** Although it is available through near-Gem condition, the 1909-S becomes scarce at the Gem grade level. Finer examples are sought-after by a small group of well-heeled collectors, but even that small group of collectors exceed the number of Premium Gems on the market. This lovely MS65 double eagle will undoubtedly fit nicely into any high-end collection. Radiantly lustrous orange-gold surfaces offer glimpses of rose accents and pinpoint definition throughout. Minuscule marks are generally well-hidden and entirely unimportant. PCGS shows 13 submissions graded higher (1/16). NGC ID# 26FE, PCGS# 9153

**4398 1910 MS64 PCGS.** Examples of the 1910 are typically seen through MS64 with the average certified grade being MS62. Collectors will have a hard time finding a Gem example of this lower-mintage Philadelphia date. Lustrous, straw-gold surfaces feature sharp detail aside from a hint of softness on the Capitol. Minor marks are well-concealed. NGC ID# 26FF, PCGS# 9154

**4399 1910 MS64 NGC.** The repatriation of overseas hoards accounts for the availability of the 1910 through MS64, but finer examples of the date prove exceedingly scarce. This near-Gem offers scintillating yellow-gold surfaces with well-defined design elements. Scattered marks and intermittent luster disturbances prevent a higher technical assessment. NGC ID# 26FF, PCGS# 9154

**4400 1914-D MS64 PCGS. CAC.** From a mintage of 453,000 pieces, this attractive Choice specimen offers sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC ID# 26FT, PCGS# 9165

**4401 1914-S MS64+ PCGS. CAC.** The mildly granular surfaces common to most pre-1920 double eagles is apparent here and sparkling mint frost is laid across each side. Sharply defined and minimally abraded. A few short streaks of grease can be found at the top of the obverse. NGC ID# 82KA, PCGS# 9166

**4402 1922 MS64+ NGC.** Plus-graded by NGC for its borderline Gem surface quality and eye appeal, this Philadelphia date is often preferred by type collectors for its satiny sheen and sharply defined motifs. Hints of rose-red color appear mostly on the reverse, while the overall smooth surfaces show only trivial marks of any kind. NGC ID# 26G3, PCGS# 9173

**4403 1922 MS64 PCGS. CAC.** Softly frosted surfaces are minimally abraded, as one could rightfully infer from the CAC endorsement. The strike is strong, but not quite complete on the highest points of the design. A long die crack around the left side of the obverse adds interest. NGC ID# 26G3, PCGS# 9173

#### 1922 Saint-Gaudens Twenty, MS65 Conditionally Rare in Finer Grades

**4404 1922 MS65 PCGS.** Despite the substantial mintage of 1.3 million pieces, the 1922 Saint-Gaudens double eagle is a prime condition rarity in grades above the MS65 level. This impressive Gem exhibits sharply detailed design elements throughout, and the well-preserved orange-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. PCGS has graded eight numerically finer examples (1/16). NGC ID# 26G3, PCGS# 9173

#### 1922 Twenty Dollar, Resplendent MS65

**4405 1922 MS65 NGC.** A pleasing near-Gem example of the 1922 can be found with minimal searching, and even Gems are relatively accessible compared to many other dates in the series. Anything finer will, however, prove exceedingly challenging, if not impossible to acquire for the vast majority of collectors. This resplendent peach-gold Gem is strongly rendered with bold die cracks on both sides. NGC has seen merely nine submissions finer (1/16). NGC ID# 26G3, PCGS# 9173

#### 1924-D Twenty Dollar, AU58 Heavily Melted Issue

**4406 1924-D AU58 PCGS.** The 1924-D is one of several heavily melted branch mint issues from the decade. Once considered a major rarity, the appearance of a few small hoards has made the date obtainable for a price. This borderline-Uncirculated twenty represents a more affordable opportunity for a collector to own an example. A few larger abrasions occur on the obverse. Most of the luster is present in the fields, with just a bit of friction over the high points. NGC ID# 34VF, PCGS# 9178

**4407 1927 MS66 PCGS.** The stunning luster is smooth, flowing, and even, showing off the best advantage the virtually immaculate preservation this Premium Gem possesses. While this type-coin issue has many thousands certified in this grade level (including a few dozen Plus-graded pieces), the number in MS67 at PCGS is only 18, including two in MS67+ (12/15). NGC ID# 26GG, PCGS# 9186

**4408 1927 MS66+ PCGS.** From more than 5,800 MS66 grading events, this radiant example is one the few Plus coins, with terrific honey-gold color and strong mint luster across the satin-smooth surfaces. The fields are nearly without marks, while a few ticks on the torch and Liberty's knee are visible with a lens. The strike is first-rate. Population: 83 in 66+, 18 finer (1/16). NGC ID# 26GG, PCGS# 9186

## COMMEMORATIVE SILVER

### 1893 Isabella Quarter, MS66 Well-Preserved, Lustrous Example

- 4409 1893 Isabella Quarter MS66 PCGS. CAC.** The 1893 Isabella quarter is the only classic silver commemorative of the denomination, from a small distribution of 24,214 pieces. This delightful Premium Gem offers well-preserved, lustrous surfaces and sharply detailed design elements, under vivid shades of golden-brown and lavender toning. PCGS has graded 52 numerically finer examples (1/16). NGC ID# BYJ9, PCGS# 9220

- 4410 1900 Lafayette Dollar MS63 PCGS. DuVall 1-B.** This Select piece shows few overt abrasions, though a number of wispy marks are hidden beneath dusky golden-gray patina. Softly lustrous with elements of deeper crimson coloration near the portrait of Washington.

Ex: *Baltimore Signature* (Heritage, 3/2009), lot 1676. NGC ID# BYKW, PCGS# 9222

- 4411 1900 Lafayette Dollar MS63 NGC. DuVall 2-C.** Dappled lavender and wheat-gold toning grace the obverse of this crisply struck and lustrous silver dollar. A blush of deeper toning occupies UNITED. The reverse has a stone-white and almond-gold center framed by a peripheral band of aquamarine. Superior quality for the MS63 level. Certified in a prior generation holder. NGC ID# BYKW, PCGS# 9222

- 4412 1900 Lafayette Dollar MS64 NGC. DuVall 3-D.** The AT in STATES on the obverse is boldly recut, a diagnostic of this scarce die variety. Light grazes on Washington's portrait are masked by consistent olive-gray toning which blankets each side. Satiny luster shines through the patina to reveal sharply rendered, near-Gem motifs. NGC ID# BYKW, PCGS# 9222

- 4413 1921 Alabama 2X2 MS65 PCGS.** Vibrant mint luster and well-preserved brilliant surfaces are the calling cards of this impressive Gem, with well-detailed design elements and ample eye appeal. The 1921 Alabama 2x2 half dollar becomes scarce in grades above MS65. NGC ID# BYEZ, PCGS# 9225

### 1936-S Bay Bridge Half, MS67+ Exceptional Color and Preservation

- 4414 1936-S Bay Bridge MS67+ PCGS. CAC.** The Bay Bridge has long been a respected second-tier commemorative half, whose difficulty is based on the susceptibility to abrasions on the wide open spaces across the bear on the obverse. This is a richly toned, original example that is toned in even autumn leaves shades over both obverse and reverse. Exceptional preservation. NGC ID# BYFM, PCGS# 9254

- 4415 1938-S Boone MS67 NGC. CAC.** A sharply detailed Superb Gem, from a small distribution of 2,100 pieces, this coin offers lustrous, impeccably preserved surfaces, with hints of pale gold and pink toning. Census: 33 in 67 (1 in 67 ★), 2 finer (11/15). NGC ID# BYG8, PCGS# 9276

- 4416 1936 Bridgeport MS67 PCGS. CAC.** A spectacular Superb Gem representative, with virtually pristine surfaces that radiate satiny mint luster and show hints of greenish-gold and lavender toning. The design elements are sharply detailed and eye appeal is quite strong. Population: 84 in 67 (5 in 67+), 0 finer (12/15). NGC ID# BYG9, PCGS# 9279

- 4417 1925-S California MS66+ PCGS. CAC.** The well-preserved surfaces of this high-end Premium Gem are enhanced by delicate shades of pale gold and lavender toning, with well-detailed design elements and vibrant mint luster underneath. NGC ID# BYGA, PCGS# 9281

- 4418 1936-D Cincinnati MS67 NGC.** The 1936-D Cincinnati half dollar claims a low distribution of 5,005 pieces. This impressive Superb Gem offers well-detailed design elements and impeccably preserved surfaces with vibrant mint luster throughout. Census: 39 in 67 (4 in 67+, 5 in 67 ★), 3 finer (11/15). NGC ID# BYCK, PCGS# 9284

- 4419 1936-S Cincinnati MS66 PCGS.** Sharply rendered and satiny, with mottled olive-gold and champagne-gray toning over each side. A single small cut on the portrait's cheek precludes an even finer grade. Population: 68 in 66 (4 in 66+), 4 finer (12/15). NGC ID# BYCL, PCGS# 9285

### 1936-S Cincinnati Half, MS66+ Original, Lightly Toned Surfaces

- 4420 1936-S Cincinnati MS66+ PCGS. CAC.** Traces of pale pastel patina at the margins accents the prevailing rose-gray surfaces on this attractive Premium Gem Cincinnati half dollar. The open fields on the obverse, in particular, are noteworthy for a paucity of abrasions. Population: 69 in 66 (4 in 66+), 4 finer (1/16). NGC ID# BYCL, PCGS# 9285

- 4421 1936 Cleveland MS67 PCGS. CAC.** Intense shades of sea-green, amber, and lavender-gray toning blanket the well-preserved surfaces of this spectacular Superb Gem, with well-detailed design elements and satiny mint luster under the patina. Population: 80 in 67 (10 in 67+), 1 finer (1/16). NGC ID# BYGB, PCGS# 9288

**1928 Hawaiian Half, Rim-Toned MS65  
Attractive Rose Patina**

- 4422 1928 Hawaiian MS65 PCGS.** The yellowish cast that so many high-grade Hawaiians seem to show is nowhere in evidence on this pleasingly attractive example, showing a touch of pale rose toning near the rims on both sides amid excellent preservation. Contact marks are minor and scattered, completely consistent with the grade. NGC ID# BYGR, PCGS# 9309

**1925 Lexington Half Dollar, MS67  
Attractive, Original Toning**

- 4423 1925 Lexington MS67 PCGS.** The toning scheme and colors seen on this high-grade Lexington remind us of a coin that spent many years inside one of the wooden boxes of issue. Moderate golden-rose and gray hues are interspersed across each side with strong underlying mint luster. Fully struck in all areas. A conditionally scarce issue. Population: 24 in 67 (3 in 67+), 1 finer (1/16). NGC ID# BYGW, PCGS# 9318

- 4424 1936 Long Island MS67+ NGC.** A well-detailed, Plus-graded Superb Gem, with impeccably preserved satiny surfaces under delicate shades of lavender and pale gold toning. Census: 84 in 67 (6 in 67+, 20 in 67 ★, 2 in 67+★), 6 finer (11/15). NGC ID# BYGX, PCGS# 9322

- 4425 1921 Missouri MS65 NGC.** The well-preserved surfaces of this impressive Gem are blanketed in shades of magenta, pale gold, and amber toning, with well-detailed design elements and satiny mint luster underneath. NGC has graded 38 numerically finer examples (12/15). NGC ID# BYH2, PCGS# 9330

- 4426 1921 Missouri 2x4 MS65 PCGS.** A pleasing Gem representative of this popular commemorative, with sharply detailed design elements and well-preserved surfaces that radiate satiny mint luster. A few hints of lavender toning enhance the considerable eye appeal. PCGS has graded 35 numerically finer examples (1/16). NGC ID# 2FE9, PCGS# 9331

- 4427 1923-S Monroe MS66 NGC.** The largely rose-gray patina makes occasional forays into amber, russet, and charcoal over surfaces that nonetheless retain a high degree of luster and show virtually pristine preservation. A semikey issue in the commemorative series, seldom seen so fine. Census: 62 in 66 (4 in 66+, 1 in 66 ★, 1 in 66+★), 8 finer (11/15). NGC ID# BYH4, PCGS# 9333

- 4428 1923-S Monroe MS66 NGC.** The issue had a high mintage of 274,077 pieces, but according to the *Guide Book*, "Many unsold coins were released into circulation at face value." Definitely scarce at the current Premium Gem level, the Monroe Doctrine Centennial half dollar is rare and nearly unobtainable any finer. This piece is well-struck with pleasing satin luster and clean, mark-free surfaces. Variegated pastel shades of sky-blue, mint-green, and greenish-gray color are noted, along with a few vivid splashes of fire-red and orange-gold near the margins. Silver luster shines through. Census: 62 in 66 (4 in 66+, 1 in 66 ★, 1 in 66+★), 8 finer (11/15). NGC ID# BYH4, PCGS# 9333

**1923-S Monroe Half, Lightly Toned MS66  
A One-Year Key to the Complete Design Set**

- 4429 1923-S Monroe MS66 PCGS.** Scintillating luster embellishes both sides of this Premium Gem 1923-S Monroe half, one of the one-year keys to the complete commemorative design set in this grade. Rose and gold centers cede to iridescent amber and orange rim patina on satiny surfaces with excellent eye appeal and top-shelf preservation. Population: 88 in 66 (8 in 66+), 6 finer (1/16). NGC ID# BYH4, PCGS# 9333

- 4430 1939-D Oregon MS67+ PCGS.** A spectacular high-end Superb Gem of this popular silver commemorative, with sharply detailed design elements and vibrant mint luster throughout. The well-preserved surfaces display a few hints of greenish-gold and amber toning. PCGS has graded 26 numerically finer examples (1/16). NGC ID# BYHM, PCGS# 9353

- 4431 1939-D Oregon MS67+ PCGS. CAC.** A tab-toned obverse with rich sea-green, ruby-red, and golden-brown toning where the coin was exposed outside its issued holder. The reverse exhibits dappled lilac, russet-brown, and aquamarine patina. A lustrous and pristine example of this low mintage issue. NGC ID# BYHM, PCGS# 9353

- 4432 1936-S Rhode Island MS67 NGC. CAC.** This spectacular Superb Gem displays immaculately preserved surfaces and well-detailed design elements, under attractive shades of lavender-gray and greenish-gold toning. Satiny mint luster shines through the patina. Census: 23 in 67 (6 in 67 ★), 0 finer (11/15). NGC ID# BYHV, PCGS# 9365

- 4433 1935-S San Diego MS67+ NGC. CAC.** A high-end Superb Gem representative of this popular issue, with well-detailed design elements and satiny mint luster under delicate shades of lavender and greenish-gold toning. NGC has graded seven numerically finer examples (12/15). NGC ID# BYHY, PCGS# 9371

**1936-D San Diego Half, MS67+  
None Finer at PCGS**

**4434 1936-D San Diego MS67+ PCGS. CAC.** Representing the scarcer of the two San Diego half dollar issues, this 1936-D is among the finest at PCGS (1/16). The design elements are well-struck, set aglow by frosty champagne-gray and soft lavender luster. There are no significant abrasions, and the eye appeal is exemplary. Few CAC-endorsed coins are known in this condition. NGC ID# BYJ2, PCGS# 9372

**4435 1926 Sesquicentennial MS65 PCGS.** Dusky shades of golden-brown, lavender-gray, and amber toning blanket the well-preserved surfaces of this attractive Gem, with well-detailed design elements and satiny mint luster underneath. NGC ID# BYJ4, PCGS# 9374

**4436 1926 Sesquicentennial MS65 PCGS. CAC.** An attractive Gem, with well-detailed design elements and well-preserved surfaces, under delicate shades of lavender and gray toning. Satiny mint luster shines through the patina. PCGS has graded eight numerically finer examples (1/16). NGC ID# BYJ4, PCGS# 9374

**1937-S Texas Half, Pristine MS68**

**4437 1937-S Texas MS68 NGC.** Many of the Texas issues are collectible up to MS67 for a price, but MS68 coins are seldom encountered. This MS68 NGC example of the 1937-S — one of 6,637 issued — is tied with five other submissions for finest at NGC and finer than any at PCGS (1/16). The satiny gray surfaces show a light ring of rose patina and pristine preservation, as expected. NGC ID# BYJK, PCGS# 9392

**1927 Vermont Half Dollar, MS67  
Just One Finer at PCGS**

**4438 1927 Vermont MS67 PCGS. CAC.** Charles Keck, the artist responsible for the 1915 Panama-Pacific gold dollar, designed the Vermont Sesquicentennial half dollar (28,142 coins minted). A blush of sky-blue and mint-green color appears above the portrait, while the other areas remain virtually brilliant with a thin layer of lemon-gold patina. Radiantly lustrous surfaces are sharply detailed and nearly unmarked. The Vermont Sesquicentennial halves are among the best-produced classic commemoratives, yet few can compete with the allure of this Superb Gem. Population: 42 in 67 (2 in 67+), 1 finer (1/16). NGC ID# BYJR, PCGS# 9401

**1947-D Booker T. Washington Half, MS67  
None Finer at PCGS**

**4439 1947-D Booker T. Washington MS67 PCGS.** Vivid shades of magenta and greenish-gold toning blanket the impeccably preserved surfaces of this delightful Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. Overall eye appeal is terrific. From a fairly generous distribution of 100,000 pieces. Population: 8 in 67, 0 finer (1/16). NGC ID# BYJW, PCGS# 9409

**4440 1950 Booker T. Washington MS67 PCGS.** A magnificent Superb Gem example of this late series classic commemorative, with sharply detailed design elements and vibrant mint luster throughout. The impeccably preserved surfaces are visited by delicate shades of pale gold and lavender toning. Population: 19 in 67, 0 finer (1/16). NGC ID# BYK6, PCGS# 9420

**4441 1950 Booker T. Washington MS67 PCGS. CAC.** Delicate shades of pale gold toning visit the mostly brilliant surfaces of this delightful Superb Gem, with vibrant mint luster, sharply detailed design elements, and no mentionable distractions. Population: 19 in 67, 0 finer (1/16). NGC ID# BYK6, PCGS# 9420

**4442 1952 Washington-Carver MS67 NGC.** Attractive shades of champagne-gold, lime-green, and lavender toning blanket the well-preserved surfaces of this delightful Superb Gem. A lens reveals a few light lines on the portrait, but the design elements are well-detailed and ample mint luster shines through the toning. The eye appeal is exceptional. Census: 36 in 67 (1 in 67+, 10 in 67 ★, 2 in 67+★), 1 finer (11/15). NGC ID# BYL3, PCGS# 9434

**4443 1936 Wisconsin MS68 NGC.** Dramatic cherry-red, orange, sea-green, golden-brown, and stone-gray consume this satiny and fully struck Superb Gem. A magnificent representative of this territorial centennial issue. Immaculate except for inconspicuous contact above the E in LIBERTY. Census: 39 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (11/15).  
*Ex: Long Beach Signature (Heritage, 2/2011), lot 4131. NGC ID# BYKU, PCGS# 9447*

**4444 1936 Wisconsin MS68 NGC.** A subtle mix of lavender, blue, and gold patina blankets the impeccably preserved surfaces of this spectacular MS68 example, with well-detailed design elements and satiny mint luster underneath. Census: 39 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (1/16). NGC ID# BYKU, PCGS# 9447

## COMMEMORATIVE GOLD

**4445 1903 Louisiana Purchase Jefferson Gold Dollar MS65 PCGS.** A spectacular Gem example of this popular gold commemorative, with well-detailed design elements and well-preserved orange-gold surfaces that show vibrant mint luster and a few hints of prooflike reflectivity at selected angles. NGC ID# BYLD, PCGS# 7443

**4446 1903 Louisiana Purchase McKinley Gold Dollar MS66 NGC.** A spectacular Premium Gem example of the first commemorative gold issue, with sharply detailed design elements and vibrant mint luster on both sides. The rich yellow-gold surfaces show no mentionable defects and eye appeal is terrific. NGC ID# BYLE, PCGS# 7444

**4447 1903 Louisiana Purchase McKinley Gold Dollar MS66 PCGS.** The design elements on each side of this appealing butter-gold McKinley commemorative are well brought-up, including the rims and denticles. This lovely Premium Gem is one of only 17,500 such coins issued in 1903. NGC ID# BYLE, PCGS# 7444

**4448 1905 Lewis and Clark Gold Dollar MS63 NGC.** An attractive select specimen of this popular two-headed commemorative, with well-detailed design elements and vibrant mint luster on both sides. The pleasing yellow-gold surfaces show just the minimum number of minor contact marks for the grade. NGC ID# BYLG, PCGS# 7448

**4449 1905 Lewis and Clark Gold Dollar MS63 PCGS.** The 1905-dated issue is considerably scarcer than the 1904 issue (David Bowers estimated by a factor of 20%). Actual distribution was much less than the reported mintage, and the Lewis and Clark issues of 1904 and 1905 are far scarcer than other gold commemoratives in MS63 and finer. This sharp example shows little evidence of the usual strike weakness. Lustrous yellow-gold surfaces display a touch of orange at the rims. The fields are prooflike with only light marks. NGC ID# BYLG, PCGS# 7448

**4450 1915-S Panama-Pacific Gold Dollar MS66 NGC.** A spectacular Premium Gem representative of this classic gold commemorative issue, with vibrant mint luster and well-detailed design elements. The light orange-gold surfaces show no mentionable distractions, with ample eye appeal. NGC ID# BYLH, PCGS# 7449

**4451 1917 McKinley Gold Dollar MS65 PCGS.** From a small distribution of 10,000 pieces, this delightful Gem offers well-preserved orange-gold surfaces, with vibrant mint luster and sharply detailed design elements throughout. Eye appeal is outstanding. NGC ID# BYLL, PCGS# 7455

**4452 1926 Sesquicentennial Quarter Eagle MS65 NGC.** Designed by John R. Sinnock, the Sesquicentennial quarter eagle was ambitiously produced (200,000 pieces struck plus 226 assay coins). Only 46,019 pieces were distributed and the rest were melted. This lustrous, conditionally scarce example is exceptionally well preserved with satiny, sun-gold surfaces that display rose and pale-green highlights. Abrasions are minor, and the troublesome copper spots that often appear on the issue are absent on the outstanding Gem surfaces. NGC ID# 2FE9, PCGS# 7466

## MODERN ISSUES

**4453 1983-D Olympic Silver Dollar MS70 PCGS.** This magnificent modern commemorative possesses terrific eye appeal to complement its perfect technical quality. The design elements are fully detailed and the lustrous surfaces show just the slightest trace of pale gold toning. Population: 9 in 70 (1/16). NGC ID# 28P6, PCGS# 9606

### 1984-D Olympic Silver Dollar, Silvery MS70

**4454 1984-D Olympic Silver Dollar MS70 PCGS.** The 1983-PDS and 1984-PDS Olympic silver dollars are popular as the coins that helped, with the 1982-DS George Washington commemorative silver half dollars, usher in the modern era of these coins. The 1984-D and -S circulation strike issues have the smallest mintage of the six, at 116,000 coins each, and seldom appear in the perfect grade of this silvery, pristine example. It helps that the reverse design is strikingly beautiful. Population: 15 in 70 (1/16). NGC ID# 3348, PCGS# 9610

**4455 1984-S Olympic Silver Dollar MS70 PCGS.** A technically perfect example of this attractive modern commemorative, from a design by Robert Graham. The design elements exhibit razor-sharp definition and the lustrous surfaces show just a trace of pale gold toning. NGC ID# 28PB, PCGS# 9611

### 1989-D Congress Bicentennial Half, MS70 Few Graded So Fine

**4456 1989-D Congress Half Dollar MS70 PCGS.** Not a great number of these Congressional Bicentennial dual-dated 1789-1989 clad half dollars were sold in relation to the proofs of the same design — about one-fifth as many — making it a contrarian play. PCGS reports only 16 in this ultimate grade (1/16). This piece is largely untuned save for a small rose blush. The modern commemorative coin issues are both artistic enjoyment and history lessons combined. NGC ID# 28PY, PCGS# 9632

**4457 2000-W Library of Congress Bimetallic Ten Dollar MS70 PCGS.** The 2000-W Library of Congress commemorative ten dollar ranks 25th on the list of 100 Greatest U.S. Modern Coins compiled by Schechter and Garrett. This impressive example is entirely void of surface flaws. An unimprovable, exceptionally appealing representative. NGC ID# 26U9, PCGS# 9784

## MODERN BULLION COINS

- 4458** 1988 Silver Eagle MS70 NGC. A single point makes a huge difference at the upper end of the grading scale, and especially so between MS69 and MS70. Only a tiny percentage of submissions reach the highest plateau. This top-rated example is satiny and lustrous, devoid of toning and sharply struck. There are no imperfections to report. NGC ID# 26J8, PCGS# 9816

### 1990 Silver Eagle, MS70 Impeccably Preserved and In Demand

- 4459** 1990 Silver Eagle MS70 NGC. Although coin prices in general were in decline in 1990, demand for Silver Eagle bullion coins rose about 12%, compared to 1989. This spectacular MS70 example offers fully detailed design elements and vibrant mint luster throughout. The brilliant surfaces are impeccably preserved. Ex: Long Beach Signature (Heritage, 6/2015), lot 5071. NGC ID# 26JC, PCGS# 9836

### 1990 Silver Eagle, MS70 In-Demand Bullion Issue

- 4460** 1990 Silver Eagle MS70 NGC. Demand for Silver Eagles increased in 1990 (due to the changing price of silver) resulting in a large business-strike mintage of 5.8 million pieces. This technically perfect example exhibits fully detailed design elements throughout and vibrant mint luster on both sides, with incredible eye appeal. NGC ID# 26JC, PCGS# 9836

### 1991 Silver Eagle, MS70 Technically Perfect Example

- 4461** 1991 Silver Eagle MS70 NGC. Despite the large mintage of nearly 7.2 million pieces, relatively few 1991 Silver Eagles have been certified in the ultimate grade of MS70, making the issue one of the strongest values of the series at that level. This incredible specimen offers technically perfect brilliant surfaces, with fully struck design elements and vibrant mint luster. NGC ID# 26JE, PCGS# 9846

### 1993-P Half-Ounce Gold Eagle PR70 Ultra Cameo

- 4462** 1993-P Half-Ounce Gold Eagle PR70 Ultra Cameo NGC. Only limited numbers of proof 1993-P half-ounce Gold Eagles are designated in perfect PR70 Ultra Cameo. This piece is flawlessly produced, showing full, frosty design elements set against fields that exhibit seemingly infinite depth of mirroring. The cameo contrast is superb. NGC ID# 28YF, PCGS# 9873

### 1995-W Silver Eagle, PR69 Deep Cameo Low-Mintage Series Key

- 4463** 1995-W Silver Eagle PR69 Deep Cameo PCGS. This virtually perfect example exhibits deeply mirrored fields that contrast profoundly with the fully struck, frosty design elements to produce a stunning cameo effect. The 1995-W proof Silver Eagle was only issued in the complete 10th Anniversary bullion coin proof set from the West Point Mint. The cost of this set, \$999.00, limited distribution to just 30,125 pieces. The silver eagle from this set is now the undisputed key to the series. PCGS has graded 85 numerically finer examples (1/16). NGC ID# 28WZ, PCGS# 9887

- 4464** 1999-W Tenth-Ounce Gold Eagle, Unfinished Proof Dies, MS70 NGC. Struck from a die that was intended to be finished and impart a reflective surface, these pieces were instead made from an unfinished die showing a satin texture. These coins are now modern semikeys, of which this is a technically perfect example. NGC ID# 26LB, PCGS# 99940

- 4465** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 PCGS. During 1999, the U.S. Mint erroneously created two additional varieties of gold eagles: tenth-ounce fives and quarter-ounce tens with both a West Point mintmark and an Uncirculated finish. Then as now, the eagles made strictly for bullion investors do not bear a mintmark, unlike proofs. The present piece is perfect save for a tiny flake out of the flying eagle's shoulder. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

- 4466** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 NGC. The U.S. Mint blundered during the Y2K year of 1999, when a West Point mintmark inadvertently appeared on a few thousand Uncirculated finish quarter-ounce gold eagles. The same error occurred on a similar quantity of tenth-ounce gold eagles, and both scarce issues have been popular ever since. Fully struck and lustrous with nearly pristine sun-gold surfaces. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

- 4467** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, FS-401, MS69 NGC. Sales of gold eagles ballooned during late 1999, caused by a Y2K panic fueled by speculative media. Brisk sales may have been partly to blame for a mint error, a West Point mintmark on a business finish die instead of a proof die. Mintages of the variety are unknown but likely only a few thousand pieces. This intricately struck yellow-gold example is perfect save for a tiny lint mark above the G in GOD. NGC ID# 26MG, PCGS# 511607 Base PCGS# 99942

**2009 One-Ounce Ultra High Relief Twenty  
MS70 Prooflike**

- 4468** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC. A gleaming, perfectly preserved and reflective example of this popular One-Ounce Ultra High Relief twenty. The strike is full, and the eye appeal is exceptional. The 2009 Ultra High Relief was modeled after the double eagle patterns of 1907, which show the twenty dollar coin on a reduced diameter planchet of twice normal thickness. NGC ID# 26S4, PCGS# 506602

**2009 Ultra High Relief Gold, MS70 Prooflike  
One Ounce of Radiant Perfection**

- 4469** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. The Ultra High Relief 2009 one-ounce gold coins made quite the sensation back in 2009, and then when PCGS started certifying a small portion as Prooflike, that created a second wave of demand. This yellow-gold piece is expectedly perfect-appearing, with exceptional surface texture and luster. NGC ID# 26S4, PCGS# 506602

**2009 Ultra High Relief, MS70 Prooflike  
Tribute to Saint-Gaudens**

- 4470** 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike PCGS. Although PCGS has certified more than 600 examples in this Prooflike category, that represents only about 8% of the total certified as MS70 non-Prooflike (1/16). This perfect Prooflike example and its ilk are considered by some as ultimate tributes to the artist Augustus Saint-Gaudens, nice coin for those of us who cannot afford an original Ultra High Relief. The wheat-gold surfaces boast fantastic reflectivity and pristine preservation. NGC ID# 26S4, PCGS# 506602

**Libertas Americana Medal  
Gold Modern Paris Mint Restrike**

- 4471** (2000) Libertas Americana Medal, Gold, Paris Mint Modern Restrike, Proof Deep Cameo Uncertified. 64 grams of 920 Fine gold. 45.86 mm. The certificate of authenticity states that the medal is #327 among 500 pieces minted. The edge is lettered "327/500 Monnaie De Paris 2000". A pristine and intricately struck specimen that exhibits deeply mirrored fields and radiant motifs. A blue velvet presentation box is included.

**TERRITORIAL GOLD**

- 4472** 1853 Assay Office Twenty Dollar, 900 Thous. — Harshly Cleaned — NGC Details. VF. K-18, R.2. Among the final issues from the San Francisco Assay Office, Kagin-18 was struck in quantity to coin gold rush gold, the cornerstone of the West Coast economy. The present sun-gold piece is hairlined and has a small rim knock on the obverse near 6 o'clock. Listed on page 388 of the 2016 *Guide Book*. NGC ID# ANHD, PCGS# 10013

**CALIFORNIA FRACTIONAL GOLD**

- 4473** 1869 Liberty Octagonal 25 Cents, BG-712, High R.4, MS67 PCGS. Olive-green and caramel-gold encompass this satiny and unmarked Superb Gem. The strike is even and the eye appeal is imposing. The crude, thick-necked Liberty head design is associated with San Francisco jeweler Pierre Frontier. PCGS has certified 57 examples, with the present piece as the single finest (1/16). NGC ID# 2BMN, PCGS# 10539
- 4474** 1871 Liberty Octagonal 25 Cents, BG-714, R.3, MS67 PCGS. Rich peach-gold toning embraces this evenly struck and mark-free Superb Gem. Minor retained laminations (as made) are noted on the central reverse. A Period Two variety made for souvenir sale by Frontier & Co. of San Francisco. Population: 6 in 67, 0 finer (1/16). NGC ID# 2BMR, PCGS# 10541

**1872 Washington Octagonal Quarter**  
MS66, Baker-503, BG-722

- 4475** 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Low R.4, MS66 PCGS. CAC. A sharply struck and satiny caramel-gold Premium Gem. The sole imperfection is a minute spot above the A in DOLLAR. The delicate horizontal die crack across CAL is usual for the variety. Elusive as a *Guide Book* type, since BG-722, BG-723, and BG-724 are the only Washington octagonal quarter varieties. Population: 32 in 66 (1 in 66+), 2 finer (1/16). NGC ID# 2BN4, PCGS# 10549

- 4476** 1872/1 Indian Octagonal 25 Cents, BG-790, R.3, MS65 Prooflike NGC. A splendid sun-gold Gem that boasts flashy fields and an absence of marks. A few letters in the reverse legend lack a full impression. A late die state with a displaced field between two left obverse cracks. Census: 6 in 65 Prooflike, 6 as 66 Prooflike, 1 as 66 Deep Prooflike, 1 in 67 Prooflike (11/15). NGC ID# 2BRA, PCGS# 710617

- 4477** 1872 Indian Octagonal 25 Cents, BG-791, R.3, MS66 NGC. A lovely lemon-gold example. The obverse is well struck. The reverse shows minor softness on a few berries and DOLLAR. The fields are flashy and the eye appeal is attractive. Among the many Period Two varieties issued by San Francisco jeweler Christopher Ferdinand Mohrig. NGC ID# 2BRB, PCGS# 10618

**1871 Octagonal Liberty Half Dollar**  
BG-912, MS67 Prooflike

- 4478** 1871 Liberty Octagonal 50 Cents, BG-912, R.3, MS67 Prooflike NGC. Die State II, rim cud from 6 to 7 o'clock on the reverse. An available Period Two half dollar by Frontier & Co. Gleaming prooflike fields deliver modest cameo contrast through bright yellow-gold coloration, while the central devices exhibit a pleasing strike. The availability of BG-912 declines sharply above MS64, and this Prooflike Superb Gem is the sole finest certified (1/16). NGC ID# 2BW8, PCGS# 710770

- 4479** 1872 Liberty Octagonal 50 Cents, BG-914, R.4, MS66 Prooflike NGC. The distinctive Frontier & Bellemere "Baby Head" variety with a snub nose on the portrait of Liberty. The DOL in DOLLAR is widely repunched north. The caramel-gold surfaces are flashy, crisply struck, and immaculate. Census: 2 in 66 Prooflike, 1 finer as MS67 without a Prooflike designation (11/15). NGC ID# 2BWA, PCGS# 710772

- 4480** 1875 Indian Octagonal 50 Cents, BG-946, R.4, MS66 Deep Mirror Prooflike NGC. The Indian has a surprised expression and his cheek displays a horizontal die line, two characteristics of this Christopher Ferdinand Mohrig variety. The prominently mirrored sun-gold surfaces are well struck and essentially as made. Census: 4 in 66 Deep Mirror Prooflike, none finer (1/16). NGC ID# 2BXE, PCGS# 910804 Base PCGS# 10804

**1875 Indian Octagonal Dollar**  
MS64 Prooflike, BG-1126

- 4481** 1875 Indian Octagonal 1 Dollar, BG-1126, R.5, MS64 Prooflike NGC. A lovely apricot-gold example. The flashy surfaces are problem-free. The reverse exhibits several wispy cracks. Well struck, without the often-seen softness on the central reverse. Period Two octagonal dollars are scarcer as a *Guide Book* type than their quarter and half dollar counterparts. Census: 2 in 64 Prooflike, 2 in 64 Deep Prooflike, 1 in 66 Deep Prooflike (11/15). NGC ID# 2C3U, PCGS# 710937

**COINS OF HAWAII**

- 4482** 1883 Hawaii Half Dollar MS62 PCGS. CAC. The planchets for the Hawaii half dollars (the Hapa Lua) were regular U.S. silver half dollar planchets, employed by the San Francisco Mint in 1883 to strike 87,755 pieces, which was nearly nine times the mintage of our domestic half dollars struck in Philadelphia for the year. This Hawaiian half shows a bit of pale gold toning on the neck of King Kalakaua I that extends to the date area, but the coin is otherwise brilliant on both sides with nice mint luster. A few small marks determine the grade. CAC endorsed, one of six such coins to receive the honor at MS62. NGC ID# 2C5B, PCGS# 10991

- 4483** 1882 Haiku Plantation One Rial Token XF45 PCGS. Medcalf TE-15. The design for the Haiku Plantation token is widely regarded as the most attractive within the 19th century Hawaii token series. The Haiku sugar cane plantation was located east of Wailuku, on the island of Maui. The rial (real) denomination was equivalent to one-eighth of a dollar. The present mahogany-brown example is inoffensively abraded and displays light, even wear. Listed on page 414 of the 2016 *Guide Book*. NGC ID# 2UBZ, PCGS# 600518

**PATTERNS**

**1854 Smaller Diameter Large Cent**  
Judd-161 Original, PR63 Brown

- 4484** 1854 One Cent, Judd-161 Original, Pollock-187, R.4 PR63 Brown PCGS. CAC. The design is similar to that of contemporary large cents except the diameter is close to a quarter dollar, there are no stars on the obverse, and the wreath is proportionately smaller. Struck in bronze with a plain edge. Each side appears to be even chocolate-brown over each side, but when closely examined slight light and darker streaks of brown are evident. Nice, glossy surfaces with only a few marks. Very nice for the grade. NGC ID# 29A6, PCGS# 11663

**1870 Standard Silver Half Dime  
PR65 Brown, Judd-811, Reeded Edge**

- 4485** 1870 Standard Silver Half Dime, Judd-811, Pollock-899, Low R.7, PR65 Brown NGC. The obverse has a seated figure of Liberty with right hand resting on a shield and Liberty Pole with Phrygian Cap behind. The reverse has 5 CENTS in the center, surrounded by a wreath of cotton and corn, with STANDARD at the top. Although Standard Silver patterns were produced dated 1869, the Judd-811 design was the first Half Dime entry in the series. Struck in copper with a reeded edge. A boldly struck and unmarked Gem with vivid rose-red, olive-gold, and gunmetal-gray toning. Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7964; Orlando Signature (Heritage, 1/2007), lot 1417. NGC ID# 26LF, PCGS# 61055

- 4486** 1870 Standard Silver Half Dollar, Judd-985, Pollock-1106, R.8 — Environmental Damage — PCGS Genuine. Proof, Unc Details. The obverse features a diademed bust of Liberty facing right, her hair tied in a bun. The reverse has the denomination 50 CENTS in an oak and laurel wreath with STANDARD SILVER above and the date 1870 below. Struck in aluminum with a reeded edge. This well-struck specimen is mostly untuned but has a granular gray area between 12 and 2 o'clock on the reverse. The STA in STANDARD also shows corrosion, and moderate verdigris is noted near the ST in STATES and the right-side star. PCGS# 61231

**Aluminum 1874 Indian Cent  
PR63, Judd-1347  
Extremely Rare**

- 4487** 1874 One Cent, Judd-1347, Pollock-1490, High R.7, PR63 PCGS Secure. Struck in aluminum with a plain edge from dies used for regular proof 1874 Indian Cent production. Three or so complete 1873 proof sets, from the cent to double eagle, were struck in aluminum for undocumented sale to well-connected dealers such as Captain John W. Haseltine. The present sharply struck specimen lacks any distinctive marks or spots but the field reflectivity is slightly subdued. A different example from the PR64 PCGS pattern that appeared in our 2003 Charlotte ANA Signature. PCGS# 61651

**1879 William Barber Dollar Design  
Judd-1617, Proof Details**

- 4488** 1879 Metric Dollar, Judd-1617, Pollock-1813, R.4 — Improperly Cleaned — NGC Details. Proof. William Barber's Metric dollar with Liberty wearing a coronet with a border of pearls. The reverse is elaborately laid out with a partial wreath of cotton and corn tied at the base, a ribbon, and with DEO EST GLORIA on a tablet above. Struck in gold or silver with a reeded edge. Numerous small contact marks are scattered across each side and the surfaces show the expected brightness of a coin that has been cleaned. NGC ID# 2AH8, PCGS# 61995

**GSA DOLLARS**

- 4489** 1883-CC GSA MS66+ NGC. VAM-4. Magnificent peach-gold, ocean-blue, and lavender-red toning graces the left obverse. The remainder of this high-grade Carson City Morgan dollar is practically brilliant. The black box and certificate of GSA issue accompany the lot. The certificate is missing its upper right serial number. NGC ID# 254H, PCGS# 518869 Base PCGS# 407144
- 4490** 1885-CC GSA MS64+ ★ NGC. VAM-2. Beautiful vertical bands of ruby-red, lemon-gold, ocean-blue, and tan-brown cross the left obverse. The remainder of this lustrous near-Gem is brilliant. A box and certificate of GSA issue are included, although the halves of the box are detached and the serial number has been clipped from the certificate. NGC ID# 254M, PCGS# 518875 Base PCGS# 407160
- 4491** 1885-CC GSA MS65 PCGS. VAM-2. Booming luster sweeps well struck and impressively smooth surfaces. Close to brilliant although wisps of tan toning are scattered. The 5 in the date is lightly repunched, as is the first C in the mintmark. A dash below the second 8 provides further VAM interest. NGC ID# 254M, PCGS# 518875 Base PCGS# 407160

**REDFIELD DOLLAR**

- 4492** 1890-S MS65 Paramount (MS65+ NGC). Ex: Redfield Collection. Freckles of autumn-gold and forest-green visit the peripheries of this crisply struck and lustrous Gem. The reverse is exceptionally smooth, and the obverse displays only wispy contact. La Vere Redfield was a hard money proponent who accumulated a vast holding of Uncirculated silver dollars during the 1950s. NGC ID# 255F, PCGS# 7202

## ERROR

### 1952-Dated Washington Quarter Struck on a Dime Planchet, MS64 Reverse Brockage

- 4493** 1952(-?) Washington Quarter — Struck on a Dime Planchet, Reverse Brockage — MS64 NGC. A remarkable double mint error. A silver dime planchet was struck between a Washington quarter obverse die and the obverse of a previously struck quarter. (That quarter was first struck normally, then struck against a fed quarter planchet, then struck against the present coin). Struck aligned with the collar at 7:30. On the obverse, the date is fully present, as is the portrait and the Motto. LIBERTY is partially absent. The reverse displays an incused, reversed, and spread image from a quarter obverse, including most of the portrait and GOD WE TRUST.

### Partially Perforated Clad Quarter Strip

- 4494** Clad Quarter Webbing and Strip. A lengthy clad quarter strip, 1470 mm x 325 mm, or 4' 10" x 1' 1". The leftmost 190 mm or 7 1/2" of the strip is perforated. The strip is folded over near its middle and displays minor abrasions. Ideal for an impressive and educational mint error exhibit.

## MINT SETS

- 4495** Uncertified 1948 Double Mint Set. An original double mint set housed in the cardboard holders of issue. The outer mailing envelope is absent. The inner envelope is present and has felt marker inscriptions on the reverse. The silver coins and nickels are lightly to moderately toned. The cents are red except for the two 1948-S examples, which display beautiful aquamarine and orange-red shades. The coins grade between MS63 and MS65. The four half dollars average MS64. No 1948-S half dollars were struck. (Total: 28 coins)
- 4496** Uncertified 1949 Double Mint Set. An original double mint set housed in the cardboard holders of issue. The outer mailing envelope is absent and displays pencil notations. The silver coins and nickels display moderate and attractive toning. The cents are red except for the two 1948-S examples, which are Red and Brown. The coins grade between MS63 and MS65. The four half dollars grade MS64 to MS65. No 1949-S half dollars were struck. (Total: 28 coins)

## HARD TIMES TOKEN

- 4497** 1837 Feuchtwanger Cent MS65 PCGS. Low-120, HT-268, Breen 6-I, R.1. A highly lustrous cent token with light gold toning and unmarked surfaces. Minor obverse laminations, as made, are noted near 10:30. A later die state with a small break inside the N in CENT. Exceptionally nice for the issue. Population: 12 in 65 (1 in 65+), 1 finer (1/16). NGC ID# 2CZP, PCGS# 20001

## PROOF INDIAN CENTS

- 7055 1866 PR64 Red and Brown PCGS.** PCGS Population (93/65). NGC Census: (19/44). Mintage: 725. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$650. NGC ID# 229J, PCGS# 2286
- 7056 1869 PR64 Brown PCGS.** PCGS Population (15/4). NGC Census: (9/8). Mintage: 600. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$460. NGC ID# 229M, PCGS# 2294
- 7057 1869 PR64 Red and Brown PCGS.** PCGS Population (87/47). NGC Census: (46/40). Mintage: 600. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$650. NGC ID# 229M, PCGS# 2295
- 7058 1872 PR64 Red and Brown PCGS.** PCGS Population (129/89). NGC Census: (61/55). Mintage: 950. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$650. NGC ID# 229R, PCGS# 2304

**7059 1873 Closed 3 PR63 Red PCGS.** PCGS Population (9/75). NGC Census: (2/17). Mintage: 1,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$460. NGC ID# 229S, PCGS# 2308

**7060 1879 PR65 Red PCGS.** PCGS Population (41/35). NGC Census: (16/21). Mintage: 3,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$910. NGC ID# 229Y, PCGS# 2326

**7061 1880 PR64 Red Cameo PCGS.** PCGS Population (2/13). NGC Census: (4/2). NGC ID# 229Z, PCGS# 82329

**7062 1881 PR65 Red and Brown PCGS.** PCGS Population (94/40). NGC Census: (75/46). Mintage: 3,575. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$585. NGC ID# 22A2, PCGS# 2331

**7063 1884 PR65 Red and Brown PCGS. CAC.** PCGS Population (129/69). NGC Census: (94/68). Mintage: 3,942. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$510. NGC ID# 22A5, PCGS# 2340

**7064 1884 PR66 Red and Brown NGC.** NGC Census: (55/13). PCGS Population (55/16). Mintage: 3,942. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$825. NGC ID# 22A5, PCGS# 2340

**7065 1885 PR65 Red and Brown PCGS.** PCGS Population (110/71). NGC Census: (62/61). Mintage: 3,790. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$500. NGC ID# 22A6, PCGS# 2343

**7066 1901 PR65 Red and Brown PCGS. CAC.** PCGS Population (78/52). NGC Census: (64/31). Mintage: 1,985. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR65: \$440. NGC ID# 22AP, PCGS# 2391

## LINCOLN CENTS

**7067 1909-S VDB Fine 12 PCGS.** PCGS Population (538/9320). NGC Census: (599/5142). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$600. NGC ID# BYKW, PCGS# 2426

**7068 1909-S VDB AU53 PCGS.** PCGS Population (288/2696). NGC Census: (157/1948). Mintage: 484,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$975. NGC ID# BYKW, PCGS# 2426

**7069 1909-S/S S Over Horizontal S, FS-1502, MS66 Red and Brown NGC.** (FS-012.3). NGC Census: (0/0). PCGS Population (0/0). PCGS# 37644

**7070 1909-S/S S Over Horizontal S, FS-1502, MS65 Red NGC.** (FS-012.3). NGC Census: (0/0). PCGS Population (4/1). NGC ID# 22B4, PCGS# 37645

**7071 1910-S MS65 Red and Brown PCGS. CAC.** PCGS Population (221/7). NGC Census: (123/14). Mintage: 6,045,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$380. NGC ID# 22B5, PCGS# 2439

**7072 1910-S MS65 Red PCGS.** PCGS Population (324/83). NGC Census: (127/47). Mintage: 6,045,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$665. NGC ID# 22B6, PCGS# 2440

**7073 1910-S MS66 Red NGC.** NGC Census: (42/5). PCGS Population (81/3). Mintage: 6,045,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,725. NGC ID# 22B6, PCGS# 2440

**7074 1911-D MS65 Red PCGS.** PCGS Population (164/31). NGC Census: (28/3). Mintage: 12,672,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,025. NGC ID# 22B8, PCGS# 2446

**7075 1912 MS66 Red PCGS.** PCGS Population (88/9). NGC Census: (11/1). Mintage: 68,153,056. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$975. NGC ID# 22BA, PCGS# 2452

**7076 1912-D MS65 Red and Brown NGC.** NGC Census: (28/2). PCGS Population (16/0). Mintage: 10,411,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$610. NGC ID# 22BB, PCGS# 2454

**7077 1912-S MS64 Red NGC.** NGC Census: (43/25). PCGS Population (173/78). Mintage: 4,431,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$835. NGC ID# 22BC, PCGS# 2458

**7078 1915-D MS65 Red PCGS.** PCGS Population (136/35). NGC Census: (46/8). Mintage: 22,050,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,050. NGC ID# 22BL, PCGS# 2482

**7079 1916-S MS65 Red and Brown PCGS.** PCGS Population (41/0). NGC Census: (53/3). Mintage: 22,510,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$900. NGC ID# 22BR, PCGS# 2493

**7080 1917 MS66 Red PCGS.** PCGS Population (130/18). NGC Census: (25/1). Mintage: 196,429,792. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,050. NGC ID# 22BS, PCGS# 2497

**7081 1918 MS66 Red PCGS.** PCGS Population (121/27). NGC Census: (15/4). Mintage: 288,104,640. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$975. NGC ID# 22BV, PCGS# 2506

**7082 1921-S MS64 Red and Brown PCGS. CAC.** PCGS Population (263/41). NGC Census: (104/39). Mintage: 15,274,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$500. NGC ID# 22C7, PCGS# 2535

**7083 1921-S MS65 Red and Brown NGC.** NGC Census: (39/0). PCGS Population (41/0). Mintage: 15,274,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,025. NGC ID# 22C7, PCGS# 2535

**7084 1922 No D, Strong Reverse Fine 12 NGC.** NGC Census: (0/0). PCGS Population (330/3964). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$575. NGC ID# 22C9, PCGS# 3285

**7085 1922 No D, Strong Reverse Fine 12 PCGS.** PCGS Population (330/3964). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$575. NGC ID# 22C9, PCGS# 3285

**7086 1922 No D, Strong Reverse VF20 PCGS. CAC.** PCGS Population (614/2868). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$760. NGC ID# 22C9, PCGS# 3285

**7087 1923-S MS63 Red and Brown PCGS. CAC.** PCGS Population (114/170). NGC Census: (47/76). Mintage: 8,700,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$585. NGC ID# 22CB, PCGS# 2547

**7088 1923-S MS64 Red and Brown PCGS.** PCGS Population (150/20). NGC Census: (57/19). Mintage: 8,700,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$1,075. NGC ID# 22CB, PCGS# 2547

**7089 1924-D MS64 Red and Brown PCGS.** PCGS Population (181/32). NGC Census: (112/71). Mintage: 2,520,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$765. NGC ID# 22CD, PCGS# 2553

**7090 1924-S MS64 Red and Brown PCGS.** PCGS Population (201/26). NGC Census: (68/14). Mintage: 11,696,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$815. NGC ID# 22CE, PCGS# 2556

**7091 1925-D MS65 Red and Brown PCGS. CAC.** PCGS Population (37/0). NGC Census: (38/0). Mintage: 22,580,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$585. NGC ID# 22CG, PCGS# 2562

**7092 1925-S MS64 Red and Brown PCGS Secure.** PCGS Population (159/9). NGC Census: (60/10). Mintage: 26,380,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$815. NGC ID# 22CH, PCGS# 2565

**7093 1926 MS67 Red PCGS.** PCGS Population (108/0). NGC Census: (24/0). Mintage: 157,088,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$600. NGC ID# 22CJ, PCGS# 2569

**7094 1926-D MS64 Red PCGS.** PCGS Population (144/56). NGC Census: (32/5). Mintage: 28,020,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$685. NGC ID# 22CK, PCGS# 2572

**7095 1928-D MS65 Red PCGS.** PCGS Population (84/14). NGC Census: (32/3). Mintage: 31,170,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$925. NGC ID# 22CS, PCGS# 2590

**7096 1930 MS67 Red PCGS.** PCGS Population (99/1). NGC Census: (256/0). Mintage: 157,415,008. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$400. NGC ID# 22CX, PCGS# 2605

**7097 1930 MS67 Red PCGS. CAC.** PCGS Population (98/1). NGC Census: (256/0). Mintage: 157,415,008. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$400. NGC ID# 22CX, PCGS# 2605

**7098 1931-D MS65 Red NGC.** NGC Census: (47/8). PCGS Population (142/38). Mintage: 4,480,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$765. NGC ID# 22D3, PCGS# 2617

**7099 1932-D MS66 Red PCGS.** PCGS Population (207/15). NGC Census: (78/13). Mintage: 10,500,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$550. NGC ID# 22D6, PCGS# 2626

**7100 1935-D MS67 Red PCGS.** PCGS Population (79/1). NGC Census: (187/0). Mintage: 47,000,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$280. NGC ID# 86BY, PCGS# 2644

**7101 1936-S MS67 Red PCGS. Ex: Jack Lee.** PCGS Population (56/0). NGC Census: (114/0). Mintage: 29,130,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$900. NGC ID# 22DG, PCGS# 2656

**7102 1944-D/S MS64 Red PCGS. CAC.** PCGS Population (56/48). NGC Census: (2/5). Mintage: 430,577,984. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$825. NGC ID# 2734, PCGS# 2728

**7103 1945 MS67 Red PCGS.** PCGS Population (83/0). NGC Census: (232/1). Mintage: 1,040,515,008. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$280. NGC ID# 22EG, PCGS# 2734

**7104 1945 MS67 Red PCGS.** PCGS Population (83/0). NGC Census: (232/1). Mintage: 1,040,515,008. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$280. NGC ID# 22EG, PCGS# 2734

**7105 1945 MS67 Red PCGS.** PCGS Population (83/0). NGC Census: (232/1). Mintage: 1,040,515,008. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$280. NGC ID# 22EG, PCGS# 2734

**7106 1945 MS67 Red PCGS.** PCGS Population (83/0). NGC Census: (232/1). Mintage: 1,040,515,008. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$280. NGC ID# 22EG, PCGS# 2734

**7107 1946 MS67 Red PCGS.** PCGS Population (27/0). NGC Census: (42/0). Mintage: 991,654,976. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$925. NGC ID# 22EK, PCGS# 2743

**7108 1948-D MS67 Red PCGS.** PCGS Population (59/0). NGC Census: (75/0). Mintage: 172,637,504. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$420. NGC ID# 22ET, PCGS# 2764

**7109 1948-D MS67 Red PCGS.** PCGS Population (59/0). NGC Census: (75/0). Mintage: 172,637,504. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$420. NGC ID# 22ET, PCGS# 2764

**7110 1950 MS67 Red NGC. CAC.** NGC Census: (71/0). PCGS Population (36/0). Mintage: 272,686,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$785. NGC ID# 22LA, PCGS# 2779

**7111 1954-D MS67 Red PCGS. Ex: The Connelly Collection.** PCGS Population (68/0). NGC Census: (412/0). Mintage: 251,552,496. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$280. NGC ID# 22FD, PCGS# 2818

**7112 1955 Doubled Die Obverse — Scratch — PCGS Genuine. XF Details.** NGC Census: (0/0). PCGS Population (22/3461). Mintage: 5,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,300.

**7113 1960 Large Date MS67 Red PCGS.** PCGS Population (13/0). NGC Census: (23/0). Mintage: 588,096,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$850. NGC ID# 22FW, PCGS# 2860

**7114 1960-D/D Small Over Large Date MS66 Red PCGS.** PCGS Population (21/0). NGC Census: (0/0). NGC ID# 22FX, PCGS# 82869

**7115 1976-D MS67 Red PCGS.** PCGS Population (15/0). NGC Census: (2/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$260. NGC ID# 22H8, PCGS# 2985

**7116 1977-D MS67 Red PCGS.** PCGS Population (20/0). NGC Census: (0/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$525. NGC ID# 22HA, PCGS# 2987

**7117 1988-D MS68 Red PCGS.** PCGS Population (25/1). NGC Census: (0/0). NGC ID# 22JA, PCGS# 3105

## PROOF LINCOLN CENTS

**7118 1913 PR64 Brown PCGS.** PCGS Population (44/39). NGC Census: (31/25). Mintage: 2,983. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$500. NGC ID# 22KW, PCGS# 3315

**7119 1936 Type One — Satin Finish PR64 Red and Brown PCGS.** PCGS Population (93/38). NGC Census: (41/38). Mintage: 5,569. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$480. NGC ID# 22L2, PCGS# 3331

**7120 1941 PR66 Red PCGS.** PCGS Population (127/5). NGC Census: (0/0). Mintage: 21,100. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR66: \$420. NGC ID# 22LH, PCGS# 3350

**7121 1956 PR68 Red Cameo PCGS.** PCGS Population (29/0). NGC Census: (60/4). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR68: \$380. NGC ID# 7VBL, PCGS# 83377

**7122 1960 Small Date PR68 Red Deep Cameo PCGS.** PCGS Population (41/0). NGC Census: (12/3). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR68: \$1,125. NGC ID# 22LL, PCGS# 93392

**7123 1961 PR69 Cameo PCGS.** PCGS Population (16/0). NGC Census: (66/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR69: \$150. NGC ID# 22LN, PCGS# 83395

**7124 1962 PR69 Red Deep Cameo PCGS.** PCGS Population (35/0). NGC Census: (39/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR69: \$650. NGC ID# 22LP, PCGS# 93398

**7125 1970-S Large Date PR69 Deep Cameo PCGS.** PCGS Population (50/0). NGC Census: (14/0). Numismedia Wsl. Price for problem free NGC/PCGS coin in PR69: \$500. NGC ID# 37FX, PCGS# 93430

**7126 1971-S Doubled Die Obverse, FS-101, PR67 Red Cameo PCGS.** (FS-032). PCGS Population (28/10). NGC Census: (13/8). NGC ID# 22M3, PCGS# 83533 Base PCGS# 83548

## TWO CENT PIECES

**7127 1864 Small Motto AU50 PCGS.** PCGS Population (32/232). NGC Census: (8/271). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$750. NGC ID# 3XHD, PCGS# 3579

**7128 1864 Small Motto AU55 PCGS.** PCGS Population (30/186). NGC Census: (23/241). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$850. NGC ID# 3XHD, PCGS# 3579

**7129 1864 Large Motto MS65 Red and Brown NGC.** CAC. NGC Census: (593/101). PCGS Population (342/18). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$480. NGC ID# 22N9, PCGS# 3577

**7130 1864 Large Motto MS65 Red NGC.** NGC Census: (122/44). PCGS Population (261/60). Mintage: 19,847,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$1,275. NGC ID# 22N9, PCGS# 3578

**7131 1865 MS65 Red and Brown PCGS.** CAC. PCGS Population (291/30). NGC Census: (352/73). Mintage: 13,640,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$500. NGC ID# 22NA, PCGS# 3583

**7132 1866 MS65 Red and Brown PCGS.** CAC. PCGS Population (66/13). NGC Census: (71/13). Mintage: 3,177,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$635. NGC ID# 3XHP, PCGS# 3589

**7133 1867 MS65 Red and Brown NGC.** NGC Census: (83/17). PCGS Population (67/10). Mintage: 2,938,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$650. NGC ID# 22NB, PCGS# 3592

**7134 1871 MS64 Red and Brown PCGS.** CAC. PCGS Population (133/44). NGC Census: (64/63). Mintage: 721,250. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$725. NGC ID# 22NF, PCGS# 3610

## PROOF TWO CENT PIECES

**7135 1867 PR64 Red and Brown PCGS.** PCGS Population (89/59). NGC Census: (41/60). Mintage: 625. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$760. NGC ID# 274W, PCGS# 3634

**7136 1867 PR64 Red and Brown NGC.** NGC Census: (41/60). PCGS Population (89/59). Mintage: 625. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$760. NGC ID# 274W, PCGS# 3634

**7137 1872 PR63 Brown PCGS.** PCGS Population (26/50). NGC Census: (19/75). Mintage: 950. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$600. NGC ID# 2752, PCGS# 3648

## THREE CENT SILVER

**7138 1851 MS65 PCGS.** PCGS Population (196/145). NGC Census: (183/86). Mintage: 5,447,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$700. NGC ID# 22YX, PCGS# 3664

**7139 1851 MS65 PCGS.** CAC. PCGS Population (196/145). NGC Census: (183/86). Mintage: 5,447,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$700. NGC ID# 22YX, PCGS# 3664

**7140 1861 MS65 NGC.** NGC Census: (117/108). PCGS Population (108/111). Mintage: 497,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$850. NGC ID# 22ZA, PCGS# 3679

## PROOF THREE CENT SILVER

**7141 1872 PR65 Cameo NGC.** NGC Census: (5/6). PCGS Population (9/11). NGC ID# 27CH, PCGS# 83723

## THREE CENT NICKELS

**7142 1865 MS66 PCGS.** CAC. PCGS Population (42/2). NGC Census: (21/2). Mintage: 11,382,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$1,000. NGC ID# 22NJ, PCGS# 3731

**7143 1867 MS65 PCGS.** CAC. PCGS Population (51/13). NGC Census: (36/12). Mintage: 3,915,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$540. NGC ID# 26K7, PCGS# 3733

**7144 1871 MS65 PCGS.** PCGS Population (40/43). NGC Census: (43/19). Mintage: 603,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$710. NGC ID# 22NN, PCGS# 3737

**7145 1880 MS65 NGC.** CAC. NGC Census: (45/45). PCGS Population (45/96). Mintage: 21,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$735. NGC ID# 275C, PCGS# 3748

☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐ 1 ☐ 2 ☐ 3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

**(Signature required)** Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment	Current Bid	Bid Increment
< \$10	\$1	\$10,000 - \$19,999	\$1,000

## 7 Easy Ways to Bid

## 1 Internet

Simply go to [www.pearsoncmg.com](http://www.pearsoncmg.com)

Simply go to [www.HA.com](http://www.HA.com), find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Proxy bidding ends one hour prior to the session start time. Live Proxy bidding continues through the session.

## 2 eMail

You can also

You can also email your bids to us at [Bid@HA.com](mailto:Bid@HA.com). List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

### 3 Postal Mail

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

## 4 In Person

Come to the auction and view the lots in person and bid live on the floor.

**5 FAX**  
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

## 6 Live By Phone

Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

**7 Live using HERITAGELive!®**  
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit [HA.com/Live](http://HA.com/Live) and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

*Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.*

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
- Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
- Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
- Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
- Twenty-two percent (22%) on Wine Auction lots;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments (see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://HA.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid .....	Bid Increment
< \$10.....	\$1
\$10 - \$49.....	\$2
\$50 - \$99.....	\$5
\$100 - \$199.....	\$10
\$200 - \$499.....	\$20
\$500 - \$999.....	\$50
\$1,000 - \$1,999.....	\$100
\$2,000 - \$4,999.....	\$200
\$5,000 - \$9,999.....	\$500

Current Bid .....	Bid Increment
\$10,000 - \$19,999 .....	\$1,000
\$20,000 - \$49,999 .....	\$2,000
\$50,000 - \$99,999 .....	\$5,000
\$100,000 - \$199,999 .....	\$10,000
\$200,000 - \$499,999 .....	\$20,000
\$500,000 - \$999,999 .....	\$50,000
\$1,000,000 - \$4,999,999 ....	\$100,000
\$5,000,000 - \$9,999,999 ....	\$250,000
>= \$10,000,000 .....	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A

REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In

# Terms and Conditions of Auction

addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

- 36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment, or afford them the capacity to void their purchase or payment. For further information, please contact Ron Brackemyre at 800-872-6467 ext. 1312.

- 36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

- 36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

## **Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

## **Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or consequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

# Terms and Conditions of Auction

## Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature- Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated

collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foose 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards or receive a guaranty. A registered bidder may inquire whether a lot is subject to an advance, a reserve, or a guaranty. Auctioneer has made advances to various consignors in this sale and a guaranty. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 3-23-2015
